ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Half-penny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

APPLIANCES.

TWO well-made breeding cages, loose fronts, 3s. 6d. each, including fittings.—Allison, Isfield, Sussex.

OUTDOOR Aviaries, bird houses.—Sussex Portable Building Company, 138, Lewes Road, Brighton.

LAKE & SON,
Bird Breeders, Practical Cage Makers,
132a, Pottergate Street, Norwich.
Half-penny stamp for Illustrated List.

W. LINSEY, Cambridge, Cage Maker.
These famous cages are not offered at ridiculous prices, try one and compare with other makers; single, 4s. 6d., 6s.; doubles, 7s. 6d., 8s. 6d., 10s.; send for list.—Cherryhinton Road, Cambridge.

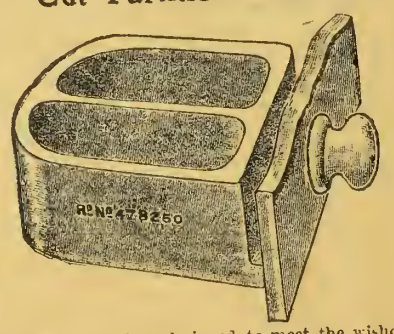
GLASS. GLASS.
Drinkers and feeders, all patterns, in opal and crystal glass; also blue tops and fish globes, aquariums and stands; illustrated list sent free for ½d. stamp.—Dean's Glass Works, Hook Street, Liverpool.

BASKETS.
Exhibitors of cage birds should send for our list of exhibition baskets, lightest, strongest, and cheapest on the market; awarded gold medal, Crystal Palace, 1903, 1904, 1905.—Gilbert, Arcade, Coventry. x263

PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex"
Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

MY SELF-ACTING SPRING NET TRAPS
catch birds of every description without any attention, price 1s. 6d.; larger size 2s.; carriage paid. I have received hundreds of testimonials stating they are worth double the money of any trap advertised. Read two, and beware of cheaper imitations that are not worth the cost of carriage. "Sir.—I received the net trap; it is honestly worth a dozen of some of the nets advertised. I tried it this afternoon, and caught more birds in two hours than I have caught in other net traps in two months.—G. Matthews, 37, Myrtle Street, Stockport." "Sir,—Trap arrived safe. It is far superior to all others. I have to-day caught fifteen Linnets, six Redpolls, four Chaffinches, three Greenfinches. J. Scragg, The Brewery, Armitage Road, Rugeley." Patent self-setting trap, Patent 23,927, warranted to catch birds and re-set without attention, 1s. 6d.; call cages, 4d. each; trap cages, single 5d., double 8d., treble 1s. 3d.; birdlime, best and strongest in England, 1s. 6d. lb., 10d. ½lb.; send for sample tin, 3d. post free. Loose netting made from the best thread obtainable, ¾-in. mesh, 6-ft. wide, 3d. yard, 9-ft. wide, 4d.; Lark netting, 1½-in. mesh, 5 yards wide, 6d. yard, post free.—Henry Morris, The Aviaries, Cape Hill, Birmingham.

PINE BOARDS, APPLIANCES, etc.
Pine Boards, planed both sides, 11 x ⅜ 2d. foot, 9 x ⅜ 1½d. foot, 7 x ⅜ 1¼d. foot; Birch Rounds for perching, 20 feet 6d.; Breeding Cages, made of best pine loose fronts, drawn battens, etc., single 2s. 9d., double 6s. 6d.; every description of cages, metal and wirework, made to order; sanitary nest pans, 1s. 6d. and 2s. dozen; felt linings, 10d. dozen; loose fronts in dozen lots, 4½d. foot. State wants. List, stamp. Exchange in Canaries entertained.—Bird Stores, Medlock Street, Hime, Manchester.

JOHN A. REECE, CAGE MAKER.
Established 31 years, awarded 28 medals and other honours. Special line breeders, best value in the market, only want to be seen, send for sample and compare the value, 18in. 2s. 9d., 20in. 3s. 6d., 30in., double, 5s. 6d., 36in., double, 6s. 6d., fully fitted with loose wood and wire divisions, etc.; slope top box cage, fully fitted, 10in. 14s., 12in. 17s., 14in. 19s. per dozen; exceptional value, other goods equally cheap; illustrated list, 1d. stamp.—Jockey Wire Works, Colston Street Yard, Bristol.

CAGE FRONTS.
Improved, made with best quality mild steel, punched bars, 12 by 12, 4d., 3s. 6d. doz.; 14 by 12, 5d., 4s. doz.; 16 by 12, 6d., 5s. doz.; 18 by 12. 7d., 6s. doz.; 20 by 12, 8d., 7s. doz.; 22 by 14, 9d., 8s. doz.; 24 by 12, 9d., 8s. doz.; acknowledged best on the market; any size made; hundreds of testimonials; punched bars, 40-in. 1s. dozen; 9s. gross; grand straight cage wire, 4d. lb., 7lb. 2s., 3s. 10d. stone; best finished enamelled metal seed boxes, 3in., 3d. each, 2s. 6d. doz.; 4in., 4d. each, 3s. doz.; large bird baths, galvanized tops, enamelled bottoms, strong, 1s. 2d. each; flat side hat glasses, 10d. doz.; bird sprays, enamelled, post paid, 4d.; anything and everything.—Fraser, Specialist, 161, Cross Lane, Salford.

Gifts Gifts Gifts Gifts

For all of the 40,000 or more readers of "Cage Birds."

TO commemorate as usual the Birthday Number of "Cage Birds," and to give those fanciers who did not see our Christmas advertisement in good time, an opportunity of having the Christmas advantages, we shall during January repeat the benefit to all readers of "Cage Birds" of having the Gold Medal Coronation Grit (with which is incorporated the White Princes Grit) delivered at the uniform rate of 6/- per cwt. all over the United Kingdom, and in addition we shall also send with it a supply of Cuttlefish Bone, and include various little items necessary for the bird room in the way of glassware and white-ware, finger feeders, nest eggs, etc., in each package. These were much appreciated last year when we gave the Free Gifts as intimated in the Birthday Number then.

The Celebrated Gold Medal Coronation GRIT. The Pick of the World's Best.

SOLE MANUFACTURERS:

DOBBIE & CO., Waverley Works and Mills, LEITH, N.B.

FOR ALL VARIETIES OF THE FEATHERED CREATION.

The Gold Medal Coronation Grit, with which is incorporated **The Princes Grit,** special combination and quality of highest utility and service to breeders. Hundreds of testimonials. To enable fanciers or readers of CAGE BIRDS to judge of its excellence, on receipt of name and address and 1d. stamp to pay postage, we will send gratis samples; 10,000 again ready. Kindly state variety the Grit is for. Prices per parcel post: 4 lb. sample, **9d.**; 7 lb., **1/-**; 10 lb. sample, **1/6.**

Cuttlefish Bone is included in each Package.

Or carriage paid to Districts south of line drawn between London and Bristol .. — Per cwt. 8/6 ½ cwt. 4/9

Whole quality Cuttlefish Bone, per parcels post, **1/-** lb.

SILVER SAND.

To fanciers and breeders of Roller Canaries who adopt silver sand for the bottom of their cages, we are in the best possible position to supply their wants. Our "Snowdrop" brand of silver sand is known all over the kingdom. It is granular, superlatively white, and clean. The prices are the same as our Gold Medal Coronation Grit. To those who keep their feathered pets in cages it is indispensible, the grit being thus saved and served to the birds either in a corner of the cage or in a small feeder, or in the seed box. Much of the grit now used is spread lavishly and indiscriminately in the bottom of the cage, and the loss through waste in the cleaning of cages daily or periodically is increased. Samples can be had of this speciality the same as for the samples enumerated above.

LAVESINE, The New Feather Soap.

Most effective in use, thoroughly cleansing the plumage, leaving it soft and silky, with the desired sheen necessary to win. Sample tablet post free 4½d., two tablets for 6d., and four for 10d. Try this and you will never use any other medium.

WE ARE THE SOLE VENDORS OF

PAULL'S ANTI-REDMITE BRACKETS & the IDEAL & WAVERLEY PERCHES for Cage Birds.

Breeders and Fanciers should not delay to order these Perches and Brackets at once.

Thousands were sold in the first month in which they were put forward to fanciers. Full particulars are given on pages 52 and 53 of the issue of CAGE BIRDS of July 28th, and we shall be glad to send a large four-page circular to all inquiring concerning these. The protected nest hanger is specially valuable for breeding cages.

We give below a copy of the first criticism and testimonial received.

Mr. G. W. PROVART, 87a, Churchfield Road, Acton, London, W., writes:

"Gentlemen,—Thanks for the brackets and perches which duly arrived. In my opinion the 'Paull-Dobbie' specialities have come to satisfy a long-felt want. As a fancier and canary breeder of many years I think that, apart from the unique advantages of the cup carrier, the brackets **are worth more** than their small cost **as mere perch holders,** as it is so easy and convenient to lift them out for cleaning. I find that what I imagined would be a weak point is quite otherwise. I refer to the clamping plate, which I thought would work loose, but instead I find that it holds like 'grim death' in any position on wires, and yet is easily and instantly detachable, a most desirable quality. The perches have also strongly appealed to me, although not now an exhibitor, as having essential advantages for exhibition cages, especially the 'Ideal.' In conclusion I may say **that the combination is an all-round commonsense one,** well thought out, and **eminently practical,** and one that has certainly come to stay."

Front Brackets, No 1, for wire-fronted cage, and No. 2 for wooden back of breeding cage, or two Front No. 1 Brackets for all wire cages .. .. **6d.** per pair.
Wood liner with two screws for wood back cages .. .. **1d.** each.

Brackets, No. 3, with double clip as used for spring perch, for wire front, or with plate for fixing on wood back .. .. **4d.** each.
Ditto, extra strong for long perches .. .. **6d.** each.
Protected Nest-hanger, No. 4 .. .. **6d.** each.

"IDEAL" and "WAVERLEY" PERCHES in any length up to 43 in. from **1d.** to **6d.** each. All post paid.

The Red-Mite Pest must be dealt with and exterminated. Carriage paid on lots of one dozen and upwards, any length or assorted. Printed directions for fixing sent with each lot. **Fanciers have the remedy now in their own hands to adopt and use to this end.**

MEDICINES.

PARROTS going thin, require a dose of Welham's Parrot Tonic, a few drops in water works wonders.—Welham, Peckham.

"DISEASES of Cage Birds," by Dr. Greene, 1s, by post 1s. 2d.—L. Upcott Gill, Bazaar Buildings, London, W.C.

MEDICINES.—Canaries off song require a dose of Welham's wonderful Canarydine Tonic, the grandest reviver known.—Welham and Co., Bird Specialists, Peckham, London.

DIARRHŒA, inflammation cure, used by most of the leading exhibitors, will cure any bowel trouble; I have cured when all others have failed. I hold proofs of same; 7d. per ounce, free; advice given.—Mather, 65, Albert Road, Widnes.

PANNASSINA.

A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song, and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 1d., 6d., and 1s. packets. Write for free sample enclosing one penny stamp for postage. Purchasing agents wanted.—W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E.

MEDICINES—continued.

"ASMAKURA." "ASMAKURA."
Best cure for asthma, wheezing, and lung troubles, a fine tonic; bottles, 6d.—Morrison, Peel Road, Woodford, Essex.

FOUND AT LAST. BRONCHORINE.

Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.

"66, Moston Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorine. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. bottle.—Crawley, 112, Radford Boulevard, Nottingham.

THE HYGIENE OF BIRD KEEPING.

By W. GEO. CRESWELL, M.D., L.R.C.P., F.Z.S.
Price 1/1, post free from CAGE BIRDS Offices,
154, FLEET STREET, LONDON, E.C.
OPINIONS OF THE PRESS.

LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."

COUNTRY LIFE: ". . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

BRITISH BIRDS.

Hardbills.

FOUR cock brown Linnets; fit for muling, 2s. each.—Holloway, Catteshall Manor, Godalming.

All these birds are carefully selected by myself, and are sent on three days' approval, cash or deposit. All kinds of British kept in stock. State wants; postcard before birds. Buy from the catcher. For best selected birds read these:—"Walmsley Town Gate, Preston. Sir,—Received birds safely. Well satisfied with all four of them. Will write if require any more. I have sent to CAGE BIRDS to forward cash.—From Edmund Oliver." "Culbert Terrace, Blackhill. Sir,—Received Goldfinches safely in the best of order after their long journey. They are marvels at the price. I have recommended you to all bird fanciers round here. Thanking you again for your honest dealing."—Matthews, Birdcatcher, 44, George Street, Hyde, Cheshire.

Hawfinches! Hawfinches!! Hawfinches!!!

ENOCH POWERS

Has just received a large consignment of all sorts of Siberian birds. Amongst them I have ten Siberian Hawfinches, which are large birds. Write for price. I have one splendid Hawfinch, which I will show against any other Hawfinch for £10 aside in England, price 50s. I have a splendid lot of Hen Canaries at 18s. a dozen. I have some grand German Rollers, at 6s. each; splendid Hartz hens for breeding purposes, 16s. dozen. Also I have 100 Rollers, trained with the Bohemian organs, 8s. each. Belgium cock Canaries, 4s. 6d. each; long Belgium hens, £1; a dozen Pekin Nightingales, 9s. dozen; or 1s. each, in full song. I have two large Siberian Cornbuntings, 4s. each; or 6s. the two. Hundreds of all other birds kept in stock. I have some splendid Rose Cockatoos, 7s. each, which other common bird dealers sell for Red and Grey Parrots. —E. Power.—I am the sole importer of the Whistling Bullfinches; whistle magnificent tunes. Write for price. All birds pipe two tunes. Wanted, 2,000 Norwich and Yorkshire Canaries; the best price given. Note the address—

E. POWERS,
91, Sclater Street, Shoreditch, London, E.

FOR THE HIGHEST

Quality at lowest prices, you must give me a trial. Grand large Worcestershire cock Goldfinches, in perfect health and feather, 2s. 6d. each, three 6s., six 11s., or 20s. dozen; specially selected, very large cocks, for show or muling, and warranted in free song, 3s. and 4s. each; hen Goldfinches 1s. each, three 2s. 6d.; grand large cock brown Linnets in pink of health and condition, and all warranted red-breasted, 1s. each, three 2s., six, 3s. 6d., or 6s. dozen; few extra special cocks, warranted in song 1s. 6d. each, three 3s.; splendid cock Bullfinches, in perfect condition, 1s. 6d. and 2s. each; hen Bullfinches 1s. each; few extra large rich-coloured hens, 1s. 6d. each; cock Yellowhammers 1s. each; cock Chaffinches 9d. each, three 1s. 6d., six 2s. 6d.; exhibition specimens 1s. each; German cock Bullfinches 3s. each; German cock Goldfinches, in full song, 4s. each; cock Bramblefinches 9d. each, three 1s. 6d., six 2s. 6d., or 4s. 6d. dozen; exhibition specimens 1s. each; cock Goldfinch Mules, in song 6s. each; one extra loud, used to catching, pure song, 10s.; cock Greenfinch Mules 4s. and 5s. each. Three male Ferrets, guaranteed absolutely best workers alive, and thoroughly quiet to handle, 6s. each, 15s. the three; round or square-topped call cages, 3d. each, 2s. 6d. dozen; single trap cages 6d. each; double ditto, 10d. and 1s. each; treble ditto, 1s. 3d. each; all with separate compartment for call bird. Patent self-setting and self-acting trap cages, catch birds and immediately reset without any attention whatever, 1s. 6d. each; self-acting spring net traps, 24 inches long, 1s. each; 18 inches long, 9d. each; these net traps are entirely different to any others on the market, they have entirely superseded the old-fashioned ones and will catch and hold anything from a Wren to a Rook; every description of cage in stock from 3d. to £5. Dealers should send stamp for wholesale list, prices will astonish you. Real Japanese bird lime, absolutely strongest ever made, does not freeze, guaranteed to hold a Hawk, and will hold birds even in the rain, 6d. ½ lb., 10d. ½ lb., 1s. 6d. lb., all post free, full weight guaranteed; clap nets, 3 yards long, 4s., 4 yards 5s., 5 yards 6s., 6 yards 7s., 7 yards 8s., 8 yards 9s. 9 yards 10s., 10 yards 11s. per pair, all 4 feet high, and sent complete, with peg poles, lines, etc, all ready for immediate setting. Loose netting, ¾ inch mesh, made from genuine thread, 6 feet deep, 3d. yard, 8 feet deep, 4d. yard, 12 feet deep, 5d. yard, all post free; this netting is made specially for me for bird nettiug, and must not be confused with the thick American cotton netting now being sold as bird netting; pure hemp pull lines, 65 yards long, 1s. 4d. each, post free; send stamp for full pprinted list of all catchers' appliances with sample of netting, for comparison with others. Thousands of testimonials published in this paper, all speaking in highest terms of praise of the quality of my birds and goods. Please note everything I sell is sent on approval at my risk on receipt of cash, or deposit system of CAGE BIRDS. I make no absurd conditions or restrictions, but advertise my conditions in plain language. I was first advertiser in England to send all wild birds on approval, and am still the only one to do so all the year round. (Will copyists please note this.) All birds are guaranteed properly staged, steady, and well on hard seed, not sent straight from the nets to die as soon as you get them. I have 10 years' reputation at stake with everything I send out. Personal inspection invited. Seven minutes walk from New Street Station; trams pass the door.

W. Gore, 219, Sherlock St., Birmingham.

Kindly read few of the following testimonials for proof of the quality of birds we send out:—"Tilbury, Essex. Dec. 20th. Received birds all right; much thanks.—Yours, Mr. Howland." "Glenhurst, Poplar Avenue, Edgbaston. Dec. 15th. Dear Sir,—I purchased two birds from you; if you have another first-class bird, kindly save it for me.—Yours, J. Whitworth." "Fair Hill, Haltwhistle. Dec 19th. Dear Sir,—We recommended Joe Henderson to give you trial for Goldfinches, and you sent splendid birds for money.—Yours, J. Stokes." "Beccles Road, Hales. Dec. 17th. Dear Sir,—Kindly send 10 yds. netting. I am sending again because you have acted straightforward, and everything we have bought from you has given every satisfaction.—Yours, H. Betts." "105, West Stirling Street, Alva, N.B. Dec. 17th. We received Goldfinch all right, and were very much pleased with them.—Yours, J. Johnstone." "45, Hamilton Street, Larkhall. Dec. 15th. Dear Sirs,—Please send 1 lb. birdlime; I have used it and cannot get better.—Yours, A. Dunn." All the above testimonials are proof of the quality we send out. All our birds are sent in proper travelling cages (not chocolate boxes). Postcard before all birds.—Parker and Wilden, Bird Merchants, 257 and 258, Farm Street, Birmingham.

British Bird Exhibitors

MOULT YOUR OWN WINNERS.
Hybrid and Mule Breeders, breed your own Winners.
Read of Success received this last two weeks. No fancy prices.

"Mr. Turnbull, Jedburgh Dec. 8th, '06. Glad to let you know of my success with Goldfinches you sent me, winning 1st and 2nd Jedburgh, 3rd Selkirk, 2nd Hawick, 2nd and 4th Carlisle. Send me two more beauties and a show cage." "Mr. J. J. Brain, Glastonbury. Dec. 4th, '06. I must thank you for Goldfinch for prompt dispatch. I received him in the evening and I showed him next morning, and won 1st in a large class. Thanks for same." "Mr. Turnbull, Jedburgh. Jan., '07. Goldfinch has added another 1st to his successes." "Mr. Asburg, Hucknall, Torkard. Sir,—Goldfinch you sent me stands 1st at our show in a good class." "Mr. Higgins, West Mallony, Kent. Jan., '07. Glad to inform you Bullfinch you sent me won 1st and special at Canterbury in a large class. Thanking you for such a good cheap bird." "Mr. Lee, Bandon, Cork. Glad to tell you I bred the light Mule, 1st and special Cork Show, from birds purchased from you." "Mr. W. Dyke, Longridge. Send a cock Goldfinch and hen Bullfinch. Pleased to see the Hybrid Goldfinch-Bullfinch I bred from the birds I bought from you has won 1st and special Leeds, Class 19, 3rd Halifax, 1st Leek, 2nd Hamilton, 2nd Hinckley, 1st Portsmouth, etc, etc." Can I convince you more? Well, read on, and send your orders. Remember, 25 years' experience. I know what's wanted.

Mr. Veitch, Jedburgh, Scotland, writes:—"Send cock Goldfinch, 3s., two hen Bullfinches, 3s. Glad to say young Goldfinch purchased from you won me two 1sts Hawick, 1st and special Kelso, 5th Edinburgh, Class 33, 3rd Galashiels, twice 2nd at our show." W. Jones, Altrincham, December 6th, 1905:—"Send two cock Linnets and two cock Siskins. Am pleased to say I won 2nd and 4th at Altrincham, Open Class with birds purchased from you." Mr. Ewan, Kirn, writes:—"Goldfinch arrived safe, and won 1st and special at our show." Mr. Weedall, Winsford, January 30th, 1906:—"Send another good Bullfinch. Glad to say last two have won 1st and 2nd every time shown. Unfortunately, best one just died; other won 4th large class at big Crystal Palace Show." Mr. G. Tomlinson, Ilkeston, November 6th, 1906:—"Send a nice cock Siskin for 3s. The one you sent last year won two 1sts and specials."

I sell more British Birds than any man alive. Thousands weekly, which enables me to pick so many winners. Beautiful British cock Goldfinches, guaranteed, **3/-, 4/-** and **5/-** each. NORWICH buffs and yellows, beautiful shape, big birds, in full song, from 10s. to 25s.; satisfaction guaranteed; 14 days' trial; no rubbish; money returned.—Street, 35a, St. Mary's Butts, Reading, Berks.

H. CHIPPENDALE has some splendid Norwich and stock birds for sale, all colour-fed, cages, etc.; giving up the Fancy; Tweddle and Bickerstaffe strain; this is a bargain.—Apply, 111, Byron Street, Blackburn.

THIRTY 1906 high-class Norwich cocks, 8s. 6d., 10s. 6d.; hens, 4s., 5s.; natural colour, cold-room bred; few songsters at 6s. 6d.; few Yorkshires same prices.—Myers, 6, Queen's Road, Gorton, Manchester.

THIRTY 1906 Norwich cocks, seven hens, all colours to be sold, cheap breed for pastime, not big profits, suit dealer; offer wanted to clear; can be seen any time.—Moore, 17, Surrey Square, Old Kent Road.

UNFLIGHTED Buff cock, variegated ditto, Yellow, variegated, 7s. 6d. each; clear Yellow, 6s.; cold room, full song; approval. Wanted Yellow unflighted Cinnamon cock.—Wood, 26, George Street, West Stockport.

LARGE Yellow green cock, 7s. 6d.; Buff mottled ditto, 6s. 6d.; slightly ticked cocks 5s. 6d., clears 6s. 6d.; splendid Buff hens 5s. each; some not so large 3s. 6d. each; good birds.—Postmaster, Hopton, Thetford.

NORWICH Canaries, matched for breeding Plainheads, 8s. 6d., 9s. 6d., 10s. 6d.; Crests, 12s. 6d., 15s., 17s. 6d., 20s. pair; satisfaction guaranteed or money returned—Marrison, 40, Garden Street, Thorn Lane, Norwich.

LARGE buff-marked Norwich hen, prize winner, 12s.; Buff Cinnamon hen 5s.; both 1905, sell or exchange, for big unflighted yellow Norwich cock; must be good bird.—Cranston, 0, Lorne Street, Carlisle.

ARTHUR WAKE can spare few good stock pairs, also some that can win, same as winners, Middlesbrough, Stockton, York, Guisbrough, Darlington; prices reasonable; approval; inspection invited.—41, Aske Road, Middlesbrough.

PRIZE-BRED Norwich Plainheads, same strain as my winners at Norwich, all in open competition; grand cocks, 5s. 6d., 7s. 6d. upwards; matched pairs, 8s. 6d., 10s. 6d., to 40s.; hens, 3s. 6d., 5s. 6d.; approval.—Geo. Wright, 51, Silver Street, Norwich.

C. E. SILK, Emsworth, Hants, has for sale some grand pairs of Norwich cheap; unflighted yellow, 1st Dartford (see report), one of the best possible to obtain, £5, can win in any company; several fine upstanding Yorkshire winners cheap; approval. x264

E. SUTTON, breeder and exhibitor of high-class Norwich Plainheads, winner at leading shows. Having chosen my breeding stock for 1907, I have a few pairs to dispose of at reasonable prices; purity guaranteed.—88, Tulketh Street, Southport.

MR. ECKERSLEY can still spare some superb unflighted and year-old yellows and buffs, bred from or related to his famous winners. Fine large, 1906, variegated buff hen, and 1905 yellow cock, £2.—51, Francis Road Edgbaston, Birmingham.

PLAINHEADS, large variegated Buff cock 1905 12s.; Clear Buff cock, unflighted, 8s.; Clear and variegated Buff hens, unflighted, 4s. each; approval anywhere.—Barnes, Factory Row, Billington, Whalley, Lancashire. x262

CHAMPION Norwich, same strain my winners, pairs, 10s. to 15s.; hens, 4s. to 7s. 6d.; cocks, 6s. to 10s.; Cinnamons, Godley's strain, pairs, 10s. to 15s.; cocks, 6s. to 10s.; inspection invited.—W. Growdridge, Clarendon Road, Hinckley.

JOHN W. HARTSHORN, Champion Norwich, can spare 15 Yellow and Buff cocks, 7s. 6d. to 15s. each; also few properly matched pairs; all bred from my winners; approval deposit; inspection invited.—7, Scott Street, Knighton Fields, Leicester.

A. G. CAMERON, breeder and exhibitor, can spare the following from his well-known winning strain: Yellow variegated hen 20s.; Yellow Green hen 15s.; also several others, various colours, all the best blood.—Address, Roxburgh Street, Kelso.

SPECIAL Offer.—14 pairs Silk's champion strain, guaranteed, 10s. 6d., 12s. 6d., 15s. 6d., 20s. 6d. pair; single cocks, 7s. 6d., 8s. 6d., 10s. 6d., 15s.; 7 days' approval; these need no comment.—J. Allen, 19, Albert Street, Wednesbury.

NORWICH. Bred from winners, cocks from 6s., hens 4s.; also hot water heating apparatus, 12s. 6d., cost 35s.; approval; exchange exhibition British.—J. Marsh, Village View, Mill Lane, Leigh, Lancashire.

HARRY E. WILKINSON, breeder and exhibitor of high-class Norwich and Yorkshires, winner of 1sts, 2nds., etc. (open), Bramley, Leeds, Stockton, Morecambe, York, Hull and Hartlepool; pairs, from 10s. upwards; approval.—4, Ashlea Street, Bramley, Leeds.

THREE Yellow hens, 1 clear Buff, and ticked Buff; these are grand birds, Bullfinch type, short wings and tail, and bred from my cup and medal winners, 16s. 6d., 12s. 6d., 15s. each, and honestly worth 30s. each.—Brown, 62, Long Lane, Moldgreen, Huddersfield.

HAVING selected breeding stock, have for sale three yellow Norwich cocks, 1906, 12s. 6d., 15s.; short chubby birds, same strain as winners, Wimborne, Bournemouth; buff Yorkshire cock, 1906, 7 inches, 15s.; approval.—Baker, Langley Road, Branksome, Bournemouth.

EXHIBITION Breeders.—Six grand Goldfinches, selected from season's catching, deep square blazes, good tan chests, moons, and bars, winners, 5s.; grand Cheveral Finch, clean, full song, 7s.; 10 selected Linnets, good facings, 1s. each; approval willingly.—Fearby, 20, Eldon Terrace, Bedminster.

YELLOW hen, typical, lovely feather, 1st, 2nd; smart buff cock, 1st; another good one, 2nd, 4th; extra large buff marked cock; clearing Norwich; quick sale desired; price reasonable; stamp particulars.—Knowles, 8, Commercial Place, Hebden Bridge.

COLOUR-FED unflighted yellow and buff cocks, 6s., 7s. 6d., 10s. each, grand quality and absolute bargains; ticked, unflighted buff cock, 3rd Oxford, 25s.; clear buff unflighted cock and ticked buff cock, 1 year, 20s. each; few yellow hens at reasonable prices.—W. W. Midgley, The Avenue, Winslow. x262

NORWICH prize-bred; 4 cocks, 6 hens, Canaries; also 4 double compartment breeding cages, white enamelled inside and black outside, with nest pans, egg drawers and drinking glasses, complete, what offers? birds won in open competition.—Wilson, Chapel Lane Post Office, Wigan.

FOUR Norwich yellow hens, or yellow-marked hens, and two buff cocks, Norwich; approval, deposit, £2; four Norwich buff hens or buff-marked hens, two yellow Norwich cocks, £2; approval, deposit.—J. Growdridge, Brickkiln Street, Hinckley, Leicestershire.

CHAMPION Norwich, latest successes.—With nine entries at Walthamstow and West London last week I took four 2nds, one 3rd, two 4ths, three specials, and two vhc's in open competition. See reports this week. Few good birds reasonable.—Hodder, 6, Banner Street, St. Luke's, London, E.C.

FOUR pairs high-class Norwich, matched for breeding, 15s. a pair to clear. Bonwick, 7, Lime Street, Walthamstow.

A FEW good Norwich for sale, pairs from 10s. 6d.; some grand buff cocks, from 7s. 6d.; no odd hens; approval; deposit; all natural colour, cold-room. At Norwich Open Show, with four entries, we won 1st, 3rd, vhc, and c, only time showing.—T. and E. Wright, Tunn Street, Fakenham, Norfolk.

LARGE buff Yorkshire cock 1905, winner 1st prize, sound, healthy, cold-room bred, exchange for large yellow Norwich cock, also would exchange yellow Norwich hens, fine quality and type, for good Yellow Norwich cock.—Parkinson, Waterloo Place, Whitby.

WM. WRIGLEY, winner of Norwich Plainhead Club's Amateur Championship gold medal, 1906 (see show reports, Manchester, Halifax, Preston, Altrincham, etc.); two Buff cocks, two Buff hens for sale, price reasonable. Address, 8, Church Street, Godley, Hyde. Inspection invited.

HIGH-CLASS Norwich. The whole of my breeding stock of about 56 birds for sale, bred from the best blood in the Fancy; will take 10s. per pair, to anyone taking the lot; there are six birds worth as many pounds; may be seen any time.—Caton, 8, Elmsall Street, Bradford.

PURE-BRED Norwich cocks, in full song, 4s., 5s., 6s.; hens, same strain 2s. 6d., 3s. 6d.; pairs properly matched, 6s. 6d., 7s. 6d.; guaranteed large healthy birds, cold-room bred (1906). If not satisfied money returned.—Fred Heathcote, 55, Havelock Street, Leicester.

NORWICH Clear Buff cock, winner two firsts, and one second, 1905 bird, with grand ticked unflighted hen, 35s.; a few other Yellow cocks from 8s. to 15s.; few hens Yellow and Buffs, from 5s. to 10s.; all on approval.—W. Palmer, 21, Newby Street, Ripon.

LARGE buff Norwich cocks 7s. 6d. each, Yellow and Buff hens 2s. 5s., clean Yellow and broken Yellow-green Yorkshire hens 3s. 6d. each, large dark Goldfinch Mules 7s. 6d., large hens do., 1s. 6d; approval, deposit; stamp, reply.—W. Pinner, 65, Gordon Hill, Enfield.

HEALTHY Norwich plainheads, matched pairs, 7s. 6d., 8s. 6d., 10s., 15s., upwards; cocks, 5s. 6d., 7s. 6d., 10s. upwards; hens, 2s. 6d., 5s., 7s. 6d., upwards; special terms to dealers; inquiries invited; cold-room bred; approval.—S. Roberts, 39, Gloucester Street, Unthank Road, Norwich.

MR. MENNARD, 113, Cemetery Road, Beeston Hill, Leeds, winner of 1sts, etc., Leeds, Bramley, Morecambe, Hull, Darlington, Barrow, in open competition, has some grand birds for disposal; all own breeding, and closely related to winners; pairs at 15s., 20s., 25s., 40s.; splendid chance for beginners; approval.

HAYWOOD, of Nottingham, breeder 35 years, winner hundreds of cash prizes, and sold hundreds of winners; high-class Norwich Plainheads, 12s. 6d., 15s. 6d., 20s.; 30s. the pair; high-class Crest and Crestbred, 15s. 6d., 20s., to £5 the pair; on seven days' approval.—L. Haywood, 3 Neville Street, Nottingham.

A. HATWELL, West Haddon, Rugby, offers Clear Buff cock, unflighted, lic, Spalding, 17s. 6d.; variegated Buff cock, unflighted, fine stock bird, £1; Buff cock and Yellow hen, lic, Coventry, 25s.; few other Yellow and Buff cocks, 6s. 6d. to 10s. each; hens 5s. to 7s. 6d. The above are all own breeding, healthy, and contain some of the best blood in the Fancy; approval; cash or deposit; stamp. x262

SPECIAL! Special!! Healthy large typical Plainheads of the right stamp and quality. A trial solicited, and the same high satisfaction guaranteed as for the past ten years; prize-bred matched pairs, 8s. 6d., 10s., 12s. 6d., 15s., 20s., 30s. upwards; odd cocks from 6s.; hens from 3s.; all cold-room bred. Enquiries invited; approval anywhere.—H. Amies, Breeder and Exporter, Ashby Street, Norwich.

JUST published, Mr. J. B. Payne's latest lecture on the Norwich Plainhead Canary. This has been issued in pamphlet form, and containing as it does some most valuable hints on this popular and profitable variety, should be read by every Norwich fancier. "All About the Norwich Plainhead Canary," price one penny, postage paid 1½d., from F. Carl, 154, Fleet Street, London.

HIGH-CLASS Norwich. Having selected stock for this season, I have the following for sale: ticked Yellow cock 25s.; eye-ticked Buff cock 25s., both good stock birds; Clear Yellow cock, unflighted, 15s.; eye-ticked Buff, unflighted, 12s.; two Clear Yellow hens 20s. each; two Clear Buff hens 15s. each; Mason, of Burton, strain; approval willingly.—A. Stacey, 77, Seymour Street, Carlton Road, Nottingham.

TO amateurs! After careful selection, I am now disposing of Buff cock, first Guildford, and Yellow hen, matched for breeding, £2 17s. 6d.; No. 2, related, only rather smaller cock bird, 20s.; also Yorkshire, 1905 cock, splendid natural colour, Buff hen, good feeders, 25s.; two 1906, bred from same, 12s. 6d.; large Crystal Palace aviary, mahogany outside feeders, 12s. 6d.—Carter, 3, Whiting Street, Bury St. Edmund's.

THE largest stock of high-class Norwich Canaries in the Midlands, cocks, in full song, 4s. 6d., 5s. 6d.; orange yellow, 7s. 6d. and 10s. each; good healthy hens, for this year's breeding, 2s., 2s. 6d.; orange yellows, 4s. and 5s. each; pairs, properly mated, for this year's breeding, unrelated, 6s. 6d., 7s. 6d., 10s. 6d., and 15s. pair, most of these birds have been bred in outdoor aviaries; this is no flattering advertisement, but genuine, with 20 years' references. With my business extending so much, I have had to take larger and more convenient premises; please note change of address.—William Judd, Midland Counties Aviaries, 120, Belgrave Gate, Leicester.

BREITENFELD'S IDEAL NORWICH.

Massive, thick, chubby birds, pairs from 10s. to 30s.; show birds, £1, £1 10s., £2; bargains; only want seeing; winner over 200 prizes Palace and all leading shows; stamp reply.—69, Allen Road, Northampton.

ERNEST G. KEW,

Having purchased the stock of Mr. Thomas Dennis, who has retired from the Fancy, can supply grand cocks Yellows, Buffs, 5s. 6d., 6s. 6d., 7s. 6d.; ditto, hens 2s. 6d., 3s. 6d.; Goldfinch Mules, 7s. 6d.; approval, deposit.—75, Dane Road, Margate.

CHAMPION NORWICH.

Few good stock birds for disposal, bred from my noted winners at Manchester, Warrington, Morecambe, Preston, Edinburgh, and all leading shows; approval; stamp reply.—J. W. Cleminson, Elmsley Street, Preston.

WYNN'S CHAMPION NORWICH.

Can spare few good ones, Yellows and Buffs; one unflighted, grand large variegated Yellow cock, grand stock bird; all cold-room bred, cheap to clear.—4 Afton Street, Barrow-in-Furness.

PLAINHEAD NORWICH.

Typical Norwich colour-fed, about 12 or 14 cocks and hens, my own breeding, good quality, will sell in one lot, reasonable to reliable person; approval, stamp reply.—Broadhead, Grocer, Derby Street, Macclesfield.

F. W. HEATON, Ash Cottage, NANTWICH, CHESHIRE. Champion Norwich.

Winner of over 3,000 firsts, specials, and other prizes at the principal shows in the country. Diplomas for best Norwich in show, Crystal Palace, and other leading shows. Have supplied many of our leading exhibitors for years with both stock and show birds. Over 200 grand Stock and Show Birds. Single Birds from 15/- each; pairs from 25/-. **Approval with pleasure.** Inspection invited.
State wants—you can rely on Quality, viz: **PURE BRED NORWICH.**

BLOOD WILL TELL.
Winners bred yearly from this strain; can spare mated pairs, or single birds, healthy, cold-room bred and kept; approval; price moderate.—Wilson, Stanley Place, Sudbury, Suffolk.

WALTON AND NOAKES
now offer stock pairs, 15s. to 30s.; odd cocks, 10s. to 25s.; no odd hens.—14, Abney Street, Highfields, Leicester.

WINN AND HINDE
Can spare few good Norwich pairs from 15s.; single cocks from 8s. 6d.; hens, 7s. 6d.; over 200 to select from; all true Norwich type; approval.—Freehold Aviaries, Lancaster.

WM. BOWYER,
Gladstone Street, Leek, can spare few that can win; also stock birds, from 10s.; those wanting to improve colour, grand opportunity, as great amount green blood has been introduced into my stock; approval.

WRIGHT & SON,
84, Heath Road, Norwich, for Show and prize-bred Norwich Plainheads winners of hundreds of money prizes, also medals, etc., in open competition at Crystal Palace and leading shows. Show birds, 15s., 20s. upwards; pairs, 8s. 6d., 10s. 6d. upwards; grand song and stock birds, cocks, 5s. 6d., 7s. 6d., 10s. 6d.; hens, 3s. 6d., 5s. 6d. upwards; approval.

CHAMPION NORWICH.
From winners, Great Harwood, Nottingham, Hanley, Leek and District; also Leek Ornithological Society's Show, with 6 Norwich Classes, I bred 5 of the 1st prize-winners, which is proof of quality; pairs, from 15s. upwards; approval.—W. Whetstone, 3, Parker Street, Leek, Staffs.

INTENDING PURCHASERS. IMPORTANT!
Those requiring reliable birds for stock, buy from breeder direct, and breed your own winners; champion Norwich Plainheads, large chubby specimens, prize-bred pairs, matched to produce winners, 10s., 12s., 15s., 20s. pair upwards; single birds reasonable; see them, approval.—R. Green, 168, Waterloo Road, Norwich.

J. Hayhurst, Champion Norwich.
A few for sale, cocks from 15s.; hens from 10s.; approval; stamp.—3, Forest Street, Burnley.

CANARY BREEDERS NOTE.

If you want a Norwich Canary that you can depend on, I can supply you at reasonable prices, with good sound stock, bred in my own rooms; send stamp for list of birds and cages from Graham Gould, Little South Street, Coventry. (See last 4 years' CAGE BIRDS' Annual).

CHAMPION NORWICH.
Few buff cocks and hens for sale, same strain as my winners at leading shows, two green hens, also marked and clear hens from 6s.; cocks from 12s. 6d. See reports at Preston, Coventry, Gateshead, Kilmarnock, etc.; stamp reply.—F. Coventry, 43, St. Stephen's Road, Preston, Lancashire.

CHAMPION PLAINHEAD. CREST.
I earnestly ask you for trial order to prove I give satisfaction. Send on week's approval, at my own risk, cash or deposit; this strain winners 200 prizes, including cup and medals, championship; Norwich Plainheads, Bullfinch type, cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; Crest and Crestbred, large feathery broad-skulled cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; hens, 3s 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d.; pairs matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards.—C. Baker, Herbert Street, Bedminster.

IT MUST BE A
difficult matter for some fanciers to decide from whom they shall purchase what birds they require amongst so many advertisers. I ask such to give me one trial order. Read the latest opinion, which proves what satisfaction I give:—"Pearson Street, Workington,—Sir, I am very pleased with birds sent, which arrived safely. Thanks for prompt attention. Yours, S. Butcher, to R. Hanford." Now supplying handsome Norwich or Yorkshire cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d.; extra large Norwich or Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d; judiciously matched pairs, 10s. 6d., 12s. 6d., 15s., 20s.: also Crests; state wants; approval anywhere, deposit; best value obtainable anywhere at prices. Illustrated price list free.—R. Hanford, Osmaston Road, Derby.

Norwich Songsters, 7s. 6d. each.
Specially selected; also breeding pairs Norwich Plainheads, 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d. upwards; hens, 3s. 6d., 4s., 4s. 6d., 5s. upwards; Crested Norwich, matched for breeding, 12s. 6d., 15s., 17s. 6d., 20s. upwards; satisfaction guaranteed.—F. J. Yallop, 23, Alexandra Road, Norwich. Established 1869.

CHAMPION NORWICH.
Best blood in the world. Large Bullfinch type, fine silky feather, nice round heads, few that can win, reasonable; approval.—T. Billington, 220, Colwick Road, Notingham.

SILK'S CHAMPION NORWICH.
My name and fame as a breeder of Norwich Plainheads is so well known to every fancier, novice, amateur, and champion that my birds need no paper recommendation. Birds sold by me have won at all principal shows throughout the British Isles. I breed to sell, and most of the leading champions have been bred from my noted strain which still stands absolutely supreme. Champion pairs to breed winners, 15s., 20s., 25s., 30s. per pair; judiciously matched for the novice, after years of careful study, cocks, Yellow and Buff 10s. 6d., 12s. 6d., 15s. each; ditto, hens, 7s. 6d., 10s. 6d., 12s. 6d., and 15s. each. These prices may appear somewhat perplexing to fanciers, but there is such a vast difference in the quality of birds it is the only way to ensure everyone getting honest value for their money. All birds sent at my risk whilst travelling. Note.—I do not aim to quote the lowest price, but my object is to give the best possible value. Approval willingly. Satisfaction guaranteed.—Silk, The Avairies, Whitstable.

W. R. MILES,
Aviaries, Chichester, winner of Walthamstow Challenge Cup last week, also 46 prizes, 14 specials, 12 honours with Norwich this season (see reports L. and P.O.S., L.C.B.A., Hastings, Swansea, Cardiff, etc.) Have good buff cock, winner 1st and 2nd, 15s.; yellow cock, winner, 15s.; ticked ditto, 15s., and some large buff cocks for stock at 10s. 6d., 12s. 6d., 15s., and 20s. each; also 40 matched pairs from 15s. pair; about 100 for disposal; all on approval.

D. MALLINSON AND SON
Can spare a few grand pairs of Norwich, same strain as our winners at Halifax, Brighouse, Huddersfield, Bradford West; pairs matched for breeding, 20s., 25s., 30s. a pair; every bird guaranteed in good condition. Stamp for reply.—D. Mallinson and Son, Victoria Street, Huddersfield.

SANDIFORD'S FAMOUS Norwich.

READ OF SUCCESS FROM BIRDS
I have supplied, also of our noted Wins at all leading Shows, including Derby, Leek, Hinckley, Carlisle, Gateshead, Sunderland, Crewe, Edinburgh, etc., etc. Won this Season—34 Firsts, 26 Seconds, Gold and Silver Medals, 50 Specials, etc. At Hartlepo l, N.P.C. Cup Show against all the cup fighters, 8 birds—4 Firsts, 2 Seconds, 2 Thirds.

Also, in the year 1900, we won **50** First Prizes, Seconds, Specials, etc. 1901, **44** Firsts, **30** Seconds, Specials, Cups, etc. 1902, **49** Firsts, **40** Seconds, **35** Thirds, Scores of Specials including Championship Medal for Best at Crystal Palace. 1903, **35** Firsts, **40** Seconds, Specials, etc., including the N.P.C. Challenge Cup, which we won at Three Shows against all others Five Shows, also Gold Medal at the N.P.C. Club Show for best Norwich. 1903-4, Won **50** Firsts, **40** Seconds, **25** Thirds, N.P.C. Challenge Cup second year in succession, also **2** Gold Medals at the International Show, England v. Scotland, **1** for Best Norwich in Show. 1905, Won **30** Firsts, **25** Seconds, Spls., etc. If my strain can't claim to be the best on earth none can.

I am offering for two weeks only 20 Grand Matched Pairs, to breed Winners, at **20/-** pair, must clear. Also other Pairs at **25/, 30/-.** Odd Yellow or Buff Cocks, **10/-, 15/-, 20/-, 25/- 30/-.** Odd Yellow and Buff Hens, **10/-, 12/-, 15/-, 20/-.** All on approval two days. If you want the blood that wins order at once.

Mr. McIver, Port Glasgow, Jan. 8, 1906.—"Sir, The Norwich Cock you sent me won 1st and Special in class of 11, against all colours." Have scores like this.

Established 1879.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High St., Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

CHAMPION NORWICH.
E. CODLEY, Rishton, nr. Blackburn,
Breeder & Exhibitor, has a few choice birds for sale. Also **Cinnamons.**

LARGE CHAMPION NORWICH PLAINHEADS.

I can now offer the following extra special champion Norwich Plainheads at only one-third their value, and cost price. The 1905 birds are good breeders, and can be relied upon to breed the very best specimens. They comprise the following:—1905-bred clear yellow cock, fine silky feather, good type, can win anywhere, he is extra large and stout, Mackley Bros.' strain, bargain at 25s.; another 1906-bred, colour-fed, clear yellow cock, large chubby type, can win, a real bouncer, Eckersley's strain, price 21s., cost double; 1906-bred monster variegated cock, stout and full of quality, same strain, rare stock bird, price 21s., cheap at £3; clear buff cock, a monster, short and extra stout, Bullfinch type, one of the best I have ever seen, Irons' strain, price 21s.; also another 1906-bred, nearly as good, Beardall's strain, price 17s. 6d., dirt cheap; also several colour-fed yellows and buff cocks, clear, ticked, and variegated, prices 12s. 6d., 15s., 21s., to £2 2s. each. All are bred from winners at all the leading shows. About the best yellow breeding hen living, she is a 1905-bred bird, of good size, rare type, and teeming with quality, a gem of gems, breeder of great winners at some of the largest shows, Vardy's, price 15s., cost 30s.; another 1905-bred hen, Eckersley's strain, purchased by me last week, this hen has bred a champion, price 12s. 6d.; clear buff hen, breeder of 13 young ones last season, of highest quality, she is extra stout and large, nicely frosted, can win natural classes, Sandiford's strain, price 10s. 6d.; another 1906-bred, without a doubt one of the largest and best living, Payne and Bennett's famous strain, price only 8s. 6d.; other good hens, above strains, colour-fed or natural, many can now win or breed you winners, prices 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d. each. Please note that I have supplied some of the largest exhibitors this last season, such as Messrs. Mills, Woollett, Davidson, Isom, Freestone, Towers, Andrews, and many others. Many winners have been sold by me. Send me your order at once for a bird, pair, or any quantity, small or large. I will guarantee to give you double value for money, and fit you up to the proper mark for quality and prices combined. You cannot beat the birds I supply, no matter where you go. All birds are cold-room kept, and are in the pink of health and condition. I hold hundreds of unsolicited testimonials from previous advertisements of Norwich Plainheads, and herewith just publish one to prove the quality of birds sent out: "5, Office Row, Barrington, Bedlington. Dec. 22nd, 1906. Sir,—I received birds this morning, and they arrived in the pink of condition. I am very pleased with them. They are as good as you described them out to be. I have received more satisfaction from you than anyone else I have ever tried. Accept my heartiest thanks for your honest dealing.—Yours, Wm. Woollett." I have also an extra large Crested-bred cock, a monster, good stock bird, Glasscock's strain, price 21s.; also 1905-bred, dark Crested buff hen, Joyce's strain, price 10s. 6d., cost 30s.; also an extra large deep yellow Sib-bred hen, breeder of one clear, three lightly-marked, and four light variegated Goldfinch Mules, probably the best Sib alive, worth £10 to a Mule breeder, price 15s. 6d.; also several muling Goldfinches, very cheap, considering the quality. State exact wants. Above are decided bargains, and will not be offered again at these prices; no time for breeding from them this season. To save time and correspondence much as possible enclose cash with order and get your choice.—Address,

G. W. CUBLEY,
3, Standard Terrace, Long Sutton.

J. C. BARNES'

Champion Norwich and Yorkshires. Winner of Silver Cups, 1901, 1902, 1904, 1905, 1906. Few grand birds for disposal; reasonable; inspection cordially invited; stamp reply.—N.B.—Type and quality a speciality. Pairs properly matched.
149, Duncombe Street, Walkley, Sheffield.

The Greatest Success on Record.

With fourteen exhibits at the late Norwich All-England Show I was awarded 13 cash prizes and 10 specials. Having selected my breeding stock of Norwich Plainheads and Crested, can spare some of the same strain, at reasonable prices.—Mrs. Gaze, Aldeby Grange, Beccles.

NOTICE, CALL OR WRITE

and inspect my Norwich. HENS, bred 1906, guaranteed pure Seifert strain, rung with B.R.C.C. closed ring, 3s. 6d. each; a few cocks 12s. 6d., 15s., 20s. each; three days' approval.—Haywood, 258, All Saints' Road, Wolverhampton.

TWO genuine Seifert cocks and hens, purchased direct from John Smith last year, costing over £4, accept half cost; a chance for those requiring the right blood; approval; deposit.—A. Hawkes, Raleigh Street, Walsall.

PAIR pure 1905-bred Rollers, 20s.; four pairs of 1906, bred from the above pair, 15s.; a few hens, 3s. 6d. each; on approval seven days; Seifert strain; hens cold-room; kept specially for breeding.—Stanley, Roller Breeder, Studley, R.S.O. x263

ST. ANDREASBERG Rollers (genuine), in full song, 10s. 6d., 12s. 6d., 15s. each; hens, 2s. 6d.; also Hartz cocks, in full song, 6s. 6d., 7s. 6d., 8s. 6d.; hens, 1s. 9d.; approval; 24 years' reputation; inspection invited.—Leech, Cross Aviaries, King Street, Dudley.

SEIFERT Rollers of the highest excellence, brothers to my recent silver cup winner, Schoolmasters and contest singers, 20s. to 60s.; these birds are home bred, not imported hot-house plants that die off when you have had them a week or ten days; inspection invited by appointment.—Foulds, 213, Brunswick Street, near Owen's College, Manchester.

TO Roller Fanciers.—I have for sale breeding pairs from 15s., singing cocks from 8s. 6d., hens from 3s. 6d., contest singers at higher prices, all wearing the B.R.C.C. closed ring, and related to my winners, 1st and 2nd at L.C.B.A., 2nd Champion Section, London B.R.C.C., 1st and 2nd Wakefield, only times out this season.—Whittaker, Rose Street, Moses Gate, near Bolton.

W. WHITTAKER,

Rose Street, Moses Gate, near Bolton, breeder and exhibitor of Seifert Rollers. My strain has won most of the prizes of the leading shows in England; good song birds always on sale.

THE LITTLE WONDER.

First-class St. Andreasberg Rollers, in full song, 6s. 6d., 7s. 6d.; special Schoolmasters, 10s. 6d.; every bird sent out on approval, and if not approved of your money returned.—W. Garner, 19, Chalton Street, Euston Road, London.

BUY DIRECT OF

Breeder and Trainer. Finest strain of Rollers in the country; trained to perfection, 7s. 6d., 10s., 12s. 6d., 15s. upwards; hens 2s. 6d., two for 4s. 6d.; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster; established 1888.

"MAGNIFICENT SONGSTERS."

That is what delighted purchasers keep saying concerning my St. Andreasberg Rollers. Give me a trial if you want honest dealing, and value for your money. Prices 8s. 6d., 10s. 6d.; Champion Schoolmasters, 12s. 6d., 15s., 20s., 25s.; Roller hens, 2s. 6d., 3s., 4s., 5s; beautiful birds. Several African Grey Parrots for sale. Liver and white Spaniel bitch, 7s. 6d.; approval.—Broxton, Orrell Post, Wigan. x262

GRAND NORWICH.

Prizebred pairs matched to breed winners, 12/6, 15/-, 20/- upwards, typical and full of quality; also a few Cocks from 10/-, same strain as my winners at Leicester, Coventry, O.S., with 4 entries, 2 firsts, third, and 2 Specials, and medals for most points in Norwich Classes (see "Coventry Fur and Feather," etc.). Approval, cash or deposit.
W. A. DAVIS, BOSTON PLACE, COVENTRY.

PURE SEIFERT ROLLERS.

Cocks, 8s. 6d., 10s. 6d., 12s. 6d.; hens, same strain, 4s., 5s.; on 7 days' approval, cash or deposit.—G. Percival, 24, Wellington Road, Wrexham.

J. Savage, Westfield Aviaries.

Goole, has considerably over 100 Norwich Plainheads for disposal, own breeding, cold room, from first-class stock; splendid health and condition. During the last three years upwards of 400 sold, all sent out on approval, and not a single specimen returned; huge pile of testimonials from all parts. My 8s. 6d. and 10s. 6d. pairs, properly matched, are tip-top value, second to none at the price; also 12s. 6d., 15s., pair, etc. Grand buff hens, 2s. 9d., 3s. 6d., 4s. 6d., 5s. 6d., upwards; approval, packed free.

IMPORTANT NOTICE.

Notice, my first consignment of St. Andreasberg Rollers has arrived; they are constant day and gaslight songsters, with all the sweetest, softest, and most musical changes of song; water-bubbles, runs, silvery trills, piccolo, harp, and deep bass rolls, etc.; all on six days' approval on receipt of P.O., or deposit the amount with the editor; 7s. 6d., 8s. 6d., 10s. 6d.; perfection. Schoolmasters, 12s. 6d., 15s. 6d., 18s. 6d., 21s.; inspection invited any time.—William Shaw, 97, Essex Road, Islington, London, N.

THERE'S ONE POINT

I wish to impress upon your memory—viz.: That if you want to own the best Roller Canary that money will buy, you must have a "Leipzig" Roller from me. There can only be one best in anything, and the best Rollers on the market are undoubtedly those imported by me. I have an immense stock of these pure St. Andreasberg hollow Rollers, all in full song, day and gaslight, with long hollow and double rolls, sweet silvery trills, waterbubble runs, flat roulades, piccolo trills, hollow bell and deep bass tours, Nightingale jug-jug, harp and gong notes, etc., etc., and guaranteed absolutely free from any harsh or objectionable notes whatever, price 7s. and 8s. each. Special Bandmasters, which excel in the deep bass tours, and are a fountain of ever flowing exquisite music, 10s. each. Pure Roller hens, guaranteed same strain as above, cocks, 2s. 6d. each, 4s. couple. Ordinary loud free singing Hartz cocks, often described and sold as Hartz Mountain Rollers at fancy prices, my price, 5s. 6d. each, two 10s., seven 33s. 9d. Hartz hens, 2s. each, 3s. 6d. couple. Every bird is guaranteed exactly as described, and sent on full week's trial entirely at my risk during the whole time, either on receipt cash or on CAGE BIRDS' deposit system, and money instantly refunded in full if perfect satisfaction is not given. Scores of testimonials arriving daily, all speaking in highest praise of these "Leipzig" Rollers. Few published below. "Leo House, Ambleside. Jan. 1st, 1907. Mrs. Pearce wishes to say that the Roller Canary sent by Mr. Gore gives the greatest satisfaction. It is the most beautiful singer, both by day and night." "66, Minto Street Ashton-under-Lyne. Jan. 3rd. Sir,—Roller arrived safe, and commenced singing half an hour after arrival. It is in good condition, and a good songster. Thanks for your selection and attention.—Yours, Wm. Berry." "North End, Cambusbarrow, Scotland. Jan. 3rd. Sir,—Just a line to say I received birds on Tuesday, and am highly pleased with them both.—Yours, Wm. Gow." "4, Gladstone Terrace, Radnor Park, Clydebank, Scotland. Jan. 5th. Sir,—I have instructed Editor to pay you the deposit, as I am greatly pleased with the Roller; he is a good bird and one worth keeping, which says a lot for your honest advertisement and straightforward dealings, for which I thank you very much.—Yours, P. McKinlay." "Feathers Hotel, Hall Street, Rhos, near Ruabon. Jan. 5th. Sir,—Many thanks for splendid Roller you sent me a month back. I am again asking you to send me a Bandmaster, as I am so pleased with the birds you send me from time to time. Again thanking you for your prompt attention and your honesty in dealing.—Yours, Wm. Price." "25, College Street, Swindon. Jan 7th. Sir,—Birds to hand, and quite satisfied with same; they are both good.—Yours, Miss Fowler." "27, Falmouth Street, Middlesbrough. Jan. 7th. Sir,—I have much pleasure in forwarding P.O. for the Bandmaster cock and two hens. Thanking you very much for the good birds you have sent. I am quite pleased with them, and shall want more later on.—Yours, C. Hopkins." The above letters by no means exhaust my stock of testimonials, as I shall be pleased to show bundles upon bundles of them to anyone at any time. All are unsolicited, and very few of them have ever been published. Readers will notice that the above letters are from all parts of the United Kingdom, as I do not believe in publishing those of my local friends, and to prove this I publicly offer to give £100 to any person that can prove that I have ever, either directly or indirectly, solicited a testimonial during the whole course of my 16 years' business career. I earnestly invite all intending purchasers to have a Roller from me on week's trial at my risk, and test it against any of the higher priced ones advertised by others. See British Bird column.
W. GORE, Direct Importer, 219, Sherlock Street, Birmingham.

Champion Seifert Rollers.

A Few gems for sale, guaranteed same strain as Mr. Tweed's Palace Cup winner 1906. A rare chance for anyone desiring a genuine strain. Cocks, 10s. 6d. to 50s.; hens, 5s.; a few 1905 cocks, grand tutors; approval.—Low, Moray Place, Elgin.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3s. 9d. each; 21s. a stick, try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, January 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"January 2nd, 1907.—Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"January 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand, I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Stratford, London.

Roehl's Reliable Rollers.

Winning Rollers of the purest Seifert strain, trained to the highest perfection, which will please the most exacting critics. This strain of birds must not be compared with the cheap and inferior class so frequently advertised. Birds of this class have been supplied by me to many members of the B.R.C.C., which have won the highest honours obtainable. Latest again, Leeds singing contest. I have once more secured, in the keenest competition, the highest prizes in open class. A personal inspection of my Roller room will greatly benefit the buyers of these beautiful songsters. Prices from 40s. to 80s., according to song. Hens, guaranteed of the same strain, 7s. 6d. each. Sole agent for Queck's unrivalled tutor organs, with latest improvement, hollow bent Shoeckel-roll, price £3 7s. 6d., well packed, carriage forward. A grand collection of piping Bullfinches, the best ever heard in this country, piping one and two tunes perfectly, price £3 to £4 each.—400, Edgware Road, W.

Don't Keep The Roller

if you are not thoroughly satisfied with it, as we believe in pleasing customers, that is why our business has grown so enormously; and incidentally it is the reason why we have to keep the largest stock of pure Rollers in the Midland Counties. Reasonable prices for reliable Rollers and absolute straightforward dealings is the secret of our success. We can send all Rollers out entirely at our own risk, on seven clear days' approval, cash to us or CAGE BIRDS' deposit system. What could be more straightforward? We have, just arrived, another consignment of pure St. Andreasberg Rollers, all with long, deep, sweet, soft, bass rolls, waterbubble runs, etc., bell, harp, and gong notes, etc., etc., 6s. 6d., 7s. 6d. each; Schoolmasters, with not a faulty note, and which far excell all others in their beautiful bass rolls, perfect little music boxes, 10s. each, two 18s.; hens 2s. each, two 3s. 9d. We also have arrived grand consignment of Hartz Mountain Rollers, and all are good clear loud day and gaslight songsters, 5s. 6d. each, hens 1s. 6d., two 2s. 9d.; Roller singing cages, 1s., 1s. 3d., 1s. 6d. each. Kindly read few more testimonials which we are publishing week by week:—"12, Broomhill Avenue, Partick West. Dec. 18th. Dear Sir,—Kindly send another Hartz Mountain Roller same as you sent last month.—Yours, J. Crookstone." "43, Bridge Street, Lisburn. Dec. 20th. Dear Sir,—Received the Rollers all right. I have instructed CAGE BIRDS to forward on cash. Hoping to favour you with another order soon.—Yours, W. Wright." "26, Sandbach Road, Bridlington. Dec. 26th. Dear Sir,—Roller arrived safe; I am very well pleased with him. Thanking you for straightforward dealings.—Yours, Thos. Wright." "Glenhurst, Poplar Avenue, Edgbaston. Dec 15th. Dear Sir,—On Friday I purchased two Schoolmasters from you; if you have another first-class Roller, kindly put it on to me.—Yours, J. Whitworth." All the above testimonials are proof of the quality of our Rollers. Cash to us or CAGE BIRDS.—Parker and Wilden, Bird Merchants, 257 and 258, Farm Street, Birmingham.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only 20s.; no fancy prices; Hummel hens 5s. each; a beautiful pair of Hummels for 22s. 6d. St. Andreasberg Rollers, 7s. 6d. and 10s. 6d. each. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

14 Days' Free Trial

Allowed on all our Roller Canaries, and we offer you real masterpieces, and certain contest winners at 15s. each, and understand it is impossible for anyone to sell a better or more classical songster even if you pay any kind of fancy price ranging up to 50s. for it. So do not be misled by bluff or bounce, or large displayed advertisements. Send your money to the Editor of CAGE BIRDS, and don't let go your hold on it till you are satisfied. And remember we allow you 14 days' free trial at our risk. No other dealer will do this. Deposit your 15s. at once, and let us send you one of the purest St. Andreasberg Rollers ever imported. We give full instructions with every one, and a recipe worth £5 to any Roller fancier how to keep them in full and perfect song. German Hartz cocks, in full song, like those advertised by others as St. Andreasberg Rollers, our prices 5s. 6d. and 6s. 6d. each. These are called best imported by some dealers. Bow fronted box cages, splendid for singing Rollers, 1s. 9d. each, complete. Always deposit your money, no matter who you deal with. Current price list post free. Anything alive bought, sold, or exchanged.
Northern Aviaries, Preston.

HARTZ

Mountain Rollers.

Cocks, 7/6, 8/6, 10/6, 12/6, 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs, 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

SPLENDID HARTZ SINGING COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 7/6, 8/6.

NOTE! These are exactly the same as some of the so-called wonders with fictitious names and no names at all, at 15/- and 20/- each.

The following is but one specimen out of hundreds quite recently to hand:—

"I am sure they could not be got anywhere else at the price."

"21 Hut, I Lines, Curragh Camp, Co. Kildare, Ireland. Jan. 8th, 1907.—The pair of Rollers arrived safe. I am perfectly satisfied. They are good healthy birds, and the cock soon commenced singing his soft sweet roll. I am sure they could not be got anywhere else at the price. I, for one, will always deal where I have got satisfaction for the last two years.—J. Haley to W. Rudd."

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

If you want to know about these beautiful and interesting songsters, send for my book

"PROFITABLE CANARY BREEDING AS PRACTISED IN GERMANY,"

By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and sole owner of copyright, W. Rudd, or from the office of "Cage Birds."

W. RUDD, The Bird Specialist, **NORWICH**

We Take It

YOU ARE LOOKING FOR A ST. ANDREASBERG ROLLER THE MANY AND VARIED CLAIMS MADE ELSEWHERE BEWILDERS YOU; NATURALLY YOU HESITATE TO PURCHASE A BIRD WHICH MAY TURN OUT A ROTTER, ALLOW US TO INTRODUCE THE MOST FAMOUS AND FINEST (RECOGNISED) STRAIN OF ROLLERS IN THE WORLD, viz.:

SCHULZE'S CHAMPION STRAIN.

We have imported these for 30 years with unparalleled success, sale increasing yearly, and, mark you, not through lavish or bragging advertisements; purely recommendations from delighted purchasers. It stands to reason we could not advertise then, for 30 years continually, unless they are all that we claim, with their soft purring rolls, sweet silvery trills, nightingale and woodlark changes, double harp, gong and flute notes, including the jug, jug pipe, beat hollow and waterbubble runs; indeed a continuous mental feast for music lovers. We allow three days' approval for you to judge. Each bird properly and warmly packed for 24 hours' rail or sea journey. We guarantee safe arrival on receipt of P.O. or cheque (or you can deposit cash with Editor). Try a Schulze's songster against any other strain (real or imaginary): we will abide result with confidence. Prices **10/-, 12/- and 15/- each Premier Bandmasters 21/- each.**

Thousands of Testimonials can be inspected here.

No waiting; all birds sent same day as ordered. Cheques or P.O.'s should be crossed and made payable to

Augustus Zache & Co.,
Bird Importers,
218, GT. PORTLAND ST., LONDON, E.C.

Mr. J. Patterson, Cork, Ireland.—"Sir, I think it only right you should know that Roller you sent me won the All Ireland Roller Singing Contest, held here last November. He was a Champion."

This is only one. Send stamp for Catalogue of others and I will send you some real ones just as they have landed. They are coming every post. I guarantee or will wager my **10/6** Rollers are the best that ever comes in England, so why pay such enormous prices. Don't be gulled, send to a reliable firm, 25 years this address. Patronised by all the leading Judges, including Judges Bexson, Payne, Battye, Barnes, Irons, Roe, Vardy Robson, etc., etc. Grand Box Cages, **1/10**. Estd. 1879.

J. SANDIFORD, BIRD SPECIALIST **PRESTON, LANCS.**

SEIFERT AND TRUTE'S

Genuine Rollers are ready; these are all bred in England; fanciers who want to improve their stock should have them; week's approval; 12s. 6d. to £3; hens, cold room kept, 5s.—Corkindale, breeder-trainer, Studley, Warwickshire, England.

St. Andreasberg Rollers.

Trained to perfection under Nightingale, Titlark, Woodlark, etc., daylight and gas light songsters, they give every satisfaction wherever they go, 6s. 6d., 7s. 6d., 8s. 6d. each; hens 2s., two 3s. 9d.; Norwich cock Canaries 6s. 6d., 7s. 6d., 8s. 6d.; hens 4s. 6d., 5s. 6d., 6s. 6d.; Yorkshire cocks 6s. 6d., 7s. 6d.; a few buff Border hens 2s. 6d. each.—Matt. Hopkins, Bird Specialist, 38, 41, Fylde Street, Preston, Lancashire.

I INVITE YOU

to send a post card for my new illustrated list of Canaries, British Birds, and Cages. I offer you the best of birds at reasonable prices. I pay carriage on all my Canaries, and allow you seven days' approval with every bird, taking all risks (if any), and exchanging any bird that does not give you entire satisfaction. That is one reason I sell so many birds. The superior quality of my genuine highly trained Rollers is too well known to need any comment. Note these prices:—Genuine St. Andreasberg cocks, in full song by day and artificial light, 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d. each; pure Roller hens, 2s. 6d., 3s., 3s. 6d. each; for British bred and contest singing Rollers see my illustrated list. For many years I have led the way with untrained Hartz Mountain Rollers, and always have over 500 to select from. These birds are the best, loud and freest songsters obtainable; an ideal working man's bird. Cocks, in full song, by day and gaslight, 5s. 3d., 5s. 9d., 6s. 3d., 6s. 6d. each; matched pairs, for breeding songsters, 7s. 6d., 8s., 8s. 6d.; for further prices of all kinds of birds, see my new illustrated list. It may interest you to know that I received no less than 164 unsolicited testimonials last week, of which I give you samples. These are genuine 1907 unsolicited testimonials:—"Movesby Parks, Whitehaven, January 4th, 1907.—Received the Roller safe. I am very pleased; he is a champion. He commenced to sing on arrival, after a journey of 200 miles. He is just like a little organ. I would not take £2 for him."—J. Mossop to Miss Storey. "Delph Cottage, Brierley Hill, Jan. 4, '07.—I am well satisfied with the bird you sent me. He is a beauty, whistling day and night."—A. Brown to Miss Storey. "18, Barrs Land, Kilsyth, Jan. 1, 1907.—Roller safe to hand, in excellent condition. This is the third I have had from you, and have been dealt with honesty and uprightness in each case. Thanking you for your selection and promptness."—J. Brown to Miss Storey. "2, Mill Lane, Halstead, Jan. 6, '07.—I received birds quite safe, and am well satisfied with them."—G. Johnson to Miss Storey. "10, Wison Cottages, Cork, Jan. 4, '07.—Bird to hand. It is a grand songster after so long a journey. It surprises me how you can sell such a good bird at the price. I am more than pleased."—W. Bickley to Miss Storey. "4, Stanley Street, Bourne, Jan. 5, 1907.—Received the birds in the best of health. Thank you very much for your kind attention. They are five fine birds, and they sing beautifully."—T. Cunnington to Miss Storey. If you want further proof of the quality of my birds, have one on approval, and compare it with any other. Neat and comfortable travelling cages, 2d. each. All birds carriage paid, on seven days' approval.—Miss Storey, Bird, Specialist, Crowle, via Doncaster.

Note My Special Announcement Every Week!

BIRD FANCIERS AND ALL OTHERS INTERESTED IN THE AVIARY WILL DO WELL TO STUDY THE WEEKLY DETAILS IN THE ADVERTISEMENTS OF

E. TAYLOR, Bird Specialist, 3 & 7, Thornton Road, BRADFORD,

WHICH not only form interesting reading, but also point the high road to Unrivalled Merit and Incomparable Value. A little study in this direction will save you much money, and prevent keen disappointment. I give a week's free trial with every bird sold at my establishment. I offer only the best and all-round satisfactory goods. If you are a private buyer, you don't find that you have only began to care for the birds you bought from ME when you discover that they are unhealthy, and that their stay will be but fleeting. If you are a dealer, let me advise you to deal with ME and be well served. I offer you the Finest Varieties on the Market, and my range of choice is almost endless. I am the recognised man in the Bird Trade, a reputation which has not sprung from magic, but from sound level-headed effort, and a complete knowledge of every detail in my business. Your own sound commonsense and good judgment will convince you that such a man is certainly well worthy a trial, and, if found to be what he represents to have the honour of your continued support and confidence. For this week I am offering the following varieties:—

YORKSHIRES. The largest stock in the World of this variety. Remember that my establishment is the recognised Headquarters by Breeders, Fanciers and Dealers. Never in the whole course of my career have I been in a position to give such value. You will save money by purchasing now, instead of delaying your purchase. My Stock includes Cinnamon marks, Green, clear Buffs, and Yellows. Matched pairs from 7/6, 8/6, 10/6, 12/6 upwards, Cocks from 4/6, Hens from 2/6.

PLAINHEAD NORWICH. The true Bullfinch type, wonderful value in Matched Pairs at 8/6, 10/6, 12/6 upwards, Cocks from 5/6, Hens from 3/-.

CRESTED & CRESTBRED NORWICH. Exceptional fine specimens. Kindly state your wants, I can give you satisfaction at a reasonable price. Properly Matched Pairs at 12/6, 15/-, 20/-, 25/-, etc.

PURE LANCASHIRE. Very moderate in price considering quality. Send for Price List.

LIZARDS. Matched Pairs at 8/6, 10/6, 12/6, etc., Cocks from 6/-, Hens from 3/6.

CINNAMONS. Yorkshire and Norwich Type. Cocks from 7/6, Hens from 3/6, Matched Pairs at 10/6, 12/6, 15/-.

SCOTCH FANCIES. Large number of Cocks from 10/6, Matched Pairs from 25/-.

HARTZ MOUNTAIN ROLLERS. The Genuine Seifert Strain at 10/6, 12/6, 15/- and 21/-. German Songsters at 5/6, 6/6. Hartz Rollers at 7/6, 8/6, Hens 1/9, 2/6.

Light and Dark Goldfinch and Canary Mules.
Linnet and Canary Mules.

Sib Bred Hens, and Selected British Goldfinches, Linnets, Bullfinches, etc.

TRAVELLING CAGES charged 3d. extra.

TAYLOR'S SONGSTERDYNE is a certain cure for Coughs, Colds, Asthma and Wheezing in all Cage Birds. Hundreds of testimonials. Price 7d., 1/- and 3/- per bottle, post free.

Recent Letters. READ! READ!

The birds are a credit to your firm.
2, Greenfield Terrace, Bleangarw, near Bridgend, Glam., 9 Jan., 1907.—Received the pair of birds safe and I am highly pleased with them. I must say, although I have bought birds of most of the largest bird dealers in England and have paid three times the price I paid you for them, they were poor value for the money. It is a treat to deal with an honest bird dealer like you, and am sure that the pair of birds you sent me are a credit to your firm. They are good quality and reached me after a long journey in first-class condition. They are cheap at double the price I paid for them.—Thomas Thomas to E. Taylor.

Shall not fail to recommend you.
296, Tyldesley Road, Hindsford, Atherton, 12 Jan., 1907.—Birds arrived Saturday and I am highly pleased with them. They are a pair of grand birds and fully up to expectations. I shall be pleased to refer any interesting purchaser to you, and if at any time I am in need of anything in connection with the Fancy shall, without fail, entrust my order with you.—F. Mort to E. Taylor.

Breeders' Outfit better value than described.
8, Baker Street, St. Helens' 2 Jan., 1907.—I was agreeably surprised with the breeder's outfit and pair of Yorkshires. They are good birds and I consider them better in reality than described in catalogue.—J. Dixon to E. Taylor.

Never saw such value for money.
8, Tram Cottages, Donnybrook Co. Dublin, 12 Jan., 1907.—Birds arrived quite safely and I am very pleased indeed with them. I never saw such value for money. The figure was low but the birds are splendid.—W. Quinn to E. Taylor.

Arrival of birds forty hours after order posted.
1, Lower South View, East Street, Franham, 12 Jan., 1907.—Pleased to tell you that birds arrived quite safely, and myself and brother are very pleased with them. Thanks for your prompt attention to order. It was only about forty hours from the time I posted your letter before the birds arrived, showing that your advertised stock is always on hand.—E. Ranson to E. Taylor.

Real beauty for the money.
117, Green Lane, Birmingham, 12 Jan., 1907.—I have just received bird quite safe, and I am very pleased with it. I have shown it to my friends, and we all think it is a beauty for the money.—R. H. Layton to E. Taylor.

More than pleased.
19, Ligoniel Row, Belfast, Ireland, 11 Jan., 1907.—I am more than pleased with the Canary you have sent me, and also the way it was packed. I got it on Friday, and it was singing all day on Saturday, and has continued ever since.—J. Thompson to E. Taylor.

Just what he wanted.
6, Bellevue Terrace, Penzance, 12 Jan., 1907.—Yorkshire hen safely to hand, and I must thank you very much for sending me such a nice bird; it is just what I wanted. I think you are a very honest man to deal with, and when I want more birds shall send to you.—A. Eddy to E. Taylor.

Charming everybody with its beautiful singing.
409, High Street, Cowdenbeath, 12 Jan., 1907.—The bird arrived in the best of condition and is charming everybody with its beautiful singing. You are certain to get more orders through this bird.—J. Michell to E. Taylor.

More than satisfied with my bargain.
21, Wood Quay, Dublin, 11 Jan., 1907.—Received the Canaries this morning, and I am more than satisfied with my bargain.—P. Miller to E. Taylor.

Best value I ever got from any dealer.
19, Castle Street, Rothesay, 9 Jan., 1907.—Received the yellow Norwich cock, and I must say I am well pleased with it. It is the best value I ever got from any dealer.—H. Derby to E. Taylor.

Always been well satisfied.
5, Mostyn Street, Mid Reddish, Stoekport, 11 Jan., 1907.—I have bought birds from you before, and I have always been well satisfied, and shall always buy from where I am well treated.—J. Sandham to E. Taylor.

Grand pair, and Cage a marvel for money.
C/o R. Ledger, West Horsley, near Leatherhead 9 Jan., 1907.—Bird and cage arrived quite safely, and I am very pleased with them; they are a grand pair of birds, and the cage is a marvel of value, and I shall certainly deal with you in future.—G. Marshall to E. Taylor.

Highly satisfied.
Branch Road, Gildersome, 11 Jan., 1907.—The Canary I bought from you is singing splendidly both night and day. I am highly satisfied. It did 16 changes before it had been at home an hour. I am using your seed and Universal food, which I think cannot be equalled.—J. Ellis to E. Taylor.

Worth double the money.
Glyn Abbey, near Ponyeates, Kidwelly, 9 Jan., 1907.—Birds arrived safely, and I must thank you very much for your honest way of dealing with me and my friend. I shall not fail to recommend you to anyone wanting birds. The birds and cages are worth double the money we paid you for them.—John King to E. Taylor.

Would have to search the world over for a better bird.
Mill Lane, Wainfleet, 11 Jan. 1907.—Now the week's approval is up, I must thank you for the fine Yorkshire cock you sent me; he is a real beauty. I should have to search the world over to find a better at the price. He is splendid type and quality, and I am more than satisfied with him.—T. Bainbridge to E. Taylor.

Did not expect such good birds.
26, Grey Street, Rochdale, 9 Jan., 1907.—Received birds quite safely, and they give me great satisfaction; I did not expect such good birds for the money.—R. Greenhalgh to E. Taylor.

Cheap at the money.
2, Greenside, Townhill, 11 Jan., 1907.—Birds arrived all safe, and they are cheap at the money. I am more than pleased.—P. Auchtirlenio to E Taylor.

Good value for the money.
66, Kempton Road, Liverpool, 12 Jan. 1907.—Received the bird sound and well the day after you sent it, and I think it real good value for the money.—R. Southall to E. Taylor.

Shall not fail to recommend you.
69, Elmwood Street, Burnley, 12 Jan., 1907.—Glad to say I received bird last night, and, allow me to thank you many times for the kind and honest way you have dealt with me. I shall not fail to recommend you to my fellow Fanciers.—J. Guttridge to E. Taylor.

Good value for the money.
26, Manse Sreet, Falkirk, 15 Jan., 1907.—Received Roller cock, and I have had him three days now, and he has sung well; the longer I have him the better he sings, both by daylight and gaslight. I cannot speak too highly of the way you have treated me, and he is good value for the money.—J. Kelso to E. Taylor.

Fine bird for the money.
Ravenscroft, Parkstone, 12 Jan., 1907.—Bird received, and he is a fine bird for the money.—F. Mathew to E. Taylor.

Hen is worth the money of pair.
86, Symonds Street, Swansea, 15 Jan., 1907.—The pair of Norwich Canaries arrived safely. The cock commeneed singing one hour after arrival. I really think the hen is worth the money I paid for the pair.—J. Morris to E. Taylor.

Songsterdyne cures bird of Asthma that has not sung for four months.
22, Waterloo Street, Stoke, Devonport, 15 Jan. 1907.—I am delighted to be able to tell you that a Canary that I value very much was attacked by asthma, and has not sung for four or five months. I read of your Songsterdyne, and can now tell you that before taking more than a few drops he was decidely better, and is now quite cured, and at the present moment is singing quite lustily.—A. E. Bine to E. Taylor.

TAYLOR'S SOFT MOULT CURE. Price 7d., 1/- and 3/- per bottle, post free. Read the following, re Soft Moult Cure.

Perfect Health after being in Moult One Year.

"Dec. 2, 1906.—Many thanks for Soft Moult Cure. It is an absolute remedy for birds in soft moult. It brought one of my birds into perfect health after being in the moult for one year.—C. McGraster to E. Taylor, Ballymagreehan, Newtownards, Ireland."

Full detailed Price List sent post free on application, but if you want my large Descriptive 104-page Catalogue of Cages, Aviaries and all Bird-room Requisites send Two Stamps to cover postage.

E. TAYLOR, BIRD SPECIALIST, 3 & 7, Thornton Rd., Bradford.

YORKSHIRES—continued.

YORKSHIRES.—M. Cooper, 85, Taylor Street, Batley, Yorkshire, wholesale dealer; trade supplied; stamp for reply; retail cocks, from 5s. 6d.; hens, from 2s. 6d.—Established 1890.

A CHANCE of a lifetime.—1905 uneven marked yellow Yorkshire hen, winner two 1sts, special, 35s.; 1906 eye-ticked buff cock, 7in., lovely quality, 20s.; 1906 buff hen, feathered like wax, 12s. 6d.—Procter, Springvale, Haslingden, Lancashire.

I HAVE a few very good birds for sale for breeding purposes, clear, ticked, or variegated, cocks from 6s. upwards, hens from 4s. upwards; cash or deposit; approval; inspection invited.—John Gregson, 99, Vernon Street, Nelson.

MAGNIFICENT deep yellow, four-pointed Yorkshire hen, rare length and type, fit and certain winner in open competition; sacrifice 10s. 6d.; also clear colour-fed buff hen, winner second prize, 7s., worth treble.—Hawkes, Richmond Road, Leytonstone.

ALL my stock of Yorkshires are bred from the noted "Bailey and Swanger's strain." I have about 20 pairs for sale, from 17s. 6d. to £5 a pair, all bred from winners; also a few good Crests and Crest-hreds for sale.—A. A. Pool, 39, Manor Road, Sydenham House, Bishopston, Bristol.

H. T. GRAHAM, 11, Linwood Grove, Longsight, Manchester, has for disposal a few grand typical Yorkshires (see reports of principal shows); pairs or separate; every bird guaranteed my own breeding; can he seen any day after 7 o'clock, or Saturdays.

TWELVE high-class Yorkshire cocks, hest hlood procurahle, splended length type and quality, 6s. each; all colour fed and feathered to perfection; satisfaction guaranteed or money returned; approval or deposit.—Wm. Hodgson, 5, Moorside, Baildon, Yorkshire.

Something about the place where the largest varied collection of Canaries in the World is kept.

A Prosperous Business.

AN AFTERNOON WITH THE NORWICH SPECIALIST.

By C. A. HOUSE.

(Author of "The British Canary," &c.)

Business taking me to Norwich recently, I called upon Mr. W. Rudd, the original Bird Specialist. Inquiring for Mr. Rudd at his private residence in Park Lane, I was asked to wait whilst his people communicated with him by telephone. In a little while he was with me, and after a short chat, I made tracks for the aviaries, which are situated in one of the adjacent roads. These being his own property, are fitted up entirely for the transaction of his now extensive bird business, although there is no suggestion of a shop. As a business man I have, for some considerable time, known that Mr. Rudd's operations must be on a pretty extensive scale, but I hardly thought that the business was of such a mammoth nature as it is.

Entering by the main door of the building, the first room on the ground floor is Mr. Rudd's private office, a nice, cosily furnished room, adorned with oil paintings and photographs of birds and places. The next room is the clerks' office. The next room on the ground floor is a general utility room, used for various purposes, and having a trap-door communication with the rooms above.

Proceeding upstairs, we entered a room which contained between 160 and 170 cages, all built to pattern. This room is tenanted by the better class Norwich, Cinnamons, Mules (Light and Dark), Belgians, Dutch Frills, etc. Many of the birds, of which there were quite 300 in the room, were up to exhibition form, but all were really high-class breeding stock. The next room, similarly fitted, contained mostly Crests, Crestbreds, and Yorkshires, with a fair sprinkling of the breeds mentioned as being in the other room. The Norwich hens here were a clinking good lot. As I looked them through, I spotted quite half-a-dozen that could hold their own in the keenest competition, whilst a very large number of others were suitable for small shows. A feature of the stock at the time of my visit was the large number of Crestbred hens on hand, many of them really good birds, with plenty of dense feather, nice shaped skulls, and neat beaks, not the usual class one expects to find in a dealer's emporium, but birds well fitted to adorn any exhibitor's stud. Amongst the Crests also were a number of birds that could win at ordinary shows. A big surprise in this room also was a team of Borders, and a really good lot, too. Altogether, this chamber contained between 400 and 500 birds.

Leaving the two rooms devoted to the better-class birds, we entered others, in which are stored the cheaper stock. All the varieties mentioned before are here to be found, but they are not kept in one's, two's, and three's, as in the other rooms, but in dozens, and scores, in larger cages, although a number were to be seen in single cages as well, but these were mostly choice German songsters. One of these rooms contains nothing but our native songsters. Goldfinches, Bullfinches, and Linnets, naturally predominate, although did I give the names of all the breeds in the room I should want almost as much space as would be occupied by the British Bird Club's list. In this room are packed and labelled all the birds sent away, and to avoid unnecessary labour and waste of time they are, when packed, passed through a trap-door into the room below.

Each of these rooms is most efficiently ventilated, the fresh air being admitted by a special contrivance affixed to the windows, and all the foul air taken away by an exhaust ventilator fixed in the ceiling. The floors are all covered with linoleum, each is as sweet and clean as any living room. These rooms, as they become exhausted, are "fed" by birds from the Park Lane Aviaries, which formerly contained the whole of Mr. Rudd's stock.

A big trade is done in breeding cages, especially with "Rudd's Perfection Breeding Cage." The great advantage this cage has over others is that it is possible to examine the eggs or young birds without removing the nest from the hangers, or handling either birds or eggs; this, to young and inexperienced breeders is a great boon, and that it is much appreciated is shown by the extensive trade which is done in "Perfection Breeding Cages." The fronts, also, are fitted in a manner totally different to any other cage I have seen. The cardinal principle governing the whole production of "Rudd's Perfection Breeding Cage" has been the combination of utility with simplicity. A better cage for amateurs it would be hard to conceive. Whilst on this matter of cages, I may say that Mr. Rudd supplies cages of all kinds, from the handsome outdoor aviary, costing over a score of golden guineas, to the humble little travelling cage, valued at a few pence.

W. Rudd, Bird Specialist, Norwich, is known, I was going to say, all over the world, but that would hardly be correct, for he has not yet sent any consignments to unexplored regions, such as Central Africa or the North Pole. Yet in the ordinary sense of the word the ramifications of his business are world-wide, and his customers are to be found in Asia, Africa, America, Australia, and Europe. They are also to be found in the princely palace of Royalty, the castle of the peer, the villa of the well-to-do tradesman, and the humbler cottages of our working classes. In fact, Rudd, of Norwich, is known here, there, and everywhere, at home and abroad, on the Continent, and equally in our colonies and dependencies. His business has grown, increased and multiplied because it is conducted on sound lines. "Value for money," is his motto.

Mr. Rudd may truly be termed a pioneer in his own line of business, and I doubt if there is a firm in the trade to-day supplying at first-hand direct from producer to customer so many specialities as does Mr. Rudd. He is no mere middleman only; of course, he does not manufacture all the goods he sells; he could not without he had a pottery, a glass manufactory, a metal foundry, etc., but he does make a number of various kinds of cages, foods, and medicines. These specialities are the outcome of his vast practical experience, gained after more than a quarter of a century's practice. Like all successful business men, Mr. Rudd has been subjected to that most sincere form of flattery—imitation. The first to bring out an Illustrated Guide, he has since seen it copied so closely that in some cases the pages of other guides are complete facsimiles, and the same with his price lists, some competitors having even copied the exact wording as well as the design. Such plagiarism does not say much for the inventive powers of these competitors, but it does say a great deal for their powers of appropriation of other men's ideas and methods. One thing which my interview with Mr. Rudd brought home most forcibly to my mind is the fact that integrity of purpose, combined with excellence of stock, and up-to-date methods of dealing will command success in the bird world as in any other walk of life. Further, Rudd is a name known and respected by Britons at home, by Britons beyond the seas, and by Britain's allies all the world over. If you ask me the reason why, I can best reply—Honesty is his policy.

The above is an extract only from the pen of one whom all the old school well know as a fearless writer, judge and critic. Comment from me is needless.

This Week's Prices of some of the Specimens in Stock. For others see Free List:—

FULLY EXTENDED CURRENT PRICE LIST, and, if required, my POST FREE ILLUSTRATED CATALOGUE and particulars of Bird Club.

(This is something new and not my Amateurs' Guide.)
Entered at Stationers' Hall.
Nothing free ever before in this line seen like it.
Copyists note.

Simply examples, but important facts. For others, see last week's CAGE BIRDS.

NO WONDER YOU DO SUCH A LARGE BUSINESS.

"76, Prudoe Street, North Shields. Jan. 11th, 1907. The Norwich arrived safe. They are a credit to you—splendid shape, nice heads and in pink of condition. I have bought from other dealers but was never more satisfied. No wonder you do such a large business. I shall not forget you in future.—F. Tinsley to W. Rudd."

SEEMED TO KNOW WHAT WE WANTED.

"Sunny Bank Villa, Rhymney. Jan. 11th, 1907. Bird arrived safe and none the worse for journey. Thanks for sending such a nice bird. You seemed to know what we wanted and have given us satisfaction.—J. Williams to W. Rudd."

THE THIRD TIME.

"71, Amity Grove, Raynes Park, Surrey. Jan. 11th, 1907. Yorkshire Cock arrived safe and am highly pleased with it. I have had dealings with you before, and on each occasion you have treated me in an honest and most straightforward way. I shall recommend you to all my friends.—R. F. Chastney to W. Rudd."

BELGIANS, GOOD BIRDS.

"19, Trafalgar Place, Stoke Damerel. Jan. 11th, 1907. The birds arrived safely and appear none the worse for journey. The Belgians are good birds, and the Goldfinch is a fine bird in splendid plumage. Thanks for your prompt attention to my order.—A Langdon to W. Rudd."

A REAL DELIGHT.

"8, Llwynypia Terrace, Llwynypia. Jan. 10th, 1907. The birds arrived here safe. They are a real delight.—J. Holborow to W. Rudd."

"32, South Yorkshire Buildings, Silkstone Common, Nr. Barnsley. Your letter to hand, I want to suit you, as I have found you the most straightforward man I have dealt with.—F. Mitchell to W. Rudd."

"Middlesbro'. Yours to hand with cheque, and we wish to thank you for the most straightforward way in which you have dealt with us. I hope you are satisfied with birds sent.—T. Slater to W. Rudd."

HAVE YOU EVER

tried "EGGERTINE." It is the best, purest, and greatest bone and muscle forming food ever known, as the analytical reports of most eminent authorities prove. It will bring hens into sound and robust condition for breeding as nothing else will. This during the past twenty years has been proved by thousands. It is a genuine egg food made with fresh laid English eggs, with white, of course, included (and NOT foreign preserved yolk of egg) with other valuable properties combined. Tins, post free, 1s. 3d.; large size, 2s. 6d. There is a saving in the larger size.

"ASTHMARINE"

IT SAVES WHERE OTHERS FAIL.

The greatest remedy ever brought before the Fancy, and has the largest sale of any similar article by far. Beware of imitations! For all lung affections it is marvellously efficacious—not a liver burner, but both soothing and healing. Thousands of testimonials received for this article alone. 9d. and 2s. 6d. per bottle, post free. Once used, always kept ready for any sudden attack.

P.S.—"CAGE BIRDS" PICTURE POST CARDS supplied by me and can be strongly recommended as Works of Art.

W. RUDD, THE Bird Specialist, NORWICH.

VARIOUS CANARIES—continued.

ATTERCLIFFE AND DIS. C.B.S.

Members' Annual Show, December 28th and 29th, Vestry Hall, Attercliffe, an ideal room for the purpose, being well-lighted and warm. Entries came up well considering it was the Society's First Show. Altogether about 200 birds were staged, the Yorkshires leading in numbers, whilst the quality all round was excellent. The British section was a good show in itself, some very good specimens being shown. Mr. G. Browning judged Yorkshires, Mr. E. Taylor Norwich, and Mr. J. Bagnall British. They got to work early, and gave every satisfaction. The exhibition was opened by Councillor S. Walker, supported by Councillor S. Hemmings. The Show was well patronised on both days considering the bad weather that prevailed. YORKS. CL. OR TKD. YELL.: 1, Greenfield; 2, 3, 4, vhc, Perry. First nice bird, good wing carriage; second a good yellow, a close runner. BUFF: 1, Greenfield; 2, 3, 4, Perry. Nice stock birds. YORKS. HEN A.V.: 1, 2, 4, Greenfield; 3, c, Durban; vhc, Waldron; hc, Wilkinson. YORKS. UNFLI.: 1, Greenfield; 2, 3, 4, vhc, Perry. NOR. CL. OR TKD. YELL.: 1 2, 3, 4, Gregory. BUFF: 1, 2, 3, 4, Gregory. UNFLI. MKD.: 1, 3, 4, vhc, Gregory; 2, Perry. First a good stock bird; second a rare good type and position, might have done better with a little soap and water. HEN A.V.: 1, 2, 4, Gregory; 3, Justice; vhc, hc, Granger. A.V. NOR. UNFLI.: 1, 2, Perry; 3, 4, Gregory. First and second two grand birds, good type and feather, well deserved their cards. NOVICE, OLD BIRDS, YORKS., CL. OR TKD. YELL.: 1, c, Harrison; 2, 3, Bettinson; 4, Durban; vhc, Waldron; hc, Empson. BUFF: 1, Harrison; 2, 3, Durban; 4, vhc, Goodley; hc, Orbell; c, Empson. Eleven birds, a very good class. UNFLI. MKD.: 1, Goodley; 2, 3, Empson; 4, Durban; vhc, Orbell. NOR. CL. OR TKD. YELL.: 1, 3, Dearden; 2, Richinson; 4, Justice. VAR.: 1, 3, Durban; 2, Granger; 4, Justice. UNFLI. YORKS. CL. YELL.: 1, Goodley; 2, Bettinson; 3, vhc, Waldron; 4, Durban; hc, Orbell; c, Wilkinson. CL. BUFF: 1, 4, Durban; 2, Bettinson; 3, Empson; vhc, Orbell; hc, Goodley. TKD. YELL.: 1, 2, Durban; 3, Waldron; 4, Orbell. BUFF: 1, Bettinson; 2, Durban; 3, Goodley; 4, vhc, Orbell. CL. BUFF: 1 Durban; 2, hc, Granger; 3, 4, Richinson; vhc, Bettinson. TKD. YELL.: 1, 4, Richinson; 2, 3, Durban. First a nice even coloured bird, winner of Ramsden's medal; second a rare good bird, not so fine in colour as first. BUFF: 1, Richinson; 2, Durban; 3, Granger; 4, Justice. MULES A.V.: 1, 2, Gregory; 3, Draycott; 4, Empson. LINNET: 1, 3, vhc, Johnson; 2, Gregory; 4, Draycott. SISKIN, ETC.: 1, vhc, Gregory; 2, 3, hc, Johnson; 4, Justice. A.V. HARD: 1, 4, Justice; 2, Gregory; 3, Orbell. SOFT, LARGE: 1, 3, Durban; 2, 4, Walsh. AMALGAMATION CLASSES: YORKS. CL. OR TKD YELL.: 1, Harrison; 2, Perry; 3, Goodley; vhc, Humphreys. BUFF: 1, Harrison; 2, Goodley. BRIT. A.V. HARD: 1, 2, Humphreys; 3, Shaw; vhc, Bramham; hc, Draycott; c, Gregory. SOFT: 1, 3, vhc, Walsh; 2, Durban; hc, Shaw. First a Tree Creeper, a nice little bird, caused much attraction by its movements; second a Thrush, a beautiful bird, which delighted visitors by its free singing.

LEICESTER C.B.S.

Annual Members' Show, held on Friday, Dec. 28th, at headquarters, Harc and Pheasant Hotel, High Street. Mr. F. Beardall (Hucknall Huthwaite) officiated as judge and gave general satisfaction throughout. Some very good birds were staged, numbering about 130.

JOHN HINDHAUGH & CO.,

NEWCASTLE-ON-TYNE.

The Largest Seed Importers in the North of England. *Established 100 Years.*

The only firm in the district who have imported WHOLE SHIP LOADS direct of Canary Seed, and are thus in direct contact with the source of supply, buying at the lowest possible prices and saving all intermediate expenses. Result—a considerable saving to the purchaser.

Besides making a speciality of the Finest Spanish Seed obtainable, we have Turkish and cheaper Canary Seeds, Linseed, Millet, Genuine Rubsen, English Rape, Maw, Teazle, Niger Seeds.

"HINDHAUGH'S (H) FANCY MIXED" SEED IS THE BEST ON THE MARKET.

SOME SPECIALITIES FOR CAGE-BIRD MEN.

A WONDERFUL BUSINESS.

That this is an "age of enterprise," one is frequently reminded in various ways, even during the course of a more-or-less hum-drum existence as a private individual. Yet it is probable the full force of all that underlies the phrase is known only to the modern business-man, the man who has ever to strive to keep abreast of the times, to see that his commodities meet the needs of the day, that the ideas of the best brains in his own particular line are utilised for the furtherance of that object. We know of no firm in which keener business acumen and a happier insight into the precise wants of its customers are displayed by its "heads," than is the case with Messrs. Spratt's Patent, Ltd., the universal fanciers' providers, of 24 and 25, Fenchurch Street, London, E.C. The progress of this firm has been simply phenomenal, and its world-wide reputation has been built up on the high quality and complete usefulness of the goods put on the market to meet the needs of the fancier. And it is on the sure ground of quality and utility that the reputation of the multitude of commodities with which Messrs. Spratt's name is associated rests to-day.

The extensive nature of the business so ably carried on by this firm, with its ramifications into practically every country on the face of the globe, is difficult to realise. Truly, it is astounding. One gets some idea, however, of the monster output by visiting the headquarters in Fenchurch Street. The huge block of buildings there, which serves as a "hub" for the many branch establishments which the flowing tide of trade has necessitated being opened in all the important cities of the world, is a veritable hive of industry. The range of offices, with its hundreds of clerical occupants, busily engaged with the inevitable "books," and in dealing with the enormous postal side of the business, is a sight in itself. The prompt despatch on the date of receipt of all orders sent through the post has always been a feature on which Messrs. Spratt's have prided themselves, and is one which has given the utmost satisfaction to fanciers residing in the country at a distance from an accredited agent, who, however, may be found in every city or town, almost in every village and hamlet throughout the British Isles.

The showrooms are regular eye-openers. Here every speciality made by the firm may be inspected—and tested, too, if desired. If the visitor be in doubt as to the exact food, medicine, or appliance suited to his wants, the services of a staff of experts, all specialists in some branch or other of the live-stock hobby are at his disposal, and under their able advice his difficulties melt away like the proverbial snows of June. The appliances make a most interesting section, and whether one be looking at a dog-kennel or an aviary, he cannot fail to note how skilfully it has been designed to fill its own particular purpose, nor can he with-hold an expression of admiration at the many ingenious little contrivances with which each is fitted, adding both to the comfort of their intended occupant or occupants, and to their owner, saving the latter both time and labour. Such satisfactory results can only be secured to their customers by a firm like Spratt's Patent, whose "heads" are themselves practical fanciers.

In this department an admirably designed outdoor aviary is to be seen (No. 406 in the catalogue). It is built on most substantial lines, and is perfectly suited to the housing of any species of small birds. The particular stock size is 10 ft. long by 6 ft. wide by 6 ft. high at eaves, by 7 ft. 6 in. high at ridge. The aviary is roofed right over, and made to bolt together in sections, thus ensuring ease of erection, and of removal when necessary. It is constructed of well-seasoned, tongued and grooved matchboards, in sections to fit together with bolts and nuts. The roof is made of sound weather-boards, painted three coats of best oil colour. Flight is constructed of iron frames covered with ½-in. mesh galvanised wire netting. A porch is fitted to front of flight, so that there are two gates, which entirely obviates the risk of birds escaping when flight is entered. The nesting house is fitted with half glass door, and woodwork is stained and varnished. Every detail has been the subject of careful thought, and an outdoor bird-place which very closely approaches perfection is seen as the result. This price of this aviary is £10 10s., carriage paid to purchaser's door. Other sizes and prices will be sent any bird-lover on application.

When the visitors leave the showrooms, maybe they enjoy a peregrination through the warehouses, which comprise room after room, floor on floor, and block on block, crammed from base to ceiling with commodities awaiting despatch to the innumerable branches, agents and customers, of the firm.

Messrs. Spratt's have a strong claim to the suffrage of the bird lover and breeder, whether he keeps his pets in cages or in aviaries, solely for pleasure, or for pleasure and exhibition combined, for they have always been to the fore in meeting his needs. Many valuable foods and medicines owe their inception to them, or were bought and put within reach of fanciers through their enterprise. These we shall deal with in detail later on.

To be the cage-bird man's "guide, philosopher, and friend," they commissioned one of the best-known breeders and fanciers to write a little booklet, which was published under the title of "The Common-sense of Canary and Cage Bird Keeping." This brochure at once met with acceptance, and proved a great help and source of knowledge to hundreds of struggling cage-bird keepers, as is testified by the heap of letters received by the firm from grateful fanciers anxious to record their appreciation. The revised edition has just been published, and now lies before us. The booklet has swollen in bulk far beyond its original bounds, and now numbers some 100 pages of reliable, up-to-date, and thoroughly practical information on the management and breeding of all varieties of Canaries, the popular British and Foreign birds, with chapters on Hybrid-breeding, and the keeping of Doves. Colour-feeding and diseases have also their special sections in the work.

A few extracts will serve to show the plain straightforward style in which it is written, easily understandable by all. Dealing with the Song Canary (the popular Roller), it says:—"Some of these little feathered musicians are executants of considerable ability, being highly educated, and those who have once heard these trained birds perform are not likely to forget their great range, exquisite softness, and wealth of song. The cages of these songsters are generally enclosed in cabinets of wood and glass, the object being to keep them free from all draughts, as their lungs and vocal organs are very delicate. Possessors of ordinary singing birds should take a lesson from this and cease to keep their pets in open wire cages placed in the draughty windows; if birds must be kept in such places let the lower half of their little prisons be shielded from currents of cold air by sheets of glass. The food of the Song Canary should consist Spratt's Mixed Bird Seed (the firm have now a special "Roller Seed Mixture") alternated with Spratt's Cod Liver Oil Cage Bird Food and Spratt's Egg Fruit and Seed Mixture. The little fellows are models of good temper and brimful of joy, which they are ever ready to share with all the household."

Turning to the Crest, we note the following lucid par:—"A Crest is an exceedingly artificial cultivation from the old turn-crown Canary, and consists of an extraordinary development of feathers on the head arranged in circular or oval shape and diverging or radiating from the centre in the form of a composite flower, such as double daisies, dandelions, or zinnias. The individual crest-feathers should be broad, long, and rounded at tips, soft and drooping, falling well over the beak, eyes and poll. A crest cannot be too large, nor too thick, nor too dark, but the radiation must be regular and the centre clearly defined and not crowded with feathers nor open."

In addition to the more popular members of the Canary family, the London Fancy, Lizard and Scotch, Belgian, Cinnamon-Crest, and others receive adequate attention. This valuable booklet will be sent post free to all readers who write direct to the firm for same and mention CAGE BIRDS when applying, and we advise everyone to secure a copy at once, prior to the breeding season now so near at hand; a postcard will do.

To aid in the keeping and successful breeding of birds, Messrs. Spratt's have put up the following specialities, the suitability and superlative quality of which has secured for them a wonderful sale. MIXED SEEDS, in 1d., 1½d., 2d., 3d., 4d., and 6d. packets, and 1s. tins; post paid 2½d., 3½d., 5d., 6d., 8d., 11d. and 1s. 6d. respectively. CANARY SEED MIXTURE (WITH EGG AND FRUIT), in 2d., 4d., and 6d. packets, post paid 5d., 8d., and 11d.; also in 1s. tins, post paid 1s. 6d. Both the above suit all Canaries admirably, and are a boon to those who keep pets songsters. FINCH MIXTURE.—Prices and packages same as Mixed Seeds. RED MITE KILLER, per bottle 6d., 1s., and 2s. 6d.; post paid 8d., 1s. 3d., and 3s. QUINELLA (Registered), for Inflammation of Stomach, per box 3d., 6d., and 1s.; post paid 4d., 7d., and 1s. 1d. CHEMICAL FOOD, per bottle 6d., 1s., and 2s.; post paid 9d., 1s. 4d. and 2s. 5d. PARROT TONIC, per bottle 6d.; post paid 7½d. "PENNAKURA," for destroying external parasites and preventing feather-eating in Cage Birds, per bottle 3d.; post paid 4d. To ensure getting the genuine articles it should be noted that all Biscuits are branded with the firm's name and Trade mark ("X"), and Meals, Seeds. Bird-foods, Sand, etc., are packed in original sealed bags and packets. Carefully note the address:—Messrs. Spratt's Patent, Ltd., 24 and 25, Fenchurch Street, London, E.C.

COCKERMOUTH.

Second Annual Exhibition, Jan. 11th and 12th. The room was well lighted and commodious, and the birds were well staged. Mr. Litt, the Hon. Sec., and a hard-working committee had everything well in hand, and the success of the show was largely attributable to their efforts. Mr. W. Mundell (Bradford) judged the Canary and For. section, and Mr. Dixon (Wigton) Mules and British.

NOR. (13): 1, Younghusband, buff rich colour, feathered like wax, good head and chest, grand wing carriage, short tail; 2, Wilson, buff, blaze of colour, full of quality, good head and wings, nice type; 3, Younghusband, yell., rich colour, full of quality, good head, round chest, good wing carriage, chubby; 4, Younghusband, buff, rich colour, full of quality, good head; vhc, hc, Ostle; hc, J. S. Wilson. HENS (9): 1, Wilson, yellow, var. LIVERPOOL & DIS. C.B. SOCIETIES.

Amalgamated Show of the Liverpool and Dis. C. B. Societies held their Second Annual Show in St. Mary's Schools on New Year's Day. Mr. A. Wellings and A. Hirst judged, and gave general satisfaction. The entries did not come up to last year, but the quality of birds was good, and some noted winners were staged.

We have received a statement of accounts of the Third Annual Show of the Hayle F.A., which proves to be a most satisfactory document. Receipts totalled £104, and expenditure £99, which leaves a balance on the right side of £5. Entry fees reached the substantial sum of £52 7s. 6d., and no less than £56 14s. was paid out in prize-money.

The Treasurer of the Thirsk Fanciers' Society reports an excellent season. The balance sheet showing credit at bank to the amount of £10 7s. 11d.

OBITUARY.

MR. LUKE BIGGINS.
Death of a Veteran Blaydon Fancier.

There died at Blaydon last Wednesday, Jan. 9th, a well-known local fancier in the person of Mr. Luke Biggins, at the ripe old age of 79. He began breeding birds when only nine years of age, by pairing a Linnet and Canary, his trap cage being altered to answer the purpose of a breeding cage, he not being able to afford a better one. From this small beginning he went forward until manhood, when he became widely known as a breeder of good Norwich. Later he became fascinated by the Crest, and was not long in getting some good stock birds into his room. Not given much to exhibiting, he nevertheless bred some good birds, notably a Crestbred, shown with success by the late Mr. Burns, of Newcastle. this bird being father to that gentleman's big yellow winner. There was also the clear body dark Crest, shown so successfully by Mr. Geo. Stobart, of Newcastle, which, after winning at Manchester, changed hands at a good figure, and, I believe, proved to be worth what was paid for it. Mr. Biggins in his day was a tall fine-looking man, and of a kindly nature, and although somewhat bent with age, his mental faculties were more like those of a young man. His memory was particularly good. It was a mere nothing for him to refer back 50 years in his breeding of birds. The following will show how enthusiastic he was to the end. On Jan. 2nd I called to see him. He asked me into the bird-room; there he had 42 Canaries, and two Goldies, for he never forgot his early muling days. After telling me how he intended pairing next season, he pointed to a Norwich hen he obtained from a brother of mine, saying, "Do you think he has a cock related to her?" his idea being to have a nest of Canaries first round before putting her to the Goldie, with a view to getting some muling hens for the following season. But as Burns has it: "The best laid schemes o' mice and men gang aft a'gley." Although he looked in good health and spirits, he took to his bed next day with an attack of bronchitis, and passed peacefully away a week that day. The interment took place on the 12th, at Blaydon Cemetery. Amongst the fanciers present, we noticed Messrs. Daglish, Hands, Davison, Vallans, McGuinness, Robson, Tyson, Morgan, Twedell, Dobson and Son, of Blaydon. J. Thompson, of Gateshead, and Mr. D. Scott, of Benwell.—D. A. OGILVIE (Blaydon).

Mr. JOHN HAND (Stoke-on-Trent).

Mr. J. Pitchford writes:—I regret to inform you of the death of Mr. John Hand, the esteemed President of the Potteries C.B.A., which took place at his residence, the Red Lion Hotel, Stoke-on-Trent, on Dec. 31st last. The deceased gentleman was only ill a few days, but pneumonia developed, and quickly proved fatal. Of a kind and generous disposition, and a true fancier, he was much respected by all local fanciers. He leaves a widow and five children, who have the deepest sympathy of all who know them.

MR. CHARLES TWEED (Bathgate).

Mr. D. J. Gardner (Bathgate) writes:—It is with the deepest regret that we have to announce the death of Mr. Charles Tweed, who passed away peacefully on Friday last, on the eve of Bathgate Show, of which he was a former President. Charlie was of a genial disposition, and had many friends, and no foes. Since the commencement of Bathgate Show he took a keen interest in same, and did much to make the show what it is to-day, one of the foremost in Scotland. He was always the same, winning or losing. During his last hours he was continually inquiring about the Show, and was greatly pleased to learn that it was to be a record one. Borders were his favourites, but he also bred some fine Mules and good Finches. He was sadly missed at the show on Saturday, as he had a kindly smile for everyone, and many of the visitors, on hearing of his demise, were deeply touched. The greatest sympathy is extended to his widow and two young sons. He was 36 years of age.

LINNET CONTEST AT LEEDS.

The quality Linnet singing brigade mustered in good numbers to witness the usual week-end contest at the Old Bird House, King's Head, Shannon Street, Leeds, and were treated to some extraordinary Linnet singing. Sixteen selected birds competed for three good prizes given by the landlord, Mr. J. Booth. Result: 1st prize, C. Whitaker; 2nd, J. Whelan; 3rd, Sam Hardcastle. Judges, J. Clark, C. Cooper, who said jointly that it was a long time since they had heard such quality singing. Mr. C Whitaker, the owner of the winner, is willing to match his bird, contest time, 10 minutes, to sing any bird in Leeds, nobody barred, first come first served, for £1 upwards. Anybody wishing to make a match should apply King's Head, Shannon Street, off York Road, Leeds. N.B. Our Linnet and Canary Clubs are now open to new members. Apply, J. Melia, 14, Elm Street, off York Road, Leeds.—J. MELIA, Hon. Sec., T. STEAD, Assist. Sec.

ILLUSTRATED IDEAS

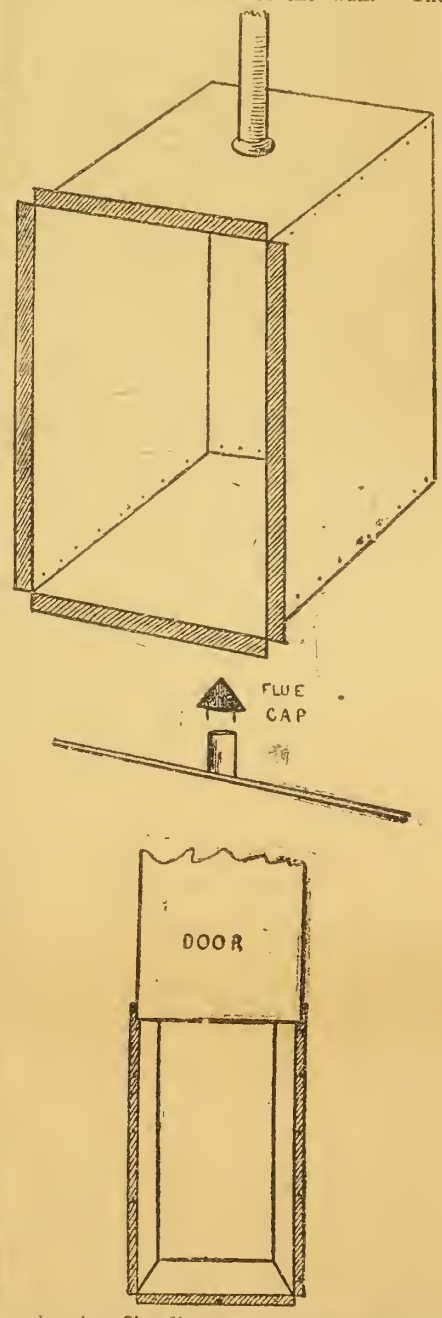
Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 68.

STOVE FOR OUTDOOR BIRD ROOM

Sent by E. Hawkes, 23, Conway Road, Plumstead, Kent.

The enclosed sketch is that of a stove which I made to heat my bird-shed. It can be made to suit size of lamp or gas jet, the size of my own stove being 2ft. 6in. by 1ft. by 1ft. The stove is put in front (outside) of the shed, and the 1in. flange round the front face (shaded in sketch) laps over and is screwed to the outside of the wall. The



smoke pipe, 2in. diameter, is inside the shed, and passes up through the roof, having a wind cap upon the top, as shown. The lamp, or gas jet, is put into the stove from the outside, and the opening is closed by a sliding sheet-iron door. By using this stove no smoke or fumes can get into bird shed, because it is open only to the outside. The whole is made of sheet-iron, riveted together. The cost of my stove was:—Sheet-iron (6ft. by 2ft. 6in.) 2s. 4d.; length of 2ins. piping 1s. 6d. Total 3s. 10d.

The Editor *is always glad to receive and consider suitable* **contributions,** *whether articles, sketches, or photographs. Provided an addressed envelope, sufficiently stamped, accompanies same, every effort will be made to return rejected contributions promptly, but he does not in any case hold himself responsible for their safety.*

All matter *intended for publication must be written or typed on one side of paper only.*

PRIZE MONEY PAID.

Kilmarnock.
Scottish National.

ENTRIES CLOSE.

Jan. 20—Calow—Messrs. Parker & Rhodes.
Jan. 25—Thirsk—Messrs. Bell & Long, Ingramgate.

SHOW DATES FIXED.

*Feb. 15 to 19, 1907.—**Great National (Crystal Palace)** (J.H.P., W.M., H.T.T.C., S.C., S.R.C., J.F.D., J.D., T.H., J.F.H., A.R., R.R., J.R., J.H.R., R.H., W.S., G.E.W.)
Oct. 11 and 12, 1907—**Great Harwood.**
Nov 1 and 2, 1907—**Mansfield.**
Nov. 9, 1907—**Boness (Nottingham)** see advertisement.
Nov. 15 and 16, 1907.—**Leeds** (C.B.U.)
Nov. 20 and 21, 1907.—**Margate** (J.R.)

GATESHEAD REPORT.—German Songsters: My birds were first and special, also hc; it is a grand report of a show, and one that should please every body.—E. Hawthorn (Llandrindod).

Mr. Allan Loggie, Secretary Muirkirk O.S., writes:—All exhibitors present from the east at Muirkirk Show, on 5th January, will get their birds lifted to catch the 3.40 p.m. train.

THE GROWTH OF CAGE BIRDS.

A RHYMING COMPETITION.

On the front page of our supplement this week will be found a "Picture Without Words." It illustrates by a combined effort of photographer and artist the progress and increase in CAGE BIRDS from Volume 1 to Volume 9. A prize of 20s. will be given to the reader who summarises in the happiest manner the gradual Rise and Development of CAGE BIRDS from its "nesting days" to the present time.

The said summary must be contained in a rhyme complete or verse to be written on the back of an ordinary post card. (Our own preferred—Managerial Side Whisper.) The picture should serve as a source of inspiration. All postcards should reach us by the latest Feb. 16th, 1907.

MICE

IN THE BIRD ROOM.

Rats, Mice, Field Mice, &c.,

EXTERMINATED BY DANYSZ VIRUS

Discovered and Prepared by
Dr. DANYSZ of the Pasteur Institute, Paris.

When affected with the Virus the Vermin leave their usual haunts and die in the open. The remedy is harmless to other animals and human beings and may be used everywhere with absolute safety.

For MICE only, 1/- per tube.
RATS & MICE, 2/6 ,,
Post free with full Particulars and Testimonials from

DANYSZ VIRUS Ltd. (Box 74)
52, Leadenhall St., London, E.C.

A Sparrow with white flight feathers and a white tail comes into our yards regularly, writes Mr. B. Jones (Kidsgrove).

Mr. W. Ambrose writes:—I have removed to 74, Foulden Road, Stoke Newington, N. I have disposed of all birds and cages.

I like "Bird World" very much—it is so nicely got-up—and wish it every success.—Mrs. E. WARREN, Vernon (Toddington).

The new address of J. and H. Hanley, late of 12, Tyndale's Place, Islington, is 85, Halton Road, Canonbury, N.

Mr. G. Leech has removed from Cross Street to larger and more commodious premises. His address now is Cross Aviaries, King Street, Dudley.—(Advt.)

The buff Norwich cock, shown on to-day's cover, has won the Walthamstow Cup two years in succession, and has also secured 1sts at the L.C.B.A., Bristol, Cardiff, S. W. London, etc., this season.

An order for twelve postcards of Lizards has come to hand with no name and address attached. If the sender will forward these necessary particulars, the postcards will be sent by return of post.

"Kindly thank all applicants for Goldfinches advertised in last week's CAGE BIRDS. I find it impossible to answer. I have over 50 now—this proves that the paper to advertise in is CAGE BIRDS."—J. W. SALMONS, Towcester.

Mr. G. P. Pickering, of Hull, writes to tell us of a Linnet in his possession which has been caged for over 21 years. This veteran is yet hale and hearty, and is still able to awaken admiration, if not envy, in the breasts of fanciers and judges.

Please let all enquirers know that I have sold my hen Gouldian advertised in "C.B." last week; too numerous for me to reply to each individually. Thanks for such a medium as "C.B."—JOHN THOMPSON (Hucknall Huthwaite).

"Will you kindly thank all those who replied to my advertisement in CAGE BIRDS, January 5th. The letters were too many for me to reply to all; I could have sold 50 if I had had them, which speaks very well for CAGE BIRDS as an advertising medium."—F. BAILEY (Hull).

The points specials at Bathgate were given as follow:—Most points over Show, R. Bald, with 52 points; 2nd most points over Show, A. Gilchrist with 33; points, Norwich, A. Roberts with 25 points; Border, A. Gilchrist, with 33 points; British Mule and Foreign, R. Bald, with 52 points. Bathgate is fully reported in our Scottish Edition.

At Walthamstow Show the Goldfinch Class was one of the best ever seen in the London suburbs, no less than thirty-five facing Mr. Norman, who had a most difficult task in dividing the contestants. Linnets and Bullfinches were a hot lot. Our artist-in-chief evidently has the confidence of the Finch fraternity.

Great National Cagebird Show, Crystal Palace, 1907.—R. A. Newley begs to announce that he will have a fine exhibition of bird cages and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visiting is respectfully invited. Address all communications to R. A. Newley, 24, Stockwell Green, London, S.W.—(Advt.)

The Expert Trade.

Foreign orders from Holland, Natal, Queensland (Australia), India, Cape Colony, Calabar (India), Bombay (India), Sydney (Australia), United States, Mass. (U.S.A.), Constantinople, Barbados, have been received by Mr. Rudd, of Norwich, during the month of January, 1907. Nothing provides more convincing testimony of the marvellous growth of this Norwich specialist's business than his foreign trade development.

Another Birthday Number.

Other papers besides CAGE BIRDS have their birthdays. Synchronising almost with our own the "Tribune," one of the latest and brightest of London's newspapers, is also celebrating a birthday, having just completed a lusty first year of life with every prospect of a long and prosperous career. Healthy in tone, virile in management, and prodigal of good things, the "Tribune" will take equal rank with any other London daily, without exception. The air of reliability pervading its news columns is refreshing in these days of irresponsible chatter-mongering and that it may have many more birthdays and continue to delight us with its generous literary fare is CAGE BIRDS' sincere wish.

In our last issue Mr. F. A. Lester's replies to correspondents, re Rollers, were, by a printer's error, attributed to Mr. Patterson.

The name of Mr. J. H. Roe (Derby) has to be added to the list of sufferers from influenza.

"Just a line to say I have had wonderful results from my advertisement in CAGE BIRDS, and to ask you to correct my name in article on "The Roller Canary." It is Walter, not William Whittaker."—WALTER WHITTAKER.

"Will you kindly thank, on my behalf, through your columns, the gentlemen who replied to my advertisement—the enquiries are too numerous to answer."—G. W. ARMES, Waltham Abbey.

Mrs. W. White writes:—I regret to have to write and tell you that my prize-winning Yellowhammer, winner of 1st Portsmouth, 2nd Winchester, 3rd Bournemouth this year, was dead in its cage when it reached me from Walthamstow Show on Saturday, Jan. 12th.

Mr. C. Goodall, a well-known and hard-working fancier, of Great Horton, has left the county of broad acres for America. In order to show their appreciation of his past services, Yorkshire fanciers contributed towards a handsome Gladstone bag, which was presented to Mr. Goodall with many expressions of good-will.

Mr. James Winter, secretary Scottish National C.B.S., writes:—"I wish to tender my sincere thanks for the truly grand report you gave of our Show in your valuable paper, which is highly appreciated by all connected with the Society. Kindly announce that all prize and sales money in connection with our late Show has now been paid. Anyone missed should apply at once to me."

During the past show season we have been fortunate enough to secure the services of Mr. T. S. Kirkpatrick, the well-known fancier photographer of 3, Tib Lane, Cross Street, Manchester, and his highly successful photographic Show supplements have not only secured a fine measure of approval, but acted as stimulants to rival enterprises to endeavour to surpass his work; but, so far, they have signally failed. Mr. Kirkpatrick's life-like portraits remain the best of their kind.

Important to New Societies.

Will the Secretary of any Society that was not represented in CAGE BIRDS ANNUAL (last year) kindly send us the correct name of the Society and the name and address of Secretary, also particulars of membership.

Rare Foreign Finches.

Some small Finches lately reached Mr. C. A. Luer, the well-known foreign bird dealer, of Leman Street, London, E., which in all his wide experience he had never before seen, so, naturally, could not find a name for. They came from South Africa. A visit to the Natural History Museum disclosed them to be the Rufus-backed Mannakin. But it was only after great search among the collection of dried skins kept at that institution that their identity was established.

Genuine Spanish; Free Gift.

The advantages derived through feeding one's birds on really genuine Spanish canary seed are known to every seasoned bird-keeper. The difficulty is: Where can the genuine Spanish be obtained? Readers will note that Messrs. Hindhaugh, of 38, Cloth Market, Newcastle-on-Tyne, the well-known seed importers, offer a special shipment in our advertisement columns this week. What is more, a sample will be sent free to all who apply to them for same, and mention CAGE BIRDS when doing so; a postcard is sufficient.

No Charge.

At the London and Counties' Pair Show on Saturday, specimen copies of CAGE BIRDS were in great demand, and the little printed tickets which we dispatch with specimens, inviting visitors to take a copy from the heap free of charge, were also in great request—for the purposes of the practical joker. Two humorously-inclined young gentlemen respectively "chevied" each other for some considerable time upon walking round with these "free" cards attached to their coat collars, serenely oblivious of the fact that this ornament hung suspended to their own. One of the members, we hear, coming from the Show, walked several hundred yards through one of the busiest London thoroughfares with a CAGE BIRDS poster hanging in magnificent style on his back. This unconsciousness of evil on the part of certain London and County members was the effect, doubtless, of great absorption in the cage bird fancy.

Accept my heartiest congratulations on the most excellent coloured plate this week. It is truly beautiful, and second to none that has ever been published. I shall certainly have it framed.—S. W. Birchley (Churchdown).

"In all Probability."

Speaking of the wingless birds of New Zealand, an American naturalist, quoted by the "New York Herald," says that in all probability the Kakapo, or great ground Parrot, once had the use of its wings, but, being a grass seed feeder and finding no enemies on the ground, it, in a process of evolution, lost its ability to fly, though able to run very swiftly.

Can it?

Let's have quality and substance, exclaims "J.E.N.," in the "Eastern Mail." A young and energetic judge of Canaries remarked the other day to an experienced Plainhead breeder—"Colour can be bought for eighteenpence, but quality and substance cannot be purchased for as many shillings." Let these words be borne in mind by all lovers of the breeding of Norwich Plainhead Canaries—the hardest class of cage bird to judge.

Birds in Transit.

Dr. Galloway, of Aberdeen, reports that a cinnamon Linnet was sent to him from Luton on Dec. 28th last, by a Mr. J. Clifton, at 4.30 p.m. It arrived here, Jan. 1st, he writes, at 1 a.m., having been caught in the severe snowstorm of the past few days. Strange to say, the bird is alive and well, a fact which speaks volumes for the careful attention paid to it by the railway companies in an exceptionally trying time. I was glad to find it the rule at Aberdeen to water and feed all birds delayed by the storm.

Sociable Novocastrians.

The Newcastle Good Intent C.B.S. intend to hold a Social at the Co-operative Hall, Dain Crook, on Tuesday, February 5th. Tea at 7.30 p.m., followed by music, etc. Tickets, ladies or gentlemen, 1s. 6d. each. A presentation will also be made to Mrs. Curry and Mrs. Hutchinson, in recognition of their and their husbands efforts in making our first show so great a success. Subscriptions to the testimonial may be given to any of the Committee, from whom tickets for Social may also be had.—T. C. CRAWHALL, Hon. Treasurer, 121, St. George's Terrace.

Birds Fed on Aniline Dyes.

According to a writer in the "Daily Mail," colouring birds artificially by feeding them with aniline dyes is actually being done now-a-days with Canaries, Parrots, and even chickens. "For this purpose," says the writer, "the dyes are either mixed in the dough of ordinary bread before baking, or else disguised in 'cottage cheese'—either being a readily-assimilated form of food. Baking takes away the bitter taste of such coal-tar products, and the crumbs are freely eaten." This will be news to a great many readers of CAGE BIRDS.

REVIEWS OF SCHEDULES.

Liverpool Green Canary Association.—Members' show. January 26th. Judge, Mr. H. W. Battye. Forty-seven classes. Yorks. Greens 4, Nor. Greens 4; (the cup, etc., classes): Yorks. Green 4. Nor. Green 4, Yorks. Cl., etc. 8, Nor. 5, Bor. 5, A.O.V. 1, Sell 3. Hyb. 1, Brit. 8. Fee 1s., to be divided into three money prizes. Valuable cash and other spls. Entries close January 21st to S. HADWIN, 28, Pembroke Place, Liverpool.

Rugby.—January 30th and 31st. Judge, Mr. G. F. Russell. Thirteen classes. Nor. 4, Yorks. 1, A.O.V. 1, Mule 1, For. 1, Brit. 3, Sell 2. Prizes 10s., 5s., 2s. 6d. Fee 1s. 6d. Entries close January 23rd to H. TARBOX, Westfield Cottage, Dunchurch Road, Rugby.

Thirsk (N.B.)—February 1st. Judge, T. J. Ambrose. Six classes. A.V. Can. 3, Novice 1, Sell 1, Brit. 1. Prizes 8s., 4s., 2s., card. Fee 1s. Entries close January 25th to J. BELL and Lone, Ingramgate, Thirsk.

LIVERPOOL B.B.A.

Report of general meeting of the Liverpool Bird Breeders' Association, held on January 10th, 1907, Mr. A. Thompson in the chair. After ordinary business, the following officers were elected: President, J. Williams, Esq.; Vice-Presidents, J. Walker, Esq., A. Coffey, Esq., G. B. Daniels, Esq., H. McMurtry, Esq., T. Rowlands, Esq., T. Wardale, Esq., T. Ryno, Esq., W. Thompson, Esq., W. Hales, Esq.; Chairman, F. Handley, Esq.; Vice-Chairman, J. Davie, Esq.; Secretary, H. Barratt, Esq.; Assistant Sec., T. Wilson, Esq.; Treasurer, J. W. Metcalf, Esq.; Auditors, R. Irwin, Esq., C Hillmen, Esq.; Committee, Messrs. Doughty, Isaac, Bratherton, Dixon, Hules, Nimmo, Bell, Hayden. Disqualification at November Show:—It was passed unanimously after full discussion, "That this meeting do exonerate all members who were disqualified at the old show by Mr. Mundell for having trimmed or cut the feathers on green birds, such feathers known as square feathers. The members are satisfied the birds were honestly shown, and that the square feathers are a natural growth on Green Birds," and that a copy of this resolution be sent to the Green Canary Association, as the members disqualified belonged to the G.C.A. I was instructed to ask you to give this resolution prominence, so that all who read of the disqualification may read this.—H. BARRATT, Sec.

SUPPLEMENT TO THE
BIRTHDAY NUMBER OF

CAGE BIRDS & BIRD WORLD

Even the Wise Owl Wonders!

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

A NEW FORM OF BIRD-CAGE

BY
DR E. T. MARTIN

AS an introduction to this short article on my favourite form of bird-cage, permit me to make a few remarks on the hobby of bird-keeping and bird-cage making in general.

CAGE-MAKING AS A BRAIN TONIC.

The brain of man is not like a sponge, from which thought can be squeezed as is water from the latter, but it is rather like a complicated house of business, having many departments, each department being concerned chiefly with its own exclusive duties; *e.g.*, there are departments of the brain for written language and for spoken language, others for hearing, seeing, for controlling the muscles of the limbs and other parts of the body, and so on. Consequently one part of the brain may be tired by its duties while another part may still be comparatively fresh.

What has all this to do with cages and cage-birds? A good deal, for it enters into the very origin of the hobby. Tired with the daily round of duty, certain of the brain cells which have been exercised with one form of work can be at rest while other cells come into pleasurable activity over the bird-keeping hobby. It is here that I think one of the chief departments of that hobby serves a useful purpose: I mean that of cage-making.

I can confidently recommend cage-making, from personal experience, as a real good tonic for the sedentary man, for the brain-worker, and for those who do not in their daily work have to use the muscles of the arms much. To meet various requirements and circumstances, cages are needed of all sorts; and here ingenuity comes into play, and the faculty of invention. It thus forms a good training for boys. And lastly, it not only diminishes the cost of the hobby, but adds considerably to its interest and pleasure.

AN IDEAL COMPOSITE CAGE.

I am now about to describe a form of cage which I have myself devised, and for above a year have found of the greatest convenience. I think it is no small advantage to possess cages of a pattern which are capable of serving as box-cages, breeding-cages (single, double, or treble), or as flight-cages of any length; a form of cage from which birds can easily be run into show or other cages, one which is very accessible for cleaning purposes, which renders the capture of a bird easy from out a great number of other birds, and which permits in the breeding season of the young being readily divided from the old ones. Further, if the owner wish, it can be cleansed and baked while, I had almost said, the birds are still in it; at any rate, while they are still occupying a part of it.

It seems to me rather an opportune moment to bring a new form of cage before bird fanciers, for now is the time to set to work and get a few made, while the duties of the breeding season do not press upon one.

MAINLY EXPLANATORY.

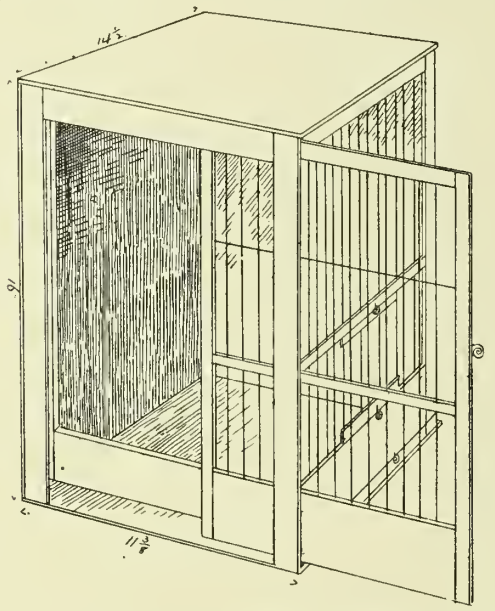
Calculate, then, how much wood you will require, and order so many feet of yellow pine, three-eighths thick and 11 ins. wide. Make the cage 14½ ins. long and 16 ins. high, and when the back is nailed on it will be 11⅜ ins. from front to back, all outside measurements. This 11 in. inside measurement is a nice depth for a cage (birds should not be stinted of a few cubic inches of space), while the height, 16 ins., just permits of the back being formed of one board and a half with a trifle left over for planing down.

Now, if you were to make up this cage by nailing and glueing the top, back, sides and bottom together, and adding a wire front, you would, of course, have just an ordinary box-cage. But this is not our object; we want it not only to be a box-cage when we so require it, but also to from part of a breeding-cage, or flight-cage, when we so wish. For this purpose the sides must not be fixed, but must be movable; they must consist of slides capable of being inserted or withdrawn at pleasure.

To prepare the cage for the slides, fix four uprights, 1¼ ins. wide, at each end of the cage, leaving a space of half-an-inch between them for the easy play of the three-eighths of an inch thick slides. Join these uprights at the top by 1¼ in. strips and the two inner uprights at the bottom by a 2½ in. strip. It is better for cleaning purposes not to join the two outer uprights at the bottom by a cross-piece, but to leave them open. All this will be made clear by the accompanying diagram.

ELASTIC AND CONVENIENT.

You will now see, by the sketch, that mine is a system of sectional cages. You may build up, side by side, any number together, which, when the middle slides are all withdrawn, will leave a flight cage as long, if you so desire it, as the side of your house. Yet by inserting a slide here and there you may at any time separate and catch any particular bird you wish, and lift it down, cage and all.



Dr. Martin's Sectional Cage.

It is advisable to have four slides for each cage, two wired and two solid. Then at any moment you have your choice whether you will use it as a closed box-cage or as a cage having one, or both, ends wired.

The wired fronts are better fixed. There is no object gained in having them loose when you have loose ends; cleaning can be carried on in the easiest possible manner when you take out the two end slides.

The sand-trays should be made entirely of zinc; and if the amateur has not mastered the art of soldering, he had better employ a plumber or tinsmith to construct them for him. When being cleaned, after first being emptied and then scraped with the cage-trowel, a little water (hot, if you like) should be run into them, and they should be brushed with a stiff, straight bristle-brush, such as housewives use for cleansing saucepans.

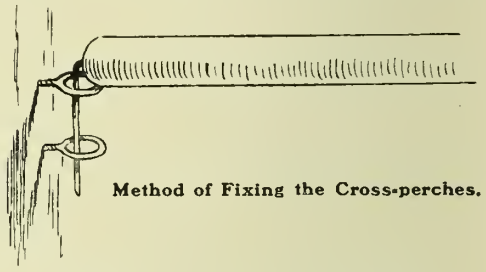
With regard to the perches, two from front to back in the middle of the cage, and one from side to side at the bottom, for the head-holes, are sufficient. This bottom perch is always a trouble—a trouble to keep clean, and a trouble to fix. The handiest method I have found for fixing it is the following:—Screw two little brass eyelets one above the other at each side of the cage, in the bottom cross-pieces, and at each end of the perch insert a piece of wire bent at right angles. The loose arm of this piece of wire is then dropped into the evelets. The accompanying little diagram will make it clear.

POSSIBLE OBJECTIONS CONSIDERED.

It now only remains to allude to a possible objection or two which I fancy I hear made against this fashion of cage. The first is that concerning the trouble, time and expense of its making. With regard to trouble: this is a word which does not enter into the vocabulary of the true bird-fancier. Work there may be, but not trouble. As for the time and expense, I am of opinion that this is a form of cage which in the end will effect a saving of both.

The second objection is that this style of cage may encourage the production of that nightmare of the Canary fancier—the red-mite. But for those who would like to give these cages a trial, I will say that I have never seen a red-mite for three years, and in that time have kept and reared a good many Canaries; have not seen, in fact, a red-mite even in the nest-pans. On second thought, I am not quite sure if this is correct: I believe I have seen a few, on freshly-purchased birds, but they (the red-mites) bade us a hasty adieu.

How have we managed this? I have no doubt that ordinary cleanliness, fresh air and sunshine, have had something to do with it. But in the main it is due undoubtedly to the use of a fluid which I saw mentioned in CAGE BIRDS just when "our paper" was commencing its illustrious career.



Method of Fixing the Cross-perches.

RED-MITE EXTERMINATED.

Above three years ago one of its correspondents, to whom I have since felt very much obliged, mentioned that as a preservative against red-mite he had found nothing to equal "Carbolineum Avenarius," a fluid sold by Messrs. C. A. Peters & Co., of London, Liverpool, and Derby. I purchased some then and there, and have used it ever since, with the result stated above.

This preventative stains the wood brown, and I believe the best plan is to paint the entire cage with it—inside and out, slides, wires, the ends of the perches and all. It should be put on hot, and I have sometimes mixed about a quarter of common terebene, or of ordinary turpentine with it; it seems then to dry a little more quickly. Paint your new cages with it in an out-house, and leave them there for three or four days, or until they appear dry. Then, when you have an opportunity, stand them in front of a good fire for a few hours, afterwards letting them stand by for three or four weeks, by which time the birds may be put in.

In the breeding season rub some of the fluid round the nest-pans; leave them to dry for an hour or two, roast them for a while in the oven, and when cool they will be ready for use.

I conclude this short contribution to our hobby with the hope that it may be of service to some fellow-fanciers.

HYBRID GUESSING COMPETITION.

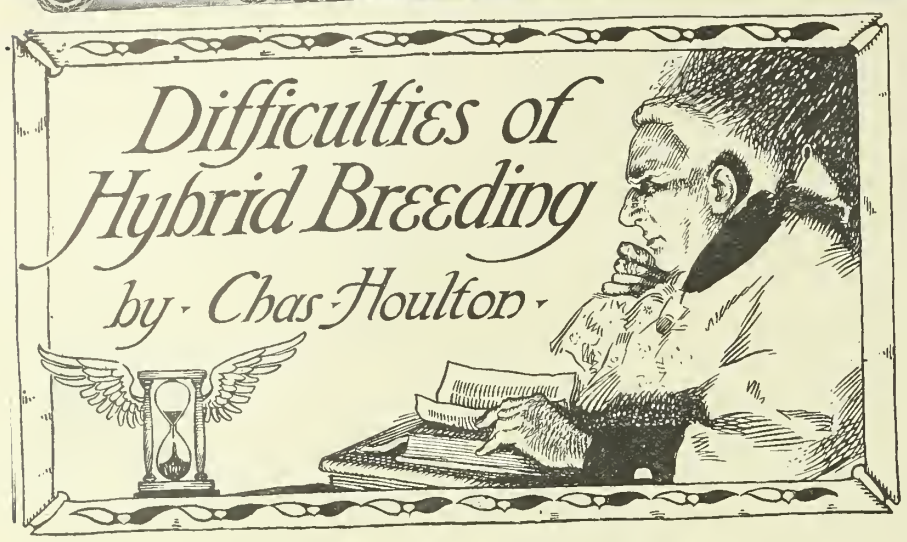
On the opposite page readers interested in the many curious and fascinating crosses between the various Finches will find a plate of "enigmas," which they are asked to while away half-an-hour in solving. To the writer of the first letter opened which names them correctly, we will send a cheque for half-a-guinea. Solutions may be posted at any time so long as they reach us not later than first post February 1st, on which date an independent person (blindfold) will make a choice at random until a correct solution comes to light. Mark all letters "HYBRID COMPETITION," in the top left-hand corner. Postcards not admissible.

The birds to be numbered and named in the following order (do not tear out the page);—

1	2
3	4
5	6

Hybrid Guessing Competition

Readers who take an interest in Hybridism are required to correctly identify the above Hybrids. *(See opposite page).*



A SEASONABLE CONVERSATION.

NOTHING in the world gives me greater pleasure than to put pen or pencil to paper in order to try and help novices to overcome little difficulties which from time to time crop up in connection with their hobby. And surely there must sometimes appear to be a thousand and one obstacles before them; no sooner is one mastered than they are face to face with another. A young fancier with grit in him will with might and main go on persevering until he has gained the height of his ambition and will not be disheartened over a few failures.

We will take our novice friend, "Johnnie," who has determined to try his hand at producing some rare and beautiful Hybrids. He has been to see the various crosses on view at the shows, and has made his mind up to at once prepare the way for the end he has in view. He secures various Finches and Canaries. He puts together pairs of different species, and looks upon them with pride, thinking that he has his foot on the first rung of the ladder of fame. But some of the pairs, alas, squabble and fight and tear each other's plumage to shreds, and death to one or the other seems imminent. Then our friend, Johnnie, in disgust at their behaviour separates them. This is one of his first obstacles.

His friend Joe calls in to see how affairs are progressing in the direction of Hybrids, and to his dismay no longer finds the pairs together. So he enquires the reason.

"Oh, they were killing one another," savs Johnnie, "so I had to separate them." "Why, how was that?" "I don't know; but they were." "Now," says Joe, "I'll tell you what to do. Prepare a large flight cage, or a large wired-off long flight about 2 feet wide and 4 or 5 feet high, along one side of your bird room. It will be all the better if it is from 5 to 10 feet long. You can, indeed, if you have room, make two of these. You will then be able to put several hen Canaries, two or three hen Bullfinches, and several cock Finches of different species in one of the flights together. You may put cock and hen British Finches of different species in the other flight."

The present is a good time to select the finest birds of each species you can, and to put them together, as just stated by Joe. You will soon see which birds become the most friendly. Make a note of these, and when the warmer season begins to approach you may cage the friendly ones off in smaller cages with some confidence that you will not meet with so much "battering about" as before. There is, indeed, a very rosy chance of you being successful when the birds pick out their mates by the method friend Joe advises Johnnie to adopt.

INTERFERENCE HAS ITS PENALTIES.

Here is one of the next drawbacks a novice meets. As soon as the birds go to nest and begin to lay, he (the novice) is so elated that he keeps ever examining the eggs when they arrive. This so disturbs the birds that they won't sit at all, or only for part of the time, and nest after nest of eggs mav prove useless. Leave the birds as much to themselves as possible after you have given them their early morning cleaning out and feeding and watering.

More difficulties beset Johnnie when the young are hatching out. He eagerly watches for the hen to feed her brood. She gets very jealous of his presence, and so will not feed her young while he is looking on. Johnnie, afraid she is letting the youngsters die, begins to meddle with matters, and succeeds in so upsetting the hen that she deserts her nest, or else sits so closely, for fear of him running away with her brood, that they all are killed or starved. This comes about through Johnnie's over-attentive eagerness and over much meddling.

Have patience my young Hybrid-breeding friend, and wait the opportunity to just peep at the young when you see the hen has come off the nest of her own accord. If you find they have bright skins, and food in their crops, leave them as soon as possible, and keep the hen well supplied with dandelion and groundsell, egg food, canary seed and some crushed hemp seed. Too much meddling will lose you more young in the nest than anything else.

Another difficulty often met with lies in hens that are sluggish and indifferent about the time of hatching a brood. They become so lazy through want of exercise during incubation that something is required to stir them up to activity. Johnnie maybe does not know what to do. and feels very down about the likelihood of these hens rearing their young. To overcome this state of things, it is a good plan to give each hen in her drinking water a good dose of Epsom salts two days before the eggs are due to hatch out.

Many hens I have known come out good feeders after this treatment—hens that have failed to feed previous broods. "Bad feeders" have been given me as useless, yet by treating them in the way above stated I have got them to successfully rear Hybrids. One damsel in particular—a bad-feeding green hen—brought up two Goldfinch-Canaries, one Greenie-Canary, and a Canary in one nest. I had mixed up the eggs so that I should not lose all of one sort, if I lost any. I left her only one of her own, the Greenfinch-Canary, and gave the other three eggs of her clutch to another hen. I was quite satisfied with the results. There are some hens, I know, that won't feed whatever one may do.

There comes a day when Johnnie's face looks very glum. He arrives home from work, goes into the bird room, and quickly looks at first one nest, then another. He gets to his ten-day-old Hybrids. One—and far and away the largest, of course—he finds has jumped, or been carried out under the hen's wing, from the nest, when, mouse-like, it has bolted through the drink hole—there it lies in a corner of the bird-room floor, starved to death.

Now, my boy, hadn't you been day after day lifting the nest-box down to see how the birds were progressing? I think you had, or else the mother and brood would not have become so nervous. These young Hybrids are much more precocious than young Canaries, and once disturbed by you, inquisitive Johnnie, they won't stay long in the nest. This results in all manner of mischief; they meet with disaster and death almost wholesale. Keep in the background after feeding, etc., as I have said before, and wait patiently. The young birds will show themselves to you in quite time enough, and a few days are not long to wait. Hybrids, when doing well, may be out of the nest any time after they are 14 days old, and if left alone will be all the stronger and healthier.

Another difficult time will now be facing Johnnie. The youngsters are all over the cage like mice, and the hen Canary is wanting to nest again. She begins to pull feathers out of her babies, and Master John is much annoyed, but doesn't know what to do. He only needs to cage them off in a Yorkshire show-cage, and hang the latter on the front of the breeding-cage, with one door open and the other closed. The young will soon be fed through the wires by the mother, any nesting material given to the hen Canary will soon be carried to the nest, and all will go well. But the youngsters must have some egg food put inside the cage they are caged off in. They will soon begin to pick morsels up, and get the knack of feeding themselves in a few days' time. Leave them where they are as long as the hen will continue feeding.

A HELP OVER SEVERAL STILES.

One of the next anxious periods to get over is the moult. Let the youngsters have as large a flight cage as possible, or the run of an indoor or outdoor aviary if you have one. They will then grow and thrive, and get through the moult more quickly and make up into finer birds than if kept in small cages; further, will be less trouble to look after. Don't attempt to colour-feed these baby birds during their first moult, for you will cripple their growth by so doing. Keep them on the wing until they are turned two years old—that is, if you have the patience to do so. They will well repay you for having waited the time, for they will be the finer birds, stronger, healthier and hardier in every respect, to face their prospective show career.

I always tried to "shelve" my youngsters in this manner as long as I could, so that when I did turn them out for show I had developed them to the fullest possible extent. It is most unwise to begin to work young Hybrids too soon. It is like working colts when too young, before bone and muscle are fully grown and set. You stunt them in the growth, and so never get satisfaction from them.

Among other obstacles to be surmounted is the selection of the right sort of birds to successfully match up. A large hen should be paired to a large cock in whatever species you wish to cross to produce Hybrids. I prefer Siberian Goldfinches, and also Siberian hen Bullfinches, whenever they are to be got. I prefer the largest and best type of either Canary or Finch—the broad-set, Norwich type is the thing. More imposing and valuable Hybrids are produced by following these lines.

Johnnie does not know which cross he would like to try first, and so goes in for three or four different ones to begin with. Better far if he had bought or secured from someone a pair of tried, successful Mulers, and set himself to learn how to manage them, extending his field of labour by additional variety of pairs afterwards. Many likely pairs may be upset through too much chopping and changing about, and over-eagerness on the part of Johnnie. Maybe he hasn't patience even to wait the routine the birds will sometimes go through before settling down. Once again I say, don't meddle with them too much.

After much heartburning and various failures and accidents, Johnnie finds that he has—or, rather, his birds have—reared several promising youngsters. But, dear me, they are *so* wild; there is no doing anything with them. Here is a fine young yellow Goldfinch-Canary, and in the next cage there is a very large dark yellow Linnet-Canary, yet if he goes near their cages, or takes a friend to look at them, he perforce bites his lips with vexation, because they won't stand to be looked at. He is dying to know whether they will be good enough to show, whether he shall colour-feed them and how. So he lets loose a shoal of questions upon his friend, who has had a few years' experience in these matters.

You would be wiser, Johnnie, to turn them into the flight cages or aviaries, as before referred to, for a year at least, then cage them and start to practise them running into show cages. If you can, fix a show cage against the stock or keeping cage, with both doors open and facing each other. All this you do at the beginning of the moulting season. Whenever you have an hour to spare at this period put your "wild" youngsters you are about to colour-feed and moult for show through a long "drill exercise" of running in and out of the keeping and show cages. Keep them at it—each one—for several minutes at a time. Be gentle, of course, so as not to make them nervous. They will soon understand the process and then steady down, when by the time they are over the moult you will have no further trouble either in running them into their show cages, or in their being unsteady.

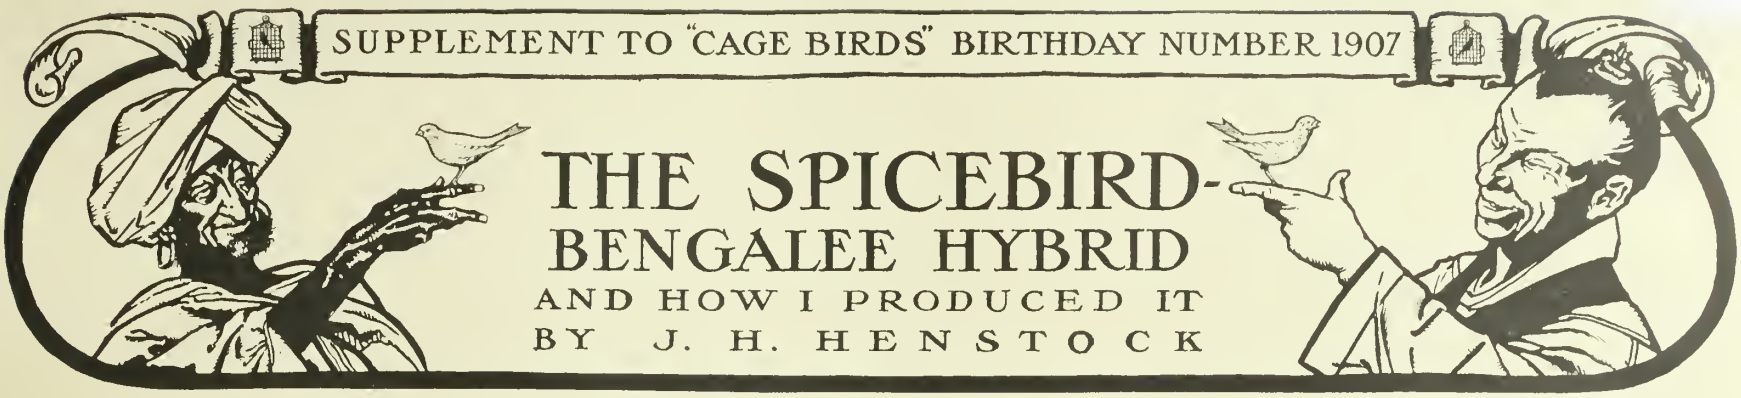
FINISHING TOUCHES.

Again, run them frequently into a clean open wire cage, and spray them well. This, regularly done, has a very steadying influence, and the Hybrids preen up and condition themselves much quicker and better. They will the sooner carry that lovely satin-like gloss and polish on their feathers, which is so charming to see, and, depend upon it, without "bloom" your otherwise good birds will be beaten by better-conditioned ones, even though they be, perhaps, the largest. Size and colour alone will not, or should not, win, if the feathers on the body resemble a bunch of rags.

By getting Hybrids into proper form, as indicated, the various colours and markings will come up more clearly and be bright and distinctive. Nothing tells so strongly against a show Hybrid as dull, smoky, wiry-looking plumage. Brightness, gloss and markings are all killed by this smoky or murky appearance of the surface of the feathers. You cannot be too particular about having your Hybrids in tight, glossy condition before turning them out to a show.

And here another "stumbling block" appears in Johnnie's pathway to success. The birds do not come out of pen-feather about the face and cheeks quickly enough, and he finds the shows are fast gliding by. Why don't the stupid things clear off? he wonders, and almost despairs of the birds coming through in time for a single show. He asks first one and then another what he should do to help them properly finish off this tantalising face and cheek moult. At last his friend Joe tells him to take a silk handkerchief in one hand and a bird in the other, then prompts him to place the bird in one corner of the handkerchief, in his left hand, with the head between the thumb and first finger.

Then Johnnie has to gently breathe on the head of the bird and with the right hand groom the head feathers with another corner of the silk handkerchief, keeping up the process for a few minutes. After carefully working away for some time, Johnnie gleefully sees the "pens" coming off one by one and quite a "transformation scene" coming over that bird's head and cheek feathers. They begin to look glossy, and the fibre lies with wax-like closeness and tightness, just as smoothly as if the plumage had been spokeshaved. Best of all, the colours come out brightly. If only you had started this method sooner, Johnnie, your birds would have been ready probably a month earlier. It is a grand move with all British Finches and Hybrids, and particularly those of the Goldfinch persuasion.



A STROKE OF LUCK.

I THINK I ought to say that at the outset I had no intention whatever of attempting any kind of hybridisation with foreign birds, though I certainly did connive at various possible crosses with British birds and Canaries. The *kudos,* if any there be, attaching to the production of Hybrids between the Nutmeg Finch and the Bengalee, belongs, therefore, to a simple stroke of good luck. As all aviculturists will readily agree, there are plenty of periods of bad luck which come their way, so that one of the opposite variety takes them almost as a pleasant surprise, and it is such happy events that bind us the more strongly to our fascinating hobby. I think I must describe these occasional successes as "lucky," because with foreign birds they must largely be spontaneous, and it is important to bear in mind that their own natural breeding season is not during our period of hot weather (when we have any at all). The arch-enemy to all bird breeding, and especially foreign bird breeding, is the variation of the weather, which upsets the best laid schemes. If possible, this trouble is accentuated in Hybrid breeding, because, generally speaking, the young Hybrids are naturally not so robust as the young of a pure-bred species.

It will, of course, be gathered that I am speaking of birds housed in an outdoor aviary, in which, I may say, are kept some fifty or sixty, both British and foreign (all seed-eaters), with a few Canaries thrown in. It will therefore be seen that any attempt at the pairing up of particular birds would be impossible. I have had no experience in the keeping or breeding of foreigners in cages; indeed, unless the cages were very large, should never attempt it.

EARLY HISTORY.

But to come to the particular case I wish to write about: I may say that both the Spice-bird (cock) and the Bengalee (hen) were bought from a dealer last year in the ordinary way, and presumably were imported birds. Certainly this must have been the case with the male bird, as the breeding of the species in this country has, I believe, only occurred two or three times. The Spice-birds were a pair, or so I supposed, but both turned out to be cocks. There were also in the aviary two male and three female Bengalese of the fawn-and-white variety. I must confess to a weakness for the Bengalee, with its quaint little ways, its docility, and its gentle bearing amongst other birds. In addition, the wonderful possibilities of its irregular markings certainly appealed to me, and made me very anxious to breed freely from these birds.

I got the birds from a friend of mine who had kept them in a cold indoor aviary, and they were turned out of doors into mine about the end of January last. As will readily be recalled, the hardest part of last winter (here in Derbyshire, at any rate) occurred in February, so they were outside during the coldest weather we had. I might add that the hen Bengalee had reared a nest of her own kind in my friend's aviary before I had her. This was in the August of the previous year, only a few weeks after he had purchased them.

A QUAINT COURTSHIP.

As I have said, I was particularly anxious to breed Bengalese, and therefore I was anything but pleased to find one of the Spice-birds—a fine, robust, well-garbed specimen—chevying a Bengalee hen about the aviary. In her quiet, gentle manner, she declined the advances, and edged away from him whenever he settled down beside her. Master Spice-bird would alight on the opposite end of the perch, and commence the peculiar gurgling sound which stands for a song with his kind. It resembles, as nearly as anything I can think of, the sound produced by pouring water out of a narrow-necked bottle as rapidly as possible.

To add to the effect of this grotesque "melody" the bird lowers the front part of his body and, turning his head on one side, looks up with ludicrous gestures while he pours out his tale of love and admiration. From the end of the perch he comes sidling up towards the favoured hen with lowered head and apparently incessant chatter; yet scarcely a sound can be heard. Should the object of his affection take no notice of him, he will bring his chattering beak quite close to hers, as though about to kiss her.

But all is of no use; my little Bengalee will have none of my Spice-bird. Away she flies to another part of the aviary; but only to be followed by her ardent admirer.

This pretty comedy went on for a week or more. Then the lady seemed to accept the inevitable, by no means, however, with the same relish as her mate. Meanwhile the remainder of the Bengalee family viewed the *mésalliance* with evident alarm, and in their demure way seemed quite shocked that such a thing could occur.

A TREMENDOUSLY INDUSTRIOUS HUSBAND.

The Spice-bird then became tremendously industrious in another way. A Hartz Canary cage, hanging high up, was selected as a home, and the hours from morning till night saw him busily engaged in making the nest. This was of dome shape, and built entirely of hay, no moss or hair, though about in plenty, being used in its construction. I noticed he did most or nearly all of the nest-making, the hen confining herself to putting a bent of hay straight here and there.

On July 12th, the first egg was laid, and on each of the following five days one was added. Then commenced the work of incubation. During the whole of the time it occupied (I think 16 days, though I am not quite sure) I scarcely ever saw the cock bird off the nest. Most of the day, and all the night, both birds sat. This, I thought, would be sufficient to spoil the eggs, even supposing they were good. But these small foreign birds can squat together very closely. Another thing, too, made me sceptical as to the result: the very open and loose way they had built the bottom of the nest, which, I thought, would admit a cold draught.

I got impatient at last as my other Bengalese made no attempt to breed, and one morning I took down the cage with the intention of taking out the eggs, when, to my surprise, I found two young ones within. I put the nest back in a hurry, you may be sure, and day by day the other four eggs hatched out. The old birds were very attentive, and the lapse of a few days saw all the young ones fine and plump. The skins of four of them were all dark; but on the other two there were light patches, indicative, I thought, of white plumage. These two, I surmised, would make charming variegated birds, and I was eager to see the feathers through.

"THOSE WHOM THE GODS LOVE."

When the young were about seven days old, I entered the aviary and took down the cage, to see how they were going on. I found one nearly on the edge of the nest, so I gently put it back again among its fellows. I then discovered there were only four in the nest, and on looking on the aviary floor saw the other two lying there. I picked them up and tried to restore animation by breathing on them and warming them. But it was too late; they were quite dead. What was still worse, they were the two light-coloured ones. Truly "those whom the gods love die young." Needless to say, I took good care to prevent a further catastrophe of the kind by putting a strip of wood across the entrance to the nest. It was fortunate I did so, because every morning I found some of the youngsters had crawled up to it, and in its absence they must have shared the fate of their brothers.

The old birds continued to be ideal parents, and their young family grew apace, finally leaving the nest when between three and four weeks old. I never saw either of the parents eat anything but white and spray millet, with the exception of green-food. I used to put in a bundle of chickweed, dock, plantain, dandelion, grass in flower, shepherd's purse, etc., and amongst it they were foraging and feeding most of the day. I certainly think this played a most important part in the rearing of the young birds. The latter "called" to be fed for a long time after they were flying about, which reminds me that they were very strong on the wing right from the day they left the nest. They have been hale and hearty ever since, and moulted without giving any trouble.

THE PLUMAGE DESCRIBED.

As I believe (though not sure on the point) that this is the first record of this particular cross, a word or two on the plumage of the Hybrids may not be out of place. The birds show more of the Spice-bird in point of colour, though in build it is easy to trace the Bengalee. The head and shoulders, as well as the wings, are of dark, rich nutmeg-browns, varying somewhat in shade. Thus, round the neck the colour is a lovely golden brown, quite irridescent in the sunlight. This golden hue is probably derived from the fawn of the Bengalee mingling with the rich brown of the Spice-bird. The lower part of the back to the rump, and also the breast, has a whitish ground, and on the breast and sides the scalings are very regular and distinct, though, of course, more subdued than in the male parent. The beak, which is short and stubby, as in the Bengalee, is black, as also are the legs and feet. Generally speaking, their plumage is pleasing to a degree, the golden flush on the neck and back making them, I think, more handsome than either of their parents. One of the Hybrids has the two outer flight feathers perfectly white, and another has a white feather in one wing.

A NOTE FROM W. T. PAGE, F.Z.S., Etc.

Mr. Henstock kindly presented me with two of these Hybrids, a supposed pair, that I might note any interesting data as to changes of plumage, etc. When they arrived (in nestling plumage, though one or two feathers had been already dropped), they were of a very nondescript appearance, their plumage consisting of washed-out browns, lighter on the underparts, with no scalings whatever. Mr. Henstock's graphic description of the adult plumage of the two birds he retained, leaves me but little to add. The rich golden-brown shining through the darker colouring on the sides of the face and neck and on the upper back is present in my birds; one also has the two outside tail feathers white. I may add to his description that the larger wing feathers and also the tail are very dark brown, almost chocolate colour. One of my birds has the whole of back dark brown, suffused in parts with golden brown; the other has the upper back brown, and the lower portion of same whitish, regularly scaled with dark brown. The underparts from the throat are whitish, regularly scaled with V-shaped markings of rich brown, except on the centre of the abdomen, which is almost clear. The beaks are blackish, shaded with a line or two of dark silvery blue. The couple turned out to be a true pair, and though at the present time barely three months old, have built and also laid several infertile eggs. In addition to the seed diet named by Mr. Henstock, my birds pick over the soft food, take a little fruit, and manage to secure regularly several of the meal worms supplied to the other birds. They have the same almost inaudible (in an aviary) song as the Spice-bird, which is only apparently produced by prodigious effort, while the courting attitudes and dance are also an exact resemblance. Lastly, they might be mistaken at first glance for pure Spice-birds, but at a second look one notes the Bengalee contour, as well as indicated colour, and with Mr. Henstock I consider them far handsomer birds than the Spice, or Nutmeg, Finch.

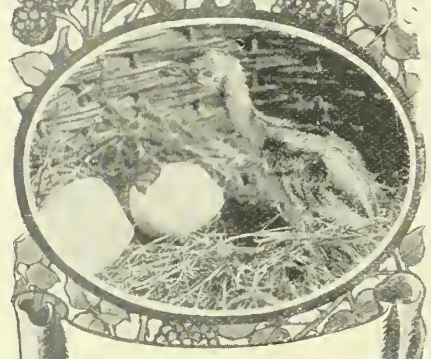
The Spice-bird and the Bengalee will be found portrayed in the body of the paper this week.

"Think of your woods and orchards without birds!
Of empty nests that cling to boughs and beams,
As in an idiot's brain remembered words
Hang empty mid the cobweb of his dreams!
Will bleat of flocks or bellowing of herds
Make up for the lost music when your teams
Drag home the stingy harvest, and no more
The feathered gleaners follow to your door?"—*Musician's Tale.*

NOTES ON NESTLINGS

By Frank Finn, B.A., F.Z.S.

Young Porphyrio.

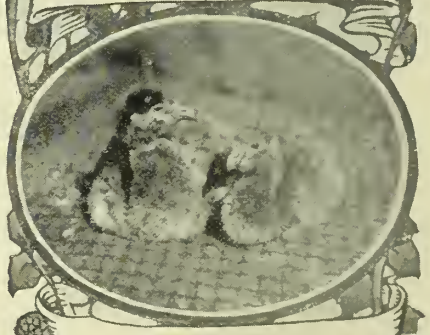


Young Rhea, 2 hours old.

Pair of Penguins and young.

Young Barn-Owls.

Young Herring-Gull.



Young Screamers.

Razorbill, half fledged.

AN INTERESTING TOPIC.

The appearance and habits of young birds should be an interesting subject to aviculturists, since so many people go in for breeding birds nowadays; it is also one of great importance in ornithology. The condition of the young, whether helpless nestlings or active chicks, is an extremely valuable point in classification, for it appears to be quite constant in every natural family, and also in groups of related families. A member of the Duck or Pheasant family which produced young naked and helpless like young Canaries would be a phenomenon indeed.

THE TEST OF THE TOE.

It may be asked—and the question is of some importance from the point of view of practical aviculture as well as science—how is one to tell what the young of an unknown bird will be like? One may come upon a species which one cannot place, according to one's experience of bird-groups. What sort of chicks may one expect from such creatures?

The answer is: Look at the hind-toe. If this be noticeably smaller than the other toes, as in the duck and fowl, or if it be absent altogether, as in many Plovers, the young will probably be downy and active, running or swimming freely, as we know young chicks and ducks do.

If, however, the hind-toe is well-developed, and suited for grasping a perch, like that of a Pigeon or Canary, or if there be two toes turned backwards, as in a Parrot, then the young of that bird will usually be a nestling, and unable to look after itself. This rule applies whatever be the habits of the parents; thus, among perchers with helpless young we get not only Finches and pigeons, but also Cormorants and Herons.

ACTIVITY AND INACTIVITY.

Penguins, having a quite rudimentary hind-toe, might be expected to produce lively chicks; but they are among the few exceptions. The young Penguin is downy, indeed, and has its eyes open at birth, but it stays in the nest a long time, till it is as big as the parents. Then it begins to fledge, and not until this process is complete does it take to the water, so that the old ones have a lot to do in feeding it, especially considering that they have to walk to and from the sea, being unable to fly.

It is a curious fact that young Penguins—at any rate the young of the Cape species (*Spheniscus demersus*), which is that most frequently seen in captivity—acquire feathers first on the wings, although these will never be used for aerial flight, but only as paddles. In the young of the Auks, which so much resemble the Penguins in many ways, the fledging proceeds more evenly all over, as may be seen in the illustration of the young Razorbill.

The young of the Razorbill and other Auks, and of the cliff-building gulls, are examples of young birds which are able to move about but have little opportunity of doing so, being born in such elevated and narrow tenements that pedestrian exercise is impossible, being too dangerous.

I have been able to observe that young Guillemots walk even better than their parents, which usually only shuffle along on their hocks; but it does not do for Guillemot chicks to be too nimble, hence in their case Nature places a premium on laziness. In this way we can see how the helplessness of some young birds may have been acquired through natural selection, supposing that all birds originally had active young like their relatives the reptiles.

BIRDS' BABY-CLOTHES.

The down of young birds varies a great deal in character and quantity; in ducklings it is much like fur, in Owlets fluffy to a degree, which makes the little things look like powder-puffs; in Canaries and most other small birds it is very scanty, and in many species absent altogether. Sometimes the young birds are at first naked and become downy in a few days, as is the case with young Cormorants; but all active young birds have a full coat of down from their exit from the egg. Such present a very woe-begone appearance when they first appear in their wet coats, as the picture of the young Rhea shows. But they soon dry, and some species do not even wait for this before trying to run; at any rate, I have seen young Californian Quails start stumbling attempts to do so.

It will be noticed that most active chicks are clothed in down which is variously, and often very prettily, coloured. I need only recall the chocolate-and-cream streaks of game chickens and the black-and-yellow pied pattern of young ducks. These patterns, no doubt, are usually of protective value, and certainly are so in the case of the streaked young of the game-birds, which are very hard to find when squatting on the ground for concealment. Similarly protective designs are the peppered colouration of young Plovers, and the spotted stone-grey of young Gulls.

The protective value of patterns in game-chicks is confirmed by the colour of one of the few in which a pattern is absent—the young of the See-see Partridge (*Ammoperdix*), which is plain buff. This is a desert species, hence a plain sandy colour hides the chick better than a variegated coat.

SOME PUZZLES.

There are, however, cases in which the colour of the young birds is not so easily explained. Why, for instance, are young Grebes so beautifully striped? If they lived ashore among grass, the explanation would be easy, but they spend nearly all their time either in the water or on the old bird's back, so that little protection can be needed.

Then, why are young Rails plain black, like the young Porphyrio illustrated, or dark brown, and young Cranes buff? If it is so necessary for young ground-birds to be concealed, one would think a striped or speckled pattern would have been better. The explanation would seem to be that Rails are very cunning and clever skulkers, and Cranes big and powerful, so that parental supervision renders any elaborate concealing pattern unnecessary. And in each of these cases both parents look after the brood and defend it.

This view of the case is supported by the fact that the young of birds which live in nests and are helpless, though downy, hardly ever exhibit distinct patterns, being usually of some nearly uniform light or dark tint, often absolutely black or white. It has been suggested that the white chicks are so coloured to keep them cooler under the glare of the sun in an open nest; but this theory will not hold water for several reasons. An open nest need not necessarily be in the sun; moreover, the colours of the chicks do not fit in with the theory at all.

The Peregrine Falcon breeds on an exposed cliff, and its young are white; the Barn-Owl nests in a gloomy hole, and has white young too. Cormorants, which usually build in the open, have black young, but the young of some of the hole-breeding Petrels are likewise dark. I have even seen, in Calcutta, the Dwarf Cormorant (*Phalacrocorax javanicus*) and its near relative, the Darter, or Snake-bird (*Plotus melanogaster*) breeding in the open on the same tree-tops, and the former has black young and the latter white!

A POSSIBLE EXPLANATION.

After all, it cannot matter very much what colour nestling birds are, for if an enemy finds their home and cannot be beaten off by the parents, the colour of the little inmates cannot save them then. This is the reasoning applied by my friend, Mr. D. Dewar, with regard to the eggs laid in other situations than on the ground or in holes, and I think it applies to young birds, too.

If we are right, it does not matter what coats such young ones wear if their nest is in a safe situation or protected well by the parents. Thus they tend to become uniformly light or dark in their down, the need for elaborate patterns no longer existing, just as the chicks of our fowls have in many cases lost the "game" striping, and become black or yellow, since poultry were taken under the protection of man.

This would also explain the uniformity of tint in young ground or water birds whose parents are well able to protect them, such as the cinnamon colour of young Cranes, the grey of Cygnets, and the yellow and olive of the young Screamers figured, whose parents are remarkably well armed with two spurs on each pinion-joint. No need to masquerade in imitation of the background when both parents are skilled in the use of "knuckle-dusters"!

In the case of the little singing-birds safety lies in concealment, and the nest is cosy and warm, so we find the down is very scanty, or disappears altogether; the only passerine bird whose young has a full coat of down is an unusually big one, the Lyre-bird of Australia.

GAPERS AND GOBBLERS.

Every keen observer of bird-life must have noticed that the method of feeding among young birds varies as much among the different groups as does their dress. The active ones usually pick up their own food, as do our chicks and ducks. But a few, like the Moorhen and other Rails, the Grebes, the Gulls, and the Cranes, much prefer their parents, at any rate for the first few days, to find the food and hold it for them to peck at; these young, however, do not gape and hold their mouths open. Gulls bring home the food in their gullets, and often vomit it on the ground for the young ones to pick up.

Most nestling birds gape for food, in the manner so familiar to us in young Canaries. But there is a variation of this method. When the young bird gapes, the old one puts its bill into its mouth; but in some families the process is reversed, and the nestling's bill goes inside its parent's, as with pigeons and Parrots. Some of the waders and waterfowl carry this process further, though some, like the Storks and Herons, gape for food. The young Ibis thrusts its bill right down the parent's throat, and the young Cormorant fairly rams its head and neck in, with the impetuous greediness which has given the family its name for gluttony.

The photographs illustrating the above article are the copyright of W. S. Berridge, Esq., F.Z.S., with the exception of the Owlets, which were taken by a lady amateur.

A Rare Northern Visitor—the Nutcracker.

The illustration gives a good idea of the Nutcracker's plumage, the ground colour of which is sooty-brown, with the wings and tail glossy black. The bird in size, flight, and habits, closely resembles the Jay, but feeds more on nuts, and frequents conifer-forests, whence its German name of "Fir-jay."

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

"OUR TRUE INTENT IS ALL FOR YOUR DELIGHT."—*Midsummer Night's Dream.*

SOME WORKERS
ON BEHALF OF
"CAGE BIRDS"

To pictorially represent all the many loyal and hard working spirits to whose practical support "Cage Birds" owes its present position would be, of course, an impossibility. On these pages we show just a few of our helpers, for whose valuable aid we are and shall be always profoundly grateful.

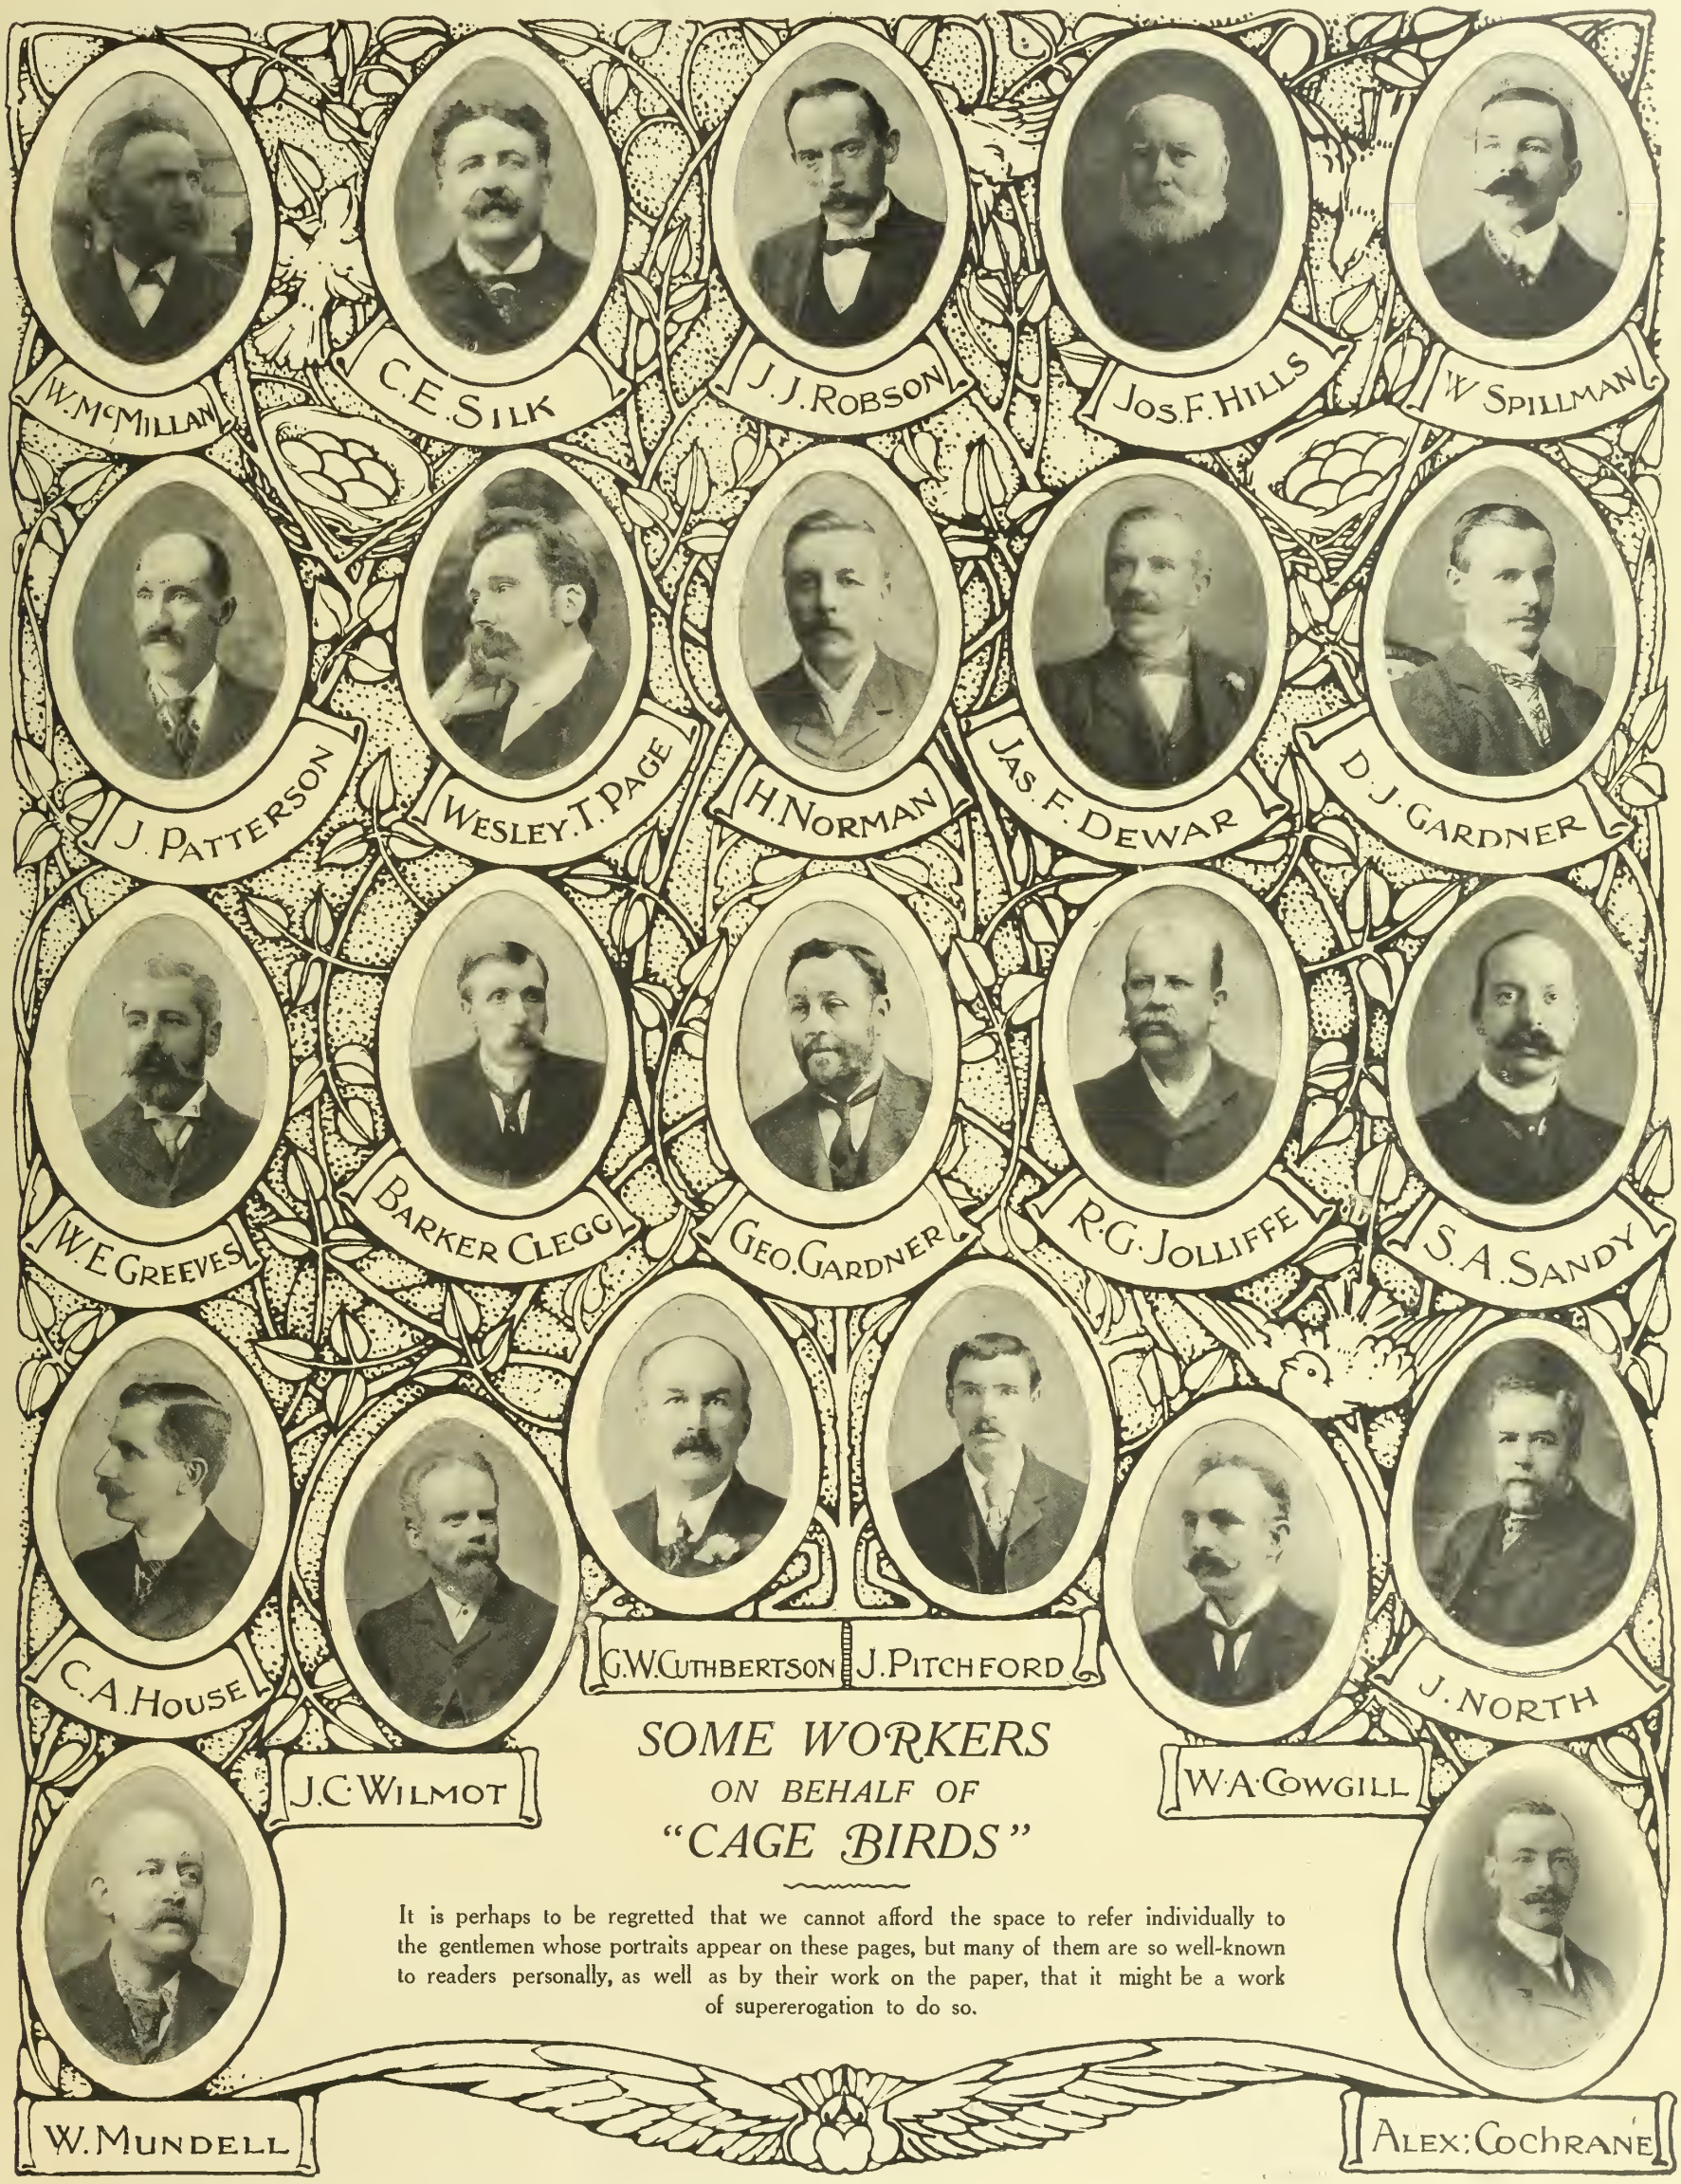
SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

"WE'LL STRIVE TO PLEASE YOU EVERY DAY."—*Twelfth Night,*



SOME WORKERS ON BEHALF OF "CAGE BIRDS"

It is perhaps to be regretted that we cannot afford the space to refer individually to the gentlemen whose portraits appear on these pages, but many of them are so well-known to readers personally, as well as by their work on the paper, that it might be a work of supererogation to do so.

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

THE POPULAR PLAINHEAD

MY EXPERIENCES OF THE NORWICH CANARY

BY W. VARDY

THESE personal experiences of the Norwich Plainhead Canary, specially contributed to CAGE BIRD's Birthday Number by one of our oldest and most successful breeders and exhibitors of the variety, will, we feel assured, be perused with acceptance alike by those skilled and those unskilled in the art of producing show specimens of "the popular Plainhead," and form a basis for the younger generation of fanciers to work upon in their endeavours to achieve greater success than has up to the present fallen to their lot. Mr. Vardy's deeds amongst the Norwich Plainheads need little recapitulation here: for several decades his name has been a "household word" amongst keepers of the variety. It is well over a quarter of a century ago since birds from his room commenced to make their presence felt among the prize-lists, and unvarying good fortune has attended him down to the present day, the quality of his exhibits still telling its tale in no uncertain manner wherever his team puts in an appearance. Mr. Vardy won the Twenty Guinea Challenge Cup of the Norwich Plainhead Club outright in the years 1899-1900-1901. Beside this he has secured the Hyson Green (Notts) and the Sheffield Cups, in addition to being the holder for the time being of many other trophies. Perhaps the performance he takes most pride in, however, was that accomplished at the International, Scotland *versus* England, Contest, held at Preston two seasons ago, when he accounted for no fewer than five first prizes—a splendid feat indeed.

THE ROOM AND THE CAGES.

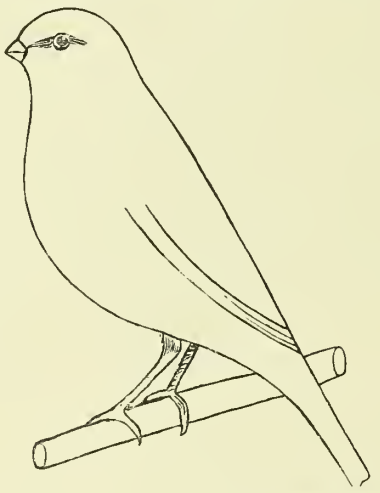
To my way of thinking, the fancier who sets out to breed Canaries, no matter of what variety, is the better off if he can provide himself with a bird-room—that is to say, a room which he can keep entirely for his birds. I am well aware that plenty of breeders do well who have not this convenience, and I do not wish anyone to think that he cannot produce and keep good birds without a room. That would be wrong, for often a corner in a bedroom or a quiet living-room can be used with every success. But wherever they are kept it should be arranged that the birds are free from disturbance as much as possible, and from strangers moving about and looking into the cages, especially when breeding operations are in progress, for then these things tend to put them off the proper performance of their duties.

I like a room facing South very much, and think, if anything, this is the best outlook of all. But it is not essential it should face this way, for many fanciers get along nicely in rooms which face the opposite direction. You must, though, get a room with plenty of light—the more light the better. I have myself done very well in a breeding-room with the window facing West, and consider this very good, as the old birds can see to feed their young much longer at night, a point all in favour of the breeder. The earlier the birds can see to get to work in the morning, and the longer they are able to keep it up in the evening, the better the chances of the young birds developing quickly into well-built and well-nourished specimens.

Many varieties of cages are adopted by different breeders, but I do not think it necessary for me to go into details about all of them. It will be more to the point if I describe the kind of cages I am using myself at the present day, the cages which my experience has led me to prefer as the best for all-round purposes, and explain the points about them that commend themselves to me.

My breeding-cages are all of one size and pattern, that known as the double-breeder, or two-compartment cage, 36 ins. long, 18 ins. high, and 10 ins. from back to front, with a division down the centre to permit of either a wired or an all-wood slide being inserted. They have removable wire fronts, made with the flat cross-bars (punched bars), which are a great improvement on the old style of cross-bar lapped with binding-wire. They are made perfectly plain, for ornamentation is of no use to the breeder, and does not improve the looks of the cages, but only makes them more difficult to keep perfectly clean. There are, of course, two doors in the front, made on the slide-up principle.

I like this class of cage, for they come in very useful all the year round, besides being so easy to clean out and overhaul when needed. With the wood slide down the centre one has excellent single stock cages. Without any slide at all one has fair-sized flight-cages. In the breeding season you do not need any nursery cages, for by running in the wired slide you can part the young from the old birds when the latter are ready to go to nest again, and they will finish off the feeding of their brood through the wired portion of the division. They are also very useful in the pairing-up of the birds, as you can part the couples when they are quarrelsome and seem disinclined to mate, as so many are apt to do at first. I leave the wire slide in between them until they "make friends," then draw it out again, when everything goes on just as you want it to.



Mr. Vardy's Ideal Norwich Plainhead.

Depicted by Master J. Vardy (age 15 years), one of three sons, each of whom is clever with the pencil.

Down one side of my room I have set out my flight cages. These are 5 ft. long, 2 ft. high, and 2 ft. from back to front. I have eight of them, arranged in two stacks of four. They are made in the same plain style as the breeding-cages—known, in fact, as the "box pattern," that is, wired in front only. I use the removable punched-bar fronts in these also, with slide-up doors in the centre; they are so convenient, and enable you to clean out the cages at any time thoroughly and easily. The flight-cages are fitted to permit of a dividing slide being run down the centre, so that the birds may be run from one to the other while being cleaned out, or for any other reason you may desire.

I like this kind of flight-cage very much. I have found them quite large enough for all ordinary purposes, and yet not too cumbersome to handle when necessary to do so. At one time I fixed up a very large flight, running right down the side of the room, and going well up to the ceiling, with a depth of about 5 ft. from front to back. But while this was very good for the birds to exercise in, I soon found it had a defect which made it useless to me. All the young birds I threw in to moult got very wild, and when I caught them up to give them their education in a show-cage, I had a lot of trouble on this score. Young Canaries get very nervous, and but little knocking about is needed to smash their tender flight and tail feathers. As the new feathers will grow longer than the old ones, this is a point to be avoided, for, as everyone knows, short tails and short wings are needed in exhibition Norwich.

(Exigencies of space compel the holding over of the remainder of Mr. Vardy's description of his room until the next instalment.—ED.)

A WORD-PICTURE OF THE IDEAL.

Having described my bird-room and the way it is fitted, I think I had better go on to describe the Norwich Plainhead which constitutes my ideal, after which I will give you the methods I adopt when trying to breed the same. I like a fairly large bird, by which I mean a bird from 6 to 6¼ ins. long. This is quite long enough for any exhibition Norwich Plainhead, but get the bird as big as you can for this length, that is to say, with as much substance as possible. A 6-in. bird with a poor frame will look long and thin, but a stoutly-built bird of that length will look just as we all want them, short and chubby.

The head is the first thing to look at in most varieties of the Canary family, and this applies with force to the Norwich Plainhead. Its head must be of good size, proportionate to the chubby body, and nicely rounded from the beak to the back of the skull, with a good rise starting directly from the beak and continuing to the crown. It must also be well-rounded from eye to eye, and free from all "browing," as feathers hanging over the eyes are termed. The flat, browy head we often see in birds is a thing to be avoided. What you want is a head something like a nut, with a bold eye set in the centre at each side, and carrying a neat, short beak. This is what I call a correct head. The beak, by-the-way, is a point often overlooked. Yet what looks worse than a heavy beak?—it gives any bird an ugly appearance. The feathers, of course, must fit closely all over the head.

To carry the ideal head we must have a short, thick neck—the thicker the better, for I have not yet seen a bird with a neck which has been too thick. Let the bird, too, be well filled-in at the cheeks. In the body it must be as short as possible, and taper off well to the tail, or, as the show reports often put it, be "well cut away behind." The less a bird has at the back of the legs the better. The back should be broad and well filled-in, and the chest bold, deep and well-rounded, which will give you the necessary thickness through the shoulders, and width across the breast.

The wings require to be short and well-braced—that is, carried tight against the body. A bird with slack wing-carriage never looks well. The flight feathers must lie evenly, and the tips just meet at the root of the tail, fitting closely without crossing—known as being "well-packed." The tail itself has something to do with this, however, for if not short and carried stiffly, as it ought to be, you can often see between the wings and tail, which lends the appearance of bad wing-carriage. A "hinge-tail" is a bad fault for any bird to have. It should be carried in a line with the wings and the back, and be kept there, and all the tail feathers should keep close together. A well-folded tail helps a bird a lot, whereas an open, or fish-tail, is all against it. The legs require to be of medium length, neither long enough to give the bird a stilty appearance, nor short enough to make it seem to hug the perch.

You need a jaunty carriage—just sufficient "life" in the bird to cause it to move briskly from perch to perch, without any suspicion of unsteadiness or ruffling of the plumage. A dull, or sluggish bird, is often handicapped owing to the trouble a judge has to get it to tighten up and show itself properly; a wild bird, of course, stands but little chance of success. Then, to top all, you must have quality of feather and colour. The plumage should be soft, shining, and silky-looking, fitting so tightly that the bird seems as though moulded out of wax. Dry, harsh feather, which carries no polish, is a heavy handicap. Colour is also essential, but it must be bred into the birds, or you cannot hope to feed it into them; and this we can leave till a later stage.

I think I have now enumerated those points which, if only you can get them all into one bird, will leave you with something very nearly approaching our "ideal" Norwich Plainhead Canary of to-day. (*To be continued.*)

SOME RARE EXHIBITS OF RECENT YEARS.

By H. Norman.

THOSE who have followed the cage-bird fancy for a number of years, and who will let their memory slip back, cannot but agree with me that the British bird section is now of much greater interest than it ever was. We have many more exhibits, both in the Finches and Softbills, the birds are shown in much better condition, and we frequently are shown some rarity that sets our tongues a-wagging. There was a time when the only Softbills exhibited were such common species as Thrushes, Blackbirds, and Starlings. In those days hardly any attempt was made to understand the requirements of more delicate birds, and even the Thrushes were not cared for and fed as they are now. Canaries, as cage-birds, occupied the leading position, and if anyone had a tendency towards bird-keeping it was generally a pair or so of these that took their fancy. Even the Finch family was only tolerated for the purpose of mule-breeding, or for keeping in small cages as songsters.

All this has been changed; not suddenly but gradually. As each year passed we saw some improvement—some new species added to the classification. Who among the most ardent of us would ever have dreamed of a class of 50 Goldfinches, or of a score of the common and despised Greenfinch? Who ever thought it was possible to cage and stage the Blackcap and Nightingale? Both species, however, have often been shown, and these one-time rarities are now seldom seen, even in the prize list! Although 'Gales then had a class to themselves, and a well-filled one, too, they now seldom number more than two or three at even big shows. So, too, had the Robin, and a most charming exhibit he made, but his adaptability to cage life killed the venture, for many were caught a week or so before the show, and as they possessed the rich wild plumage, generally secured the prizes.

The Robin class is one we would like to see revived, for with our present-day knowledge of Softbills it is doubtful whether the wild specimen would head the poll. Birds would be carefully selected for size and colour, moulted upon good food in an outside aviary, and caged ready for exhibiting.

Among the rarer exhibits we must not forget to mention the Wagtails. These graceful birds have been taken up with avidity. Their pretty manners and engaging tameness make them charming cage-birds. They are one and all delightful, the Greys possibly standing pre-eminent, although some lovely Yellows have been shown and a few Blue-headed specimens have done well in recent years. Fanciers looked askance at the first of the latter species exhibited, some openly doubting its nationality. But many of these birds found their way to our shores during the spring months, although in consequence of their close resemblance to the Grey were no doubt frequently overlooked. They generally come with flocks of Yellow Wagtails and frequent the fields and meadows, where probably some of them nest, but get overlooked.

Another bird whose nationality was questioned is the beautiful Black Redstart. Yet this bird is a regular winter visitor, especially along the southern coast. A fine specimen is indeed a handsome bird, and to my mind excels the ordinary Redstart, although he lacks the beautiful colouring of the breast. Still, its black and blue-grey plumage make up a most charming picture.

Generally there has only been one of this species of any note exhibited during a season, but three or four years ago there happened to be two good ones going the round of the shows, each taking premier honours These birds met in competition at one of the Palace Exhibitions, and both were such excellent specimens that any fancier might well have said either was the better. It was, indeed, not until they were scanned side by side that there was any apparent difference. Then it could be seen that the one hailing from the Eastern counties was slightly larger and more perfect in black markings; still, the difference was very slight and only discernible by the "experts." The best of the pair stood first, and the other, in consequence of the many rare exhibits staged in the same class, was relegated to fourth position. Unfortunately there was no help for this, although a fourth prize was not by any means a true approximation of its worth, as compared with the first bird, which only just managed to beat it.

In this same class was shown a good specimen of the elusive Sedge Warbler (catalogued as a Grasshopper Warbler). Very few of these birds have found their way upon the show bench, which is rather surprising when one considers how plentiful they are on our marshes and reedy streams. Netting them with a silk net is not a difficult matter, as they can be driven up the stream almost as easily as a Kingfisher.

Writing of the marshes reminds one of the Reed Warbler, a still rarer exhibit, a bird quite as graceful and shapely, with all the sleek beauty of the Sedge-bird, but lacking its lovely markings. A very fine example was shown last season in London. We heard that a knowing young gentleman who was present brought all his lady friends to see the lovely "Nightingale." They hung round the cage for some time, hoping to hear the voice of the famous singer, but needless to say the Reed-bird did not oblige—not even with his own chattering song.

Not being remarkable for colour, nor possessing anything special in the way of markings, it is very doubtful if these and kindred species do so well upon the show bench as they deserve. Yet to keep and stage a good Reed Warbler is quite as difficult a feat as the staging of some of the more showy birds. Few people are familiar enough with these species in a wild state to determine if the specimen be a good one or only an indifferent example.

With most of our rare exhibits, someone sets a fashion which is invariably followed by others. Just now the beautiful little Tree Creeper (if a fair specimen) is almost certain to be among the winners, and no doubt the exhibitor deserves the award, for such birds are not by any means easy to keep. They are always attractive to visitors, and their quick, animated ways make them delightful exhibits. Of the many shown there have been only one or two really good specimens, for although they are practically a white and brown bird many fail in purity on the breast, which should be silvery and lustrous, not a dull, lead-like colour. The markings in one or two specimens are as near to perfection as possible, and given a suitable interior to the show-cage, and good health and condition, they deserve all the prizes that fall to their lot.

Running the Tree Creeper hard just now for premier honours is the Pied Flycatcher. Both of the Flycatchers are most difficult birds to keep. In a state of nature they live almost exclusively upon insects, and to supply this want sufficiently to keep the birds in a fit condition to exhibit is a difficult task. In addition, the Pied Flycatcher is not by any means a common bird It is, in fact, numbered among the rarer birds of this country, so that when an exhibitor is fortunate enough to obtain a good specimen, and to stage it in perfect condition, it is indeed hard lines to have that bird misplaced in the honours list through ignorance or caprice. But this class has always been a most difficult one to judge, and always will be with so many rare cage-birds competing together.

Last, but least only in size, is the rare Fire-crested Wren—rare enough as a wild species, but much rarer as a caged one. It is doubtful whether more than two or three genuine specimens have ever been shown Several so-called Fire-crests have proved to be highly-coloured Golden-crests. Of the latter species many little beauties have been exhibited, some of them very tastefully and artistically staged. Of these I think the house-moulted specimen now being shown by Mr. Maxwell is deserving of special mention. It certainly lacks a little in depth and richness of colour, but has been shown in most perfect health and condition—a feat which has never been excelled in aviculture.

A Rare Visitor to our Shores.

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

The PRACTICAL SIDE of BRITISH BIRD KEEPING

BY A. COCHRANE.

NOTWITHSTANDING the wide dissemination of general knowledge on bird-keeping through the medium of CAGE BIRDS, and the happily broader-minded attitude of fanciers towards that particular branch of the hobby (other than their own) taken up by fellow-fanciers, it is still not unusual to hear expressions of how easy and simple the keeping of British birds is in comparison to the culture of the Canary. How very far this theory is removed from squaring with actual practice it would be difficult to say which realises most, the person who has reached the top of the ladder, or the person who has tried to do so and failed. I am assuming, for the purpose of this article, that successful moulting for the show bench is the aim of every British bird keeper; and this successful moulting really means, in a word, their successful keeping in health and condition.

It is certain that the beginner is pretty sure to be disappointed who starts off with the impression that all he has to do is to secure good specimens and follow faithfully the generally-accepted ideas on feeding and management for him and his birds to have a good time. It may be accepted as an axiom that while a good specimen may moult out badly, a poor specimen will *never* moult out a winner. Whether aware of this or not, the beginner generally seeks to obtain the best specimen he can, and with his difficulty here comes his first insight into the *practice* of obtaining good specimens as opposed to the mere *theory*. It will only be after a more-or-less lengthy experience that he learns that real good specimens are found only in a very small minority; further, that the undoubtedly best specimen at the moment is *not* the one to secure with a view to moulting out well. Indeed, he may never gain that subtle ability to choose "rough diamonds" which is possessed by so few, and whose selections would sometimes, to his mind, appear to approach uncommonly near to the "poor specimen" of the axiom above referred to. This is a matter on which it is extremely difficult to give any hints, and only a close study of details such as age, seasonal changes, temperament of the individual bird, etc., on the part of the beginner himself will bring any enlightenment.

The subject of feeding he should approach with something of an open mind, remembering the adage about "one man's meat being another man's poison." Otherwise he will soon find that the rigid adherence to any set formula for feeding any given species is quite a mistake in the case of many individuals of that said species. For instance, while it is absolutely necessary that in most cases Goldfinches should have hemp seed, I have had some which from the first preferred canary seed and thrived for years on it. I knew a certain Goldie which had an unbeaten record on the show bench for four years running, which would never look at any seed other than maw, and another which bred three years to my knowledge and never ate any other than inga—that much-abused, yet very useful seed, so-called "poison." I maintain that so long as any bird appears to be thriving, its idiosyncrasies in feeding ought to be studied, not thwarted, due regard being paid to the general conditions under which the bird is kept.

On becoming possessed of a fresh specimen, it naturally occurs to one to see that it gets at the food and the latter is generally plentifully and conspicuously offered, but I am afraid that the perhaps more important matter of the water is often unconsciously neglected, with consequent loss of many valuable specimens. It should be borne in mind that, although the bird may drink freely out of the dealer's or catcher's store cage, it does not follow that it will immediately drink out of the vessel in the cage to which it has been transferred by the buyer. Therefore it behoves one to have a watchful eye. Further, if a bird is desired to drink from an outside vessel, see that the hole is just comfortably big; for instance, do not expect a Bullfinch to push its head out of a hole just big enough for the head of a Redpoll or Siskin. Unless one knows for a certainty that a bird has been accustomed to drink from the outside, it is always safest to place water both outside and in, withdrawing the latter when the bird has become accustomed to its new cage.

Unless the bird is fairly steady, it should be kept for some time, at least, in a very small cage. Again and again this point has been dwelt upon by writers, and my reason for once more referring to it is that I am much impressed by it, and think its importance cannot be exaggerated. I have examined the bodies of so many apparently plump, well-developed specimens, particularly Linnets, which before death showed no symptoms of the familiar bird diseases, and have found that a very high percentage indeed of these deaths resulted from injury to the head. The conclusion to be drawn here between putting a recently-caught bird into an ordinary roomy cage where it can dash about with more or less impetus, and into a small one where it cannot do so to any extent, is sufficiently obvious and offers a field for investigation, especially by catchers and dealers, for I know from experience it will have for them in particular very practical and profitable results.

I do not propose to enter largely into the question as to whether birds should be colour-fed or not, but I am convinced that more Britishers are spoiled than benefited by the process. Therefore I would advise the beginner to consider well whether the bird he proposes to "feed" is of a kind or colour likely to be improved by it. For instance, I never yet saw a Linnet improved by it (and I am something of a Linnet specialist), but I have seen many good ones ruined, insomuch that colour which was brown before became black, or "burnt" as they call it, after a course of "feeding." Now black is absolutely undesirable, whereas brown—of the proper shade, neither too light nor too dark—is really difficult to get. Again, with the Goldfinch my observations prove that colour-feeding may improve the yellow of the wings, but it undoubtedly darkens and blackens the chest marks, and transforms the blaze into a flat, bronzy, undesirable hue, in proportion to the amount given.

Turning to species whose general colouring lends itself to the effects of "pepper-feeding," such as the Siskin, Yellowhammer, Greenfinch, etc., it is a well-known fact that, notwithstanding all the colour-food which may be lavished upon them, and which they may greedily eat, a great many will moult out just as if they had never tasted it, their colour absolutely unaffected by it. So I again warn the beginner against the fallacy that colour-feeding is essential to what one might call the "remoulting of colour." Rather should he pin his faith to general cleanliness, good air, unlimited bathing and natural foods; nor should the latter be allowed to outweigh the other items in importance, particularly the bathing, frequent spraying being resorted to in the case of any birds which appear disinclined to use the water otherwise.

To moult well, a bird must *be* well. It is useless to hope for a sickly one to become well after the moult; on the contrary, the chances are that it will go to the wall. We all know the fancier who during winter attends the shows, works up his enthusiasm, and gets together a fair stock of likely birds. Spring arrives and his birds seemingly are getting on well enough. He then neglects to attend to them so well as he might in the matter of the early green-foods, dandelion, hawthorn buds, etc. Summer comes and he perhaps pursues some other hobby, to the further neglect of his birds—chickweed and groundsell ripen in vain for him. But as the moulting season approaches he begins to think of the coming shows, and to look out for greenstuff to help them on. But he is too late: the birds have lost their vigour, and his now feverish attention does but little to hasten or improve the lagging process of Nature. Eventually he wonders why his birds are so long in finishing, and look so poor after all.

Contrast this with the other man who has laid in a stock of personally-gathered dried wild seeds for winter use. Spring finds him always on the hunt for the earliest weeds, and his seed bill begins to decrease as his birds are eating less and less of this, and more and more of Nature's fresh supply. At the same time their owner's pleasure in them grows more and more intense, and his search after green-foods unremitting. Then, when the moult comes, he gets them well through it with the minimum of trouble and a minimum death-rate. Why?—simply because this attention on his part has kept their health up to "concert pitch," and so, being well, they moult well.

I think most fanciers are apt to overrate the importance of dried wild seeds. I do not mean to say that these are valueless—indeed I am now using up some 2-year-old knapweed—but I would like to press the importance of fresh wild seeds as opposed to preserved seeds. By-the-way, attention should be given to the quality of the green-food. It is worth walking another mile to get chickweed carrying more seed, or knapweed with bigger heads. Human nature inclines to prejudice, and so you find some fanciers discarding certain green-stuffs which others swear by. I advise a trial of them all.

I do not know whether it is prejudice against it, or whether it is scarce and comparatively unknown, but there is a weed which I do not remember having ever seen mentioned before, and that is goatsbeard ("Jack-go-to-bed-at-noon"). Its seeds are large and greatly relished by the birds. I often wonder why some of the various weeds are not purposely planted and cultivated in obscure corners by fanciers for their own future gathering. I do not think it is generally known, either, that rowan, privet, and other berries can be kept perfectly fresh for a considerable period if packed in dry sawdust, after the manner in which imported grapes reach the fruit merchant. Hence it is possible to strip a rowan tree in autumn when the berries are red and ripe (that is, if the birds in the garden do not forestall you) and later on present your Bullfinches and Hawfinches with a fine fresh bunch for a Christmas treat.

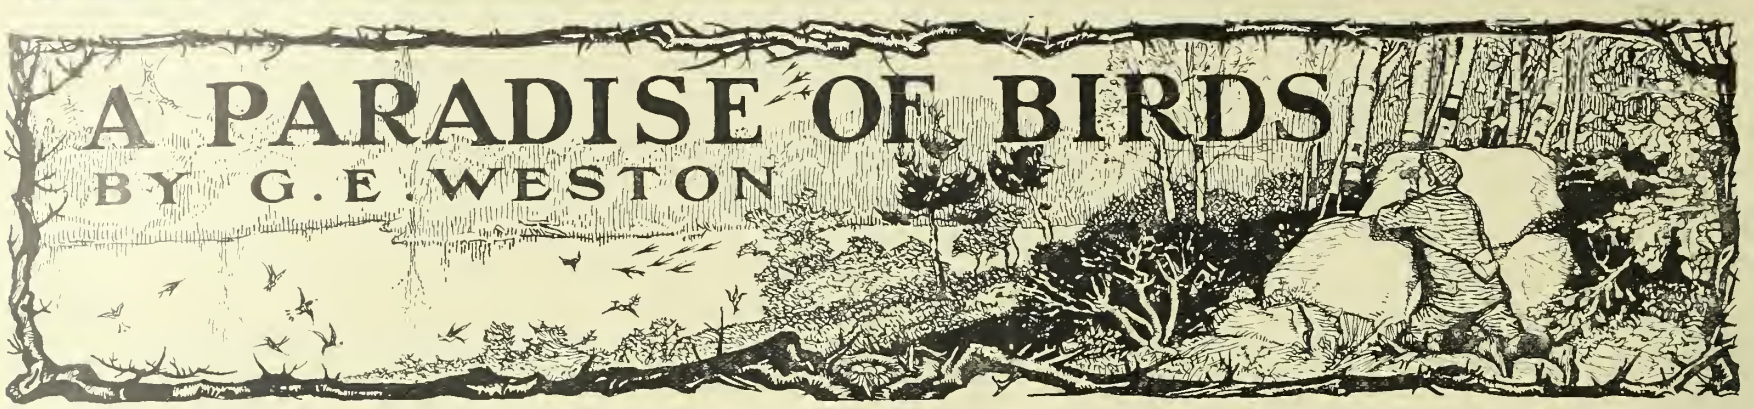
Perhaps the greatest bugbear the British bird-keeper experiences, and one of which the Canary fancier knows absolutely nothing, is their unfortunate knack of occasionally stampeding during the night. Panic seems to seize upon the birds and spreads from cage to cage. Sometimes only one or two become affected; sometimes the whole stock. They dash wildly about, knocking out flights and tails, till they subside, sometimes bleeding badly, from sheer exhaustion. Why this happens can often be accounted for: mice, a sudden noise, the flashing of a light, etc. But just as often it is impossible to explain. After much observation, absurd as it may seem, and at the risk of being thought ridiculous, I fancy that birds "dream." A dreamer falls off its perch, splutters about in its fright, and so begins the general disastrous panic. In this connection I have found Bramblefinches a positive danger in the bird-room, on account of their restlessness and noisy squealing during the hours of darkness.

Siskins and Redpolls have a nasty habit of sleeping on the wires, generally near the top. Besides messing the fronts, the strain often results in their becoming stilty-legged, Siskins especially. I have found that by inserting a short twig between the wires at about the spot which they favour, they can often be induced to roost on it, and after a time this twig can be gradually lowered till it reaches the level of the perches. After they have roosted on it for some nights at this level it can be dispensed with, when they will take to the perch itself, rarely seeking to sleep on the wires thereafter.

I have not of late years paid much attention to Softbills, though I must admit that the sweetness and delicate charm of manner of the smaller varieties always appeal to me.

(Continued on page 15.)

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.



A lover of our native birds tells of one of England's tiniest Beauty Spots, and of some of its feathered inhabitants.

Go abroad
Upon the paths of Nature, and when all
Its voices whisper, and its silent things
Are breathing the deep beauty of the world,
Kneel at its simple altar. . . . .

WILLIS.

At the south corner of the Charnwood Forest, in a beautiful valley surrounded by rich woodlands, lies a straggling, picturesque village. Cottages with worn plaster sides supporting streaky, moss-grown thatch, gardens in which glorious roses bloom and fade, dainty villas with woodbine-laden porches and cool green lawns, from which yews and hollies of fantastic shape rise strangely up, deck the dusty grey road, which, seldom disturbed save when the Sparrows revel in the dirt, winds calmly on, and is lost at last, high up, in the shadow of the trees.

A little babbling trout stream runs across the centre of the village, passes under the roadway, and meanders on—over stepping-stones where Wagtails love to drink—past the ivy-covered church where, leaving the main road and turning sharply to the left, you are on the threshold of a very Paradise of Birds. Before, however, you may enter this "land of heart's desire," you must climb a high stone boundary-wall, by means of a particularly awkward stile.

A BEAUTY SPOT.

Once safely over, a scene of rare beauty is revealed; you find yourself, most unexpectedly, in a miniature ravine. This lovely spot—'tis but a dell some half-mile long—is part of a noble park of no little historic interest, containing, as it does, the ruins of the one-time home of the hapless Lady Jane Grey. On either side, grass-covered hills studded with huge boulders of slate and granite rise to a considerable height, and seem in the near distance almost to meet: there, though, the tumbled masses of rock and earth end as abruptly as they began. Long ago, in ages far remote, these tumbled masses of rock, by some awful convulsion of Nature's forces, were heaved from the bowels of the earth and piled in their present position, to develop, as time went on, that picturesque charm which captivates all who see.

Our old friend the trout stream threads its way along the bottom of the glade; rushing through channels narrow enough for a schoolboy to skip across; whirling and eddying over the tiniest of waterfalls; here and there widening out into placid, shallow pools—pools covered with a green mantle of duckweed, arrowheads and frog-bit. Underfoot is a carpet of springy moss, hidden during part of the year by a myriad ferns. Hundreds of venerable oaks, rugged and lichen-covered, line the hillsides; many, despite their centuries, are young still; others, mere shells of bark, struggle gallantly year by year to put forth their acorn-bearing leaves; and some, weird and ghastly, like forest ghouls, lift blackened, lightning-blasted arms towards the sky.

On the near left-hand side of the stream, along the carriage-road, and up the hillside, the presence of the general public, on certain days, is tolerated, and on such occasions scores of holiday-makers and other undesirables roam the place. Many there are who find no pleasure in restful quiet amid such beauty as this: inactivity bores them. With prying eyes they scan the bushes, trees and walls, and woe betide the birds that build within this zone—few ever rear their brood undisturbed. Only a bird's nest!—little such vandals consider the loving labour and ceaseless care rendered as nought by their ruthless hands.

On the far side of the stream the ground slopes upward directly from the water's edge, more precipitously and to a greater height. No pleasure-seekers ramble here—all is sacred to the game-keeper and his charges. Herds of graceful deer wander in the shade; rabbits feed and frolic in their thousands; the challenge of the pheasant rings through the air. Many pleasant hours have I spent here, seated, nearly hidden by the ferns, comfortably against a rock, with a pair of field-glasses, a pipe and tobacco, and, perhaps, a sandwich or two, an interested observer of the little "goings on" of some of our rarer British birds.

AN IDLER AMONGST THE BIRDS.

I may say that, being naturally of a lazy disposition, I am no believer in walking mile after mile, on and on, in search of birds. It is hot work usually, and always seems to induce—as a kind of second objective—thoughts of a public-house. And when you *do* drop across a bird it, as a rule, pops over the nearest hedge with a startled scurry before you have time to determine whether it is a Sparrow, a Hoopoe, or a Buzzard!

I may as well say, too, that I am not able to name on sight every bird one meets. The facility with which some, apparently, do this, is a standing marvel to me. Many species have some characteristic of form, flight, call, or song, which renders them instantly recognisable; and the locality in which they are seen will also assist to this end. But what of the number of sober-coloured birds, and particularly the indispensable females? Take the members of the family *Sylviidæ*. I do not believe anyone except, perhaps, an ornithologist of great experience, could accurately name them after just the momentary glimpse obtained as they flit away from you. And these are by no means the only species one could specify in this connection, especially so in regard to the females.

The walking method may, perhaps, enable an observer to see a great variety of birds in a short space of time, but of their inner domestic life, if I may so term it, he will learn next to nothing. I prefer to choose some likely spot—the centre of a thicket, the hedge surrounding a stubble-field, the banks of a stream (the nearer to timber the better), the interior of a wood, all are such—to take advantage of whatever cover it offers to conceal myself as closely as possible, and then to keep my eyes open for whatsoever comes my way. One seldom has to complain of boredom when pursuing such a plan: never in the Paradise just described.

Strange though it may seem, it is nevertheless true, that here one finds the representatives of species more or less rare (and nearly all these—I speak of the summer time—Softbills), outnumber those of varieties usually far more common. This fact, however, is easy of explanation: owing to the swampy, lush nature of the lower ground insect life, both winged and wingless, flourishes amazingly (so much so that towards the close of a hot summer day the place becomes positively unbearable unless you keep your oldest and strongest pipe constantly on the go), thus ensuring an abundance of food—an irresistible attraction. Then, too, the sheltered position, the almost never-ending quiet, and the conformation of the ground generally—the loosely-set granite walls, teeming with likely crevices; the trees, fissured with age and the storms of centuries; the thick, well-nigh impenetrable bushes; the gorse-covered rocks; the hollow, reed-fringed banks of the stream—make it an ideal breeding place for those birds. It is rarely used for such a purpose by the smaller seed-eaters; they seem to prefer the plantations and hedges on the more open ground outside, and nearer the gardens and orchards of the village.

It is obviously impossible in the course of a short article to mention, even briefly, the many different birds I have identified and watched in this little dell, and in the plantations and on the open ground outside; a few notes here and there are all one can give. Starlings swarm to excess: from almost every tree where there is a decent-sized hole the metallic cry of their nestlings may be heard. Although sociable and of great value as insect destroyers, they need their ranks thinning; they are far too numerous, and must crowd out birds of greater interest and rarity that also nest in the holes of trees.

SOME CLIMBERS OF TREES.

That very handsome bird, the Green Woodpecker, is by no means rare; the Greater Spotted Woodpecker is also to be found, but the Lesser Spotted Woodpecker, though I have watched carefully, I have yet to see. These species are not altogether easy to keep under observation, their search for food, round and round the tree, taking them out of your sight one moment and in the next, and they always seem to drop off a tree on the side farthest away from you, and to keep the trunk in their line of flight. The peculiar cry they rarely fail to utter on alighting soon rediscovers them however. Their use of their tails, in supporting themselves, is extraordinary: I have repeatedly seen this bird in such a position as to look for all the world as though it had dug its caudal appendage into the bark, and were giving a little exhibition of the art of balancing on the tip.

A nest of that shy little bird, the Tree Creeper, I found about twelve feet from the ground in the hollow of a decayed branch. In it were five promising nestlings, and a snugger household would be hard to find. I noticed that the parents when returning from their excursions after food, never lit on the tree anywhere near the nest, but generally much lower down and on the opposite side, from whence they ran swiftly upwards, over e branch, and so to the nest hid within the fissure. The agility they display is wonderful. Nuthatches, too, find the locality congenial—they always remind me strongly of certain foreign birds—and seem very fond of tinkering up their nesting places, some alteration being usually deemed necessary. Several times I have seen Wrynecks hereabouts, but their nests I have never discovered. All birds, in fact, which build their homes in the holes and crevices of trees, or in the ivy and other parasitic plants attached to them, are in their element here, and few species go unrepresented.

A STUDY IN BLACK-AND-WHITE.

Spotted Flycatchers abound: sweet little things, confiding and industrious—hawking for flies the livelong day. I have found only one nest of the Pied Flycatcher, and that was foredoomed to destruction—built within the danger zone. I was somewhat nonplussed when I first saw these sprightly black and white little birds; I could not think what they were. I was walking by the side of the brook as I caught sight of the cock; a few paces further on the hen dropped, apparently, off the bark of a tree. A search of the spot revealed a small cup-shaped hollow, left by the forcible breaking off of a lower bough (probably by boys swinging on it), which held a neat nest of moss, bents and hair. Reposing therein were five pale blue eggs: the mystery was no more. On concealing myself the hen—modestly garbed by comparison with her mate—presently came back and settled down on her treasures. I could see her head and neck standing out above the sides of the hollow—reminding me strangely of the sugar caricatures sold as "Easter eggs"—and I had my fears: she was easily seen where there were so many to see. Two days later, on re-visiting the spot, I found every egg had disappeared.

"IMPUDENT LITTLE BEGGARS."

Those impudent little beggars, the Blue Tits, lord it all over the place. The Greater Tit and, in a lesser degree, the Coal Tit, are also very much in evidence; but the Marsh Tit (though the place seems so suitable) and the Long-tailed Tit have yet to come under my notice.

It is a treat to watch the little "Billy-biters"—their ceaseless activity, their acrobatic ability, and their swagger, excite one's wonder and admiration. I kept my eyes on one tiny couple so often and so long that they got to know me well; my presence did not alarm or hinder them one jot, though I sat and smoked at the foot of the tree which, not

ten feet up, held "all their little world." The hen was particularly inclined to be chummy: when she alighted on the tiny branch nearest the nest, with a fat, juicy grub in her beak, and observed me gazing sympathetically at her, down would come a friendly "tweet." Of course I never failed to "tweet" back, and up would go the feathers on her head—from very pleasure, I'll swear.

GOOD FEEDERS AND GOOD FIGHTERS.

Such indefatigable foragers these Blue Tits were, too: prodigious the number of plant-lice, caterpillars, and grubs consigned to an early grave by them. On two occasions, towards the dusk of evening (in the busy time, so to speak) I timed them in their visits to an oak close by from which the majority of their victims came. On the first occasion, when the youngsters were some three days old, in five minutes the pair did thirteen journeys; a week later, in the same space of time, they actually went one better. A little arithmetic on the basis of these facts gives one figures more than a little astounding, even after deducting a big percentage for intervals for personal "light recreation." If we could only cross their abilities in this direction into our strains of Canaries!

On one occasion I endeavoured to get a glimpse into the interior of the nest, to ascertain the number of youngsters. The hen, however, strongly objected. Unable to gauge the exact wickedness of my designs, she brought up her heavy batteries to defend the position: ruffled herself out all a-shake with rage, hissed and spit like a vicious she-cat, and looked so furious and obnoxious generally, that I beat a hurried retreat. It is a remarkable impulse this, the love of the helpless offspring—unconquerable, even though involving death. And yet in a few days' time every member of this tenderly-nurtured brood would fly out into the wide world and she would know them no more. Some little while later I discovered it was a case of "we are seven," not by any means a large family for a Blue Tit.

DINING IN THE DARK.

In these woods and ruins the Wren finds abundant choice of nesting sites, and many a big-domed structure is hidden hereabouts. Jenny is a clever architect, and designs and finishes her nest with great nicety, taking advantage the while of every possible means of concealment the site affords. I discovered one nest hidden in the hollow of a thick semi-ruined wall, the face of which was covered with a dense growth of matted ivy. It took me some time to locate—I doubt whether I ever should have found it but for the visits of the old birds with food—the outside of the nest harmonising so well with the accumulation of dead refuse at the back of the ivy, and the thickness of the latter rendering the light so very dim, the interior of the nest, as far as human eyesight was concerned, being pitchy dark. I imitated the low call of the parent birds, and, judging by the volume of answering "cheeps" within, the progeny was, as usual, a numerous one. The "instinct"—call it what you will—which enables the old birds to feed them in the dark one after the other evenly (as must be the case) is surely little short of miraculous.

Along the banks of the stream the Grey and Pied Wagtails nest freely, holes in the bank and in the walls alongside being usually favoured, though, not infrequently, the cavities in the undermined roots of a tree are chosen.

TWO MISSING GEMS.

One would think such a spot as this would be the haunt of that beautiful bird the Kingfisher. His gorgeous beauty—flashing meteor-like down the stream—is one of the two things lacking in an otherwise perfect whole. That darker jewel, the Nightingale, is the other gem mourned by this lovely setting.

Philomel's "long trills and gushing ecstasies of song" heard as the twilight faded in the West and the softened winds whispered to the trees would lend these glades a glamour their waking moments, beautiful though they be, could not hope to possess. But no!—its voice, "most musical, most melancholy," tunes not its "love-laboured song." Many a summer night have I lingered, hour after hour, hoping to hear its rapturous strains pour forth from some shady covert: alas! in vain. Sometimes the Sedge Warbler awakes and deputises in a disjointed manner; but what an apology for the 'Gale himself!

PRACTICAL BRITISH BIRD KEEPING

(Concluded from page 13.)

My experiences when I kept the latter led me to conclude that about the easiest to keep was the Bearded Tit and the most difficult the Wagtails; but I am far from dogmatising on this point. I do not think the value of maw seed—which is rich in vegetable oil—as an aid in the feeding of Softbills is as well understood as it should be. Neither do I think the practice, which I long ago adopted, of having special fronts fitted with glass instead of wire, for use during the time the birds are under the spell of the migratory fever, is so well-known either. I found them of immense benefit, obviating the constant clinging to and fluttering against the wires, and resultant broken flights and tails and "skinned" nostrils. I have dwelt on the importance of supplying Hardbills with unlimited green-food; so, likewise, must Softbills be attended to in the matter of live insect food.

Properly treated, it is astonishing how long British birds will live in captivity, indeed, certain kinds are of little service on the bench till they have moulted several times—the Redstart and Yellow Wagtail, for instance. On the whole, I believe the Hardbills live longest, which, on reflection, is only as might be expected. As an instance of longevity, I might mention that I know a Bramblefinch which has been winning during this and for several seasons past, and, though seventeen times house-moulted, still looks youthful and fit. He is now in the possession of Mr. Sam Ward, of Glasgow, and has been owned at various times by nearly every prominent West of Scotland exhibitor, each of whom, presumably, parted with him because he was getting old! Undoubtedly the keeping of British birds demands more attention on the part of their owner than does the keeping of Canaries, and is a much more practical affair. Yet I would not have it supposed that this is a drawback; on the contrary I fancy that those who are devoted to their birds will agree with me that therein lies its greatest charm.

GOLD-CRESTED WRENS: Dainty Birds and their dainty aerial cradle.

SUPPLEMENT TO "CAGE BIRDS" BIRTHDAY NO. 1907.

Some Rare Exhibits of Recent Years.

Depicted by Mr. H. NORMAN.

While the commoner birds must always claim a welcome corner in the hearts of bird lovers, it is to such rare and interesting exhibits as Mr. Norman shows us in the above plate that we look for the added attractiveness of our cage bird shows to-day. An interesting account of these species is given on page 11.

Printed for the Proprietor, Mr. F. CARL, 154 Fleet Street, E.C., by W. H. SMITH & SON, 95 Fetter Lane, London, E.C.

Our Xmas Number Competition.

A splendid entry has been received for the front page colouring competition, arranged by us in connection with our last Christmas Number. Over 1,000 front pages, painted in every conceivable medium, crayon, oil, and water-colour, have come to hand. One of the birds has evidently caused great speculation amongst the competitors, some of whom picture it as a Linnet, others as a Greenfinch, others as a Chaffinch, and others as goodness knows what. A large number of the entries represent so much waste of time, but on the other hand a large number have taken the utmost pains, and the winning front will have to be a super-excellent effort. The winner of the prize offered will be announced next week. The competition certainly seems a highly popular one.

THE CAGE BIRD UNION.

The Penzance and Dist. Fanciers' Association has affiliated to the Union; their show being on Jan. 25th; King's Heath and Moseley, January 25th-26th, and Rugby and Dis., January 30th-31st.—G. W. F. Lythgoe.

BOLTON WOODS C.B.S.

On January 12th, general meeting held Victoria Hotel. Secretary presented the balance sheet, showing a balance of £7 4s. 7d., which is very satisfactory. The following gentlemen elected: President, Councillor H. W. Rodgerson; Chairman, Mr. W. B. Atkinson; Sec. and Treas., Mr. E. Shepherd; Assist. Sec., Mr. J. Hutton; Auditors, Messrs. W. Firth and W. B. Atkinson. Date fixed for concert and distribution of prizes was February 2nd, when we hope to have a good attendance of members and friends.—E. Shepherd, Hon. Sec.

CITY AND SUBURBAN A.C.B.

A large number of members attended the Annual General Meeting, headquarters, January 14th. There were no less than four nominations for membership. Ballot for officers resulted as follows:—Council, Messrs. Prance, 58 votes; Curtis, 57; Davis, 56; Daintry, 55; Pooley, 54; Easterling, Hart and Shepherd, 53; Burton, 50; Lazarus, 41; Vickery, 40; Bassett and Offord, 37. Mr. Bassett withdrew in favour of Mr. Offord. Auditors, C. Prior, 51 votes; F. W. Thorpe, 43. Trustee, R. L. Crisp, 49 votes. Judge for Pair Show, J. Robson, 37 votes. Of 82 ballot papers, 62 were returned. The annual balance sheet read and passed. Treasurer gave a few statistics, drawing attention to the fact that £4 6s. 4½d. had alone been saved in postage last year. In special prizes, they gave to the members in 1903, 19s. 6d.; in 1904, £1 8s. 1d.; in 1905, £1 13s. 6d., and in 1906, £5 5s. 11d. Their cash balance rose from 5s. 4d. when he took over the treasurership at the end of 1902, to £5 9s. 0d. in 1903; £15 5s. 3½d. in 1904; £19 2s. 7½d. in 1905, and £24 8s. 6d. in 1906. The total worth of the Association was 13s. 8d. per member, thus showing the steady progress made. A vote of thanks to the auditors (Messrs. F. W. Thorpe and C. Prior) was acknowledged by Mr. Thorpe, who remarked that he was more than satisfied with the sound financial condition, all accounts being in correct order, and fulfilling all their requirements. There was but one alteration in the set of new Rules, which speaks volumes for the careful way they were drawn up by Mr. G. E. Weston. Notice of two alterations had been received. The first was to the effect that a win at an open limit class should not make a member become a champion, which was lost, and the second bone of contention was riveted upon the simple little word "Gift" in Show Rule 1, which was hotly contested and finally deleted. Date of Pair Show was fixed for February 2nd; Finch Show, April 8th; Young Bird Show, July 6th, and Annual Show, November 22nd and 23rd. (Secretaries kindly note). After the announcement of various lectures, competitions, etc., arranged for the ensuing year, Mr. F. Pullinger proposed the reading of a paper on "Breeding," himself offering 10s. as first prize, and Mr. A. W. Curtis 2s. 6d. as third prize, which was approved of and the donors thanked. Mr. L. Daintry placed upon the table a lovely silver cup, to be called the Yorkshire Cup, for the best unflighted Yorkshire, to be won outright at the Annual Show by a novice who has never won a first prize.—Victor Wynn.

"LIVERPOOL" VIRUS
is absolutely harmless to human beings and animals, but is speedily fatal to
RATS & MICE.
It causes a fatal disease to spread through a colony of these pests.
They do not die in their holes.
There is, therefore, no danger of smell from dead bodies.
Mice Virus, 1/6 per tube.
Rat Virus, 2/6 & 8/- per tube.
Prepared in Liverpool. Of all Chemists.
Sole Agents: 56, Hanover St., Liverpool.

Our Birthday.

MANY HAPPY RETURNS OF THE DAY TO READERS.

Yet another Birthday Number of "CAGE BIRDS"! The sixth, and so far the largest, and, we trust, the most successful of the series.

The flight of time brings many changes, but has it, we wonder, ever brought any more remarkable development than that of "CAGE BIRDS"? Comparatively few of our readers can have seen the first number of this paper; it was a miserable little demy quarto twelve-page sheet, but it had as stout a heart and as large an ambition as any journal in the land. The possibilities before it, foreto'd in the opening editorial, have every one of them been realised. True, the ideal cage bird paper has not yet been produced, but "CAGE BIRDS" may with justice claim to have reached as near perfection as human fallibility and weakness will permit in such a short space of time.

The concensus of public opinion has been with us almost from the start; latterly the tide of public favour has borne us along triumphantly, and the result is seen to-day in a giant paper, with a far-reaching circulation guaranteed at well over 40,000 copies a week, a staff of experts impossible to equal let alone surpass, a record advertising medium, and coloured plates the exquisite loveliness of which had never greeted the eye of the fancier before.

A letter which has reached us this week from one of our readers, evidently one of those good-hearted unpretentious spirits we frequently find in the Fancy, so adequately conveys the attitude of our average supporter that we select it from the budget of good wishes lying on the table in front of us. This reader sends us an advertisement, as he says,

> "for your Birthday Number, or I should say, my Birthday Number, as I have taken a great interest in the paper from the commencement, and have been greatly pleased to watch its growth, which I think must be beyond all readers' expectations, considering that at the time it started it had such strong rivals. The last time I advertised, it brought me in contact with so many fanciers privately that I cannot supply all their wants, but rest assured I shall do my best for 'C B's' further success. Coming to my bird room for a little birdy chat are many visitors, and I always keep the current number of 'Cage Birds' on my table, also the plates, which please them well. Wishing you every success and a prosperous New Year to self, staff and paper.—E. W. Sellick, Ashbourne, Derbyshire."

Now what this good friend of ours does we want all of you to do. Recommend "CAGE BIRDS" right and left, endeavour to interest your neighbours, your friends, and even strangers in your hobby by showing them "CAGE BIRDS" plates and lending them your "CAGE BIRDS" to read.

Specimen copies of "CAGE BIRDS" will always be sent, free of cost, by the publisher to any address on receipt of a post-card, and in any way we can supplement your efforts we will.

The splendid response made by Fanciers to our appeal of last week has overwhelmed us. We wanted to break all records; with the grand support received we believe it will be said we have done so handsomely. On this auspicious occasion we extend sincere thanks to readers the world over and to all who have in any way contributed to our success. Whatever the future may have in store for us, gratitude for past favours will always remain.

With this issue we give:—

A Sixteen page Art Supplement,

Two Coloured Plates, entitled: "Desirable Aliens," & "Stars of the Season" respectively, also

A TRI-COLOUR CALENDAR.

See that you get them all with this Number.

The Walmer Shooting Affray.

The domestic affairs of a well-known cage bird man have come into sad prominence the last few days with the arrest of Mr. Patrick E. Trainor, late of Teddington, on a charge of shooting with intent. The case is not completed at the time of going to press, but it appears from the evidence that Trainor, who has been living apart from his wife, accuses the man he assailed at Walmer of taking his wife from him. This is denied by the wounded man, and meanwhile great excitement has been caused in cage bird circles, as elsewhere, by the unexpected news. Mr. Trainor will be remembered by our readers as a defendant in the celebrated "Trainor case," brought by him against the London and Provincial O.S. for withholding prizes on the ground that he had incorrectly entered a bird in Novice Classes, being ineligible to show in that section. The action went against Mr. Trainor, and he was mulcted in costs. Mr. Trainor at the same time threatened Cage Birds and another Fancy paper with libel, but did not take action.

Is it a New Variety of Canary?

A correspondent draws our attention to a laughable misprint in a Scotch newspaper. The local reporter has discovered a new variety of Canary entitled, "The Plumbald Norman." Whether he had in mind our artist in chief, or what he really intended to write, is known only to himself.

The Sex Problem.

The difficulties of judging hen British bird classes were well illustrated at the recent West London Show, when a Grey Wagtail which was so large and so good in colour as to be left out as a cock (and deceive the onlookers as well) was described by its owner, Mr. Francis, as an old aviary inmate, which had therein built, laid eggs, and sat on them! All, however, proved unfertile, through, Mr. Francis thinks, default of the male bird, which, by the way, he said looked, when in winter dress, much more like a hen than the real lady herself. In summer dress, of course, the comparative absence of black throat markings at once betrays the hen.

CLUB NOTICES.

No charge is made for notices of forthcoming meetings, but they can only be inserted once. Should secretaries desire to secure immediate insertion of their announcements **exactly as written** they can do so by prepayment at the rate of three words a penny.

Amalgamated Yorkshire O.S.—Annual general meeting, Fri., Jan. 25th, at Market Tavern, Godwin Street, Bradford, 8 p.m. prompt. Presentation of cup and medals, balance-sheet, etc.—Fred Hammond, hon. sec.

Ashton-under-Lyne and Dis. O.S.—Jan. 26th, at 16, Old Road, 7.30 prompt. Election of officers, balance-sheet, etc.—Harry Foden, sec.

Barnsley and Dis. C.B.S.—Jan. 19th, at Temperance Hotel, 7 p.m. Election of officers.—F. Morris, sec.

Bee Hive Bird Club, Cynthia Street, Pentonville.—Handicaps: Linnets, Chaffinches; Sundays; prizes, free. Cork club meeting, Sundey evenings. Pigeon flying club, Monday evenings. Members wanted. Handicaps every evening, Mondays excepted. Join our summer outing club.—Frank Rob, sec.

Bradford (East) O.S.—Jan. 22nd, at Park Chapel Schools, 8 p.m. Schedule for February Show; all members please attend.—H. Hill, hon. sec.

Brighouse and Dis. C.B.S.—Tues., Jan. 22nd, at Round House Inn, Clifton Road, 7.30 prompt. Drafting schedule for Members' Show, Feb. 2rd, and other Show business, and to discuss Yorks Union rules as presented by sub-committee.—A. Morton, hon. sec.

Bristol C.B.S.—Feb. 6th, at Headquarters, 8 p.m. Election of officers for the ensuing year, and other important business.—C. E. Brown, sec.

Derby C.B.C.—Sat., Jan. 26th, at Derwent Hotel, 7 p.m. Statement of accounts, votes of thanks to retiring officers, election of officers for ensuing year, clearing up Members' Show, etc.—W. H. Bamsey, hon. sec.

Dewsbury and Dis. C.B.S.—2.30. Members' Table Show.—B. Cook, sec. (No date given, nor place of meeting.)

Eccleshill C.B.A.—Sat., Jan. 19th, at Fountain Inn, Eccleshill, 7.30 p.m. General meeting; election of officers, balance-sheet, and other important business.—W. Hollings, sec.

Farnworth and Dis. C.B.S.—Jan. 20th, at Old Post Office Inn, Market Street, 7.30. Election of officers, balance-sheet, etc.; will all members please attend?—W. Dawson, sec.

Green C.A.—Thurs., Jan. 24th, at the Oldham Hall, Renshaw Street, Liverpool, 8 p.m. prompt. Bird Washing Exhibition.—S. Hadwin, sec.

Gt. Horton Good Intent.—Jan. 26th, at Church Schools, 8 p.m. Adoption of balance-sheet; arrangements for Members' Show; musical evening; all attend.—A. Holden, sec.

Laisterdyke B.F.A.—Jan. 26th, at Royal Oak Hotel, 6 p.m. Annual Members' Show; please note change of Sec.—J. Pownall, 69, New Hay Road, Bowling, Bradford.

Leicester C.B.S.—Jan. 23rd, at Headquarters, 8 p.m. Balance-sheet and election of fresh officers; Table Show any variety Norwich, yellow ben, ditto Novice; judge, Mr. T. Ride.—J. Heighton, sec.

London and Counties A.C.B.—Annual general meeting, Jan. 24th, at "The Bay Malton," Great Portland Street, W., 8.15 p.m. Election of officers, etc., etc.—R. J. Pretty, hon. sec.

London C.B.A.—Postponed annual meeting, Wed., Jan. 23rd, at St. Clement Danes' Parish House, 8.30 prompt. All members please attend.—W. A. Hobby, hon. sec.

Loughborough and Dis. C.B.A.—Jan. 23rd, at Charnwood Coffee House, Mill Street, 7.30 p.m. All bird-lovers invited.—E. Thorp, hon. sec.

Manchester and N.C.O.S.—Mon., Jan. 21st, at The Deansgate Temperance Hotel, 7.45. Election of officers.—Geo. Bleach, asst. hon. sec.

Oldham and Dis. C.B.S.—Jan. 22nd, at Textile Dining Rooms, Shaw Road, 8 p.m. Mr Hampshire's demonstration of "Cage Making," followed by advice on painting and enamelling of same; all welcome.—A. Ackroyd, sec.

Porth and Dis. C.B.F.S.—Jan. 19th, at Danix Temperance Bar, Hannah Street, Porth, 7.30 p.m. Report of the school children's essay on Show.—John Challenger, sec.

Potteries and Dis. C.B.A.—Jan. 26th, at Red Lion, Stoke, 8 p.m. Important business.—J. Simcock, sec.

Spen Valley C.B.S.—Mon., Jan. 21st, 8 p.m. Important business; all members attend.—A. Whitehead, hon. sec.

St. Helens O.S.—Jan. 21st, at George Inn, Water Street, 8 o'clock; all members are requested to attend; important business.—Thos. Vose, sec.

Stockport O.S.—Mon., Jan. 21st, at County Restaurant, 8 p.m. Receiving specials, ticket money, and electing auditors.—W. Stafford, sec.

Stoke Newington F.A.—Wed., Jan. 23rd, at Devonshire Square Church, Stoke Newington Road. Annual general meeting; election of officers, Secretary's and Treasurer's report; members requested to attend.—Geo. Dowden, sec.

Western Counties O.S.—Mon., Jan. 21st, at Boro' Restaurant, Bank Street, Plymouth, 7.30. Pair Show (matched), breeding, for Society medals.—Thos. Pope, sec.

Wibsey and Dis. C.B.S.—Jan. 26th, at Horse and Groom, 6 p.m.—W. E. Norton, sec.

Mr. W. R. Miles is judging Ryde Fanciers' Show, Jan. 31st.

Dealers Disqualified.

The Bristol C.B.S. have decided unanimously that dealers be not eligible for membership of that Society, and have issued a definition of the term "dealer," which they state means a person who gets his or her living out of cage birds.

The Mouse-bird.

In the foreign class at the recent West London Show, Mr. J. Dewhurst had a rare exhibit on view in the South African Coly (black-faced variety), called by colonists out there the "Mouse-bird," probably owing to its curious habit of creeping about with its legs out flat, looking as though "crawling about on its hocks," as an onlooker at the exhibition put it, all its toes being usually carried pointing forwards. These birds are fruit-eaters in captivity, and climb about the cage in an extraordinary manner, with lightning-like rapidity. They also sleep suspended by their powerful toes, and hang together in "bunches." Their plumage is extraordinary, being more like coarse fur than feathers, with a disagreeable feel" when touched. On the top of the head appear a number of longer feathers, capable of erection, something like a miniature Cockatoo crest.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Norwich Plainheads.—**J. H. Payne.** Yorkshires.—**H. W. Battye.** Crests & Crestbreds—**W. E. Greeves.** Cinnamons & Miscellaneous Canary Queries—**J. North.** Border Fancies—**J. Wild Bird Life—**H. Norman.**

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Cross Moult (Madam).—Your cock bird has evidently gone into a cross moult, as you say he is casting a lot of feathers. This would stop him from singing. The cause of its moulting is no doubt the heat of the kitchen where you are keeping him. Keep him as far away from the fire as you can, and in a box cage, that is, one with only the front of wire. Cover over at night with a warm cloth; give in his drinking water 10 drops of tincture of quinine for a fortnight. Three times a week give a little crushed biscuit and hard-boiled egg well mixed, say a half-teaspoonful, to which add 5 drops of Parrish's chemical food. Hang him as far below the ceiling as you can. Treat your hen the same.

An Unbearable Noise (A.R.W.).—The probability is that if you remove your birds from your kitchen to a cold room you will get them fall into a cross moult, so that I should advise you to let them stop where they are, and try and bear with their lusty singing. Let the thought comfort you that they are in tip-top condition for the time of year. I can assure you there are a great many that would like to hear their birds singing as yours are doing. No, I don't mean deaf people, but those who have birds that do not sing a note, and there are, I know, hundreds in this unfortunate position from various causes. If you have been giving your birds egg food in any form, discontinue it, and feed only on plain canary seed.

Much Too Fat (Lover of "C.B.").—Keep your hen as you are doing in a roomy cage, and let the perches be as far away from each other as possible. Give her twice a week a little Epsom salts in her drinking water, just enough to make it taste slightly. Keep her on equal parts canary seed and millet, and occasionally a little German rape. Keep her in as light a place as you can; give two or three times a week a spray or two of watercress.

A Quandary (In Abeyance).—I should advise you to pair up your birds rather early so that you may have a couple of nests and then part them, which you should be able to do nicely in time for you to enjoy your holidays. Pair them up the first week in April. A fortnight previous give them a little egg food every day, and a pinch of maw seed three times a week, the object, of course, being to get them into as high a condition as possible, so that they will go to nest as soon as you wish them to. I should certainly not advise you to take your birds with you on your holidays, as I feel sure you would not do any good by so doing, and, again, the time you name, the last two weeks in July, is practically the end of the breeding season. If you commence when I say, the last nest should be old enough to do for themselves, with just ordinary attention.

A Nasty Noise (A. Williams).—Give your Norwich cock in his drinking water 15 drops of syrup of Tolu for a fortnight on alternate days. On the days he is not having this, give him a little honey, dissolved in warm water, to which add 10 drops of glycerine. Keep him covered over at night with a warm cloth, and away from any draught.

Anxious to Nest (F. Yardley).—Your hen is evidently ready and anxious to go to nest, but it is far too early, so do not put her with a cock yet. The latter end of March or the beginning of April will be quite early enough. In the meantime, keep her on a plain diet, canary seed and German rape. Do not give her any egg food until about ten days before you pair her. Let her have a piece of apple to peck at twice a week. If you can keep her in a room by herself until ready to pair her up, so much the better.

Sore-footed Cock (F.H.).—Bathe your bird's feet in slightly warmed water for about a minute, then dry and put on a little vaseline with the tip of your finger. Do this for a week once a day, and I think he will come all right again. You do not say how you are feeding, or I could have advised you further.

Wing Carriage (A. Butler).—As you say your pair of Norwich are equal in points with the exception of the cock's wings, which are slightly crossed at the tips, I do not think you need have any fears as to the result of their breeding. You may get a small percentage with the wing defect of the cock, as this is a fault that we see a lot of, and amongst some of our very best birds. A lot depends on whether your cock bird is bred from a pair that were both good in wing carriage, or whether from a pair either or both of which had this fault. It from the former, and as you are pairing him to a hen which I gather from your query has a pair of perfect wings, it is possible that you may not have a single bird showing this defect.

Effects of Protracted Moult (Avis).—Your bird is evidently run down, no doubt the result of a protracted moult. Give him in his drinking water for a fortnight 10 drops of tincture of quinine. Then follow up by giving him three times a week a little crushed biscuit and hard boiled egg, well mixed, to which add 5 drops of Parrish's chemical food. Let the staple seed be best Spanish canary. Three times a week give a little of the following mixture:—Hemp, German rape, and Niger seed. Twice a week give him a pinch of maw seed, and let him have a piece of apple between the bars of his cage for him to peck at.

Time for Breeding (W. J. B.).—Pair up your birds about the second week in April. As you say you have been troubled with egg-bound hens in the past, try giving them, a few days before you expect them to lay, plenty of niga seed, and let them have some cuttlefish bone to peck at. Also give a little fresh butter well mixed with a little Demarara sugar. Make it as stiff as you can, and put on the end of the perch for them to peck at. You will soon find it disappear. The times you name—May or June—is far too late. Many will have had their second round by then.

A Defective Claw (South-West).—I see no reason why your Norwich cock, that you say has one defective hack claw, should not fill eggs. I do not think there is any doubt but what he will. As you say you only want him for stock purposes, I should not advise you to attempt to put the claw right, the probability is that you may make it worse. If you can prevail upon the person from whom you purchased him to change it for another, I should do so.

Moulting last July (Amateur).—Your bird has evidently gone into a cross moult. Do you keep him in the window? If so, take him away at once, and put him in a warm corner away from any draught, and take the precaution to cover over every night with a warm cloth. Hang him well below the level of the gas burner. Give him in his drinking water ten drops of tincture of quinine on alternate days for a month. Give twice a week a little crushed biscuit and hard-boiled egg well mixed, to which add five drops of Parrish's Chemical Food. Give him a little boiled carrot, and occasionally a pinch of maw seed.

Wanting a Pair (Smith).—I should advise you to procure a pair of stock birds from some good and reliable breeder in preference to buying a pair in a show. Many birds are put into selling classes at shows that are practically useless from a breeder's point of view, many being barren, bad feeders, have cannibalistic and other equally as bad tendencies, and they are put there so that their owners may sell their trouble. Of course, I do not mean to suggest that all are worthless; on the contrary, I have seen many really good birds in these classes, sound and all right in every respect, and fit to win, but they are not, as a rule, put in by the old hands. They are generally to be found coming from the room of an amateur, who has started with some well-bred stock, and the old hands are the ones that snap them up. If you wish to buy them from a show, see they are unflighted, and have the advice of a practical fancier before purchasing.

YORKSHIRES.

Answered by H. W. BATTYE.

Flying Bird for Exercise (H. J. Cable).—I see no objection to you allowing your bird to fly about as often as you can; the exercise will be beneficial to the bird. Give best Spanish canary as its staple food, and one teaspoonful twice a week of the following mixture:—1 lb. summer rape, ½ lb. maw, ½ lb. inga, ½lb. hemp.

Time to Pair (Beginner).—Yes, but you should not pair the hen up till well into the month of May, when she should have got well over her moult and be in good breeding condition. (2) Keep free from draught and give a little egg food daily, to which add, once or twice, six drops of Parrish's Chemical Food; well mix together and sprinkle a pinch of maw seed over the lot. Keep the bird in the room it now occupies, and cover at night with a light cloth.

Sleepy Hens (Novice).—From your description of your two hens I should advise you to get rid of them, and the best way would be to kill them at once. Unhealthy stock are of no use for breeding.

Pairing Queries (F. P.).—(1) If you pair a clear yellow cock to a green marked yellow hen you may expect to get all yellows, but might possibly get one or two buffs, and you would have about even chances of getting both clears and marked young ones. I do not advise breeding with two yellows. (2) You do not say what colour your birds are, but I take it for granted they are yellow and buff Cinnamon marked birds. By breeding with two marked birds most of the young ones would be marked, some of them probably very heavily. If the parents are yellow and buff, expect about even numbers of yellows and buffs from them. (3) You ask: "If I pair a clear yellow cock to a Cinnamon marked hen, what colour of young ones would I get?" It would depend on how the clear yellow cock was bred. If a green-eyed bird, without Cinnamon blood in its veins, you would breed clear and green marked youngsters, but if your clear yellow cock was a pink-eyed or Cinnamon-bred bird, then you would breed clear and Cinnamon marked youngsters. But to get either kind of markings with certainty you should know how both birds have been bred. (4) By pairing a Cinnamon marked cock to a clear yellow hen you would get both Cinnamon marks and green marks, if the yellow hen was devoid of Cinnamon blood; but if pink-eyed you would get all Cinnamon marked birds. But to breed for given points, either in markings or type, you should make a point of knowing as much as possible of your breeding stock's ancestors.

Out of Condition (W.F.).—Keep your bird on plain white canary seed as staple food; instead of scalded rape, give ½ teaspoonful of maw seed three times a week, and keep well supplied with clean, sharp gritty sand. Give in its drinking water, for seven days, fresh every morning, 10 drops of syrup of buckthorn.

Nervous and Frightened (H.E.B.).—Evidently your bird is of a very nervous kind; keep it where it will have good light (near front of window); give 10 drops of Parrish's chemical food in its drinking water, fresh daily. Keep it where someone is regularly moving about; talk gently to it, but avoid startling it. It may gradually improve, as nervousness seems to be the only thing the matter with it.

Rough and Broken Feather (A.A.).—I am of opinion that both the bird and its cage are infested with red mite. Get a clean cage (a new one would be best); catch the bird during the day and give it a good dusting with freshly prepared insect powder, any good chemist will supply you with this. Dust this well into the feathers, especially underneath its wings, then get a little paraffin oil, wet the end of your finger, and lightly touch the bare places. Do this on alternate days for a week, and then repeat twice a fortnight. Sometimes a hen will make more noise than a cock, but you will definitely discover the sex later.

CRESTS AND CREST-BREDS.

Answered by W. E. GREEVES.

Mating Two Crests Together (S. R. B.).—It is usual to pair a Crest to a Crestbred, i.e., a plainhead bred from one Crest parent. Mating two Crests together will produce mop Crests, and most likely young ones with sore heads or with bald places on the head. This method of mating two Crests together is occasionally adopted by breeders of exhibition birds, but then it is with two of the largest possible Crests, perfect in shape; it is only waste of time mating two small Crests together.

Crestbred Cock. Loss of Voice (A Constant Reader).—Crests and Crest-breds are not, as a rule, noted for their singing powers. I have possessed some grand birds and know many others which made but a poor attempt to make even a slight noise. If your bird is healthy, and does not appear to be suffering from lung trouble, as the spring advances he will most likely get stronger in voice. Your feeding is correct; instead of the present medicine put three drops Syrup of Tolu on the egg food three times a week, and six to ten drops of Parish's Chemical Food in the drinking water for a week or ten days.

Crest Hen with Growth (J. Birchmough).—It is difficult to tell, without seeing the bird or knowing the nature of the growth of the two small red lumps you say have grown on each side of the oil gland, what to advise you to do. If the bird is in good health, and there is no inflammation round the lumps, and the bird does not appear to suffer any pain from them, I should let them alone for a time and watch further developments. If they are hard lumps, and when touching them they will move about, they may be removed by just cutting the skin, when the hard substances inside can be taken out. You should get a medical man to do this, or someone who thoroughly understands how it should be done; if it is merely a hard lump, free from inflammation, paint with iodine.

Crests and Crest-breds—Meaning of Terms (W. G. B.).—(1) Grizzle.—A Crest with part light feathers and others lightly shaded dark. (2) A Grizzle Cap Crest-bred.—A plainhead bred from one Crest parent with mixed head feathers, light and dark, only that the dark feathers are a much lighter shade than the usual green; the top of the head of a plainhead is the cap. (3) Grizzle, Light and Dark.—The former carrying more light feathers than dark; the latter more dark than light. (4) Mop.—A Crest with no formation, merely a tuft of feathers twisted, and generally standing up. (5) Heavily Lashed.—A Crest-bred with an abundance of head feather hanging well over the eyes. (6) Good Frontal.—The front of the crest, wide, dense in feather, coming from the centre to the end of the beak. (7) Heavy Brow.—Synonymous with heavily lashed. (8) Heavy Feathered Crests.—A quantity of feather, dense, many layers of feather. (9) Feathery.—The feathers in crest wide and of a soft, silky nature, opposed to a long, narrow, wiry feather. (10) Gray Crest.—Synonymous with Grizzle, but a name more often used than Grizzle. (11) Clinkers.—Often used to denote an extra good bird.

BORDERS.

Answered by J. PATTERSON.

Cock Unwell (W.E.B.).—I answered a query from a party using the same nom-de-plume last week. It was something similar to yours, and I expect you will be the same querist; if not, please refer to advice in last week's issue, and follow out the same instructions. Only you state the cock keeps the feathers of his back all up. You might safely add to diet a small piece of sponge cake, with five drops sherry wine. Stick it between the wires every other day, on the day you do not use the egg-food. You might also dust his egg-food with about as much Cayenne pepper as you would take amongst your own food, until you see some improvement; then gradually withdraw all tonics in food, and place in water ten drops syrup of Buckthorn until well; keep quite away from all draughts and cover him well over with paper at night.

Cinnamons: Selfs and Marked (Donald).—You state you want to breed a strain of your own, and ask me to tell you what to get to pair up with, but you give no particulars of what birds you have in your room, or if you want to buy all your stock birds. I am therefore at a disadvantage to know how to answer you. If you have some birds you wish to keep, and are anxious to procure suitable partners for them, kindly repeat query, and give colours, markings, type, etc., and I shall be happy to further advise you; but if on the other hand, you are buying all your stock birds, you would need some of them Selfs and some Marks, just as many pairs as will suit your requirements. Keep the Selfs for Self breeding alone, and only introduce one now and again into your marked strain, when markings are getting light, and vice versa, where you may be losing in type, etc. If you want to start with green birds, you have a long and tedious task before you, whereas if you purchase a few pairs from any well-known breeder of this variety, you might produce a winner the first season, and it would be cheaper in the long run to pay a good price for a suitable and reliable foundation. The greatest drawback at present in Cinnamon Borders is to get cock birds. Most Cinnamons shown are hens, and I am afraid you must rest contented with a Cinnamon green cock, say yellow paired to a Buff Cinnamon hen. The majority of their youngsters would be green cocks and Cinnamon hens. Keep one of the green cocks, and pair up to his mother, so as to strengthen the Cinnamon blood, and reduce the green until you have a Self cock. After that you may feel your way more safely, but the man is not born yet who could tell you what to expect from any given pair, without the fullest knowledge of your stock birds. (2) They are what I might term freaks of nature, and there are great secrets hidden in the production of same, which I have up to the present not mastered. (3) Examine the feather of a green bird, and you will find the extreme outside carries more colour than down towards the roots, whereas in the latter it is more solid and all of one shade. I hope you will be successful with this variety and able to make a name for yourself with them, and also bring them more to the front. At present they are neglected.

Hen Weak (F.M.).—I have grave doubts that your hen will be of any good this season, although she is calling to the cock, as you imagine. From your description of her, and the way she let all her broods die last season, I would prefer a fresh hen to pair up to the cock, and if she is well bred you might keep her as a spare one. If so, add to her diet a third of German summer rape seed every other day; give on the other days a little milk sop with five drops chemical food mixed well through; give in drinking water five drops syrup of Buckthorn and ten drops sherry wine fresh daily for the next week or ten days, until you see some improvement. (2) Your other hen was egg-bound with her first egg, with the result she got into a very weak state, which must have upset her whole system. She may do all right this time; feed the same as No. 1, with the exception of drugs in water. Give fresh gritty gravel every week on drawboards when cleaning out. Hang up a piece of cuttlefish bone for them to peck at; also keep all eggshells from your kitchen, dry in oven, and mix amongst the gravel. After this month is over, give a little inga seed, unless you give once a week amongst the gravel some mixed seeds sold in packets by some well-known seed firms. The great cause of your failure I think is from your keeping them in the kitchen. The temperature fluctuates far too much in kitchens to keep birds in proper trim. Could you not get them into any spare corner of some room, or attic, where it would be more equal. Look over and see. Write me, and I shall be happy to advise you how to construct it to your own and your birds' comfort. (3) Pleased you think so well of CAGE BIRDS, and thank you for wishes for its success. Don't think of "trouble," it is a pleasure to help such as you.

LIZARDS.

Answered by BARKER CLEGG.

Injured Leg (A.E.P.).—Ere this reaches you, I hope your Lizard will be much better. You have done perfectly right with your treatment. Bathe the leg in a small pot of hot water, to which add two teaspoonsful of whiskey, keep the leg immersed for at least five minutes night and morning, then dry the under parts with a warm cloth, and place a little chopped hay over the cage bottom, half inch thick. You might leave one perch low down, and if the bird is wild, bind the wings round with hemp or worsted. It will manage to jump on the low perch, if inclined. Keep in a warm room, and very quiet. I think your bird will be all right in a short time.

Pairing Two Broken Caps (T. Snow).—I must refer you to the answer to D. Smith, in the last issue of "C.B.," re the first part of your enquiry; secondly, yes, it is quite possible for you to get a Clear Cap from two Broken Caps. Still, you would be losing ground in your endeavour to produce the ideal bird by pursuing this course more than one season, unless your broken Caps in each case were bred from Clear Caps. Then you would be quite in order. As you don't say anything on that point, I presume you don't know their pedigree; therefore, it would be more to your advantage to procure two Clear Cap birds and mate them up. You would then be able, with ordinary success, to continue upon the line breeding for many seasons.

Blue Lizards (J. Needham).—Yes, there were what were termed Blue Lizards; they were of the same stock, but exhibited a blueish shade, being invariably bred from two Silvers. This class of bird died a natural death when colour feeding was introduced some 25 to 30 years ago. If natural colour should again be the order of the day, no doubt there might be a revival of the Blue Lizard. The late W. A. Blakston does make a reference to these birds, I believe, in one of his works.

GREENS.

Answered by S. HADWIN.

Norwich Greens (Curious).—It is rather a bare enquiry to ask what would be the result of pairing a Marked Buff cock to a Self Yellow hen, seeing you do not say how the birds have been bred. Assuming from the tone of your enquiry that the cock is bred from a marked strain and not from Greens, the result is likely to be heavily marked youngsters. Colour to a very great extent follows the cock, so that a marked cock paired to a Self hen would not throw as near to the Self colour as a Self cock paired to a marked hen would. The best thing for you to do, would be to repeat your query, giving particulars as to how your birds are bred, and be very particular to describe feet and beak, as to whether they are dark or light, as their feet and beak have a big influence in determining the quantity of green blood possessed by any specimen.

ROLLERS.

Answered by F. A. LESTER.

Breeding Advice Required (Novice).—If you want finer built birds, I would suggest Yorkshire hens as I have used this cross myself for a few gift birds for friends, and found them very good. (2) The size would be right, but keep separate. (3) Feed plainly on good canary 1 part, best German rape 2 parts. Hemp, maw, linseed, ¼ teaspoonful now and then. Egg food, five biscuits and one egg, boiled ten minutes, thoroughly mixed twice a week, the small lots of seed alternately. (4) Mr. House publishes a book on Canaries that would suit you admirably, the price is 1s. 2d. from this office.

What to Mate to German Hen (Canariensis).—You will get the best results from a German Roller cock. You must choose from our advertisement columns. We cannot recommend individual advertisers. The hens' sore feet are due no doubt to excreta clogging in the folds of the underfoot, and to the perches being too small or too large; wash the feet carefully in warm water, with a few grains of permangate of potash dissolved into it. Do this two or three times a week. Put a thick sprinkle of silver sand on cage bottom. Alter perches, having one square, rounding off sharp edges, and the other round. Use deposit system to buy bird.

Hangs One Wing Down (J. Oates).—If the bird is not a valuable one, and you have good cause to think the wing broken, I should destroy it, as it would not be much use for breeding in that condition. Accidents to birds are very difficult to deal with; they are best destroyed, unless very valuable. Glad you find our paper valuable; kindly recommend it to your friends.

Diarrhœa (Huggy).—Presuming your bird has this complaint, I should imagine he has got it from some stray seed that has got into his ordinary mixture of rape and canary, or maybe the egg food is responsible for this. If you only keep your bird for song, I should try and break this off, as

it is not really necessary. Clear his stomach out with Epsom salts, enough to cover a threepenny piece, as advised to Denis A. Nunan last issue. Then give him a few drops of Parrishe's in his drinker; this and few pieces of apple and fat bacon occasionally will doubtless soon set him right. Do not keep too warm.

Aged Roller Not Singing (Mountain Roller).—I should think that your bird has perhaps got past singing. Do you mean you have not taken very much care of him? If that is so, it will account for his condition. Give him a few other seeds, as recommended to Novice in this issue, and a little egg food now and then, and he will doubtless recover and delight you again with his song. YORK. S

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Off Song.—Cock Canary seems lively enough, is in good condition, but is continually eating, and is "off song." His bowels seem to be enlarged, of a dark red colour in some places and white and dark in others. He is always pecking at himself. Seed and apple diet; cold room.—J. Y.

Your bird may have got inflammation of the liver and bowels. It should be kept in a box cage and in a warm room, or where the sun shines. It should not have any apple or green food at present, but feed it on bread and milk sop sprinkled with seed. Get a chemist to mix the following, and give in a glass vessel in place of plain drinking water: Sulphate of iron, 1 scruple; diluted sulphuric acid, 20 drops; sulphate of soda, ½ oz.; distilled water, 1 pint. The pecking of itself is probably caused by redmite; look for same by candle-light, and if found dust bird well with insect powder, and apply turpentine to cracks and crevices of the cage.

Hens Want to Nest.—Two hen Canaries want to nest, one has laid an egg. Do you think it is too early to pair them up?—A. SNOW.

Your hens have most likely been forced into abnormal breeding condition by being kept in a warm room. It is quite two months too early to pair up Canaries for breeding. Run each hen into a separate cage, feed on Canary seed and sweet apple; reduce the temperature of their room, and keep them out of sight and sound of the cock bird.

Better-Looking Songsters.—Which would produce the better songsters and better-looking birds with more colour, Border Fancy cock with Roller hen, or Norwich cock and Roller hen?—J. L. PLUM.

A great deal depends on the way the stock birds have been bred, and also on the birds themselves. Cross-bred birds from a common Roller will not be any improvement on parents. It is most difficult to get good whistling, and fancy properties of size, colour or marking in one bird. Better by far stick to the English varieties if you admire their superior appearance. Most of them sing well enough to please. Rollers have a cultured way of singing, but have no pretensions to good looks. A yellow variegated Border would put some colour and quality into the Roller stock without altering the size and build of the progeny. It does not matter which is the cock or which the hen.

Lost Tail.—Canary lost its tail three months ago, and there is no sign of a new one. I am feeding on mixed seed, and give twenty drops of Chemical Food twice a week.—TAILLESS.

Your bird must have got its tail broken off; roots of the quills of the first feathers are probably still in. Examine it carefully, blowing away the bent feathers. If they are in you can extract them. Let the bird have a teaspoonful of soft food daily, also a slice of sweet apple, boiled carrot, or a few leaves of watercress, chickweed or groundsel. Feed well and keep warm in sunny window.

Egg-Food.—Should I be as successful if I discarded the usual egg-food and adopted the undernoted preparation for rearing young from nest. If not, would it do to mix it with the egg and bread. If so, what quantities? "Biscuits, 8 ozs.; ground linseed, 2 ozs.; oatmeal, 3 ozs.; rice, 3 ozs.; crushed hempseed, 2 ozs.; sugar, 4 ozs.; salt, ½ oz.; maw seed, 2 ozs." Taken from Wallace's Canary Book, page 57.—MIDLOTHIAN.

I have not the means of verifying the quotation at this moment, but I cannot help thinking that a perusal of the context would have given a solution; the enthusiastic writer you mention did not as a rule leave any room for doubt. Your first-mentioned item (biscuits) is a puzzler, there being so many kinds and qualities, some rich in fat, eggs, milk, and sugar, others being chiefly wheaten flour. The majority of show birds are reared on egg-foods. Common Canaries can be raised on common food, dog biscuits, scraps from the table, bread and milk sop, "canary cake" or "bird bread."

Canary Off Song.—What can I do to make my Canary sing again? Three months since I put him in a wire cage by the window; four weeks ago I noticed it had a kind of a squeak in his song, so I put him in a box cage, hanging it on the wall, but it did not seem to make it any better.—E. NAVIN.

Keep it in a warm room and give it the benefit of all the available sunshine. Feed it on bread and milk sop, sprinkled with mixed seed; into two tablespoonfuls of its drinking-water mix half-a-teaspoonful of the following:—Glycerine, Ipecacuanha wine and oxymel of squills, of each equal proportions.

Swollen Claw.—I have a Canary with hind claw swollen; he stands on one leg. Kindly recommend a remedy.—E. L.

Bathe the foot in warm water every day, dry well with a soft cloth, and then apply fluid extract of witch-hazel with a camel-hair brush. If this does not soon cure it, try equal parts of glycerine and water.

Pairing Query.—Cock Canary with hen and other birds in an indoor aviary. In March I intend shutting them off together to breed. Would they be all right in the aviary? Last year the hen sat on eggs in aviary; she is not at all a shy bird.—ARDENT.

I could have given you a more helpful answer if you had mentioned the dimensions of the aviary, but, assuming it is of the "Crystal Palace" pattern, I consider it quite likely that your birds would build their nest, lay and set their eggs, and rear their young in the end compartment. A partition of cardboard would be a better screen from the other birds than one of open wire-work, as through the latter the male birds on either side would be constantly quarrelling.

Bare of Feathers.—Bird perfectly bare of feathers on back and breast; skin looking rather dark. Is in good health, and sings lustily.—E. M. AMBROSE.

I always suspect red mite in these cases, so you would do well to look for same by candle-light, and, if found, proceed to exterminate them in the manner so often suggested in these columns. Sometimes the bareness is caused by liver trouble. Sweet apple, boiled carrot, or watercress can be given to assist the liver and bowels to act regularly. An invisible parasite under the skin also often causes loss of feather. A lotion made as follows, if applied daily will soon destroy the parasites and cause the plumage to spring up afresh:—Precipitated sulphur and glycerine, of each one teaspoonful; mix with two tablespoonfuls of fresh milk.

Brass or Lacquered Cage.—Is it inadvisable to keep a Canary in a brass cage, lacquered to prevent verdigris; what would prevent verdigris forming?—V. A. OATS.

I have always thought a brass cage a superior article—in price anyway—to a brass-lacquered cage. The former is made of brass wire, etc., and the latter of common wire, coloured with lacquer to make it look like brass. If your cage is really brass, it can be kept free from the danger of verdigris if washed with warm water occasionally, but enamelled iron-wire cages, or wood and wire cages, are more generally used, and appear more comfortable for the birds.

Fears Hen is Consumptive.—Canary hen eats well, but is very thin. I am afraid it is a case of consumption. How can I best feed her. Should she be separated from other Canaries? She is four or five years old, has mated, but her eggs are useless. Fed on canary seed, rape, and bread and milk sop.—E. G.

Do not be afraid that your little Canary hen is going into consumption, because it is contended by some who have made a deep study of the subject, that Canaries do not have "consumption," or wasting disease of lungs. Your bird has a great deal more likely got a diseased liver, and, having regard to her bad record as a breeder, most fanciers would "part company" from her. Still, you may be successful in curing her, especially as the spring will soon be coming, and it is at that time of the year that most improvement can be made. Run her into a box cage by herself; continue the seed and sop diet, but in addition give good supply of sweet apple and salads.

Plucking Feathers.—Hen Canary is apparently healthy, but has lately acquired the habit of plucking and biting wing feathers. The butts of her wings are plucked nearly raw. She is also continually twitching her wings, and allows them to droop. There are a few red mite in the cage, but I cover a white cloth over at night to catch them; also use quassia in bath water.—H. CLARKE.

From my point of view it seems quite feasible that all the troubles your bird has got have arisen through redmite, and it would be well to take more stringent measures for their extermination. Run the bird into a clean cage, dress the old one with turpentine, then scrub with hot water and soda. Dust the bird every alternate day with freshly ground Pyrethrum insect powder; continue the quassia in the bath water. To the bare and inflamed butts of the wings apply some sulphur lotion as advised to E. M. Ambrose in this issue. Continue diet of seed and apple, adding spring salads as they may be procurable.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

A Mule Breeding Failure (Bill).—If you are "disgusted," as you put it, at one little failure, I am afraid you will never make a Mule breeder, and I advise you to turn your attention to songster Canaries, which are very easily (comparatively) produced. One of the essential assets of the Mule-breeder is a determination never to give in—to regard present failure as merely temporary. Some Canary hens absolutely will not accept the attentions of cock British birds; such are rare, it is true—but I have had them myself, and so has many another fancier. I feel convinced, however, that your method of mating was at fault. It often happens when two birds are rushed together, and one of them is not ripe for breeding, that serious fighting ensues, which embitters the couple for the rest of the season. You yourself say your hen never seemed to settle down. Then why not have tried another? Not even the luckiest of breeders can expect to met with success from every hen put up. However, if you follow this advice, success will, I fancy, crown your efforts this coming season. Keep the Goldfinch and the hen Canary in different rooms for a month. Then re-introduce them in a double breeding-cage, having the wired slide down the centre—that is, one bird in each compartment. When the hen begins to carry nesting material about in her beak, and appears to be looking for a receptacle in which to deposit it, hang up a nest-box, withdraw the slide, and let the Goldfinch run in with her. Before this takes place, I fancy you will find him (if, as he ought to be, in condition) both singing to her and feeding her through the wires. If so, you can shake hands with yourself on a rosy outlook. A great deal more depends on the proper mating of Muling (and other) couples than the majority of breeders seem to credit. Some do not even seem to worry about whether the birds are in breeding condition; when they think the time has come for them to breed, pop they go together. Then there is trouble should one of the twain happen to be rank and its partner contrariwise. Have another try; better luck may attend you. Cock and hen song Thrushes are alike in plumage. The only safe method of sexing them is by hearing them sing.

Couples and their Cages (F.F.)—You are making a mistake. Take my advice and give the Canary hens the smaller cages, and the British couples the larger. Here is how I myself should utilise the cages and birds you specify. No. 1 cage, 10 feet by 2 by 2, the Goldfinch and Bullfinch; No. 2, 7 feet by 2 by 2, the Redpole and Siskin; No. 3, 7 feet by 2 by 2, the Greenfinch and Canary; No. 4, 4 feet by 1 by 2, the Goldfinch and Canary; No. 5, 3 feet by 1 by 2, the Linnet and Canary. Sliding divisions down the centre would be an advantage in all; in No. 3 you certainly ought to have one. No. 1 cage could very well be made into two, and another couple be housed therein—say big cock Redpole to a medium-sized hen Bullfinch. Any progeny from the latter mating will be very valuable—the males, that is. All the above-mentioned pairs are correct, though you do not say which are the cocks and which the hens; I have assumed, however, the birds named the last to be the hens.

Two Ailments (Alleghany).—Dissolve in the water of the Chaffinch you describe as "loose in the bowels" as much citrate of iron as will just lie on a threepennypiece—quantity of water, two tablespoonfuls. Watch its effect, and cease as soon as the desired end is secured. The dose may be slightly increased, if necessary. The one which you say seems to have a slight cold should have stirred into the same quantity of water a small teaspoonful of a mixture of best honey and glycerine in equal parts. If after eight or nine days the wheezing has not ceased, try the same quantity of our Mr. North's bronchial syrup: glycerine, oxymel of squills and ipecacuanha wine in equal parts—say half-ounce of each. Keep this bird out of draughts, and in a dry (not damp) room. Let both birds have plenty of maw seed to eat. The medicines, of course, must be given fresh every day.

Seed Samples (E. Sharratt).—Both the samples, marked 1 and 2, are charlock (or wild mustard, as it is often termed, in allusion to its pungent taste when chewed). They seem to be fresh, and of excellent quality.

Wild Seed (S. E. Larkey).—The plant you favour me with, which has long seed-pods (like pea-pods) is charlock, a common weed, and one whose seeds are eagerly sought and eaten by Linnets and many other Finches. You say the yellow flower misled you (or friends) into believing it to be gold of pleasure; but the seed-pods of the latter are rounded and quite small (like a tiny, somewhat flattened, pea). You say you gathered a lot of this charlock, and that when you "threw a heap of it into the flight I can tell you the birds make a raid on it in quick time." Your experience in this direction is precisely that undergone by myself, and many other fanciers, too, of course. An occasional feed of the wild seeds which form part of their natural diet is relished by practically all of the Finch tribe when in captivity, and forms a valuable change of food, as there can be no question that the latter is badly needed at times.

Bullfinch Ailing (M.A.B.).—You say your bird's eyes appear to have "shrunk to half their size, while stomach appears much swollen." I can only inform you that I think the case an utterly hopeless one; probably the bird will have succumbed ere you see this reply. Should he still be in the land of the living, however, clear out his stomach with a dose of sulphate of soda, dissolving as much as will just lie on a shilling in 2 tablespoonfuls of drinking water. Give this for twelve hours only. Afterwards, in the same quantity of water, give 8 drops of chlorodyne, fresh twice daily. If you can possibly do so, get the bird to eat a little crumbled Osborne biscuit moistened with a few spots of new milk, and liberally sprinkled with maw seed. Also let the bird have a free run at maw seed in a separate vessel. Offer it, too, as many mealworms daily as it is inclined to eat. Should Bullie pull round, let him have a lengthy course of a tonic, say Parrish's chemical food, a small teaspoonful in the above-mentioned quantity of drinking water. He must have a change of food, though, at once.

Blackbird Moulting Grey (Moutague).—I have not the least idea what caused your Blackbird to moult out with grey feathers in wings and tail, beyond knowing that this sort of freakishness is attributed to absence of the normal black pigment from the parts affected. It is said that a local change of colour can be effected by a hurt to the pulp of the growing feather. Albinism and melanism are conditions which puzzle the learned (no reference to myself) at present. No one can legally trap or net protected birds in the close season.

Seed Samples (W. W. Huxford).—The sample of rape seed is of good quality, quite safe to use. (W.B.S.) Sample No. 1 is not German summer rape at all, but cabbage or turnip seed, or some other member of the genus Brassica. No. 2 is genuine summer rape, and a very nice sample. No. 3 merits the same remarks as No. 1. No 2 is the seed to use. The difference in colour is due to it being obtained from a different plant and under different climatic conditions to the others. The right sort of German summer rape seed is always very small.

Temper of Goldfinch Mules (P. H. Harris).—Mules are born "scrappers," and the reverse of sweet-tempered with each other. If you put two high-conditioned cock birds in a cage 20in. by 18in., look out for trouble. Mules sing themselves into a "paddy," and a fight seems to be the only blood-cooler acceptable when others of their kind are within striking distance. In an aviary they often make themselves obnoxious by the persistency with which they pursue and endeavour to thrash fellow inmates. Keeping a cock Mule with a hen Mule in a small cage would not prevent the former singing, by any means; but how he would treat the fair damsel I am not prepared to say. I have had cock and hen Mules together when the couples were ready to go to nest, and nothing untoward has occurred; beyond that I cannot speak. You could, at any rate, soon remove one or the other if necessary. If kept with a male bird your hen would want to build and lay in due season, and you would have to provide nesting materials, or she would probably proceed to strip her partner naked and utilise his garments to construct the home with.

Red Mite and Breeding Cages (Novice).—I do not know of anything which will actually prevent red mite from establishing themselves in breeding cages, though, of course, constant supervision by the fancier himself will always keep them down to "vanishing point," so to speak, and render them perfectly harmless to his birds. It is only in the midst of neglect where they can flourish and become a source of annoyance to the birds, and of danger to their health. I note, however, that Dr. Martin, who contributes an article to this week's Birthday Supplement, tells readers of a fluid which he has found actually keep away red mite from his cages. This must be worthy of a trial. Benzoline is a sure destroyer of red mite, but its effects soon pass away, and wood treated with it will harbour them again when this comes about. Keating's powder and pyrethrum powder are equally effective as red mite destroyers.

Room for Mule Breeding (H.M.).—You will no doubt succeed in breeding and rearing Goldfinch Mules in the room you mention—a large room in which a little cooking is carried on, but which otherwise remains unheated. At the same time, a quiet room away from the culinary department would certainly be better. I assume a fire is used; gas and oil stoves are not good for birds. To do any good in such a situation, a house moulted, well-domesticated Goldfinch should be used.

Song of the Hand-reared Thrush (D. E. Nunan).—Hand-reared birds never sing the song of their particular species so well as birds which have acquired the same out in the country under the usual conditions. So you cannot expect your hand-reared Song Thrush to become a really skilled exponent of the "pure wild notes" which the birds in the fields utter so charmingly. One moment, though, if you can arrange to give your bird even a few days' tuition under a good singing Thrush, you will find his song improve beyond recognition. In fact, he will sing the family music as well as need be, given opportunity to learn it. The annoying thing is this: Hand-reared birds never seem to forget any "bad" notes acquired in their youth from other birds. And they are great mimics, imitating anything from a Sparrow to a Starling.

Loss of Flights (J. G.).—I don't think the loss of the flight feathers at all difficult to understand. Most fanciers undergo the same experience at some period of their career. Both Mules and British birds are very nervous if wakened up suddenly during the night, and the sound of another bird knocking about is then sufficient to send all in a panic. The result is a mad scramble in the dark about the cages, and flight feathers knocked out. The more acute the state of panic, the more damage will be done. Canaries are much more stolid, unimpressionable individuals, and take a lot more shifting from their roosting positions, which will account for your own Canaries coming out scathless. What induced the racket, I cannot, of course, pretend to say. It might well have been the scampering of a mouse about the cages; see that you have none of the pests around. I have often heard fanciers talk of birds "dreaming." Suppose one of yours had a touch of indigestion, or a twinge of liver, with an attendant horrible nightmare of being stalked by hungry cats? Small wonder that he hopped about. I know I hop about myself when suffering that way. The diet for Bullfinches is mentioned in another reply this week.

Larks for Song (D.A.N.).—You will not do any good by keeping two Larks in one cage, even though the latter measures 30 by 9 by 15. They would probably disagree, too, as they came into full song, though I cannot say for sure, as, to tell you the truth it never occurred to me to try to keep two of these birds in the same cage. If you have only two cages, be content with only two Larks. You can soon test the matter, however, by means of the old singing Lark you say you have. Should you decide to do so, I shall be very glad to know the result.

Starling in Aviary (A. Wheelwright).—A Starling would do very nicely in an aviary 16 feet long, and varying from 3 to 10 feet in width. In such a place a couple would be likely to breed if you fixed up a tree stump with a deep hole in it in some sheltered, secluded spot. I don't think you would find them harm the other birds, however small; but as to whether they should be kept along with small Foreign Finches like Spice birds, I cannot answer, for all queries relating to Foreign birds must be addressed to our Mr. W. T. Page. The diet you mention will answer admirably: Melox, crushed dog biscuit, currants, bread crumbs, table scraps, etc., damped with carrot, milk, boiled potato, etc. See that the milk does not turn the food sour at any time.

Concerning a Chaffinch (Novice).—The best cage to keep a Chaffinch in is the Finch stock cage, illustrated and described in CAGE BIRDS' ANNUAL for 1906. It is a box-pattern cage (wired at front only) about 16 by 12 by 9, with inside food trough, doors at front and side, and two perches. Feed him as recommended another enquirer this week. Your present dietary is not varied enough to keep him in high condition. Few house moulted Chaffinches exhibit quite the same contrast in colours as a good bird moulted in a wild state. Don't omit to supply a bath freely.

Stocking an Aviary (T. B., Manchester).—It is far from a good plan to try and mix seed-eaters and insectivorous birds in an aviary, and I do not advise you to attempt it, especially seeing that you are a beginner. Your place, 10ft. by 3ft. by 6ft., is not large enough, for another thing. Even for all seed-eaters it should certainly be made at least 4ft. from back to front if you can possibly manage it—the wider the better. At present it would hold 20 to 24 small birds comfortably if kept nicely clean. Make your selection from the Finches and Buntings and you cannot go wrong. Do not include more than one Chaffinch, Bramblefinch, or Yellowhammer, or, at least, a pair of each. And if any prove incorrigibly quarrelsome, remove them at once. A few small Foreigners, such as Saffron, Singing, Parson, Spice, etc. Finches, Diamond Sparrows, and the like, would add colour and variety. Our Mr. Page would oblige with a suitable list. Fix up dead hawthorn, bramble, furze, etc. bushes, bundles of pea-sticks, and suitable dead branches. Live shrubs in such a place would soon become an unsightly mess. You can try one or two if you like, changing them when necessary—that is, giving them a spell outside. Privet and box bushes would be very suitable for the purpose.

Goldfinch Queer (Novice, D.K.).—You are doing quite right in keeping the Goldfinch which has undergone a bad moult in a warm room, out of draught. But do not fly to extremes, and keep him too warm. Your seed mixture of hemp, canary, rape, teazle, and linseed, in equal parts, with half-part of maw, is pretty correct, though I'd wager he never eats any of the rape, which I never recommend for British Goldies—so, you see, you are not feeding as I advise, although you say that. Refer to another answer this week. Put in an equal part of inga, and throw out the rape; in fact, give him all the inga he will eat. Try him with a few small mealworms as well. Drop the egg and biscuit; also the glycerine in the water. It is a point in his favour that he will tackle soft food. Go to a chemist and get a small bottle of finest quality tasteless cod liver oil. Moisten a little crushed Osborne biscuit with a few spots of this (don't overdo it, especially at first), and liberally sprinkle it with maw seed. Let him eat as much as he will of this. For two days give a gentle saline medicine—as much sulphate of soda as will just lie on a sixpence, dissolved in two tablespoonfuls of drinking water. Afterwards dissolve in the same quantity of water as much citrate of iron as will just cover a threepenny piece. Fresh daily, and continue for 10 or 12 days. This treatment should pull him round.

A Muling Question (Enthusiastic).—Personally, I prefer to do my mule-breeding in suitable cages, for then one has much better control over operations. Still your Goldfinch and Norwich hen Canary would doubtless do all right in the outside aviary "8ft. by 4ft. by 6ft., stuffed full of thorn bushes." Let them be in a cage indoors until the end of March, close together, and well within sight of each other; then let them fly out into the aviary. Even then another male bird may try to rob Master Goldie of his "missus." There is no reason why the hen should not turn out a success this coming season, though, as she suffered so from egg-binding last year, you ought not to mate her up until late—the beginning of April at the earliest.

Ox-eye Tit (W. W.).—You would, no douht, note that your questions concerning this bird were anticipated by another querist last week, in whose answer you will find embodied the information you desire. A Great Tit (or Ox-eye, as you term the bird) does not stand much chance on the show-bench, for it has to compete, as a rule, against a crowd of small insectivorous species in the "mixed" class. Still, it is not often we see a real good one benched; they are extremely restless in a small cage usually, and soon manage to wreck their plumage. I quite agree with you that the Ox-eye is a handsome bird, and you should certainly give the extra fine specimen you would seem to possess a chance to distinguish itself at some of our exhibitions.

Bullfinch, etc. (R. Burgess).—As stock mixtures for your birds the following will answer admirably:—Bullfinch: canary and teazle, three parts each; summer rape and linseed, one part each. Give also a good feed of sunflower seed daily. Vary this diet with occasional feeds of hemp, maw, inga, thistle, dandelion, wild seed mixture, etc. Linnet: same mixture as above, but with one part of charlock seed added. Vary this as advised for Bullfinch, a little lettuce seed also being relished by many Linnets; while a little sunflower seed, if offered cracked, may be sampled by them. Goldfinch: hemp and teazle, four parts each; canary,

three parts; linseed, one part. Inga and maw may be mixed in equal parts, and a feed be given practically daily. Thistle, dandelion and wild-seed mixture are also relished by them. Equal parts by measure is meant; let a half-pint measure, say, stand for one part. By "feed" I mean about half-a-teaspoonful—just enough to give the bird a good taste, as a tit-bit, so to speak. If you give your Linnet half-a-teaspoonful daily of the mixed maw and inga seed, it should very soon sing, if a male. You will give green food, of course, according to season—rape seedlings and lettuce are about the safest now.

Will Mules Breed? (T. Kidger).—This is an old query, my friend. I have frequently stated in reply to enquiries that it has never yet been conclusively established that Mules (the Finch Mules of fanciers) will breed. The cocks will run hens down to nest like cock Canaries; but they never fertilise the eggs. The hens will build and lay eggs, but their eggs, too, are never fertile. The hens, further, make excellent foster-mothers, feeding young birds in irreproachable fashion. Many people have claimed to have bred with "Mules," but their claims have never withstood investigation (to my knowledge), the supposed Mules turning out to be merely ordinary marked Canaries. Hundreds of people believe Canaries splashed in any way with dark feathers to be "Mule-birds," and always refer to them as such. Any bird dealer who, in his business, touches a large number of private (as distinct from fancier) customers will tell you at once that this is so. Thanks for your kind remarks, also for helping along our journal by recommending it to your friends.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.U.S.

Zebra Finches and Bronze Mannikins.—(1) My birds are very quarrelsome; the Bronze Mannikins chase the others about and give them no rest; I have had to separate. How can I make them agree? (2) The Mannikins have gone to nest again—only 14 days ago they deserted their eggs. Shall I permit them to sit?—"FLORENCE."

(1) In a large or medium-sized aviary Bronze Mannikins are amiable enough, though they will not permit any other bird, large or small, to approach their nest box. In a cage when they are thinking of nesting, or playing at same, they will seldom tolerate any company; they are rather dangerous company even for birds much larger than themselves. You will have to keep them separate. Even the amiable Zebra Finch can make himself very objectionable to other birds when breeding in a cage. It is a standing rule when attempting to breed Foreign birds in cages to have only one pair in each cage. (2) Leave the Mannikins to follow their own sweet will as regards nesting; they frequently lay and sit, but do not often rear young in captivity.

Moustache Parrakeet.—My bird is fairly tame, will take fruit, biscuit, etc., from my fingers. How can I train it to come on my finger? Would it be safe to let it have a fly round the room? Do they talk?—"PARKY."

You must make sure of the temper of your bird; if it makes no attempt to bite, put your hand in cage and tap its feet slightly, and it will soon begin to clutch your finger and play with same, and will soon learn to come on same. When quite sure of the temper of the individual bird, I have trained them to play with finger through bars of cage; they soon begin to put the foot through and clutch the finger—a "sort of shaking hands"—and, when I have felt it safe, the insertion of the hand in cage, and the finger rubbed slightly against the bird, has brought about the desired result. It will do your bird good to have a fly round the room, but it must not be driven; it will go back to cage of its own accord when tired or hungry. At the same time, you must keep a watch on the furniture and wood fittings of the room, as they are very fond of sampling wood. There is no reason why it should not talk if you repeat continuously one or two words, and keep at these till learned, and then take up fresh ones; but it often requires much patience before the words are uttered. On the other hand, some birds will respond almost at once.

Grey Singing Finch.—Please give me a list of these birds as songsters, etc. What do they eat? How can I maintain them in health? What is their value?—"NATURALIST."

Though plainly clad, this is really a handsome and beautiful little bird, and to be numbered as one of the best of Foreign songsters; the capacity of individuals varies much in this respect. A good one—and they are many—will sit upon a branch in the aviary, or perch in a cage, and sing his sweet melody for an hour at a time. Kept in either cage or aviary, they are charming birds, long-lived if kept out of draught, on the go nearly all the day long, being very full of life and vivacity. Their flight is graceful and undulating; they somewhat resemble butterflies flitting to and fro. Young have been successfully reared in a large-size canary breeding cage. White and spray millet and canary seed forms the staple bill of fare; a few ants' eggs (cocoons) scattered over sand tray, and a little crumpled sponge cake, slightly damped, are much appreciated; also blighty foliage (not from lilac, laburnum or mock orange), when obtainable, will help to keep them in fine condition. Green food, such as chickweed, grass in flower, or a leaf of tender lettuce; cuttlefish, grit and water for drinking and bathing ad lib. When kept in a cage, it is best to hang bath outside cage over the open door. The average price for a male is 5s. 6d. to 7s. 6d., according to number on the market; and 7s. 6d. to 10s., sometimes a trifle more, would be a fair price for a pair.

Blue-crowned Conures.—(1) I have had a pair of birds brought me from Chili, and am told they are Blue-crowned Conures; description enclosed—is this correct? (2) What is their value? (3) My Californian Quails have become very wild; shall I cut their wings? (4) Could you give me a cheaper food than white millet for these birds?—"SHEFFIELD."

(1 and 2) I am doubtful as to what species your birds are; the description comes very near to the Blue-crowned Conure, but differs in one or two points. Will you give me the actual measure in inches (you can get this without catching the birds if they are in a cage) from tip of beak to end of tail—also separate length of tail? If you give me these details, I will give name and value in following issue. If they are Blue-crowns, they are worth 40s. to 50s. a pair. (3) It would be better to cut the flight feathers of one wing, or they may seriously injure themselves by dashing violently against the top of aviary; this may not be necessary another year, when they have become thoroughly accustomed to their surroundings. (4) Make up a mixture of two parts each canary, millet, and one part each of dari, wheat, buck-wheat, and rice in the husk. Green food in variety should be supplied—grass, lawn clippings, chickweed, lettuce and cabbage leaves, etc.; insect food of some kind should be supplied—ants' eggs, pupæ of the flesh fly, caterpillars, beetles, earwigs, and plant bugs generally. Game meal—or, better, Partridge meal—is cheap enough, and a little of this made crumbly moist is wholesome; most species of Quails will eat it readily. These birds require a dust-bath, the same as domestic fowls, and a handful of sulphur mixed with same will help to keep down lice and other parasites.

Blue-fronted Amazon.—Have had it two years, and it has done well up to present. It has a swelling the size of a pea under its beak and one eye has become swollen. Please advise.—M. R.

Your bird ought to talk by this time; you should commence its tuition at once. Repeat a word or two continuously, and keep on at the same words till they are thoroughly learned, and then take up something fresh. You do not say how you are feeding; however, you will be quite safe in carrying out the following:—Get from your chemist a box of either spermaceti or zinc ointment, and annoint the growths with same; if there are any growths inside the mouth, wipe out the bird's mouth with the following:—20 grains chlorate of potassium mixed with two drachms of glycerine, using a feather or small camel-hair brush for the purpose, which must be well cleaned each time after use, and the portion of the mixture must not be used a second time. For one day only make its drinking water just saline with Epsom Salts, and repeat if necessary in a week's time. Bathing the eye with a solution of sulphate of zinc (from your chemist) should give relief; if not, try a warm decoction of camomile flowers instead. If the bird appears at all weak, just colour its drinking water with Parrish's Chemical Food.

What Bird—(1) I have a bird said to be a Solomon's Island Parrot. Does my description tally with that bird? (2) Please describe the King Parrot to me, and give correct diet.—D.B.V.

(1) Your description is that of the Solomon Island Cockatoo. (2) By the King Parrot, I presume you mean the Australian King Parrakeet, the male of which has the head, neck, and under surface, rich crimson; rump and band at back of neck, rich blue; tail, blackish; remainder of upper surface, rich greens. The female has the head, nape, back wings and tail, green; throat and chest, green washed with red; abdomen, crimson; rump, blue. Diet: equal parts of canary, millet, oats, wheat, dari, maize, and half a part each of hemp and sunflower seed; this constitutes the staple food. A regular supply of grit, cuttlefish, and water must be kept up; also give so as to vary the diet, raw carrot, greenfood, ripe fruit, plain biscuits, and stale household bread. This species is quite hardy, and is really better in a roomy outdoor aviary than in the house. Indoors, it should have a roomy cage, and only needs protection from draught. It must not be kept in too warm a room.

Ring-necked Parrot.—I have a young bird, all green, no ring, said to be a male; am told it will not show ring until it is two years old. It has scarcely uttered a sound so far. Shall I wait till it begins chattering before commencing to teach it to talk? Feeds well, and is not wild, but is ruffled and somewhat dull? Have given chemical food.—R.F.H.

Young Ring-necks resemble the female, which has no ring. When about two years old they moult into adult plumage. A healthy youngster usually chatters, or rather squalls, a little. You cannot begin too soon to teach it to talk; this requires patience. Try it with one word at first; when learned begin with a fresh one. Parrish's chemical food will not harm a young bird; give it every other day, and keep its bowels gently moving (not loose) with an occasional dose of Dinneford's magnesia (one teaspoonful to two tablespoonsful of water). Diet:—Canary and millet, 2 parts; oats, hemp, and sunflower, 1 part each. Give ripe fruit, plain biscuit, greenfood, cuttlefish, grit, and water; let it satisfy its thirst three times a day. At this season lightly spray the bird once a week; keep strictly out of draught till dry.

Indian Green Parrot.—Have had my bird two years, it is a good talker; last few weeks it has been very sick. It is fed on Parrots' mixture, boiled potato, scraps of meat, and bread dipped in tea. Please advise. Is the Pekin Robin a good songster to keep indoors?—H. CLARK.

See reply to R.F.H. re diet. Do not give Parrot foods, sops, slops, or animal food of any kind. Give one teaspoonful of Dinneford's magnesia in two tablespoonsful of water; let it have only this to drink for one day. Repeat in a week's time. If the sickness is not checked give two or three applications of 5 grains each of bicarbonate of potash in the drinking water on separate days. Follow this by a course of Parrish's chemical food; just colour the water with same. Till the bird is well again do not leave water in cage, let it have a drink three times a day.

Budgerigars.—I have done as you suggested, but the male of my first pair has forsaken his own mate, and wants to pair with the other hen; he hunts the other male about. What can I do to keep each devoted to his own hen?—NOVICE.

Young birds reared at this time of year seldom make strong birds. Take out your husks, and see that there are branches or perches well up against the roof, so that the birds can get shelter at night. You can re-hang the husks in April; in the meanwhile let your birds have plenty of cuttlefish, a few oats once a week, and the other foods as you are now giving. Colour their drinking water with Parrish's chemical food every other day for the next two months, and give daily a fresh tender leaf of lettuce. Otherwise, just leave them to themselves, and let each Jack choose his own Jill; you will find they will soon settle down. Your birds are evidently weak, or else birds of the year; the above treatment will strengthen them up.

Young Budgerigars Dying—I am sending you further particulars and sketch of my aviary. The young appear to fall from the nest to the ground and die; they were fully fledged. I feed as advised in F.B.Q. column. Are they as a rule able to fly when they leave the nest, and when are they able to feed themselves?—C. C. BROWN.

Your birds are evidently in a debilitated condition, and I should not permit them to breed till March is past. To this end remove the husks, and do not replace them till first week in April. At the same time, see that there are perches in sheltered parts of the shed, close under roof, for them to sleep on at night. Keep up a good supply of cuttlefish, and give a leaf of fresh and tender lettuce daily. For the next two months make their drinking water the colour of pale port with Parrish's Chemical Food, every alternate day. Normally, Budgerigars are able to fly to the ground when they leave the nest, but I always have a branch within a few inches of all my husks and nest boxes, so that they can just hop on and have a look round before indulging in flight. Speaking generally, the old birds feed the young for about a week after they leave the nest, sometimes longer, but the young are able to look after themselves after the third day.—Even though the birds are ready to breed in the winter, it is bad practice to let them do so; the young are never so robust as summer-reared birds.—Sow grass, oats, etc., in the flight, and keep two inches of sand over concrete.

Grey Parrot Still Mopy (L.A.F.).—I have found all the species it is suitable for eat the seed mixture readily, and a little later I am of the opinion you will find yours doing so. You must give the magnesia sufficiently often to keep its bowels moving freely, not loose. Get the following mixture: Ipecacuanha wine, oxymel of squills and glycerine in equal parts, put one teaspoonful of this to each ounce of the drinking water till relief is given. It is, however, possible the back of the bird's mouth is ulcerated; you had better examine it, and if so, wipe out its mouth with a mixture 20 grains of chlorate of potassium mixew with 2 drams of glycerine, using a camel hair brush or feather for the purpose, and a fresh portion of the mixture for each occasion. Keep the cage strictly clean, and the bird warm and quiet. Note carefully the effect of the treatment, and unless the bird becomes suddenly worse, report progress in a fortnight's time.

Amazon with Swelling (T. J. B.).—I hope the case is not as serious as I fear, but it is impossible to advise in such a case without seeing the bird, and the only course for you to take is to let your vet. or medical man see the bird, and if it is not too far gone he should be able to give the bird relief. You make no mention as to how you are dieting the bird. The correct diet is—No slops, or animal food, but as staple food the following seed mixture: canary, millet, oats, wheat, dari, maize, hemp, and sunflower seeds, ripe fruit, greenfood, plain biscuit, boiled potato, nuts, given so as to vary the diet; also regular supplies of grit, cuttlefish, and water. A little boiled maize should be given twice a week (this only keeps fresh one day), but while the bird is in its present condition you had better give it daily. Keep the bird warm and quiet. I should be interested in hearing how the bird progresses. Regret I cannot help you direct.

Grey Parrot Scratching.—(1) My grey scratches its neck a little; will it be safe to use insect powder? (2) What species of Amazon makes the best talker?—DUDLEY.

(1) You give me no clue as to your diet, and as, in nine cases out of ten, skin irritation mostly arises from an unwholesome diet, how can I help you? If there are any insects on the bird, either dust it with insect powder or sulphur; spraying it with Quassia solution would be equally effective: but these will give no relief unless the bird is troubled with parasites. Give your bird for one day only, one teaspoonful of Dinneford's Magnesia in its drinking water, and let it have only this to drink for that day. Diet your bird as advised almost weekly in this column. You had better repeat query with full particulars as to diet and treatment. (2) The Blue-fronted is the most freely imported, handsome, robust, and about as talented as any, being but little behind a Grey as to talking ability. All Parrots must be patiently and carefully taught; their talent usually depends on the care bestowed upon their training. Of course, it is a well-known fact that some individuals are almost unteachable, and others pick up a vocabulary almost at once.

Grey Parrot with Abortive Mandible.—The lower mandible grows so that the upper does not close properly on it, but crosses it; have had it cut, but it still grows. What can I do to remedy this?—PETERBOROUGH.

You will have to have its mandible cut again; there is no other remedy for the present trouble. A recurrence should be prevented by getting a lump of hardish mortar rubbish, drill a hole through one end, and hang it up by a piece of binding wire; let it have this to bite at; also keep a piece of cuttlefish bone hanging in the cage, also a piece of, say, poplar wood to chew up. Ususally a supply of cotton reels and a chunk of non-splintery wood will save the perch. Try all the above, and any that it makes no use of can, of course, be discontinued after a few days' trial. Unless you can get it to exercise its beak upon some of the above, it will continue to be a source of periodical annoyance, but unless yours is a most exceptional case the above treatment should end the trouble.

Budgerigars with Cold.—My birds are in an indoor cage, 3½ by 3½ by 1½, containing 4 husks. Do you think they will breed? They sneeze a good deal. What can I do to stop this?—J. WELLS.

You will have to move any young you rear as soon as they are able to feed themselves, as your cage is barely spacious enough for the two pairs for breeding purposes. Your dietary is correct, but cuttlefish should be regularly given, and oats when they have young to feed. Get from your chemist a small bottle of the following mixture: Oxymel of squills, glycerine and Ipecacuanha wine in equal parts, put one teaspoonful of the mixture to each ounce (say two tablespoonfuls) of the drinking water. Avoid draught, as, though these birds are as "hard as nails" and require no artificial heat, they must be protected against draught. If there should be any running from the nostrils, syringe same with diluted glyco-thymoline.

PARK & LAKE AVICULTURE.

Answered by FRANK FINN, B.A., F.Z.S., M.B.O.U., etc.

Wood-pigeon Hybrids.—(1) Is it possible to breed Hybrids between the Wood-pigeon and Tame Pigeon? (2) If so, how does one proceed—I suppose it is best to use a cock Wood-pigeon and hen Tame Pigeon? (3) Would the Hybrid be eligible in a British Hybrid class?—COLUMKILLE.

(1) Yes, Hybrids between the Wood-pigeon and Tame Pigeon have been produced, but very rarely: there is a fine cock bird in the Zoo now, bred by Mr. P. St. John Podmore in this way. It is a "light Mule," too, resembling a splashed blue and white Tame Pigeon in colour, though showing the Wood-pigeon blood plainly in size, shape, actions, and note. It has bred again with a hen Tame Pigeon. (2) One would naturally think the best way to go to work would be to use the hen Tame Pigeon, but Mr. Podmore has found this would not do, and he did not succeed until he got a hen Wood-pigeon, which he reared from a very early age by hand. The case seems to be similar to that of the Canary-Bullfinch cross. (3) Mr. Weston would be able to tell you this better than I; personally, I should think any Hybrid between any two British birds—other than game-birds and water-fowl perhaps—should be eligible in a British Hybrid class. It would be interesting to see something different from Finch Hybrids.

Changeless Water-fowl.—Are there not any ducks that keep their colour all the year? It seems a great drawback that the drakes should be out of colour during so much of the best weather, just when one wants to watch them.—IMMUTABLE.

You must remember, as a set-off to the dinginess of drakes in summer, that it is something to have outdoor birds which will give a touch of colour in winter; besides, the finest of the ducks, the Mandarin and Carolina, remain out of colour a shorter time than the other species. There are some handsome ducks, however, which never go into a dull plumage; all the Sheldrakes and Tree-ducks, the Spotted-bill, Bahama and Chilian Widgeon, and the male Rosy-billed Pochard. Eliminating some of the Sheldrakes as too pugnacious—the English one is the best to keep for temper—you have quite enough here to make a nice collection, which would be always gay to look at.

POST MORTEMS.

Mr. J. North, 425, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a reply direct, 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Goldfinch (F. L. Hill).—Death was caused by inflammation of liver. The bird had the appearance of being recently caught, and, perhaps, imported, its dieting has very likely been irregular and unsuitable.

GENERAL.

Answered by the EDITOR.

Deposit System (Old Reader).—Remarks noted.

Articles (Finch).—Too late this week to do as you wish.

Picture of Crimson Wing (R. Nisbet).—So long as you are pleased, we are.

All Should Help (C. K. E.).—Thanks for kind remarks and practical help.

C.B.U. Rules (T. C. Crawhall):—Your interesting observations duly noted.

Cleared Out (J. McGough).—Very pleased to hear you have done so well with your CAGE BIRDS.

Good Wishes (W. H. Goodall and many others).—Best thanks for kind wishes and practical support.

Sketch (Mrs. G. Barker).—We shall be pleased to receive the promised sketch whenever you care to send it.

"Cage Birds Annual" (Samuel McCann).—Ready second or third week in February. Thanks for good wishes.

Idea (J. H. P.).—Your suggestion, Sir, seems to us a very excellent one, and we will give it our serious attention.

Special of Framed Plate (H. Dobson).—Sorry to hear glass was broken in transit. Let us know cost of new one.

Lost at Show (W. Lewis).—Nothing so bad as worry. Sit tight, and all may yet be well. We have inserted your letter.

Red-crested Yorkshire with Ruff (C. P. Craven).—If such a bird could be produced, it certainly would be worth £500.

Crystal Palace Schedule Wanted (F. King).—You will see the show advertised this week. Also the Schedule reviewed in another column.

Special Prize (W. Jackson).—We see no objection to your keeping the unwon prize offered by us till next year. It has been sent you, as requested.

Book on Canary Breeding (M. Keough).—We can send you a first-class manual on this subject, entitled "The British Canary," for 1s. 2d. post paid.

Looking Forward (E. M.).—Let us hope that in your case, when the distance that "lends enchantment to the view" is removed, the enchantment will remain.

Index (J. Dring).—Your suggestion could scarcely be adopted, for the front page has to go to press some time before the inner pages. But we will give your letter further consideration.

Takes "C.B." Regularly (Mrs. Knowles).—Your lodger evidently doesn't know what's good for him. He can't be such a nice young man as the lodger in the comic song is reputed to be.

Kind Remarks (A. Burtenshaw and many others).—The volume of work to be got through prevents us from doing more than just acknowledging your very kind expressions of goodwill and hopes for future prosperity.

Good Wishes from North London (R. P. Harper).—The sentiments so admirably expressed by you find an echo in 154, Fleet Street. That the 1907 season may have better things in store for both of us is our earnest wish.

Gouldians, etc., Dying (Dorothy Langdon).—Sorry to hear of your father's loss, Dorothy; but birds are, like ourselves, very subject to ailments, and, sooner or later, must go the way of all flesh. We wish him better luck in 1907.

Recommendation (James Gillespie).—We regret we can't advise you on the point. We never recommend one advertiser to the detriment of another. You or your correspondent must use you own judgment.

Postcards (C. Henfrey).—It means that, if you sent for a set of six, you can choose exactly which six you would like to have, either all of a sort or all different, or two of one sort and four of another. In fact, just anyhow; but you would not get more than the six. Is this clear?

Perch, and a Story (B. J.).—We were unable to print your sketch of perch, as it happened to be the one our correspondent already had in use. We shall be very pleased to have your story of the old collier, the gun and the sparrow, etc., whenever you can find time to send it on to us.

Dead on Arrival (James Nile).—You talk a lot about the rules of this paper, but it is evident to us you have not made yourself acquainted with them, or you would not send us such an unreasonable demand. Over and over again we ask purchasers to use the deposit system, and, if they neglect to do so, they have only themselves to thank if dissatisfaction comes their way. The Angel Gabriel wouldn't satisfy some people, and you, we fear, are one of them. Read our Rules again.

What Sort of a Man Is—— (P. S.).—(1) We really can't answer such a question, much as we would like to oblige you. But we will go so far as to say that we have heard no complaints of him. As for instituting a comparison between one advertiser and another, it really isn't fair to expect us to do so. Probably the man you mention is suffering from a glut of orders. (2) If you wish your advertisement to be supervised, our advertisement manager will be very pleased to advise you; but you will have to give him all the particulars you require publishing. (3) Thanks for appreciative and encouraging remarks.

Douglas Show (Border Fancy Member).—We see no good object in printing your letter. If you or any exhibitor were dissatisfied with the awards, your only remedy is to leave the judge alone next time. Were we to start printing complaints from dissatisfied exhibitors, we should have room for little else, I fear. (2) You say it is no honour for a firm to win a medal against a single competitor. Why not? The birds compete, and not the exhibitors; and whether a bird is owned by a firm or a single individual can make little difference to its merits. (3) Any legitimate grievance you wish ventilating will gladly be published, but you must not magnify dissatisfaction, but try and bear losing in as sportsmanlike a manner as you are capable of.

Many Queries held over.

LONDON AND COUNTIES A.C.B.

The Annual Show of the above Association was held at the "Bay Malton," Great Portland Street, W., on January 12th. There was a very satisfactory attendance, and the entries, though somewhat less than last year, were of first-rate quality. Mr. T. Heath judged, and little criticism was offered as the result of his awards.

A Fanciers' Society is in contemplation for Dartmouth and district.

Shipley O.S. have altered their meeting night to the first Tuesday in the month, and the fee from 6s. to 4s. a year.

THE CRYSTAL PALACE.

FORTY-EIGTH GREAT ANNUAL NATIONAL CAGE-BIRD SHOW.

A splendid Schedule and a record list of judges.

OPEN TO ALL.—The schedule of the Annual Crystal Palace Show just to hand gives evidence of the existence of a Cage Bird Union in a rather striking manner by the notice printed in bold letters right across the page, "This Show is open to all," while inside the precaution is taken of stating that "All fanciers, whether affiliated members of the Cage Bird Union or not, are equally eligible to exhibit at this Show." It has been too generally assumed by the non-"fancying" public that association or affiliation with the Cage Bird Union implies some sort of stipulation that exhibitors must also be affiliated.

DATE OF SHOW.—The Show will take place Friday, Saturday, Monday and Tuesday, Feb. 15th, 16th, 18th and 19th, 1907, inclusive. The Show will open at 3 o'clock on the Friday, and will close on Tuesday, at 4 p.m.

ENTRIES absolutely close Saturday, February 2nd. There will be no extension and no whip up cards. The entrance fee throughout is 2s., and prize money is as follows: 1st, 15s.; 2nd, 10s.; 3rd, 5s.; 4th, 2s., or medals of varying quality at winners' option. Cash will be sent unless otherwise requested. No prizes will be withheld in any of the standing classes. No classes will be amalgamated.

SHOW MANAGEMENT.—All entries must be sent to H. Lambert Brown, 64, Manor Park, Lee, S.E., who will dispatch tickets, labels, etc., also pay prize and sale monies. The Show at the Palace will be under the sole management of Mr. J. W. Ramsden, 10, Heron Road, Herne Hill, S.E., who will accept orders for stalls and advertisements and dispatch all birds at close of show. Birds fed on seeds supplied by Carter and Co., High Holborn.

ADMISSION.—No extra charge for admission.

THE CLASSIFICATION, JUDGES, Etc.

NORWICH PLAINHEADS (OPEN).—Judge, J. H. Payne. Under patronage Southern N.P.C. Eight classes. Thirteen specials.

CRESTED NORWICH (OPEN).—Judge, R. Rhodes. Under patronage Crested Canary Club. Four Crests; three Crestbreds. Eleven specials.

YORKSHIRES (OPEN).—Judge, W. Mundell. Under patronage Y.C.C., C.M.Y.C., S.Y.C.C., and the G.C.A. Eight classes other than cinn. ticks.; four cinn. ticks. Over fifty specials.

GREENS, Yorks. Type.—Judge, T. Heath. Four classes. Norwich type: Judge, J. H. Payne; four classes. Green Canary Association specials offered.

CINNAMONS (OPEN).—Judge, T. Heath. Under patronage Cinn. C.C. Four classes. Ten specials.

LANCASHIRES.—Judge, S. R. Compston. Under patronage of Lanc. and Liz. F.A. and the Lancs. C.A., who guarantee two classes. Four classes (guaranteed). Ten specials.

LIZARDS.—Judge, S. R. Compston. Under patronage L. and L.F.A. Four classes. Nine specials.

BORDER FANCY.—Judge, J. F. Dewar. Under patronage B.F.C. and E. and W. B.F.C. Seven classes. Over seven specials.

SCOTCH FANCY.—Judge, J. F. Dewar. Under patronage S.F.C. 4 classes; 4 spls.

BELGIANS.—Judge, J. F. Dewar. Under patronage U.K.B.C.A. Four classes. Eight specials.

A.O.V.—Judge, J. Robson. One class. One special.

OPEN NOVICE SECTIONS.—Norwich, Judge, J. Robson. Six classes. Ten specials. Crests and Crestbreds: Judge, R. Rhodes. Two classes. Three specials. Yorks.: Judge, T. Heath. Seven classes. Nine specials. Cinnamons: T. Heath. Two classes. Two specials. A.O.V.: J. Robson. One class.

LIMIT CLASSES.—Judges, Dobson and Robson. Seven classes. Prices varying in limit from 20s. to £5.

ROLLER CANARY SINGING CONTEST.—Judge, A. Rettich. Under patronage B.R.C.C. These birds must be in show before 12 on Thursday, February 13th. Judged same day in separate room and afterwards staged in an annexe to the show tent. Three classes. Seven specials.

MULES OR HYBRIDS.—Judge, J. H. Roe. Eleven classes. Eight specials.

THE BRITISH, etc.

G. E. WESTON.—103 Bullfinch; 104 Goldfinch; 105 Linnet, and 106 Chaffinch Classes respectively. Also Foreign Goldfinches and Bullfinches.

S. COOK.—107 Lesser Redpoll or Twite; 108 Siskin; 109 Bramblefinch; 110 Greenfinch; 119 Nightingale or Blackcap; 120 A.S. Lark or Pipit; 121 A.O.S. Resident Bird; 122 A.O.S. Migratory Bird; 123 price limit A.N. Finch.

J. F. HILLS Classes 111 Hawfinch; 112 A.S. Bunting; 113 Blackbird; 114 Song Thrush; 115 Starling; 116 Magpie, Jackdaw, Jay, Chough; 117 Pied Albino, etc.; 118 Hens, A.S. British Finch. Thirteen specials. N.B.B. and M.C. specials three.

FOREIGN.—Under F.B.C. patronage. Judge, H. T. T. Camps. Three classes. Russell Humphrey seven classes. Eleven specials.

There is also a class for the Crystal Palace employees. Judge, J. Dobson. Also extra stock class. Fee of 1s. per cage.

CAGES.—Judge, W. Swaysland. Fee 2s. per cage. Three classes.

JUDGES' LUNCH.—February 15th. Covers at 2 o'clock. Tickets 3s. each. Tickets for exhibitors and friends supplied by the Show Manager.

TELEGRAMS OR LETTERS asking for result of judging cannot be answered by the authorities. Under these circumstances CAGE BIRDS will be pleased to supply exhibitors with the result in any class upon compliance with the following rules:—

1. Fully stamped post-cards, letters, or telegraph forms must reach us, at 154, Fleet Street, prior to February 15th.

2. The number of each exhibit and number of class must be stated, and spaces left blank for awards. For instance:—Jones, 15, Aberystwyth Terrace, Swansea.—Class 30, No. 259 ——; Class 31, No 263 ——.

3. All applicants for results at the Palace must write RESULT on top left-hand corner of the envelope.

CAGE BIRDS will have its usual stall at the Palace and we shall be pleased to welcome visitors and friends.

NEWCASTLE C.B.S.

General Meeting held in Lockhart's Cafe, Jan. 3rd. Mr. J. Shepherd presided over a good attendance. The rules for the ensuing year was unanimously agreed that Messrs. Curry and Hutchinson act as Joint Secretaries and Treasurers. Mr. J. Shepherd and Mr. J. Currah were re-elected Chairman and Vice-Chairman respectively. All retiring members of the committee were re-elected with power to add to their number. The report of the auditors was given upon the balance sheet, which was considered satisfactory for the first year of the society. Several new members were enrolled. Anyone desirous of becoming a member of what is going to be one of the principal societies in the kingdom, please send names and addresses to the secretaries. Entrance, 1s., subscription, 2s. 6d.—W. Curry, J. G. Hutchinson, Joint Secs., 60, Grosvenor Gardens, Newcastle-on Tyne.

CITY OF BELFAST BELGIAN AND SCOTCH FANCY C.B.

Monthly Meeting Avenue Hall, Mr. R. Trimble, President, in the chair. Old office bearers were re-elected for present year. Show to be held on Nov. 9th. The President and Secretary will give a special of 5s. each for new members (amateurs). Number of members 20.—R. Smith, Sec., 22, Paxton Street.

BRIGHTON F. & F.A.

The Year Book for 1903 of the Brighton F. and F.A. is a neatly got-up and informative booklet, and will form a useful compendium for local Fanciers. Especially convenient is a list of railway rates for stock on all railways in Great Britain and Ireland. We are glad to note that the Society has a balance in hand of over £14.

THE QUESTION OF THE MOMENT!

HAVE YOU HAD YOUR JANUARY "BIRD WORLD" YET?

If not, get it AT ONCE or you may be TOO LATE. "The proof of the pudding is in the eating," and the success of **THE BIRD WORLD** is proved by its reception. No. 2, like No. 1, is fast running out of print; repeat orders are coming in every day. This fact and the letters received daily from delighted readers prove that **THE BIRD WORLD** fills the proverbial long felt want.

The January Number contains a beautiful Coloured Plate of Canary Bullfinch Hybrids, from the brush of Mr. H. Norman.
An article on the Bird Pets of Royalty, by Princess Helene Vacaresco.
The first instalment of a highly instructive and extremely interesting Serial entitled "A History of Birds," by W. P. Pycroft, the well-known ornithologist.
An illustrated interview with a Champion Exhibitor of British Birds.
An article on Canary Breeding for beginners, and numerous other very interesting Articles and Illustrations.

The circulation which reached the unexpected figure of 12,500 has not been confined to the United Kingdom alone; our books already contain a large number of subscribers from Australia, New Zealand, India, Canada, British West Indies, etc., and we have already received several letters of congratulation from distant parts.

ADVERTISERS SHOULD NOTE that a wealthy class of buyer can be reached through THE BIRD WORLD, so do not miss being in the next Number.

Price 3d. Of all NEWSAGENTS and RAILWAY BOOKSTALLS. **Price 3d.**

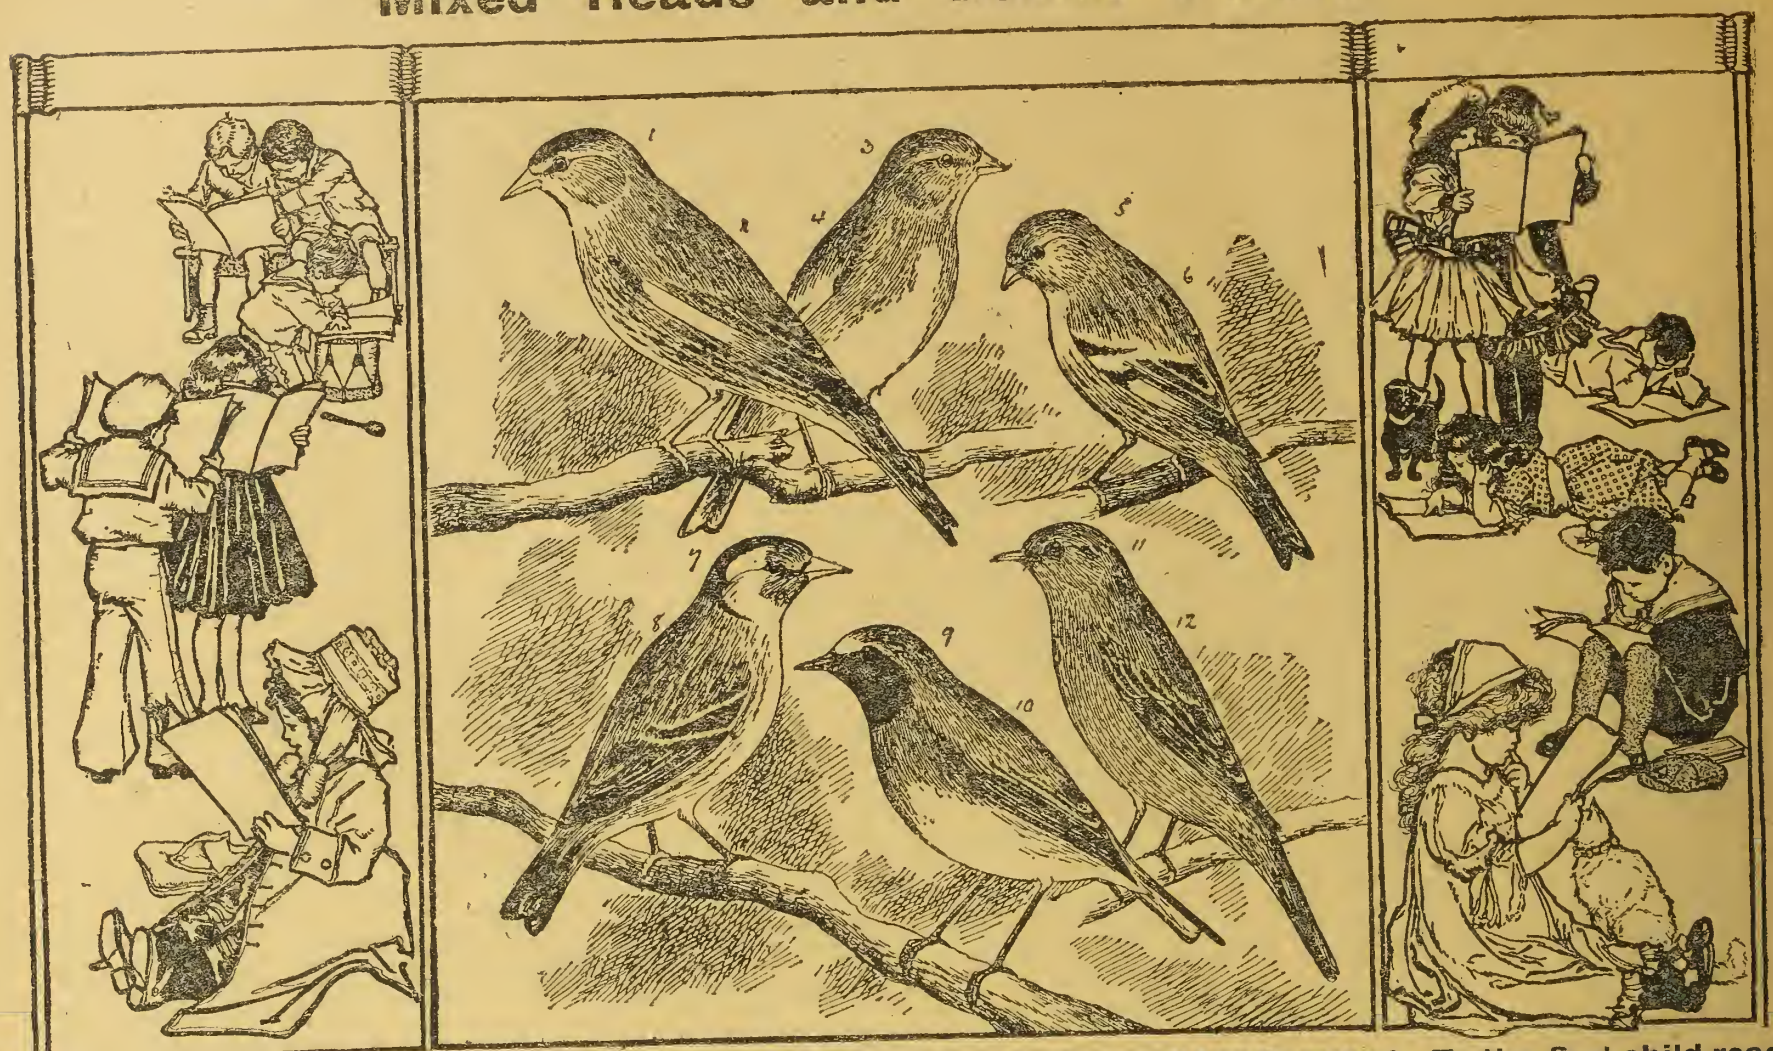
SUBSCRIPTIONS: English and Foreign, six months, 2/-; twelve months, 3/6.

Advertisement Rates: 5/- per inch display (the same advt. inserted in "Cage Birds" and "The Bird World" for 7/6 per inch inclusive). Two Words a penny throughout undisplayed; special prices for large spaces.

The BIRD WORLD, 154, Fleet St., London, E.C.

OUR CHILDREN'S COMPETITION.

Mixed Heads and Bodies Puzzle.



Here are some naughty birds which have evidently got their bodies and heads mixed. To the first child reader of "Cage Birds" under sixteen years of age who succeeds in successfully placing all the right heads on the right bodies we will give half a sovereign. Every head and every body has been given a number, so it is not necessary to mutilate the paper in order to compete. Full name, age, and address must be written on a postcard with solution, and posted before February 16th, 1907, when entries will finally close. Only one guess allowed to each child. Winning card selected by an independent person, blindfolded.

CRYSTAL PALACE SHOW.

Sir,—Seeing the Great National Show to be held at Crystal Palace is now fixed, can you arrange for an excursion, so as to embrace the North-east coast? To start from Glasgow and come by Edinburgh, Berwick, Newcastle, Gateshead, and Darlington, which embraces Stockton, Middlesbrough, and the Hartlepools, then Yorks., etc. The excursion would be well patronised. Have it to embrace the whole of the week, or even longer. If Messrs. Thos. Cook and Sons were consulted by you, I feel sure it would be a success. Will you please give the matter your very careful attention? By so doing you will oblige a large circle of fanciers and readers of Cage Birds. —William Cotton.

[This is more a matter for the Palace Show manager than Cage Birds. Perhaps he will inform our correspondent if any special excursions are arranged from the Darlington district.—Ed. "C.B."]

THE HOMING INSTINCT IN A CALL-BIRD.

Sir,—I am an interested reader of your valued paper, and have read several interesting letters on the homing instincts of cage birds. I could recount several instances of various species, but to-day's experiences I consider most remarkable. I have a hen Chaffinch that has been used as a call-bird in a back cage; but, premier position being taken by a fine male, I decided to let it fly, and opened its door in the bird-room, which is a small conservatory. It flew about for awhile, and then into the garden, hopping about some gooseberry bushes, taking no heed when closely approached, and then it flew into a high plum tree, where it was joined by several of its clan by its repeated "pink, pink." Being called for a while away from the fascination of watching its joy at being once more a free bird, on returning, it was nowhere to be seen; only sparrows and starlings occupied the trees. Now, to-day, we had spring-like weather, and, being a day of rest, I sat in the open reading my favourite paper, "C.B." with a few favourite songsters hung on a wall opposite me, and I was surprised, on looking up, to see my bob-tailed Chaffinch, with crown feathers stuck up, strutting along the wall above the cages. I was all attention to see what she would do. There is something very satisfying in knowing a bird is not afraid of one, and, above all, that it loves its home. However common a species it might be, it commands our affection. After a while it flew on to a cage, and then hopped from one to the other backwards and forwards. Then it flew on to the side of one as if to get in. I got its cage, and placed it on top of another, when it immediately hopped in and commenced feeding. I took it down and fastened its door. It is certainly the tamest Chaffinch I have known, as, after being caged years, they are often as wild as the day they are caught.—T. Hubbard.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else. Sold in tins, 3d., 6d., and 1s each.

KESTRELS IN CAPTIVITY.

Sir,—I am pleased and gratified to read in your valuable paper, Cage Birds, that Mr. J. S. Clarke (whose letters I have noticed on more than one occasion) has taken up his pen to defend the Sparrows from such inhuman and barbarous methods of slaughter as practised by your correspondent "Tiercel," who in his misguided greed for blood, or so-called "back-garden sport," resorts to means which are heinous crimes in the eyes of the civilised How terrible to maim Sparrows in order to provide sport for "Tiercel" and food for his Falcon. It might have escaped notice a hundred or more years ago, when the law and protection extended to birds were less apparent, but to-day we have a society whose object is to prevent such malpractice. I wonder if they would call it "sport." Judging by the strong outburst of feeling and indignation displayed in his reply to Mr. J. S. Clarke's letter "Tiercel" is evidently hard hit. I have heard of men whose light has been hidden under a bushel, and to whom a little advice would have come as a boon and a blessing, may it prove so in "Tiercel's" case, and cause him in future to be more humane, and thus become a blessing to himself and the Sparrows alike. In all common sense and feeling there cannot be sport in watching an untrained Falcon do to death a Sparrow, maimed to deprive it of its chance of escape, and "Tiercel" knows this.—C. Brunt.

Sir,—Allow me to thank "Shikra" for his instructive and interesting letter re falconry. What interesting articles he could write in your columns on his hawking expeditions! British officers, I am told, indulge much in this "ancient and royal sport" on the plains of India. Mr. J. S. Clarke convicts himself of cruelty that is fiendish compared with that for which he arraigned me. He says he "has shot hares and rabbits"!!! Angels and ministers of grace defend us from the righteous indignation and the mock heroics of a rabbit-potter! When J. S. Clarke attacks me on the ethics of cruelty why does he not reply to my arguments? Is it not a case of the pan calling the kettle black? He may blow a hare's leg off with his shot, and yet he wriggles and squirms like a bottle full of worms at a recital of the death of a cock sparrow! If you would shoot your rabbits "humanely" you must shoot with Quaker Oats, not lead! At the end of his letter J. S. Clarke gives me some of the information I sought, but I have had to wring it out of him by first wringing his neck like a cock chicken. I speak figuratively, of course. If my quixotic traducer considers this another "farrago of abuse" let him not forget that he was first to throw stones.—Tiercel.

[Much of this correspondent's letter has had to be deleted. A long and harrowing description of the cruelty of rabbit and hare shooting is not suitable for the columns of Cage Birds. Mr. J. S. Clarke may, if he so pleases, reply briefly, and then this correspondence must close.—Ed. "C.B."]

GRAVE CHARGES AGAINST EGREMONT SHOW.

Sir,—I am the representative of the C.B.U. referred to. I visited the show on the Sunday, and found seven birds without water, and looking soft; five in Border section, and two in Norwich. Now, Mr. Moffat, I must admit that I did neglect doing my duty, but four birds out of the seven being my own, I did not feel inclined to make any bother about them. But there, as you have beaten round the bush in the manner you have done, I am obliged to tell the 40,000 readers of Cage Birds a little more of the case. First, he, Mr. Moffat, is not an obliging Sec—far from it—or else he would have put himself out of the way for five minutes, instead of saying that someone else had the key of the hall. But, as I told Mr. Withington, I could not prove any neglect of the dead bird, as the drinker was full of something of a pink colour and the bird had seed. But now, Mr. Moffat, you said in one of your letters I neglected my duty, which I admit. Well, it is your fault, first, in not informing Mr. W. of his bird's condition, and for making a wrong statement about the key, and my fault in the second place, for allowing the lads in charge of the hall, and to let the birds go out; they were not committeemen. This is my first letter and my last, as this beats cock-fighting, Jim.—W. J. Park.

(Letter from Mr. Moffatt, jun, crowded out.)

DISQUALIFICATION AT HAYLE SHOW.

SIR,—I have no desire to introduce anything of an unfriendly nature towards Mr. House, but I must say he "hit off" at the outset with an air that was not all that could be desired, and when I drove the point home he treated my inquiry, re disqualification, with an amount of disregard which was unbecoming in an "All England" judge. Still, I propose sending the said bird to the Great National, so that one and all may see the grizzle smear on the side of the neck, the size of a shilling. Here ends this regrettable controversy.—W. COLLINGS.

SOUTHERN N.P. CLUB.

Proposed Testimonial to Mr. Leclair the Retiring Hon. Sec.

SIR,—On learning Mr. Leclair is about to resign his post as Hon.-Sec. to above club, through pressure of business, as a member I think we ought to make him a present of some kind for the services he has rendered to our club, and should be pleased to hear of someone more prominent than myself who will undertake to collect subscriptions. The time is short, but should like, if possible, for the presentation to take place at the forthcoming Crystal Palace Show. I should like to hear what other members think in the matter.—W. R. MILES.

DUTCH FRILLS AT SCOTTISH NATIONAL SHOW.

SIR,—Will you kindly note that the pair of Dutch Frills, 1st prize cage No. 15 in class 108, were mine, as I understand, though by some error the name of the owner of these birds is printed wrong in the Show Catalogue. Though the weather was so severe, this pair of birds went and returned all that distance in safety, and in the pink of condition, and came home again. This speaks well for the hardiness of the birds, considering the awful weather that prevailed, and also is a tribute to the care that the Sec. and the Stewards of the Scots National Show betowed upon exhibits. The Dutch Frill, it appears, must be put on to the show bench, and so having been urged to do some exhibiting, though I am not keen on it, I am thinking over it, and maybe some Liverpool Frillies will be seen about the Halls de Exposition in fair array shortly.—EDWARD WILLIAMS.

A TALKING ROSE-BREASTED COCKATOO.

SIR,—Perhaps it may be of interest to your readers to know that some rose-breasted Cockatoos can be taught to talk. I have had a young male bird for the last ten months. His name is Joey. He can now say the following sentences, to our great delight: "Mary, make the tea—quick, quick! Harold, Tommy, daddy, have a cup of coffee. Tish, oh! Cockoo! Fine Kippers! Penny a pair! Sweet! Bobby! Ada, come along! Kiss, kiss!" (then imitates kissing). "Joey, mother's beauty! Pretty boy!" A knock or ring at front door brings forth: "Who's that?" My morning's greeting very often is: "Halloa, my beauty!" On leaving the room, he says: "Good-bye, Joey—good-bye! Who are you? What do you want? Puss, puss! Mew! Frank, how you do? Baby, don't you cry? Oh, you beauty!" At meal-times it is: "Give us a bit." He is still learning, is tame, and a good, lively companion.—(Mrs.) KNOWLES.

NETTING SPARROWS.

SIR,—A few young friends of mine went out during the Christmas Holidays—round the hedges—with a sparrow net (i.e. a net upon two long bamboo poles). One acted as beater, and went the opposite side of the net, another had the net, and the third one carried a bull's-eye lantern, which he showed upon the net, and his light greatly helped to attract the birds, which were thus more easily caught than the would have been without one. There are several parties here who go out netting, but they only go on moonlight nights. In my young days I always preferred the light, and many a time have I thrown the light from a bull's-eye into thick bushes, and caught the birds in my hands. The results of this catch were nothing very choice, only sparrows (plenty of these), Greenfinches, Chaffinches, a few Yellowhammers, and about 7 or 8 Linnets, 1 Robin, and 2 Hedge Sparrows, and about 7 or 8 Blackbirds and Thrushes. No Bullfinches, Goldfinches, or Bramble Finches. It is very rare, indeed, that the netters get any of these three last finches; but there are plenty caught in the Fens where they use the clap-nets. The Linnets are found in plenty in the Fens, and good catches are made. The same with the Bramble Finches. The Bullies are not so plentiful only in spring in the gardens and orchards, when they can be easily taken with the trap-cages. A few young farmers in the district have gone in largely for the past few years round the stacks with the sparrow-nets, and some hundreds of sparrows have been taken. Sparrows they will tell you make many a good pie, only they are a lot of trouble to prepare. Some say they are as nice to eat as Larks. A great many of the Blackbirds and Thrushes are used for "puddings" by those who regularly go out on these nocturnal raids.—T. H. KINCH (Ramsey).

SUGGESTED CAGE BIRD CLUB FOR LEYTON (Essex).

SIR,—I have been approached by several cage bird fanciers about forming a cage bird association for this district, and if any local cage bird fancier will kindly communicate with me at above address, I will have a meeting arranged, and so get the thing on a working basis. I, myself, think that a very strong association can be formed, seeing we have no cage bird association anywhere near us. I have already about 20 promises of membership, also the promised support of a few local tradespeople, and in addition to this I have three challenge cups promised for competition, so as to give us a start if the association can be formed. I may also say that it is proposed that the association be open to the county of Essex only; but, of course, we can see how the feeling of the meeting is as regards a point like this. Now, all you local fanciers let us hear from you, as we want to make this a bumping association. It is to be a Cage Bird Association only, and not a mixed society.—F. WILLIAMSON, 63, Murrison Road, Leyton.

ANOTHER APOLOGY.

SIR,—With the permission of our Chairman (Mr. Thomas Floyd), forty years a fancier and exhibitor, and on behalf of the Ashington and Hirst C.B.F.C., I would deem it a favour if you could publish an apology (copy enclosed), received from T. Rowell, of Bebside, who made certain slanderous statements about our first show, held on December 29, 1906. He may consider himself fortunate that such an apology is accepted, and I trust it will be a lesson for the future, as we are determined to put a stop to such practices. I also hope the apology will satisfy the public of any doubt as to the honesty and intentions of our Chairman and Society, and that exhibitors will not be deterred from giving us their support at our future shows.—JOS. MILES (Hon.-Sec.)

Mr. Floyd,—I must appoligise you no what it is for a man to have to much drink.

Yours,
T. H. ROWELL.

(Exact copy).

ROBIN REDBREAST.

SIR,—The following may perhaps be of interest to some of your readers. It is supposed that while our Saviour was upon his way to Calvary, that a robin picked one of the thorns from out the crown he was wearing, and the blood rushing from the wound covered the breast of the bird, dyeing it the proverbial red. This beautifully sweet legend seems to explain the reason why the robin redbreast has become such a favourite of man. Another legend attributed to the robin is that he carried dew upon his bill to the souls shut up in the lake of fire, and that in consequence his breast became scorched by the fire from Gehenna. The poet Bishop Doane, in his poem on the "Robin Redbreast," says:—

"Sweet Robin, I have heard them say,
That thou wert there upon the day
That Christ was crown'd in cruel scorn,
And bore away one bleeding thorn,
That so the blush upon thy breast,
In shameful sorrow was imprest;
And thence thy genial sympathy,
With our redeemed humanity."

Whittier, the poet, gives the following regarding the tradition of the robin carrying moisture to the parched souls in the lake of fire:—

"He brings cool dew in his little bill,
And lets it fall on the souls of sin;
You can see the mark on his red breast still,
Of fires that scorch as he drops it in."

Trusting this may be acceptable to those who may not know these legends.—A. H. M. C.

SIR,—The robin's early whistle generally portends an early or severe winter. This year they were rather early with their sweet warble, hence the severe winter we are now having. The robin I always consider a great pet, his gentle manners make him a general favourite. I will also relate another instance of what happened on New Year's morning. Poor robin was our first-foot, having found his way early in by an open door to our parlour, where he evidently enjoyed the warm reception, and was not the least put about by me moving about the room. He allowed me to get within arm's-length of him without being at all disturbed. Even when writing this letter poor Robin is paying close attention to me in my office, comes in whenever the door is open, and remains a long time.—J. J. W. LAMB.

Grateful—Comforting.

Breakfast and Supper.

SHOULD MISSING CLAWS DISQUALIFY?

SIR,—On looking over the winners in the Greenfinch class, at the recent West London Show, I was surprised to see No. 1, a Greenfinch, with a claw missing, awarded 2nd prize. This same bird at Watford show was passed; evidently the judge, Mr. Frostick, must have noticed the missing claw, and judged it according to the rules stated in Schedule. In my opinion it should have been so passed at the West London Show, if judged according to rule 3 in Schedule. It is not fair to exhibitors, or yet judges, when we see such specimens as the above taking honours over perfect specimens. I should like to see the opinions of fellow exhibitors.—ONLOOKER.

[Possibly our correspondent is not aware that the winning Greenfinch at the last Crystal Palace exhibition also had a claw missing; further, that this is a question on which different judges hold different opinions.—ED.]

GOLDFINCH MISSING A MOULT.

SIR,—This is not an uncommon occurence among cage birds, and in most instances the bird does not suffer any evil effects from it. I have known it in some few cases to cause death, but very rarely. If birds are kept in roomy cages, and given a bath three times weekly, they should moult. Some cage birds will not bath; in that case syringe them occasionally with a very small glass syringe, using tepid water, unless it is summer time. Then hang them in the sun; they soon get dry. If at the present season, keep them out of all kinds of chills. Feed upon crushed hemp, mixing a little flour of sulphur, just a pinch, in all food, and carbonate of iron in the water, only enough to discolour it. Give apple or pear daily between bars of cage—no other green food. If the bird is in a small cage (box cage) put him in a larger one. I think you will find this treatment will cause the bird to moult; but if the bird is in good health, and sings I should leave him alone until the warm weather comes. Don't forget sand. Some birds will not take it off the bottom of the cage, in such cases mix it with their food. This is my experience, and it has been a long one, I can assure W. C. Freeman of that.—FRANCIS SMITH (Walthamstow).

SHOULD MULE BREEDING BE ENCOURAGED?

SIR,—Your correspondent J. H. Verrall evidently has never seen "Notes on Cage Birds," edited by the late Dr. Greene. In this, Chap. IX., of 50 pages, is entirely devoted to Doves, and the rest of the book consists of the correspondence from the "Bazaar" columns with Editorial Notes by the late doctor. It is published by L. Upcott Gill, and the price is 6s. for the second series, the first series, I believe, only being supplied to subscribers, as there is a list of these in the later edition. I think J. H. Verrall is also mistaken in thinking that Dr. Greene never bred any Canary Mules, as in his book "Birds I Have Kept," published in 1885, he says, "The only crosses I ever attempted, have been with the Brown Linnet and the Greenfinch, from which I obtained hybrids, and the Chaffinch and the Saffron Finch, from which I had no result." He was not in favour of this branch of the hobby, for as he continues: "I am not an admirer of mules, for I think we can scarcely improve upon Nature's handiwork, and Nature has set her face against such intermeddling with her arrangements by stamping the offspring of these unnatural unions with uniform sterility." I should advise J. H. V. to get hold of any of Dr. Greene's books he is able to, as there is not one that is not only valuable to the fancier, but they are all written in a chatty way, which makes them doubly interesting.—A. H. DESPREZ.

SONG OF THE REDWING AND FIELDFARE.

SIR,—I see that some querists have been asking your able expert, Mr. Weston, some questions about the Redwing and Fieldfare. I may say I have heard the Redwing singing here (North Ayrshire) several times in April, in a wild state. I also heard one singing sweetly in October, 1906, but it was not so loud as those I heard in April. The song somewhat resembles that of the Song Thrush. I have also heard Redwings warbling in consort. The Redwing also produces a "chuck" note, which resembles that of the Blackbird; this note is usually uttered while the bird is perched. It also produces a long-drawn "cheep," which also resembles that of the Blackbird; this note is generally uttered while the bird is on the wing. The Redwing is easily distinguished from the Song Thrush by any of these notes. Other distinguishing points are a whitish streak above the eye, and the red under the wings. The Redwing flies more rapidly and the wings are kept more straight than those of the Song Thrush, while the body is not so large, and the bird has a more snaky appearance while perched. With regard to the Fieldfare, I have often heard them making a chattering noise, and some of them seemed as if just going to sing; but I have never heard them singing.—JOHN CRAIG (Beith).

THE "STUCK AT SIX" QUESTION.

SIR,—It has come to my knowledge that statements are being circulated that at Kilsyth Open Show on Dec. 15th, 1906, classes were intentionally stuck at six. I am prepared to deposit 10s. with CAGE BIRDS, which, in the event of any exhibitor being able to prove that any such thing was done, or that any entries in cage birds were returned for that purpose, can be devoted to any object the Editor of CAGE BIRDS cares to nominate.—ANDREW D. DUNCAN (Hon. Sec.).

CANARY MISSING FROM LLANELLY SHOW.

SIR,—I should esteem it a favour if you could grant me a little space in your valuable paper. At the late C. B. Show, which was held Jan. 8th, an error has been made in repacking the birds. We have missed a Buff Norwich in Class 2, No. 3; therefore I appeal to exhibitors at the above show to thoroughly examine their exhibits, and I trust to have a reply to my satisfaction. I must expresss my regret at this mistake.—W. LEWIS (Sec.).

LLANELLY SHOW—ALLEGED TAMPERING IN TRANSIT.

SIR,—Llanelly being the last show for competition for the English and W.B.F.C.C. Cup I entered and nominated two birds, and, to be sure they would arrive in good time, I sent them off on Sunday night, Jan. 6th, by mail train, the show being on Jan. 8th (Tuesday). To my surprise, early on the Tuesday morning, day of show, I had them handed in to me by a railway servant. I went down to the station to see where they had been returned from, but they could not tell me, as they had no waybill back with them. They told me the label must have got turned, but by whom, or where, they could not say. I wrote to the Secretary to make strict enquiry at Llanelly Station, and see if ever my case had been there on Monday. He wrote back and told me he had been to the station and checked all the cases that had been to the show, but mine had never been there at all. As I was standing well up in points to win the Cup, the only motive seems to have been to spoil my chance of winning. It is the most dastardly trick I have ever known in all my 20 years' experience as an exhibitor of cage birds. I should like to know if any of your readers have ever had a similar experience. I have put a claim in to the railway company, and it will be seen whether they are responsible or not.—J. THOMPSON (Wigton).

NORWICH PLAINHEAD AND CREST CLUB FOR IRELAND.

SIR,—I notice in a recent issue that one of your readers suggests that we should have a club for the above varieties. Surely it is time that something should be done, as I am greatly afraid that another season or two will see our schedules excluding these varieties altogether. The past season has been a perfect failure in respect of them; at most of the shows Crests and Crestbreds only averaged three per class, and Plainheads only five. This is not an encouragement to show committees to continue classes for these. The exhibitors of these varieties will have to do as their friends the Yorkshire exhibitors did—start a club, and do the same as soon as possible. If they do not, I am afraid the Norwich will not make as big a headway as the Yorks.—C. J. MULLIGAN (Sligo).

"A PRIVATE APPEAL."

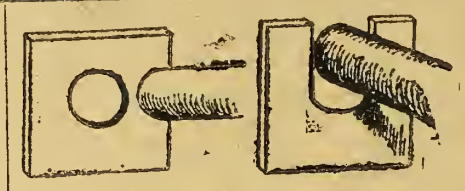
SIR,—It was a pleasing surprise to me to read Mr. R. Rhydderch's appeal on my behalf. The gentleman is a stranger to myself, and I only know his name from having replied to some queries forwarded on to me by the Editor. But what he has written is quite correct. On my health improving, I was unable to regain any of my former employments. I have never learnt any trade. The workhouse was the only place where I could obtain board and lodging. Reading and writing is called a luxury, and can only be done during the dinner-hour, or between six and eight in the evening, and on Sundays. I am hoping that through the generosity of old friends and new readers I may be able once again to visit the Crystal Palace Cage Bird Show.—J. H. VERRALL.

SIR,—I have pleasure in sending you P.O. value 2s. towards the "Verrall" (I presume) Fund. Ah! well do I remember about fifteen years ago, when writing on mules, how friend Verrall partly questioned my remarks, and in return I gave him an invitation to spend his summer holidays with me, to which the late Mr. Comyns added: "What does friend V. think of this spontaneous invitation?" Well, no one knows what may happen, and I say many can help one, where one can't help many, and I trust he may be comforted in his old age. I could write a lot more about all the good things you are giving us, but must stay for the time.—W. SPILLMAN.

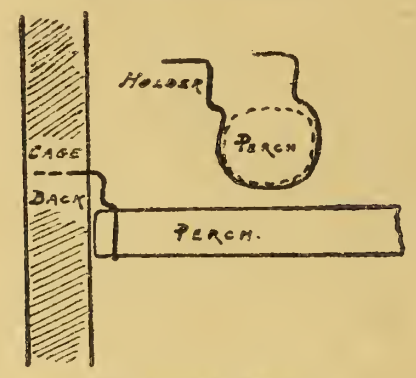
The following sums have also been received: From J. Wilkins (Tonypandy), 1s.; from Mrs. Ivatt (Walmer), 1s.; from William Cairns (Edinburgh), 5s.

THE CLASSIFICATION OF YORKSHIRES.

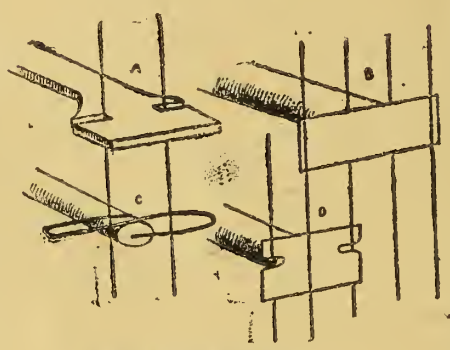
SIR,—Now that the Show season is nearly over, and a few more weeks will bring us into the breeding season, I think the interval might be taken as an opportunity to devise ways and means of ensuring a better co-operation of fanciers with a view to promoting and exhibiting the different breeds of Canaries. As the same means will apply to all varieties, I will take for example the variety I am most interested in—viz., the Yorkshire Canary. I am pleased to see the rapid advancement of this popular bird in Cumberland, also to note the formation of the Northern Y.C.C., and humbly express the hope that their officials will use their utmost endeavour to secure a different classification to that which we have been favoured with during the past season in the North of England. If things go on as they are shaping, we might possibly find ourselves with a classification such as "Any variety Yorkshire, yellow or buff." Gradually but surely many societies are cutting down the classes and amalgamating them together with a view to getting large entries. These societies are not run for the benefit of exhibitors, but for the benefit of themselves. Will some of our leading Yorkshire fanciers take this matter up in earnest, and by friendly discussion upon the questions I ask much good may be done to advance the interests of this variety. Will the Hon.-Sec. of the Yorkshire C.C. kindly inform me as to how many classes have to be provided by a society to secure the Y.C.C. patronage? First, for Challenge Cup; secondly, for Taylor's Cup and Specials.' And whether there is any stipulation as to the classification, or is it entirely left in the hands of the society patronised? Will any of our leading exhibitors kindly explain why they generously support societies who only give from three to five classes, and why societies giving seven or eight classes scarcely ever get a single entry from them? Is mixed classes preferred to separate classes for clears, tsks., and uneven mks., and separate hen classes? Should not societies who give a classification similar to the above be supported, even at a little inconvenience to the exhibitor? I trust this matter, Mr. Editor, with your kind indulgence, will be heartily taken up by lovers of the Yorkshire, fully discussed, and be productive of much good to both fanciers and societies.—JOHN FERGUSON (Whitehaven).



Mr. A. Eagle's Perches.



Mr. Bradley's Perch.



A: Mr. S. Dean's Perch.
B: Mr. Pitcher's Perch.
C: Mr. T. Soar's Perch.
D: Mr. R. Allen's Perch.

SOME EASILY REMOVABLE PERCHES.

SIR,—I am sending sketch of a simple method to secure perches. Take a short piece of cage-wire, and bend it to get round the perch; then bend as per sketch and fix in the back of cage. The perches cannot fall down, and you can easily take them out for cleaning, etc.—G. BRADLEY.

SIR,—I see a fancier wishes for a perch that can be taken out of the cage from the outside without lifting down the cage and disturbing the birds. I enclose sketch of one, which answers two purposes, i.e., perch and egg board, for placing soft food on.—S. DEAN.

P.S.—Perch for box-cages which can be taken out of cage from outside. They should be made from three-eighths inches wood, with one end cut perhaps an inch square (as per illustration), then cut with a saw to fit between the wires of the cage, after the style of an egg-board. If desired, they can either be made long enough to touch back of cage, or to be a bit short, when they will be almost like spring perches. Sufficient should be left outside to take hold of, in order to fix in position.—S. DEAN.

SIR,—In reply to J. E. D. in your issue of the 22nd inst., re simple way to fix perches, he has only to cut them long enough to strain a little tight from front to back, and use no nail or tack whatever. I do not know if he uses such or not, but there is no need of it; he can put his hand to the perch and take it down without any trouble.—H. FOWLER.

SIR,—I herewith send an idea which I think will meet the requirements of "J. E. D." in this week's correspondence column. Perches made as per sketch, with a piece of stout tin nailed to one end, are easily slipped in and out for cleaning. A hole bored at the far end makes a good trap for red mite, which are easily dislodged by giving a sharp tap or two on the perch. The end must not touch the back of the cage. I have made and used these myself for years, so can speak with confidence as to their complete satisfaction.—W. J. PITCHER.

SIR,—A correspondent of yours asks for a secure perch-holder that can be easily taken out without moving cage. How will one suit him that is easily cut from a piece of brass and will hold any weight, while fastener is outside of cage, and perch can be removed without putting the hand in the cage at all? The nicks inside of brass must be tapered, and they will not then slip off the wires. The perch need not go to back of cage, as it will hold firmly with fastener only, which grips the wires very tightly, and will not drop if nicks are not cut too far in for the gauge to which the wire front is made. The sketch shows a piece of brass (or other hard metal) cut out like design, and with a few notches made in it at the point which is driven in up to the top in the perch. Insert in cage front with brass front-piece turned endwise. Then turn flat to lock in wires of front; to take out, turn straight again.—R. ALLEN.

SIR,—I am sending you a simple way to fix perches so that they may be got out to clean. I get a piece of hard, smooth wood, about quarter-inch thick, and bore a hole in same about size of perch; or perch can be made to fit hole. Then I glue it to back or sides of cages, as the case may be. If for fixing from back of cage to front wires, I have a slit sawn down about half-inch or so in perch, to fit a wire, when all you have to do is lift the end on the wire upwards and pull it out through the front wires. For breeding-cages I have two blocks of wood, one with a piece cut out as shown in sketch. This is for flight, etc., cages, when running from end to end, and the perches should fit pretty tightly in both the hole and the slit. I glue the two blocks to the sides, etc., of the cages, after, of course, the necessary holes have been cut.—A. EAGLE.

SIR,—I beg to call your correspondent's attention to the accompanying explanations and diagrams. Get some ordinary cage-wire and bend it in the shape of an elongated letter S. Leave a tang, which flatten and then drive into an ordinary wooden perch. Interlace the elongated S between your front wires, and there you are.—THOS. SOAR.

Many readers have kindly responded to "J.E.D.'s" inquiry for an easily removable perch, and their ideas we purpose publishing in due course. It was, however, inevitable that some amongst them should forward on similar notions, and, of course, we can select only one of each for illustration. We have to return thanks to Mr. G. Stevens (Cheltenham), Mr. John Canning (Tyldesley), Mr. A. Winfield (Watford), Mr. B. Jones (Kidsgrove), and several others.—Editor.

BRITISH CAGE BIRDS ABROAD.

SIR,—As an ardent lover of birds, especially British, I thought that perhaps it might interest those of your readers, who like myself, are condemned to live in sultry climates to hear of my experience in keeping British birds in such. I started off to join my regiment in West Africa (Sierra Leone) with a cage containing two Larks, one Bullfinch, one Goldfinch, one Linnet, one Canary. This was before I had any experience in keeping Larks, or any soft-billed birds. I mention this to show how hardy Larks are, as they lived in that cage, principally on seeds and Indian corn meal, with a few insects that I caught by robbing the Mason Wasp's mud nest of his store of spiders. I was only at Sierra Leone six weeks, as a certain riot broke out at Belize, British Honduras, in that year, 1895, to which I was sent with a detachment of my regiment, and so, of course, the birds went too. They sang beautifully all this time and seemed to like the eternal summer. I had separated the Larks, but had no proper cage. Well, to make a long story shorter, I left Belize after nine months, and my birds were still alive and apparently quite fit. My destination was now Jamaica, West Indies; there I met with my first mishap, and it was of course, one of my best birds, my tamest Lark. This Lark was so tame that he would come on my hand and twitter to me, and I often let him run about the room; the consequence was, a dog killed him in mistake for a mouse. Then, after some time, the Bullfinch wasted away and died, and then the Goldfinch. The other Lark lived for some years—I think about three—and sang all the year round, as far as I remember. Then one night came a cursed army of travelling ants, my worst enemies, and went through the cage, literally eating the poor little bird alive. This was, of course, my fault for not having stood the cage on a table the legs of which were standing in oil tins. When I went home at the end of my term of service of nearly five years, I left the jolly little Linnet still hale and hearty, with a dear old Devonshire "pal" of mine, to whom it brought back dear memories of yellow gorse bushes and trout fishing, and I think it lived for about another year. My other experience was about 18 months ago, when serving in Barbados, West Indies. I got people to bring me out three Thrushes from home. Of course, the Thrushes were supposed to be cock birds—they were sold as such. Well, I had a big cage made, and separated them all; they were fed on Spratt's patent food, and, when that ran short, on bruised hemp-seed, egg and bread crumbs. One bird very soon died without singing. Another, evidently a very old one judging from its legs, sang fairly well, but not so loudly as they do at home, and the other cock Thrush astonished me one morning by laying an egg in its bath. I promptly transferred the real cock to her cage, at which she was delighted, and did her best to encourage the honeymoon by building a nest in an old cigar box. I gave her some clay, too, with which she lined it, but still preferred to lay in her bath. As fast as I put the eggs in her nest she ate them! The old cock bird died and I gave away the hen. I am due to sail again for Sierra Leone at the end of the month, and am taking out a cock Blackbird (reared on Capern's excellent new food), a Goldfinch, and two Larks, and I intend to ask H. Allen, of Leeds, to pick me out a good Linnet. Now, will some one else give me their experiences? Your excellent paper will, of course, reach me weekly, and I shall probably try and write more if it does not bore you.—H. A. HILL (Major, West India Regiment).

BENGER'S
Food
assists nature.
It is used mixed with fresh new milk and forms a delicate and nutritive cream which can be enjoyed and assimilated when other foods disagree. It is entirely free from rough and indigestible particles which produce irritation in delicate stomachs.
Mothers and interested persons are requested to write for Booklet, "Benger's Food and How to Use it." This contains a "Concise Guide to the Rearing of Infants," and practical information on the care of Invalids Convalescents, and the Aged. Post free on application to Benger's Food Ltd., Otter Works, Manchester.

THE BRENT GOOSE.

SIR,—In answer to your correspondent, "Constant Reader," I am of opinion that the bird recently shot by him on the Welland is a specimen of the Brent Goose, judging from the description given in his letter. It certainly cannot be a Pochard, for the description does not agree with any of the Pochard family, either in size or colour. In the first place there is no white ring on the neck in the Pochards. Then, again, the rump and vent parts in these birds are black. Also there are distinct white bands on the wings similar to those found on the wings of the Chaffinch or Bullfinch. On the other hand, the description answers in almost every point to that of the Brent Goose. Selby, in his "British Ornithology," describes the bird thus:—Irides, brown; bill, black; legs and feet, black, with faint tinge of reddish brown; head, neck, and upper back, black, with patch of white on each side of neck, about half-way down; back, scapulars, and wing coverts, clove brown, the feathers having their tips and margins paler; under parts, French grey; rump, vent part, upper and lower tail coverts, white. These birds often appear on our eastern coast in large numbers, especially on the muddy and sandy flats between Holy Isle and the coast of Northumberland. In severe winters they appear much further south, especially after long continued north winds. Flocks of these birds begin to make their appearance early in October, and they continue to arrive during October, November, and December. They begin to migrate in February, and will be all gone by April. If captured, these birds can be easily tamed. When tamed they readily eat all kinds of grain, as well as grass and other vegetables. They are fit for the table. The average weight is about three pounds.—ERNEST COLLINS.

P.S.—I hope to give you some information later about some very rare visitors to our North Devon coasts.

SIR,—In reply to "Constant Reader" in last week's CAGE BIRDS re Wild Duck, please allow me to state that it was a specimen of the Brent Goose that was shot. It is one of the commonest Geese to visit Great Britain in the winter, but it does not frequent inland rivers, preferring the coast. In the Arctic regions it is captured by the thousands, and then eaten by the natives. They are very nice additions to anyone who goes in for fancy Waterfowl, being absolutely hardy, and about this time of the year can be bought very cheaply from almost any dealer, especially the Leadenhall Market ones.—W. EARP.

(Many letters unavoidably held over owing to severe pressure on space.)

SHOW REPORTS

WALTHAMSTOW.

The show held in the Public Baths, Walthamstow, on Jan. 10th and 11th, was one of the best ever held by the Walthamstow Fanciers' Association; in fact, the fixture, as a whole, was the best open event in the society's history, and our section, in its entirety, contributed its full share to the success which was attained. Canaries were not great numerically, but the quality was far in advance of what has usually been seen at Walthamstow fixtures. In Yorkshires Mr. Pattrick's splendid team were the cynosure of all eyes, not only for their individual merit, but for the magnificent manner in which they were staged. It is strange, but nevertheless a fact, that no one can surpass a Yorkshireman in the staging of the slim beauties named after his county. Mr. Forse's winning hen was a gem, and many were the congratulations the popular assistant secretary received on his success. Messrs. Jones, Mabey, and Parrott also put down some capital birds. These young Ilford enthusiasts, the Messrs. Morris, won each of the novice classes with a useful pair. Norwich were a most typical lot, most of them being short and compact in shape and of grand feather properties. The members' cup for the best Canary fell to a very choice buff, shown by Mr. Miles. Messrs. Green, Hodder, and Carr were each represented by choice specimens. The Norwich novices came up well, and made strong classes in both numbers and merit. The winning exhibits of Messrs. Bromwick, Green, Handscombe, Vincent, and Watchman all being of standard properties. Crests were not numerous, but some very choice birds were staged by Messrs. Horton, Calver and Sons, Johnson, and Farmer. From Northampton came the winner in the A. O. V., and for quality and type we have not seen a better Cinnamon for many a day. The great feature of the Cage Bird section was the grand class of Goldfinches, thirty-five, and all good ones. We did not envy Mr. Norman the task of separating them, but he got through it with credit and satisfaction. The class was quite the best we have seen this season, and very little separated the best from the worst. Bullfinches topped the score, and in placing Mr. Howe's pair at the top Mr. Norman did well, but Mr. Carter's crack pressed very hard. Mr. Bull's Linnet was a worthy companion to his charming Goldfinch, but he had to acknowledge the superiority of the Wellingborough crack. The fight for supremacy in the Bramblings and Chaffinches was again a duel between the West and the Midlands, but the former carried just a trifle too much powder for the latter. Mr. Carter's Siskin by its colour and beautiful condition well deserved its position in front of its giant adversary Mr. Lowne's Hawfinch, which is indeed a beauty. Mr. Lowne's Blackbird, which headed the large variety, is one of the correct stamp, and was beautifully shown. Mr. Baldry's very handsome Tree Pipit had quite an array of special prize cards on its cage, and well it deserved them. It is indeed a gem. Two grand classes of Mules wound up the finest collection of British birds we have ever seen at a London suburban show. Walthamstow usually has a grand collection of our native songsters on view at its annual fixture, but this time all its past records were well beaten, which must have been as gratifying to Mr. Norman as it was complimentary. As in past years the birds were staged in the gallery in a splendid light, and in a position which enabled them to be well and easily seen by visitors. It is hardly needful to say that a show executive, containing the names of such well-known aviculturists as Messrs. J. S. Clarke and C. A. House would not be lacking in the essentials of good management, and in addition to them such whole-hearted devotees as Messrs. E. J. Voss, R. Farmer, B. Forse, R. Mien, W. Cole, C. Carr, and A. B. Forse were a guarantee as to the manner in which the work was carried out. Messrs. Forse attended to the feeding and watering, and most carefully did they perform their task. Mr. C. W. Mead, the Secretary, proved that he improves with keeping, and it is to be hoped the day is far distant when he will resign the position he so worthily fills. Mr. Bishop, the Treasurer, is another most indefatigable worker, and most ably fills his responsible post, whilst his good wife renders most loyal and effective service by her superintendence of the refreshment department. Walthamstow Show of 1907 was a good one, and one to be remembered, especially by lovers of British. Mr. T. Heath judged Canaries, and Mr. H. Norman British and Mules.

YORKS. YELL. (9): 1, sp, Patrick, really a gem, stands right out, as smooth as glass, full of nerve, very slim and tapering, rare wings and tail, put down very fit; 2, hc, Jones, beautiful shape and style, well up on leg, very tight in feather, plenty of nerve; 3, Mabey, not so long, but a beauty, splendid type, grand quality and nerve, stands well; vhc, Parrott, rare shape and carriage, fine feather, not so hot; c, Joiner. BUFF (8): 1, Patrick, wonderful quality, feathered like a Java, nice fine head, rare wings and tail, very slim and shapely, handles well; 2, Broome, grand shape, carriage, and colour, capital wings and tail, hardly so well burnished; 3, Parrott, noted winner, splendid shape and style, well braced wings and nicely piped tail; vhc, Civil Service sp, Watson, good head, wings, and tail, splendid carriage and feather; hc, Mabey; c, Bleach. TICKED, ETC. (6): 1, Pattrick, thigh ticked yell., sweet head, nice level back, wings, and tail, grand quality of feather, rare shape and style; 2, Jones, thigh ticked yell., hardly so even in colour, but beautiful soft, silky feather, very nice modelled, and as erect as a soldier; 3, Hall, another thigh ticked yell., most beautifully feathered; vhc, c, Mabey, very long var., Cinn. marked, nice style, but lacks colour. HEN (14): 1, sp, A. B. Forse, lovely neck ticked yell., very sweetly built, full of grace and style, a bonny hen, and claimed at catalogue price by Mr. Webb, of Southend; 2, Jones, neck ticked buff, again great length and style, with beautiful feather properties, and a slim, neat body; 3, vhc, Mabey, very fine, long yell., of rare shape and quality, and a wing ticked buff of superb feather, grandly shaped and well shown, we liked immensely; vhc, Parrott (2), two grand birds, but look as though the end of the season is near; hc, Hall; c, C. B. Forse. NOVICE YORKS. YELL. (10): 1, sp, Morris Bros., very hot clear, capital length, shape, and carriage, well feathered and stands well; 2, Honeysett, wing ticked, not so much colour, but great style and splendid shape; 3, A. B. Forse, eye ticked, very slim and well tapered, grandly feathered and good legs; vhc, Coates and Humphries; hc, c, Penton. BUFF (7): 1, sp, Morris Bros., grand clear, beautiful shape and feather, splendid carriage, and nice colour; 2, Honeysett, finely drawn clear, well up on leg, capital feather and style; 3, B. F. Forse, clear, capital feather and style, but not built on quite such fine lines; vhc, Coates and Humphries; hc, F. A. Forse. NOR. YELL. (7): 1, Miles, beautiful rich even colour, very neat in shape, and full of quality; 2, sp, Hodder, not quite so even in colour on face, but good shape; 3, Burton, grand body, lovely feather rich bright colour, given a trifle more fulness of head as good as any; vhc, Hodder, grand shape and colour, not quite so fine in feather; hc, Kilby; c, sp, Barton. BUFF (9): 1, sp, members' Canary cup, 3, Miles, a gem, very rich bright colour, beautifully frosted, short chubby body, grand head, and feathered like wax, a clever and well-deserved win, third, splendid shape and feather, rare colour and meal, capital back and chest, not so neat in head; 2, vhc, Hodder, beautifully coloured and mealed, rare shape and carriage, as tight as wax, not quite so bold in chest, the vhc, another beauty, which we liked quite as well if not better; hc, c, Cooper. TKD., ETC. (11): 1, Matthes, very smart thigh ticked, grand shape, colour, and feather, a bonny bird; 2, vhc, Carr, neck ticked, grand shape and colour, nice carriage, tight in feather, vhc, thigh ticked, beautiful type and colour, and had they been a trifle better shown might easily have stood first and second; 3, Kirk, var. yell., not quite so chubby, but capital colour and feather; hc, Kilby; c, Lupton and Jordan. HEN (8): 1, Green, most charming yell., not one of the largest, but so shapely, quality of feather, and true Nor. character, would take beating; 2, Hodder, cheek ticked buff, rare shape, beautifully coloured and frosted, nice head and wings; 3, vhc, Miles, rattling good clear buff, which we liked as well as any, splendid shape, neat wings and tail, neat round body, splendidly feathered and good colour, vhc, grand-bodied buff, of good colour and feather, not so neat in head; hc, Clarke; c, Kilby. NOVICE NOR. YELL. (13): 1, sp, Green, beautiful colour and feather, just a shade long in body and tail; 2, Handscombe, smaller, and full of quality and colour, well staged, and nice shape; 3, sp, Vincent, grand shape and feather, very even and sound in colour, and well staged, we admired greatly; vhc, Puxley, splendid colour and quality, needs just a bit more depth and fulness of chest; hc, Bromwick; c, Isom. BUFF (20): 1, sp, Bromwick, a good one for a novice, rare shape and style, beautifully coloured and evenly frosted, neat wings and tail, very compact in feather; 2, Isom, neck ticked, a little beauty, rare shoulders and chest, splendid depth, richness, evenness, and brightness of colour, well mealed, and full of quality; 3, Watcham, very stout, heavily variegated, as tight as wax, a magnificent stamp for breeding purposes; vhc, Roberts, rare colour and quality, nice shapely body, hardly so full in head; hc, Neal; c, Pike, Green, Roberts. CREST COCK (6): 1, sp, Horton, almost self green, splendid shape and radiation, neat centre, good front, capital quality of feather, inclined to lift at times; 2, 3, Johnson, very handsome wing marked, neat centre, well radiated and drooped, not quite so long in frontal, third, good-bodied grey, nicely centred and drooped, not so wide in frontal; vhc, Archer; hc, Miss Gilbert; c, Irving. HEN cancelled. C. B. COCK (9): 1, sp, 3, Horton, green with pied tail, bird of exceptional shape and quality, very densely covered with long, broad feather, nice, broad, dome-shaped skull, and well browed, third, heavily var., not so much substance, but plenty of feather and nice shape; 2, Calver and Son, variegated, if anything a better shaped and more massive skull than that of the winner, but not so well thatched, splendid body and very close-fitting feather; vhc, Johnson; hc, c, Clarke. HEN (7): 1, Johnson, variegated, splendid shape of skull and body, dense, long, broad feather, nicely browed; 2, hc, Farmer, cap and wing marked buff, wonderful quality, and just the nice cushion-shaped skull so much desired, should be very useful in the breeding room; 3, Calvert and Son, not so massive or broad in skull, rare quality of feather, and plenty of it; vhc, Clarke, var. yell., with plenty of feather and a good-shaped skull and body, might have gone up a notch higher without injustice to anyone; c, Archer. A. O. V. (6): 1, Swingler and Blackwell, rare good Cinnamon, very rich and sound in colour, beautiful Nor. shape, and covered with feather of the most silky character, one of the old-fashioned sort; 2, Cooper, another good coloured, shapely Cinn., but lacks just the touch of super-excellent quality and sheen possessed by winner; 3, Phillips, var. Belgian, nice shape and carriage, fairly good position, hardly quiet enough when handled; vhc, Baldry; hc, Johnson.

THE BRITISH BIRDS.

One of the features of the exhibition was the fine show of British birds. It was certainly flattering to all concerned to see such well-filled classes. At mixed shows we do not, as a rule, expect to find 35 Goldfinches in one class. The Bullies numbered 22, while 25 bonnie Linnets faced the Judge. Mr. Baldry's Tree Pipit is a lovely bird, and won several handsome specials for its owner. Mr. Lowne's exhibits from Yarmouth were not in the best of feather; possibly their journey to the show had not been a smooth one. His winning Blackbird is a gem.

GOLDFINCH (35): 1, Bull, a bonnie Britisher, very shapely, splendid position, nicely tanned, not over large blaze, nor very square cut, but beautifully polished and rich, something very taking about him, and he certainly wins; 2, Carter, another good one, hardly so big, but beautifully tanned, good square cut blaze, exceedingly rich bars, nicely staged; 3, Baker, very sleek, shapely bird, good blaze, stands well, capital wings and buttons; 4, Carrier, an extraordinary big, square-cut blaze, good wings and bars, but lacks that indefinable something which makes the champion; vhc, Swingler and Co.; hc, Watson, Pike; c, Carrier. BULLFINCH (22): 1, 2, Howe, grand pair, most difficult matter to divide them, both have deep, rich coloured breasts, and silvery backs, rare feather and quality, the winner a shade more Bully in shape; 3, Carter, another lovely bird, not far behind, grand shape, with plenty of polish, capital cage, well shown; 4, hc, Jupe, very shapely, rare colour and condition, but hardly the sheen of winners; vhc, Prescott and Co.; hc, Marks; c, Waldock. LINNET (25): 1, Howe, most charming bird, possessing all the qualities of an exhibition Linnet, the bird deserves all he gets, but the owner might stage him a little better, a jewel, certainly should have a proper setting; 2, Bull, might be a nest companion, lovely shape, colour and condition, beautifully marked, yet hardly so clearly as winner, splendidly staged, a near thing; 3, Temple, beautiful shapely bird, capital colour, takes his perches well, hardly the finish of winner; 4, Johnson, bonnie bird, rare stamp and size, nice wings, beautifully laced; vhc, Taviner; hc, Marks; c, Morris and Watson. GREENFINCH (11): 1, Howe, real champion, rare size, nice silky feather, not spoilt by heavy colour feeding, stands well and shows himself off to perfection; 2, hc, Hellens, another bonnie bird, nice distinctive colour, plenty of rich, green and bright yellow, will do more winning; 3, Bull, good bird, nice colour and condition, capital wings; vhc, White; c, Joiner. BRAMBLE, ETC. (13): 1, Bull, good Bramble, not over large, but full of quality and colour, splendidly marked; 2, 3, Howe, former a wonderful Chaffinch for quality, very shapely, fails a bit in cap or would have won, third bonnie Bramble, good colour and condition, perches too high in cage to show off spangling; vhc, Hawkins; c, Swingler and Co. A.O.V. FINCH (7): 1, Carter, bonnie Siskin, nicely pencilled and capital colour, good wings; 2, Lowne, topping Hawfinch, very shapely, capital colour, evidently had a rough time of it, as several lesser wing feathers were sticking out in all directions, and spoilt his chance; 3, Cocq, also a very nice bird; vhc, Botting; hc, Irons. LARGE (7): A small but topping class; 1, Lowne, gem of a Blackbird, extraordinary depth of colour, rare polish, bonnie, shapely bird; 2, Walker, very fine Magpie, perfect in feather, rare sheen and polish, hard lines to meet such a Blackie, deserved to win; 3, Baldry, topping Song Thrush, very shapely and bold, nicely spotted; vhc, Tabor; hc, Tasker; c, Overy. SMALL (8): 1, Baldry, most lovely Tree Pipit, shapely, full of colour, marked to perfection, the man who could find fault with him would be hard to please, wins cup for best Britisher; 2, Howe, lovely Gale, grand shape and carriage, shade damaged at lores; 3, Lowne, beautiful Bearded Tit, but like his aviary companion, the Hawfinch, had evidently had a rough journey, was not looking his best; vhc, hc, Baldry, nice Redstart and good Whitethroat; c, White. MULES, LIGHT (13): 1, Bull, beautiful lightly marked Goldie-Canary, good size, stands well, capital polish and colour; 2, Pattrick, another very shapely, lightly marked bird, not so large as winner, but in capital condition; 3, Watson, big, full-bodied bird, shade heavier in markings, but very clean and nice colour, well shown; vhc, Watson, good bird, beaten in finish; hc, Morris; c, Cook and Prescott and Co. DARK (18): 1, Gunnett, bonnie Goldfinch-Bullfinch, rare size and colour, lovely feather, good win; 2, hc, Marshall, well-known Goldie-Canary, brimful of colour and quality, a real topper; 3, Lamb, beautiful Linnet-Bullie, capital size, rare condition and colour; 4, c, Chapman, good Goldie-Bullie, hardly the size of winner; vhc, Bull and White.

I have sold my best Goldie, 1st Kilmarnock, and other wins, to a well-known Southern exhibitor, writes Mr. A. Howe (Wellingborough).

WALLASEY.

This Annual Show of British birds held by the Wallasey and Dis. C. B. S, duly came off in St. Mary's School, Liscard, on Jan. 10th. There were 12 classes provided, which afforded ample scope for good competition. With Captain Hurst, Mr. Irwin, Mr. W. Young, C. Stewart, T. T. Woodman, W. Barnett, and last but—like a new planet or "star"—by no means the least Mr. A. Coffey, who came out with a very strong team, and did great execution. Competition was very keen. It is remarkable how an enterprising fancier can extend himself when competition presses him to do so. That this gentleman has been very wide awake lately the detailed report of classes will show. The points gained count in addition to points gained at this club's several "Canary shows" during the season, for a challenge prize, which produces good competition and keen interest in the club's yearly doings, others would do well to act likewise. Mr. Mallinson is an ideal Hon. Sec., who does his work in a masterly manner, and his club's members highly appreciate his services. Mr. Chas. Houlton judged.

GOLDFINCH (6): 1, A. P. Hurst, "Pride of Liverpool," standing his long travels very well, won with a bit in hand; 2, Irwin, not quite so large in body, but very pretty blaze, nice moons and bars, and good tan back and breast, in nice feather; 3, vhc, Hurst, pair of fine young Greypates, beginning to develop a few sterling points, particularly in the perfect moonings and bars, and clean cut blazes; hc, Coffey; c, Stewart. LINNET (4): 1, Coffey, a fine, big, upstanding bird, shows well all that is in him, fine head, fairly good colour, and nice markings and condition; 2, Hurst, grandly coloured and marked bird, very tame, and just beaten here in tightness of condition a little; 3, Young, not up to the high class of former two yet, nice quality of feather and requires a bit of working up; vhc, Stewart. BULLFINCH (7): 1, 2, hc, Coffey, first two fine big birds, leader in grand form and all out a noble Bullie, we were told was the Scottish National winner in new hands, and, if so, looking well, second, looser in feather and not the colour of winner; 3, Hurst, smaller, but equal to first in every other point, and the owner informed me it occupied running-up position to first here at Scottish National; vhc, Irwin, nice Bullie, good size, hardly up in finish to others; c, Young. GREENFINCH (6). Good set of birds: 1, 3, Coffey, large, good clean cut shaped bird, nice even colour, massive head, steady, and in silky feather, third, smaller, but grand colour, shape, and condition; 2, hc, Irwin, a capital size and shape, just beaten a very little in colour; vhc, Young; c, Stewart. BRAMBLEFINCH (4): 1, Coffey, splendid size, good shape, well coned off, spangled profusely, rich colour, good, glossy condition, and well shown; 2, Woodman, a fairly good one, but beaten in all-round points; 3, Young, fair size and markings, but, like second, beaten; vhc, Stewart. CHAFFINCH (5): 1, Hurst, a well-known winner, coming up in spring colours form and condition wins rather easily; 2, Coffey, a very nice shape, smaller, but well up in all colours and markings and condition; 3, Woodman, a good, big bird, but a bit soft in condition, which told a bit against it; vhc, Young, a decent Chaffie, but fails in tail feathers; hc, Stewart, little paler and tail awry. SISKIN (4): 1, Hurst, good colour markings, shape, and quality of feather, nice deep, large, well cut cap, correctly laced; 2, 3, Coffey, capital size and shape, natural coloured bird, well spangled markings, and good feather, fails in bib only, third, rich coloured small one, beaten in cap; vhc, Stewart, a bit too small. REDPOLL, ETC. (4): 1, Coffey, grandly marked Twite, good size, shape, colour, and glossy condition; 2, Hurst, bonny Lesser Redpoll, rare good bib, well finished, in glossy condition; 3, Stewart, smaller Twite, in nice condition; vhc, Young, good sized, fresh caught Lesser Redpoll. ANY SPECIES BUNTING cancelled. Why? I know these men have them. A. O. S. HARDBILL (2): 1, 2, Hurst, first takes special also for best in show, a silver-plated teapot, capital Hawfinch, good size, rich level colour, nice bib, and feathered as close as a Java from head to tail, and beat "Pride of Liverpool," the runner-up, on tightness and finish in condition, second, fair, wild-coloured Cressbill, in nice feather. SMALL SOFTBILLS (4): 1, Barnett, lovely conditioned Nuthatch, better in feather and steadier than is usually seen; 2, Young, a fair Robin, a bit shy; 3, vhc, Stewart, a Blue Tit, very effectively cross-wired in his cage, and a Robin, very shy and surly. LARGER SOFTBILLS (3): 1, Coffey, fairly well spotted Thrush, of nice shape and condition, good; 2, Young, a big, good-shaped Skylark, good spangle and nice contour; 3, Stewart, another Skylark, beaten in shape.

OLDHAM AND DISTRICT C.B.S.

Annual Show of hen Canaries and British birds in the large room, Textile Dining Rooms, Jan. 5th. The cup, which is competed for by four nominated birds, was won by Mr. Hampshire with 27 points out of a possible 28, being closely followed by Mr. Young with 26. The judge was Mr. Alex. Donnelly.

LIZ. GOLD A. V. (4): 1, 2, 3, 4, Hampshire. SILVER (4): 1, sp, 2, 4, Hampshire; 3, Lowe. LANC. COPPY (4): 1, 2, Rowbotham; 3, Harrison; 4, Steeple. PLAINHEAD (4): 1, 2, 4, Lowe; 3, Harrison. CREST (4): 1, 4, Lowe; 2, Harrison; 3, Rowbotham. C. B. (4): 1, Rowbotham; 2, 3, Lowe; 4, Harrison. NOR. YELL. (5): 1, Young; 2, vhc, Burke; 3, Ackroyd; 4, Simms. BUFF (5): 1, 2, 3, 4, Young; vhc, Simms. YORKS. YELL. (4): 1, Hampshire; 2, Harrison; 3, Ackroyd; 4, Steeple. BUFF (5): 1, Ackroyd; 2, vhc, Burke; 3, 4, Steeple. BRIT. (5): 1, Simms, Siskin; 2, Ackroyd, Siskin; 3, Rowbotham, Bramble; 4, Cooker, Goldfinch; vhc, Lowe, Bramble. SELL. (6): 1, Hampshire; 2, 3, hc, Steeple; 4, vhc, Burke. A. O. V. (4): 1, Nelson; 2, Ackroyd; 3, Lowe; 4, Young.

WEST LONDON F.A.

The above progressive Metropolitan Fanciers' Association held its Eighteenth Annual Show, on January 10 and 11, in the Wycombe Hall, Hammersmith. The entry, on the whole, was considered fairly satisfactory, though, like the curate's egg, it was only good in parts. No doubt the unfortunate clashing with another suburban fixture adversely affected the number of exhibits, and it seems a pity this could not have been avoided, to, no doubt, the benefit of both of the ventures concerned. The Open Canary Classes had to suffer under the secretarial shears, but those that stood contained some first-rate specimens. The Hybrid section was an eye-opener. It is safe to say that a finer collection for quality has never been seen in London outside the premier shows, and there were actually sixty-two specimens in the four classes—nearly sixteen per class! We saw three or four Clear Mules, and no fewer than four Canary-Bullies! The Judge must have had a warm time selecting the winners. The British birds were a very good lot, too, the Goldies and Bullies mustering to the tune of twenty-three. The Softbills were also most attractive. In the Foreign section Mr. Dewhurst showed us one or two rarities as usual, and these classes lent pleasing variety to the exhibition. The members' section was an extensive one, but competition was not conspicuously keen in many of the classes, several of the exhibitors having things all their own way. The Association's cups for best young birds (bred 1906) were won by Messrs. J. Turner (Crests), C. Battison (Norwich), and L. Daintry (Yorks). The hall is a very comfortable room, and the exhibits were well staged therein, while their wants received every attention from a very capable band of stewards and helpers, whose names included Messrs. Bond, Lack, Crust, Pieroth, Tucker, Boyes, Lewis, Easterling, Daintry, Turner, Stone Bros., Lazarus, Lethbridge, Lovett, and Peverall. Mr. B. Stevenson, the chairman, lent invaluable aid, while Mr. Dewhurst, junr., helped to lighten his father's task in no small degree. As Secretary, Mr. J. Dewhurst quite filled the bill, for, as becomes an "old war-horse," he left nothing unattended to, or to chance, every detail being carefully thought out and given practical attention. We hope under his guidance the Society may go on to attain still further prosperity, and have a "bumper" show next season. Mr. J. Robson judged.

The four Crest classes were all cancelled. NOR. YELL. CK. (9): 1, Meades, shade lengthy, yet a very fine clear, good head and chest, nice style, excellent wings and tail, rich tone of colour, full of quality, put down in fine form; 2, 4, Hodder, leader of good size and substance, shapely, well-cut body, neat bead, nice texture of feather, needs a tubbing, fourth, mkd. tail, very typical, but just on the small side; 3, Godfrey, good clear, short, chubby, and stylish, has feather of taking quality, close up, a trifle loose on chest at times; vhc, Spooner; hc, c, Curtis; "W. C.," Daines, a buff. HEN cancelled. BUFF (7): 1, hc, Curtis, really fine clear, grand chest, well-cut, thick-set body, short, well braced wings and tail, nice head, lovely under-colour and mealy, scores somewhat easily; 2, Meades, mkd. left wing and eye, shade behind in substance, but close on winner in other points, full of quality, short and stylish; 3, 4, Hodder, couple of nice ones, leader mkd. wings and eyes, regular ball of fire, rare under-colour, nice shape and carriage, latter, sweet clear, beautiful quality, shade small; vhc, Spooner, rare big one. HEN cancelled. YORKS. YELL. (12): 1, Crisp, the well-known neck tkd., grand Yorkie, splendid length, beautifully drawn, takes a faultless stand, very close in feather and teeming with quality, just a suspicion of flatness on crown, yet wants some beating; 2, 4, Ogden Bros., clear, magnificent length, gets well up from perch, tightly braced all over, real good bird, hardly so slim and nicely moulded as winner, latter is also a true Yorkie, but shorter and less even on chest; 3, Daintry, heavy variegated, grand length and style, slimmer than second, and well moulded, teems with colour and quality, very breedy bird; vhc, Watt; hc, c, Parrott. HEN cancelled. BUFF (8): 1, Crisp, another well-known performer, clear, wonderful length and quality, very shapely, feather wax-like in quality, was looking decidedly "soft" and queer when we took our notes, however; 2, c, Turl, former, a nice clear, shade short on leg, but stands well, full of quality, staged in taking form; 3, Ogden Bros., eye tkd., excellent length and style, stands on fine legs, grand texture of feather, nicely moulded, we liked well; 4, Watt, very well-drawn, nice carriage and quality, handicapped by want of a tub; vhc, Willcox, slim, takes a good position; hc, Peverall. HEN (7): 1, c, Daintry, clear buff, wins nicely, sweet hen for quality and style, not a feather out of place, excellent length and stand, very neat wings and tail; 2, Easterling, another taking damsel, neat to a fault, excellent length and position, sweet head, well drawn; 3, Parrett, very nearly four-marked, trifle smaller than leaders, full of quality, neat, good style and shape; 4, hc, Ogden Bros., rather heavier in build, yet of fine length, lovely colour and quality, true Yorkie in style and stand, hard lines, we thought; vhc, Knight. A. O. V. cancelled. HYBRID LIGHT GOLDIE (15): 1, 4, Denny Hunt, lovely clear, nice size and shape, full of colour and quality, in rare condition, fourth, lightly mkd. yell., also of beautiful colour and quality; 2, 3, vhc, c, John Williams, another charming clear leading, excellent size and shape, grand Mule, yet a trifle soiled in plumage, and beaten for colour, third, red-hot, four-pointed yellow, fine specimen, big and shapely; hc, Taiab, good bird, looking a wee bit soft. DARK (7): 1, 3, Hunt, beautiful Jonque, shines like satin, wonderful rich bronze colour throughout, very fine size and shape, romps home, a clinker, though with a suspicion of light plumage here and there, third, another hot yellow, of A1 quality, a size smaller; 2, 4, Best, two real smart buffs, excellent size and shape, in tip-top condition, full of colour; vhc, Vale, rare big buff, little out in feather; hc, Goodall; c, Browning. A. O. V. CAN HYB (19): 1, vhc, hc (2), c, Hunt, Canary-Bullie leading, good size and shape, thick-set, bold chest and head, excellent colour and quality of feather, not over-steady, however, so is apt to get feathers awry at times, vhc, Cinnamon coloured Greenfinch, sweet shape, lovely wax-like coat, very level in colour, a sleek, rich-coloured dk. yell. Siskin follows, and yet another Canary-Bullie, a rattling good team; 2, 3, 4, Williams, second, also a Canary-Bullie, very close on second's heels, and which we heard many say they preferred to win, very cobby and shapely, carries a lovely sheen, tight as a drum in plumage, very steady and stylish, darker shade of colour than winner, which, possibly, the judge did not care about, fourth, the noted lightly mkd. Linnet-Mule, in very beautiful condition, grand bird, large and shapely, pressed leaders closely, third, variegated Greenfinch, another gem, teeming with colour and quality; vhc, Lamb (2), dark Twite Mule, exceptional size and shape and Canary-Bullie number four! a very thick lot in this and the next class. A. O. V. HYB. (21): 1, 3, Williams, the champion Goldie-Bullie to the fore, we cannot say more about him than we have already done, he is a star of stars, and ought to be seen by every Hybrid breeder, he was looking in great form, third, very fine Linnet-Bullie, rare size and shape, fine chest and head, a little more breast colour would make him a topper; 2, c, Hunt, beautiful little Goldie-Redpoll, rare, good, deep colour, yet unsteady, and so failing to show quite to the best advantage; 4, Andrews, real good Goldfinch-Linnet, excellent size and shape, well polished and rich in colour, shows parentage nicely; vhc, Browning, well-known Greenfinch-Bullfinch, looking very fit, a fine specimen; vhc, Ward, Linnet-Bullfinch, named "Unique the Second," a youngster which should follow in the footsteps of the "First" by winning same prizes, great length, needs to fill out a bit; hc, Prior, Goldfinch-Greenfinch, grand body and head, full of colour, would make a real clinker if given an ounce or two of sweet pepper in due season; vhc, Parsons, needs more colour and polish; hc, Jupe; hc, Lamb, topping Goldfinch-Siskin, quite unusually low down in the list; unnoticed, No. 2, Lamb, the well-known winning Goldie-Redpoll, very shapely, sleek, and steady, lovely clear colour, must have run second hard.

BRITISH GOLD or BULLFINCH (23): 1, Andrews, a clinker for colour, shapely, rich blaze, fine deep tanning, excellent moons and buttons, fine Finch, clear win; 2, vhc, Maxwell, leader, lovely, clean-coloured Goldie, rare underblaze, very chubby and shapely, good in all points, just beaten for depth of colour; 3, Vincent, we thought resembled the Manchester winner in fresh hands, fine, big Goldie, with a grand face, excellent polish and colour, not well contrasted, though, marred by colour-feeding; 4, Jupe, black-legged Bullfinch, splendid colour and lustre, grand cap and body, very taking bird, yet has feathers chipped off over beak, so fortunate to score over the vhc (Maxwell), a clinking good housemoulted specimen; vhc, Herbert, splendid-bodied Goldfinch, beaten for blaze; vhc, hc, Allison, good faces, nice stamp, short of polish; vhc, Browning, we thought showed too many foreign characteristics to pass; hc, Wickham, very good, square-faced Finch; c, Turner. SISKIN, ETC. (9): 1, Maxwell, clinking Twite, fine substance and colour, well pencilled, steady, and carries a nice bloom; 2, hc, Francis, smart non-fed Siskin, big and cobby, good head and bib, well marked; 3, Andrews, whopping Mealy Redpoll, rare substance, good feather; 4, Clark, sweet Lesser Redpoll, tight and shapely, nicely marked; vhc, Prior, grand Twite for markings, shade small; c, Dewhurst. LINNET (10): 1, Pile, wonderfully big bird, very rich nut-brown colour, lovely polish, with more work about it would be a champion; 2, Maxwell, same failing as leader, otherwise an excellent specimen, shapely and stylish, sound colour; 3, 4, Francis, former a shade too dark in colour, yet a fine Linnet, excellent size and shape, good polish, latter, a big one; vhc, Wyse, was looking soft when we saw it; hc, Pearson; c, Browning. GREENFINCH, ETC. (10): 1, Withers Bros., slashing big Chaffinch, rare chest and head, well contrasted in colour; 2, Goodall, fine Greenfinch, splendid colour, size and shape, in A1 condition, the Watford unnoticed bird, owing to a claw it had missing; 3, Maxwell, very good exhibit, but cage is too small to allow it to do justice to its beauty; 4, Vale, the Watford winning Greenie, slasher for size, very hot colour, well polished; vhc, Clark, exceedingly good-conditioned Chaffie, trifle slim; hc, Meades; c, Francis. A. O. V. SEED-EATER (9): 1, hc, Francis, very fine Hawfinch leads, splendid size and shape, grand bib, full of colour and bloom; 2, R. J. Howe, one of the steadiest, best coloured and marked Meadow Buntings we have seen, very attractive exhibit; 3, Maxwell, smart Yellow Bunting, big and shapely, well marked, plenty of colour; 4, Prior, lovely Bramblefinch for colour and spangling, well-laced and marked all over; vhc, Withers Bros., very big Bramble, beaten in spangling; c, Dewhurst, nice Tree Sparrow. THRUSH, ETC. (6): 1, 2, 4, vhc, R. J. Howe, grand team, two topping Blackbirds leading, winner excels in size and density of colour, lovely rich beak and ceres, fourth, very fine Thrush, cloudy in mooning; 3, Francis, big, bold Thrush, very distinctly mooned, goes right under, deep, sound colour, damaged feathers over beak, or would have gone a peg higher; hc, Chapman. SMALL SOFTBILL (12): 1, 2, Dewhurst, pretty Nightingale leading, fine shape and colour, steady as a rock, second, charming Whitethroat, in the best of condition; 3, vhc, Francis, well-known Wheatear, fine size and shape, about the best for colour and markings we have seen, pressed; 4, Cook, attractive Long-tailed Tit, in nice form; hc, Fowell; c, Ledbitter, nice Grey Wagtail, in winter plumage; No. 5, Hawes, catalogued Tree Sparrow, is really a Hedge Sparrow. LARGE cancelled. HEN (11): 1, hc, c, Dewhurst, very smart Greater Spotted Woodpecker, sleek and tame, full of life and playfulness, yet we could not see how it beat 2, R. J. Howe, the well-known champion Song Thrush, a perfect picture, we certainly thought won hands down; 3, Eyes, beautiful hen Bullfinch, fine size and shape, coat like silk, nice tone of colour; 4, Fowell, said to be a hen Reed Bunting, very nice bird, in lovely condition, some fancied it a young male, however; vhc, Francis, attractive, good-conditioned hen Bearded Tit; No. 2, Francis, wonderfully large and high-coloured hen Grey Wagtail, we took to be a cock at first glance, and no doubt the judge passed it on this account, yet its owner interested us very much with an account of its nesting in his aviary. FOREIGN SEED-EATER (15): 1, F. Howe, the well-known King Parrot, perfect condition, rich, lustrous colouring; 2, vhc, hc, Dewhurst, one of the best Grey Parrots we have seen leading, very large and of lovely colour, followed by Red-shouldered Whydah and Yellow Budgerigars, all in beautiful condition; 3, Townsend, attractive Black-throated Cardinal, deep colour, A1 condition; 4, Acland, very pretty Redrump, worth its place; c, Frost, nice Rosellas. INSECTIV. (8): 1, hc, Townsend, gem of a Blue Sugar-bird, wax-like in plumage, very rich, lustrous colour, latter, very fine Zosterops; 2, 3, 4, c, Dewhurst, splendid team, rare Coly (or Mouse-bird), leading, followed by Green Glossy Starling, Superb Tanager, and White-eared Bulbul, all excellent examples, in attractive condition; vhc, Withers Bros., true pair of Pekin Robins, splendid specimens. SELL. PAIRS (17): 1, Stevenson, nice Crests; 2, 3, Cooper Bros., two good couples of Nor. P.-heads; 4, Podd; vhc, Lazarus; hc, Brooks; c, Pullinger. SINGLE (6): 1, Cooper Bros.; 2, vhc, Brooks; 3, 4, Yeoman; hc, Lazarus.

MEMBERS' SECTION.

CHAMPION CLASSES. CREST (6): 1, 3 spls, 2, 3, 4, Turner, a clinking good team for any fancier to own, leader a grand wing-mkd. dk. Crest, great body substance, excellent texture of feather, rare sweep of crest, well-built and neat; second, lovely hen, big, neat, veiny headpiece; vhc, hc, Stevenson. CRESTBRED (4): 1, 4, Stevenson, clinking varieg. leading, grand frame, broad skull, well shaped and clothed; 2, 3, Turner, fine (lightly-mkd. specimen, wide, rising skull, heaps of feather, very close up. NOR. YELL. (3): 1, 3, Battison, leader short and well filled out, grand colour and quality; 2, Godfrey, shade slimmer, yet teeming with colour, very silky feather. BUFF (2): 1, Battison, beauty, very typical all over; 2, Godfrey, grand bodied bird, full of quality, shade flatter on crown than winner. VARIEG. CKS. (3): 1, Cooper Bros., chubby and typical, grand feather texture, looked a wee bit soft when we saw it; 2, 3, Godfrey, excellent specimens, of the right quality, second close up except for a little slackness in wing carriage. HENS (4): 1, Battison, fine cobby buff; 2, Godfrey, stylish wing-mkd. yell.; 3, Peverall, size smaller, very neatly made; 4, Cooper Bros. YORKS. YELL. (2): 1, Crisp; 2, Peverall, both very typical, well-drawn birds, leader has the pull in length. BUFF (4): 1, Crisp; 2, 3, 4, Knight, another fine all-round lot. MKD. (7): 1, Peverall, very lengthy and slim varieg. yell., stands on good legs, teems with quality; 2, c, Daintry, fine, long-drawn buff, shade stouter got up, very neat and stylish; 3, 4, Crisp, two smart ones, very close up, excellent length, neat and well-moulded; vhc, hc, Knight. HENS (4): 1, 2, 3, Knight, fine trio, winner very taking hen, grand length and position; 4, Peverall, another typical damsel. AMATEUR: In the Crest and Crest-bred classes Mr. Lazarus staged a fine team of five birds and took all the honours. NOR. YELL. (2): 1, Lethbridge, nice type, very good head and quality; 2, Lovett, neat all over, shade longer. BUFF (3): 1, Lack, excels in quality; 2, Lethbridge, also a nice one. MKD. (3): 1, Lethbridge, very hot varieg., nice type; 2, Lovett, has quality, very fair stamp; 3, Lack, grand condition. HEN (2): 1, Lethbridge; 2, Lack, two smart hens, neat and fair type. YORKS.: Mr. Easterling had out three really excellent Yorkies, and took all the prizes. NOVICE CRESTS (8): 1, Franz, very smart clear body, grizzle crest, nice frame, expansive, neat, well-drooped head-piece; 2, 3, 4, vhc, hc, c, Mugford, highly creditable team, leader wing-mkd. dk., looked to have a nice head-piece, but had been tubbing it when we saw him. CREST-BRED (12): 1, 2, Franz, couple of high-class specimens, both have feather of good texture and rare good frames; 3, 4, vhc, hc, c, Mugford, another fine lot. NOR. YELL. (4): 1, 2, 3, Williams, smart trio, good in type and feather. BUFF (5): 1, 2, Podd, two rare big ones, nice quality, latter carries a shade too much astern; 3, vhc, Lack, fine colour and quality; 4, Williams. MKD. (4): 1, 3, 4, Williams, good yell., fine silky coat, leading, latter also of excellent quality; 2, Lack, big, stout varieg. HENS (3): 1, Williams, light-var., well-rounded chest, neat head; 2, Podd, heavy var., a strapping hen; 3, Lack, almost green, teems with quality. YORKS.: In these classes Messrs. Stone Bros. cleared the deck with seven very nice examples of the breed. CUP CLASSES. CRESTS (BRED 1906) (5): 1, 2, 4, vhc, Turner, winner green, with a crest of fine size, thickly built and well laid, inclined to shield-shape, yet high-class youngster; 3, Lazarus. NOR. (BRED 1906) (12): 1, c, Battison, romping big, clear buff, beautiful head and chest, wings and tail well packed, full of quality, scores nicely; 2, 3, 4, Godfrey; vhc, hc, Lethbridge. YORKS. (BRED 1906): 1, 3, Daintry, winner head mkd. buff, good length, wonderfully neat and tight all over, fine stand, just wins after a struggle with 2, Easterling; 4, Knight. BRITISH SEED-EATER (9): 1, 2, 4, vhc, hc, Robinson, a warm lot, headed by an excellent Goldie, nice face, rich colour; 3, Dewhurst, good Bullfinch; c, Lack. INSECTIV. (4): 1, 2, 3, 4, Dewhurst, attractive quartette, excellent Blackie in premier position. HYBRID (1): 1, Robinson.

LEEDS C.B.S.

Winter Show, held December 15th, 1906, in St. Luke's Schoolroom. Judge, Mr. Megson (Bramley). The Leeds and President's Cup were both won by Mr. Stead with 42 and 56 points respectively, Mr. Mennard being the runner-up with 37 and 50 points. A silver teapot given by Mr. Greenwood for most points in show was carried off by Mr. Mennard with 29 points; an alarm clock given by the same gentleman for second most points going to Mr. Moody; Wallace's "Canary Book," given by a friend for third most points was won by Mr. Bracewell; and a gold-centre medal for fourth most points, given by Messrs. Middleton and Pollard, was won by Mr. H. E. Wilkinson. The cards were placed as follows:—YORKS. YELL. CL. (9): 1, Farrar; 2, 4, Bracewell; 3, Hall. TICK., ETC. (9): 1, Ramsden; 2, Bracewell; 3, Hall; 4, Jones. HEN (9): 1, Porter; 2, Bracewell; 3, Hall; 4, Wilkinson. BUFF CL. (11): 1, Farrar; 2, Wilkinson; 3, Ramsden; 4, Ireland. TICK. OR VAR. (8): 1, Bracewell; 2, Wilkinson; 3, Hall; 4, Farrar. HEN (11): 1, 3, Bracewell; 2, 4, Porter. PAIR STOCK (9): 1, Bracewell; 2, Porter; 3, Hall; 4, Farrar. NOR. CL., TICK. OR VAR. (6): 1, Stead; 2, 3, Mennard; 4, Wilkinson. HEN (7): 1, 3, Mennard; 2, Woof; 4, Wilkinson. YELL. UNFLI. (6): 1, Wilkinson; 2, Stead; 3, Mennard; 4, Woof. BUFF (6): 1, 2, Mennard; 3, Stead; 4, Bracewell. NOR. HEN (9): 1, Johnson; 2, Woof; 3, Wilkinson; 4, Hornby. BUFF UNFLI. (7): 1, 2, Stead; 3, Johnson; 4, Chambers. PAIR STOCK (6): 1, Mennard; 2, Woof; 3, Wilkinson; 4, Ireland. GREENS A.V. (3): 1, Ramsden; 2, Yelland; 3, Hall. CREST A.V. (7): 1, 2, 3, Moody; 4, Johnson. C.B. (8): 1, Mennard; 2, Moody; 3, 4, Johnson. A.O.V. CAN. (6): 1, 3, Nichols; 2, Wilkins; 4, Yelland. PAIR STOCK, A.O.V. CAN. OR HYB. (4): 1, Moody; 2, Simpson; 3, Hornby; 4, Bennet. MULE A.V. (8): 1, Simpson; 2, Hunt; 3, 4, Hallet. GOLDFINCH BRIT. (14): 1, Thompson; 2, Stephenson; 3, Hunt; 4, Simpson. BULLFINCH (2): 1, 2, Bennet. GREENFINCH (7): 1, Turton; 2, Hunt; 3, 4, Thomson. LINNET (12): 1, Pearson; 2, Yelland; 3, Turton; 4, Hunt. A.O.V. BRIT. (6): 1, Thomson; 2, 3, Hunt; 4, Turton. SELL., 10s. 6d. (6): 1, 3, Moody; 2, Mennard; 4, Hornby. PAIR SELL., 15s. (1): 1, Mennard. NOVICE A.V. YORKS. (9): 1, Hallet; 2, 3, Greaves; 4, Porter. NOR. (4): 1, Stephenson; 2, 3, Chambers; 4, Wilkins.

BELPER.

This show was held in the Public Hall on Jan. 12th and 14th. Cage birds had 12 classes provided, with an average entry of seven per class, a considerable falling off from last year's entry. Norwich came up fairly well, both in numbers and quality; Mules and British were good, but Yorkshires and Crests were a long way behind. The birds were all nicely staged at one end of the hall away from the rest of the exhibits. Mr. J. N. Harrison judged.

YELL. NOR. (9): 1, Shaw, very hot colour, fair shape and quality; 2, Webster, lovely colour and quality, not quite so good in size; 3, Nutt, grand shape and size, but uneven in colour; r, vhc, Vardy, two nice shaped birds, of lovely quality, not quite so hot as winners; hc, Bickerton, Walker. BUFF (11): 1, Pegg, very smart cl, nice shape, lovely colour and quality, wants more substance; 2, Rathbone, var., nice shape, bit short of quality; 3, Shaw, very fine shape and size, grand head and neck, rare quality for a big one; r, vhc, Vardy, two grand birds; vhc, Walker; hc, Fox. CRESTS (2): 1, 2, withheld; 3, r, Simms, heavy var., with crest of grand size coming well over beak, second, grand clear crest of good quality and droop. C.B. (2): 1, 2, withheld; 3, r, Simms, nearly green, grand size and substance, rare head and lash, lightly var., good size and substance. STOCK PAIR (6): 1, Walker, Nor. clear buff cock, of grand shape and size, lovely quality of feather, with marked yell. hen; 2, Bate, grand pair of Yorks.; 3, Hampshire, good pair of Liz.; r, Williams; vhc, Nutt; hc, Webster. YORKS. YELL. (8): 1, withheld; 2, Mountain, rather small cl, of fair shape and position; 3, Bate, better length, grand position, full of style, lovely quality and colour; r, vhc, Elkins, clear and Cinn. marked, the latter we liked well; hc, Ash, nice stylish bird. BUFF (2): 3, Bate, grand length and stand, feathered like a Java; r, Mountain, marked, not quite so good in quality, nice position. A.O.V. (4): 1, withhold; 2, Hampshire, very good clear cap, Silver Liz., grand size, nice bold spangling; 3, Pegg, lovely four-pointed yell. Nor., of good shape and quality, marked well; r, Elkins, fair Bor.; vhc, Fawley. MULE A. V. (11): 1, vhc, Vardy, well-known four-pointed buff Gold-Can., locking well, and yell. Linnet and Can., of nice size, grand colour and quality; 2, Lees, Greenfinch and Can., of good size and shape; 3, Draper, very fine Gold and Bullie, rare size, grand blaze, rich breast colour, right down to vent; r, Herrett; vhc, Mitchell and Needham; hc, Bridges. BRIT. (14): 1, 2, Hakes, fine Hawfinch leading, lovely colour and beautifully marked, just a few feathers out of top of head, second, very good Blackbird; 3, Kinch, nice Bullfinch, grand colour; r, Mear; vhc, Dallman; hc, Garton.

Use our Picture Postcards.

ST. HELENS RECREATION F. & F.A.

Show held Jan. 12th, Works Cafe, a room which lent itself well for the purpose. There were 10 open classes and 17 members' classes for cage birds, and for this, their first "birthday" show, a good entry of very high class was secured. As the members of this society are all employees of Messrs. Pilkington Bros. (the great glass manufacturers), the membership is perforce limited, but seeing that this gigantic firm employ many thousands of men and youths, they can muster a very good membership. The show has the patronage of Messrs. Pilkington Bros. (with R. A. Pilkington, Esq., J.P., President), Dr. Giles, Messrs. F. Eddleston, L. West, W. Owen, W. Arnold, J. H. Dickinson, A. Britton, J. Poole, J. Dickinson, and G. Holt as Vice-Presidents; Mr. J. Judson, Chairman; Dr. Siddall, Vice-Chairman; J. H. Lewis, Hon. Treas.; J. Shufflebotham, Hon. Sec. The stewards are:—Messrs. J. T. Rigby, L. Whittle, W. Knowles, J. Blanshard, J. Grice, and H. Forber, with Mr. Robt. Little, Hon. Show Manager. The chief officials and stewards did well, and the Hon. Sec. and the Hon. Show Manager proved that they are thoroughly competent to manage this onerous work. Birds came in from far and near, some really first-class ones being shown. About 50 special prizes —many of them very valuable—were given by the leading gentlemen at the works, and by leading tradesmen in St. Helens. Hyde's and Capern's Specials were also for competition. Mr. Levi Whittle, of crest fame, staged a grand var. buff dark crest, which won 1st local and 1st open (being allowed to compete in both sections), sp, best crest, sp best members' Canary, and Hyde's special, a grand performance. This exhibition knows how to select and put down a good crest, and we hope soon to see him going strong again in the open as he did years ago. Several other notable wins were made, which are noted later. Taken all through competition was very level and keen, and very fine points had to be looked for to separate them. General approval of the day's work was apparent. A fine attendance of visitors gratified the Show Manager and his colleagues, and that a pronounced success was achieved is undoubted. The next venture will, we believe, see a vast extension and improvement. Mr. Chas. Houlton judged, and his awards met with cordial approval from those present.

MEMBERS' CLASSES.

YELL. NOR. COCK (9): 1, sp, Capern's Can. sp, Vose, grand typical clear bird, fine chest, clean cut through, neat head, good carriage, wings, and tail, nice quality feather, well wins the quadruple; 2, he, Grice, storming, big cl yell., tremendous head and eyebrows, longer wings and tail than first; 3, c, Helm, similar build to second, and only a shade beaten in tail; vhc, Barrow, nice type and col. BUFF (5): sp, 1, 2, Grice, rattling clean cut, typical bird, A1 quality feather, well finished, second, good head, beaten in body condition; 3, hc, Helm, rare head, fine body, just beaten a little in breast; vhc, Vose. HENS (8): 1, sp, Helm, lovely-shaped clear yell. hen, good size, fine head, tight and clean cut, good wings and tail; 2, vhc, c, Grice, nice trio, first two fine clear buffs, good quality and shape, well mealed; 3, hc, Vose, clear yell., fine body shape, fair size, rare feather, very tight, run as a yell. to first. YORKS. YELL. COCK (2): 1, 2, Grice, first very solid in feather, finely drawn, good stand, neat head, wings, and tail, well up on legs, second, Cinn. mark wings, very snaky, well up, neat head and good carriage. BUFFS (2): 1, sp, best members' Yorks., Grice, slashing long-drawn bird, stands up grandly, well filled and clean cut through, feathered like a Java; 2, Little, tick wings, smaller, nicely drawn out, well up on leg, good position and condition. HENS (3): 1, 2, 3, Grice, var. buff, lovely feather and condition, second, good yell., fine type and stand, nicely posted, third, Cinn. mark, yell., good quality, trifle small. CRESTS (4): 1, sp best crest, sp best members' and Hyde's sp, Whittle, grand var. buff, dark crest, grand size and formation, good radiation, droops nicely, immense body and body feather; 2, 3, vhc, Knowles, very good hen in body, fair crest for a young bird, will improve much with age, third, similar. CREST-BRED (2): 1, sp, Whittle, buff var., great size and feather, broad, dome-shape head, good entrance, wealth of frontal feather; 2, Knowles, nice var. buff, smaller, good stock bird. A. O. V. CAN. (2): 1, Grice, big buff Cinn., foul tail, fine stock bird; 2, Helm, self Cinn., good Nor. type, rather smaller than first. A. V. MULE (4): 1, sp, vhc, Grice, big, nearly evenly marked buff Gold-Can., very clean, good in colour; 2, 3, Helm, pretty Siskin-Canary and a fair Greenfinch-Canary. A. V. NOR. or YORKS. NAT. COL. (5): 1, sp, hc, Barrow, large, good feather and condition; 2, vhc, Grice, even mark Yorks., grand feather, fair shape and stand, medium size; 3, Little, very compact cobby-shaped Yell. Nor., A1 condition. BRITISH GOLD. or BULL. (3): 1, sp, Capern's sp, Grice, capitally finished bird, blaze and other colours well defined, clean cut, good body shape and finish; 2, Leather, hen Bullie, very fine condition; 3, Helm, fails on head a little to first. LINNET (7): 1, sp, 2, Grice, well got up pair, A1 form; 3, Little, rare size and shape, wants time to make a grand bird; vhc, hc, Helm, very nice condition, shade smaller, ought to moult up into good ones; c, Mercer. SISKIN, ETC.: 1, sp, 2, Grice, best all-round Siskin, fine cap and good colour, second, nat. col., fine shape and condition; 3, vhc, Helm, pretty Lesser Redpoll and good Siskin. BRAMBLE, ETC. (5): 1, sp, 3, Helm, capital Greenfinch leading, and a wonderfully big hen, third, yell. Bunting, grand feather and condition; 2, vhc, Leather, smart Chaffinch, and a smaller Greenfinch, both in nice condition; hc, Grice, very nice Bramble. BLACKBIRD (4): sp, 1, 2, 3, Grice, leader wins Capern's sp, very fine Blackbird, in good feather, nice size and shape. A. O. V. SOFT (3): 1, sp, 3, Grice, large, good-shaped Lark, well spangled, good feather, steady, third, nice Lark, well shown; 2, Helm, good Robin, in nice feather and steady.

OPEN SECTION.

YELL. NOR. COCK (5): 1, sp, 2, Barker and Abbott, grand var., immense substance body, rare colour, feather, and condition, second, grizzle head tick bird, grand head, neat body, feathered like a Java, runs very close; 3, Hawkes, fine big bird, good shape and head, rare condition; vhc, Harding; hc, Clarke, both good, on a little smaller scale. BUFF (5): sp, 1, Tasker, tick head, slashing shaped bird, lovely silky feather, neat head and wings, just long enough in tail; 2, 3, Barker and Abbott, pair of the right stamp, very hard to separate from first; vhc, Lover, capital head, fine bird, bit long, was splitting breast feather just a little, for stock purposes; hc, Hawkes. YORKS. YELL. (4): 1, sp, W. R. Knowles, very grand Cinn. marked yell., finely drawn, full of nerve, A1 quality and finish all out; 2, 3, Binns, pair of clears, second, best all-round type, quality, position, and carriage; vhc, Horne, shorter and very racy, good feather. BUFF (4): 1, sp, vhc, Binns, splendid clear bird, straight as a rush, well up on legs, fine wing and tail carriage, neat head, lovely feather, vhc, smaller stamp, nice quality and good carriage; 2, W. R. Knowles, mark head, grand length and style, well-bred, neat in all points and fine condition; 3, Horne, finely drawn out, a little weaker on breast and sides than others, good feather and condition. A. O. V. CAN. (4): 1, Whittle, A1 crest, fine centre and crest, good droop, well filled in, good shape, plenty of feather; 2, Fairclough, fine Cinn., grand Nor. shape, nice level colour, good feather and condition; 3, Hampson and Billington, heavy var., buff Scotch Fancy, nice size, fair thickness through heart, full of nerve; vhc, Hawkes, wing mark, dark crest, a yell., nice crest, on the small side. BRITISH GOLD. or BULL. (11). Very strong class for quality: 1, sp, Hunt, grand Goldfinch, rare, big, square, clean cut face, rich, bright colour, good flow of rich tan on body, well defined moons and good broad wing bars, medium sized bird, in grand condition; 2, Berry, very fine rich-coloured Bullie, big, broad, dense cape, breast and back, colour bright and clear, wings and tail dark points; 3, Hampson and Billington, Goldfinch, very big, square blaze, deep colour and well cut off, plenty body brown, nice bars and moons; vhc, Penwick, good Goldie all through; hc, Lover; c, Jones. LINNET (8): 1, sp, Hampson and Billington, grandly marked bird, rare thick body shape, grand colour and condition, steady; 2, vhc, Parr, pair of gems, grand heads, very good markings, glossy feather, steady as a rock; 3, hc, Hunt, another pair of beauties, nearly, if not quite, as good in all points as former pair; c, Berry. SELL., 20s. (4): 1, Tasker; 2, Hawkes; 3, Lover; vhc, Barker and Abbott. 12s. 6d. (10): 1, Horne; 2, 3, vhc, Barker and Abbott, second soon claimed; hc, Anders; c, Hampson and Billington. GIFT (3): 1, Knowles, Crest; 2, Grice, Yorks; 3, Vose, Nor.

STIRCHLEY.

Second Open Show, held in Telly Park Baptist School, January 9th. Two classes only were provided for cage birds, and both were well filled. The Committee would be wise in making more classes another year, as this section was quite the attraction of the Show, and would well bear extension. We were pleased to see the Show so well patronised; it was simply packed, and we had hard work to see the exhibits, which were well looked after by a capable lot of stewards. Mr. Proud judged, and his awards were as follows:—

NOR. A.V.: 1, spl, Hughes, good clear yell., nice and chubby, clean cut, grand colour and condition; 2, Wood, fair, good buff, in nice condition, closely pressed by 3, Symonds and Sen, grand even-mark., good head, well filled in neck, fine wings and tail; res., Hughes; vhc, Derry; hc, spl, Jones. YORKS. A.V.: 1, Hughes, good yell., capital length and position, splendid pipe tail, wins; 2, 3, Key, buff, second frilled a bit on breast, good quality and condition, third very decent yell., nice style, well up on leg, good colour, might have changed places with second; res., spl, Symond and Son, very finely drawn tick buff, nice wings and tail, well shown; vhc, Smith; hc, Smith, Pugh.

NETHERTON.

The Dudley and Dis. F. S. held a show at Netherton, on Jan. 9th and 10th. It was confined to a 12-mile radius, and was a great success. Fanciers from the surrounding district attended in great numbers. Cage birds had 3 classes alotted to them, one being cancelled; the other two were well filled. The class for British birds was the chief attraction, some noted winners putting in an appearance. Mr. W. V. Witton judged.

CAN. A. V. (15): 1, sp, vhc, Fallows, nice yell. Yorks., fair length, good colour; 2, Jones and Bradley, grand yell. Cinn., lovely colour and quality, good size; 3, No Name, very nice Crest-bred, good frontal, nicely staged; 4, Capewell, head and wings marked Nor., nice shape, good colour, rather long in tail and flights; vhc, Russon (3), Hingley, Busby, Willetts (2).. BRIT. A. V.: 1, sp, 3, vhc, Jones and Bradley, noted trio, Blackcap first, Nightingale third, well-known winners, need no further comments; 2, r, vhc (2), Hingley, leader Hawfinch, in grand condition, nice colour, good bib, deserves its place, r, very nice conditioned Nuthatch, all nicely shown, in good condition; 4, Capewell, Bullfinch, the Halesowen winner, outclassed here, good cap, wing bars, and breast colour, rare size; vhc, Fallows, Hingley; hc, Garret. Silver medal most points was won by Messrs. Jones and Bradley.

In your report of Coventry Show you gave the winner of Class 76 (hens) as Tebbs, which should have read Ibbs, as I was credited with that honour.—T. Ibbs (Stoke-on-Trent).

HERTFORD.

Hertford and Dis. F.A. scored another big success in its Third Annual fixture, which was held in the Corn Exchange, January 9th and 10th. Although a young Society, it has by its splendid organisation secured the patronage of most of the elite of the neighbourhood. Sir G. F. Faudel-Phillips, Bart., G.C.I.E., is patron, and the list of Vice-Presidents is imposing. The President is Mr. "Pat" Harrower, the famous football referee, and joint Secretary of the Crystal Palace Poultry and Pigeon Show, and a better man for the post it would be impossible to find. A born organiser, the manner in which he leads his committee and gets the last ounce out of each member is splendid. He is ably supported by Mr. E. J. Hott (Treas.), whilst the Hon. Sec., Mr. Fred Looker, by his urbanity and energy, keeps everything going smoothly. Amongst the Committee are such well-known fanciers as Messrs. W. Rose, H. Harry, P. H. Hott, W. H. Scoby, W. Cox, H. W. Robinson, A. B. Mitchell, J. P. Farley, A. Scales, W. J. Alexander, and C. G. Smith. The Show was opened by the Hon. Mrs. Abel Henry Smith, the wife of the member for the division, who was supported by the Mayor, Mr. W. Grayeson, and other prominent local residents. Mrs. Smith made a most telling and appropriate speech, in which she expressed her great pleasure at being able to help on the good work of the Association. The classification was not large, but the entry and the quality was much in advance of the Association's two previous shows. Mr. Brookes staged a grand pair of Norwich, which easily headed the class. Mr. Mabey repeated his last year's performance of taking first, second, and third in Yorkshires, with a most typical trio. Mr. Welch's Goldfinch is one of the best we have seen this season; Mr. Meadows headed the Foreigners with a Varied Lorikeet of most charming colour and plumage. The Members' classes were much stronger than in previous years, and several of the winners could have won in the Open. Mr. C. A. House judged.

NOR. (9): 1, 2, spl, Hyde's spl, Brookes, wing and eye marked buff, grand shape, nice even colour, well frosted, splendid feather, second very prettily marked four-pointed yell., of rare colour and quality, not so typical; 3, res., vhc, Moles, wing and cap marked buff, grand shaped body, but trifle long in head, as tight as wax, res., vhc, two very neat buffs of capital shape, feather and colour, but needed washing; vhc, Jupe, stout saddle-marked buff, of nice shape and feather; hc, Linsey. YORKS. (10): 1, 2, 3, spl, Mabey, bit slim, well tapered yell., of splendid colour and quality, well up on leg, tick. on wing, second sweet clear buff, feathered like a Java, grand style and colour, third cl. yell., capital colour and shape, the longest of the three, but not so tight; res., Ramsdeu's spl, vhc, Linsey, neck tick. buff of rare colour and style, nice feather, and a neck tick. yell., full of nerve; hc, Hudspeth (2); c, Jupe. BRIT. (8): 1, spl, Welch, very brilliantly coloured Goldfinch, deep, well cut blaze, grand body and feather, very steady; 2, res., vhc, Hill, very smart Grey Wagtail in capital form, a prettily marked, shapely Siskin, and a rich coloured Goldie, not so large in shape as winner; 3, Blackwell, grand breasted Bullfinch, glossy, well cut cap, nice back; vhc, Hills, another capital Bullfinch, close up; hc, Rayment. MULES (11): 1, spl, Lees, light Linnet-Can., splendid shape and feather, very lightly marked; 2, vhc, hc, c, Bruce, large, shapely, var. buff Goldfinch-Can., capital colour and feather; 3, Hill, well marked Siskin-Can., sound, natural colour, rare shape and quality; res., Dickens, big, var. buff Goldfinch-Can., nicely feathered, needs colour; vhc, Hills, another really nice var. Goldfinch-Can., grand feather. FOR. (9): 1, spl, Meadows, charming Varied Lorikeet, splendid colour, grand head, beautiful feather and condition; 2, res., Smith, yell. fronted Amazon, of capital colour, feather and marking, and a nicely feathered pair of Yell. Budgerigars, in colour; 3, vhc, Cooper, well-marked Red-rumped Parrakeet, rich colour; vhc, Miss Gladys Hunt; hc, Miss Hopwood. MEMBS.': CREST, ETC. (9): 1, 2, 3, res., vhc, hc, c, spl, spl second best members' C.B., Smith, very nice team, a grand young Crest leading. NOR. (10): 1, spl, cup best members' bird, Harrower, very even, rich coloured yell., of grand shape; 2, res., vhc, he, c, Miss Croft, bonnie buff, nice type, feather, and colour; 3, vhc, Smith, shapely, good feathered buff, beaten in wing carriage. YORKS. (13): 1, 2, 3, res., vhc, hc, spl, Hudspeth, very nice team, long, slim, and well tapered, plenty of style, need tightening up a bit; vhc, hc, Dickins; vhc, Macpherson; c, Blaekwell. A.O.V. (9): 1, 3, spl, Harrower, two shapely yell. Cinns., leader best in colour, latter best shape; 2, Welch, shapely yell. cinn., of good quality,

BAILDON C.B.F.A.

The third monthly show was held at the Roebuck Hotel, January 5th, when upwards of 70 birds were staged. Mr. Joseph Exley judged, his awards giving general satisfaction.

CLEAR YELL. YORKS: 1, special, 3, Fawcett; 2, 4, Greaves; vhc, Tidgwell. CLEAR BUFF YORKS.: 1, special, Fawcett; 2, 3, Rhodes; 4, Halliday; vhc, Tidgwell; hc, Wilson; c, Tyler. TICKED YELLOW: 1, special, 2, Fawcett; 3, 4, Greaves; vhc, Halliday; hc, c, Tyler. TICKED BUFF: 1, special, Rhodes; 2, Jennings; 3, Halliday; 4, Fawcett; vhc, Tidgwell; hc, Wilson. YELLOW HEN: 1, special, 3, Rhodes; 2, Tidgwell; 4, Fawcett; vhc, Halliday; hc, Greaves; c, Tidgwell. BUFF HEN: 1, special, Greaves; 2, Fawcett; 3, Halliday; 4, Wilson; vhc, Jennings; hc, Tyler. ANY VARIETY CANARY OR MULE: 1, special, vhc, Tyler, green Yorkshire and Mule; 2, 4, Fawcett, Norwich; 3, Tyler, Norwich; hc, Halliday. ANY VARIETY BRITISH: 1, special, Fawcett; 2 Rhodes; 3, 4, vhc, Tyler. SELLING 10s. 6d.: 1, special, hc, Fawcett; 2, c, Halliday; 3, vhc, Wilson; 4, Tidgwell. SELLING CLASS, HEN, 10s. 6d.: 1, special, 3, Fawcett; 2 c, Halliday; 4, Hudson and Dawson; vhc, Tidgwell; hc, Greaves.—Fred Tyler, hon. sec.

NOTTINGHAM P.O.S.

Annual Show, Boxing Day. The competition was very keen, as there were several prominent exhibitors well in the running for the year's aggregate points prizes, the result of a series of shows held throughout the year. Mr. Joe Goode was the winner of the premier points prize, beating Mr. J. Birch by four points, being followed by Messrs. Hill, Wood, Davis and Onion. Mr. Goode was the recipient of a fine pair of bronzes; Mr. Birch blankets; Mr. Hill set of carvers in case, and Mr. Wood cruet. Mr. J. H. Scothern judged, and the arrangements were well carried out by Mr. G. Clay, the energetic Secretary, who was well supported by an enthusiastic Committee.

CL. YELL.: 1, J. Birch; 2, 3, Hill; 4, Birch; vhc, Paling. CLEAR BUFF: 1, 2, Hill; 3, 4, Birch. TKD., ETC. YELL.: 1, 2, Birch; 3, Paling. BUFF: 1, Hill; 2, 3, Birch; 4, Paling; vhc, Hill; hc, Taylor. UNFLI.: 1, Birch; 2, 3, Hill; 4, Birch. HENS: 1, 2, Birch; 3, 4, Hill; vhc, Paling. PAIRS: 1, 3, Hill; 2, 4, Birch; vhc, Paling. YELL. DK. CREST: 1, Onion; 2, 3, Maybe; 4, J. Goode. BUFF, DO. CK.: 1, Wood; 2, Onion; 3, Bowers; 4, Clay. LIGHT: 1, Bowers; 2, Onion; 3, Davis; 4, Onion. CREST. HENS: 1, Onion; 2, Greensmith. YELL. C.B. CK.: 1, Chas. Maybe; 2, Wood; 3, Onion; 4, Goode. BUFF: 1, 4, Davis; 2, Bowers; 3, vhc, he, Onion. YELL. HENS: 1, 2, J. Goode; 3, R. Woolley. BUFF: 1, 3, Goode; 2, Wood; 4, Onion; vhc, Taylor; hc, Bowers. STOCK PAIRS: 1, Goode; 2, Bowers. CRESTS, UNFLI.: 1, Onion; 2, 3, Wood; 4, R. Woolley. C.B., DO.: 1, 2, Goode; 3, A. Onion; 4, Greensmith; vhc, Bowers; hc, Davis. SELL., 20s.: 1, Davis; 2, Wood; 3, Cooke; 4, Whyles. 15s.; 1, Maybe; 2, Goode; 3, Onion; 4, Davis; vhc, Cooke; hc, Greensmith. 10s.: 1, Birch; 2, Hill; 3, Birch; 4, Paling; vhc, Hill; hc, Goode. BRIT.: 1, 2, 3, 4, vhc, J. Goode; hc, Hill.

ERDINGTON.

The Fourth Annual Show of the above was held in the Queen's Head Assembly Rooms, Jan. 5th, and was a huge success, considering that it was confined to a five mile radius. Entries in cage bird section come up well. The Norwich and Yorkshires made a nice display, and quality on the whole was very good. The birds were staged in a room by themselves, and were well looked after by Mr. Wells, who had everything well in hand, and cards quickly up. Mr. G. E. Russell judged, and gave every satisfaction. The special for most points was won by Mr. Wells.

YELL. NOR. (5): 1, Broadhurst, nice typical, lovely quality, good shape, nice wings and tail, wins well; 2, Shaw, nice chubby body, good head, rather long in tail for our liking; 3, De Mailett, nice quality feather, good colour and condition; res., Shireley, fair var., close feather of good quality, not quite as bold in head as those above; vhc, Hughes. BUFF (6): 1, spl, Shaw, grand clear of good shape, nice quality feather, best of wing carriage, wins well; 2, Wells, another nice clear, deep chest, short wings and tail, deserves its place; 3, Broadhurst, not quite so typical as those above, rather long in tail; res., De Mailett; vhc, Hughes; hc, Storer. NOR. HEN A.V. (9): 1, Broadhurst, a gem, medium size, splendid shape, neat head, rich colour, feather of a nice silky texture; 2, Shaw, nice var., good head and chest, nice quality feather, well shown; 3, vhc, De Mailett, third nice and chubby, fair size, fails colour to winners; res., Shireley; hc, Wells; c, Hughes, nice class. CREST OR C.B. (9): 1, spl, vhc, Smith, first var., dark crest, of good size, good droop of nice leafy feather, well radiated, taking exhibit; 2, Broadhurst, var. C.B., plenty of head feather, comes well over beak, nice entrance; 3, res., hc, c, Harvey, third dark, green crest, plenty of feather, split at side, which no doubt put it down, res. var. dark crest, plenty of feather, but split left side, hc nice clear buff C.B., good quality head, feather well lashed, nicely shown. YORKS. YELL. (9): 1, spl, Richardson, good size, nice style, well on leg, neat, narrow shoulders, wins; 2, he, Burke, equally as good in shape, as straight as a dart, hardly so long in leg as winner, but a very taking cinn. marked bird, well shown, close up; 3, 'Members' spl, Wells, another nice clear, good length, well drawn, hardly so tight in feather; res., Mole, very nice broken green, neat, round head, good tail; c, Shaw. BUFF (11): 1, 2, Richardson, first nice var., long and slim, good style, well on leg, neat head and tail, second nice cinn. marked, good wing and tail, nice colour, both well shown; 3, Burke, nice clear, good shape and style, bit slack at thighs, which put it down one; res., Shaw, good quality, nice length, inclined to drop tail; vhc, hc, Wells; c, Mole. HEN (8): 1, spl, Richardson, grand hen, lovely shape, neat head, good tail, splendid colour, easy win; 2, spl, vhc, c, Wells, nicely drawn, good carriage, fair length, fair wings and tail, deserved its place; 3, Mole, clear buff, very long and shapely, grand wings and tail, beaten colour; res., Allen, nice shape, good colour, hc, Key. MULE A.V. (5): All prizes to Wells, first Linnet and Canary Mule, splendid size, nice shape, good colour, second yell. Siskin-Canary, third buff, Siskin-Can., two very nice Mules, little to part them; res., vhc, two nice Goldie-Canary Mules, dark ones, good quality and flourish, nicely shown. GOLDFINCH: 1, spl, 3, res., Wells, grand trio, first has the pull in blaze, nice body colour, good moons, third nice Finch, loses in face to first, both well shown; 2, Holder, good moon and bars, not up in blaze; vhc, Hughes, larger than some above, but not the face of winner, rich tanned chest; hc, Shaw. SELL., 10s.: 1, Shaw; 2, Holder; 3, res., Wells; vhc, Emery. GIFT: 1, spl, 3, Wells; 2, res., Hughes.

CLUB REPORTS.

CITY OF DUNDEE & DIS. NOR., M. & B.B.A.

Annual General Meeting, Doig's Rooms, Jan. 9th. Balance sheet past year read and adopted. The date of Annual Show was fixed for the last Saturday of November, 1907.—A. MILLER, Sec.

NORTH LONDON C.B.A.

Annual Meeting, January 9th, at Headquarters, Library Hall, Stoke Newington. The Pres., Mr. T. R. Trower occupied the chair, and a fair number of members were present. The Secretary presented the balance sheet for 1906 showing a satisfactory balance of £11 10s. 6d., which was well received. Several important alterations and additions to Rules were made. Result of election of officers for 1907 was as follows:—Chairman, Mr. J. W. Rennie; Vice, Mr. H. K. Rankin; Treas., Mr. H. Sweetman; Hon. Assist. Sec., Mr. H. Pike; Committee, Messrs. W. Morris, F. Williamson, S. A. Griffin, T. Cawthorne, T. W. Morgan, A. J. Marley, J. Hale, G. Williams. Challenge cups and prizes were presented by Mr. Trower, who complimented the Association on such a successful year's working, and promised a Challenge Cup for Amateur Section. A hearty vote of thanks to Mr. Trower and all retiring officers concluded the meeting.—R. P. HARPER, Hon. Sec.

HULL C.B.S.

Annual Meeting, Jan. 7th, Oddfellow's Hall. One of the best-attended meetings ever held. Room crowded. The balance sheet read and passed, showing a balance in hand of £7 15s. 3d., with various amounts outstanding to about £3 more. Election of officers for the coming year resulted as follows: D. Hope, Chairman; T. Perkins, Vice-Chairman; G. W. Oliver, Treasurer. Messrs. F. F. Potter and F. H. Stamford, Joint Secretaries. Committee: Messrs. Brumby, Banks, Pepper, Barwick, Walker, Harland, Buckley, and Stones. These were elected after a spirited competition. Auditors elected were Messrs. Longhorn and Jopling. A vote of thanks was passed to the retiring officers for their past services, and as the hour of closing had gone by it was resolved to adjourn the meeting until February 4th to take into consideration the alteration of rules and other matters, when we hope to have a good meeting.—GEO. W. OLIVER.

CHELTENHAM C.B.S.

Annual Meeting held on January 9th, Mr. T. J. King in the chair. The Secretary read the balance sheet and report, which showed that although there was a deficit in the Open Show, the Society is in a flourishing condition. There was an increased membership. On the proposition of Mr. Child, the same officers were elected, viz., Mr. T. J. King, Pres.; Mr. G. Grant, Vice; and Mr. A. S. Treasure, Hon. Sec. and Treas. The post of Assist. Hon. Sec. was left open, Mr. T. N. King junr., having resigned owing to his removal to Ipswich. A hearty vote of thanks to Mr. King was passed, the Hon. Sec. especially regretting his loss. The following resolution, proposed by Mr. T. J. King, was unanimously passed:—"That this meeting wishes to place on record its appreciation and thanks to the Hon. Sec. for the very efficient manner in which he has carried out his duties." The Secretary announced an attractive programme for the ensuing year, including washing competitions, judging ditto, and several lectures and discussions. The annual Pair Show takes place on January 26th.—A. S. TREASURE, Hon. Sec.

SHEFFIELD & DIS. C.B.S.

An important meeting was held on Jan. 3rd, Wentworth Cafe, Pinstone Street. First business on the agenda was to fill the vacancy of Hon, Vice-President, caused by the death of the late Norman B. Roberts, Esq. The consent of P. Walsh, Esq., of Sheffield, to occupy that position was received by a round of applause. Next was the alteration of a few rules, the most important being Rule 13, which reads "a new member shall be allowed to show in novice classes, and shall be considered a novice unless he has won two firsts in any members' class, or one first in open competition." This rule has caused a lot of complaint of late years from young novice members who have won with British and Foreign birds in small classes, their novice career having been ended in Canary classes, and several complained how the society had lost members through having to compete in champion classes. The matter was discussed at length, with the result that the rule be altered to read "A member shall be allowed to show in novice classes, and shall be considered a novice until he has won with Canaries or Mules two first in members' classes, or one first in open competition, British and Foreign wins not to count." Any member that this rule has affected in the past should apply to the Secretaries in writing before May next to be reinstated.

Next came the programme for 1907, which promises to be of interest. Several table shows are to be held, the first of which is down for the next meeting to be held February 14th, 1907, and is for matched pairs of Norwich Plainheads and Crests for breeding. Novice and champion classes will be provided.

Last, but not least, was the remuneration of Mr. W. Oxley for his valuable services as Honorary Treasurer to the society for so many years. The committee's decision found favour from all members present that £1 be given out of the society's funds followed by subscriptions from all the members, and that a box be placed in the room the following two meetings for members to give what they please. The presentation to be in the shape of something useful. The enrolment of several new members brought an interesting meeting to a close.—BISHOP and PILLEY, Secretaries.

NORWICH PLAINHEAD CLUB.

The following are winners of prizes given by the club for 1906. Manchester Club Show: (champions, best birds) Messrs. Bancroft (gold medal), Drakeley, Hayhurst, Cook, Wootton (2). Amateurs: Wrigley (gold medal), Hindley (2), Massey, Mallinson, Huggins, A. Points prizes Gt. Harwood: Messrs. Booth, Barraclough, and Cook all equal; Nottingham: Vardy, Booth, Hayhurst; Preston: Croucher, Dent, Booth; Wellingboro: Bishop, Nutt, Coulson, and Towers tie; Hartlepool: Trengove, Eckersley, and Tweddle tie; Altrincham: Shaw and Hindley tie, Edwards; Challenge Cup: Cooke, 70 points, Trengove, 45, J. and J. Hopkins, 33. Amateur points: Hindley 40 points, Wrigley, 30, Sutton, 9. All prize-money paid. Will those members whom I have written to please forward their subscriptions at once?—J. RAYNES, Hon. Sec.

BORDER COUNTIES N. & C. C.C.

The result of the silver bowl competition in connection with above club, held at five nominated shows, viz., Morpeth, Sunderland, Darlington, Kelso, and Gateshead, is as follows:—Brown, winner, 57 points, followed by Grey 39, Rowell 38, Cameron 32, Dixon 22, Wilson 11, Stanger and Herdman 8, Hay 4, Taylor and Sanderson 4. Bowl has been sent on to Anthony Brown, Gateshead. The following are the winners of the cash specials at all shows under our patronage, for most points totalled over all shows:—1, Rowell, 139 points; 2, Brown, 86; 3, Stanger and Herdman, 84. The above are the winners of the cash specials. The runners-up were:—Cameron 82, Grey 72, Wilson 31, Dixon 22, Taylor and Sanderson 21, Hay 4, Winter 4. Anyone overlooked in the counting of points to write Sec. at once, as cash specials will be sent out within week from date of issue.—ANTHONY HAY, Sec.

BRADFORD (EAST) O.S.

Annual Meeting, held at Park Chapel Schools, January 8th. The balance sheet was adopted, showing a nice sum of money left in hand. The Society is to be congratulated in having Mr. E. Suddards as President, who is supported in that office by the following gentlemen: Vice-Presidents, Messrs. G. R. Rushworth and W. Cruise; Hon. Sec., Mr. H. Hill; Assistant Sec., Mr. G. White; Treas., Mr. J. Farrar; Auditors, Mr. W. Laycock and Mr. A. Wilkinson. The outlook for the coming year is one of which the members ought to feel proud, for we have obtained, through the kind permission of the Trustees of Park Chapel Schools, the use of a splendid little room in which to hold our meetings, also a larger room in which we can hold our Members' Shows. This is, indeed, a rare chance and members are determined that they will leave no stone unturned in making this Society one of the strongest in the district. There is one feature about the formation of this Society which deserves special mention—many of the members have never been in any way connected with a Society before, and are practically unknown in the Fancy; this speaks well for the progress that the Yorkshire Canary is making in this district. The subscriptions were fixed at 3s. per annum, and if any fancier is desirous of joining us we shall be only too pleased to give him a hearty welcome. The monthly meetings will be held the first Tuesday in each month. I should like to thank the Editor of CAGE BIRDS, on behalf of our Society, for the part this important journal has played in making it known to the Fancy at large, also for the kindness shown us in announcing our meetings. It seems to be the only bird-paper read by our members.—Mr. H. HILL, 31, St. Stephens Road, West Bowling, Bradford.

HAYLE F.A.
Annual Supper.

Hayle F.A. held its annual supper at the White Hart Hotel on January 10th, a large number sitting down to an excellent spread, provided by Host Trevena. The Chairman of the Association, Mr. J. Roskrow, presided, the vice-chair being occupied by the Secretary. The Chairman gave the toast of the King, which was replied to with musical honours. Mr. Trott proposed the health of the President (Col. F. H. Harvey), and spoke of the great interest the Colonel had always shown in the Society, and regretted that owing to a rule of the Association to elect a new President each year, Colonel Harvey was not eligible for re-election. The Hayle F.A. was proposed by the Rev. Father Mullins, who complimented the Society on the high position they had attained amongst West Country shows, and he attributed their success to the fact that the Society was very fortunate in possessing two such capable and up-to-date officers as their Chairman, Mr. Roskrow, and the Cage Bird Secretary, Mr. Cock. He had much pleasure in coupling the names of these two gentlemen with the toast. Mr. Cock thanked Father Mullins for the kind words he had said about him, but his modesty, he said, would not allow him to take all the credit. When he said that within an hour of closing their show the whole of the 347 cage birds were packed, and all the staging removed, it would be seen that credit was due to more than one individual. In fact, the Hayle committee was one which any Secretary might be proud. A good musical programme was arranged by Mr. Hancock. Mr. Thompson presided at the piano, Messrs. W. Harris and Daniel gave violin selections, and songs were contributed by Messrs. Rowe, Willougby, Pearce, Sangwin, Wedgewood, Trott, and others. Mr. Symons, in a very neat speech, proposed the visitors. Mr. T. Rowe replied, and said it always gave him very great pleasure to come amongst the Hayle fanciers. He had exhibited at each of their shows, and he must say the way in which the Hayle Committee looked after exhibits deserved the support of all fanciers.

READING AND DIS. C.B.S.

Meeting held Palmer's Hall, January 2nd. Good number present. Vote of sympathy accorded a member (Mr. J. Read), who recently lost his wife. Mr. T. Nason was elected a member. The two next monthly meetings will be advertised in two local papers. At next meeting, January 6th, 1907, a Washing Competition will be held.—G. A. CHARLES, Sec., 94, Grange Avenue, Reading.

ECCLES & DIS. C.B.S.

General Meeting, Jan. 9th, Grapes Hotel, Peel Green, Mr. J. H. Walker, Chairman. The Secretary presented the balance sheet, showing a balance in hand of £3 13s. 1d., which, taking into consideration the short time this society has been formed, is a very satisfactory report. Officers were nominated, and will be elected next meeting 16th inst. The discussion as to joining the Cage Bird Union will also take place. It was decided to hold our first open show on Nov. 30th, 1907. Vote of thanks to officers for the past year closed the meeting. Anyone wishing to join, kindly send their names and addresses to A. WHEATLEY, Hon. Sec.

SEAHAM HARBOUR & DIS. B.B.A.

First Annual General Meeting, Jan. 12th. Balance sheet for year just ended showed our income from all sources to be £12 11s. 6d., our expenditure was £8 9s. 10½d., leaving a balance in hand, £4 1s. 7½d. The accounts were received with enthusiasm and accepted. The election of officers resulted in everybody being elected as before en bloc. Chairman, J. Hudson; Vice, T. Toy; Treas., W. French. Committee: W. Deacon, J. Pickering, T. Wilkinson, R. Harrison, M. Elliot, J. Hancock. Banking Stewards: W. French, R. Harrison. Sec., J. M. Nicholson. One new member admitted. Several minor questions settled, which brought an excellent meeting to a close.—J. M. NICHOLSON, Sec.

OLDHAM AND DIS. C.B.S.

Annual General Meeting at Headquarters, Jan. 7th. There was a good attendance of members. After the Hen Show business had been disposed of, the Chairman (Mr. Hampshire) invited the Secretary to present the year's accounts, which showed a gain of £8 2s. 3½d. The election of officers followed, and resulted in Mr. Sharples being elected Pres., Messrs. Young, Steeple, and Nelson Vice-Pres., Mr. Hardy Treas., Mr. Ackroyd Sec., and Messrs. Eckersley and Garside auditors. The committee is composed of Messrs. Steeple, Lowe, Harrison, Garside, and Cocker. It was decided to arrange lectures on the Norwich and Yorkshire varieties and one on Mule breeding. Three new members were nominated—Messrs. Hatchard, Heywood, and Pickering.

LANCASHIRE C.A.
Secretary's Annual Report.

Mr. Chairman and Gentlemen,—No doubt you will be aware that this association was formed last March, the first meeting taking place at the Coffee Rooms, near Rochdale Station, when it was unanimously decided by a good number of Lancashire fanciers that a society like this was needed very much, for the principal object of bringing the Lancashire Canary more to the front, and I am pleased to see that taking the season through there has been a good number of birds on the show benches; take, for instance, the Rochdale Town Hall show, this being the first show we gave our patronage to; we had about 80 Lancashires, exhibited in 9 classes, this averaged almost 9 per class. The next show we gave our support was Manchester. This society, I am sorry to say, did not get as good an entry as I expected. I don't know whether it was the 2s. entry fee or what; but there is one thing I would like to say, and that is, in my opinion I considered the Lancashires very badly staged; the table being very unsuitable; they should be staged on the gallery where the British were. However, it would be as well if this was mentioned to the Secretary next time. In the novice classes at this show there were only 14 entries, and I am sure we ought to thank Messrs. Steeple and Hardy for guaranteeing individually these two classes. The next show was the Rochdale Good Intent, where we guaranteed the two novice classes, and nobly did novices respond. We had an entry of 33 exhibits in the two classes; in the six classes there we had 78 birds staged, an average of 13 per class; this, I consider, up to the mark. The next and last show of the year was Middleton. This fixture did not come up to expectation, but perhaps they will do better the next time. I hope so. That, gentlemen, concludes the shows we patronised, and the losses at them are as follows:—Rochdale Town Hall was 11s. 6d.; Manchester Town Hall was 11s.; Rochdale Good Intent nothing; Middleton was 9s., making a total of £1 11s. 6d.

Of course you will be aware that we have the Palace Show yet, which takes place next month, and I trust you will all do your utmost to let the Southern fanciers see that there are plenty of Lancashires up this way. Give them a good entry. Mr. Green has written me, stating that he will see that all exhibits sent will be specially cared for by himself; he also enclosed a copy of a letter received from a friend of his in Canada, in which he says that he has given a gold medal for most points in Lancashire classes, the winner must be a member of the Lancashire Canary Association, and Mr. Lambert Brown, the Secretary of Palace, has wrote asking for me to send a list of specials if we have any; he is keeping the schedule open until Monday for this purpose. I will now read you the balance sheet:—Receipts, £5 6s.; Expenditure, £4 3s. 10½d.; balance in hand, £1 2s. 1½d. This, gentlemen, concludes my report, and I thank you, one and all, for your attention, and wish you all a successful breeding season.—Yours, Jas. Law. Audited and found correct (signed) James Eckersley, R. R. Gaskill (Auditors).

BRISTOL C.B.S.

A very successful Meeting was held at headquarters on Jan. 9th, Mr. W. G. Bull in the chair. Following were accepted as members: Mr. A. Newman, Mr. Quarman, Mr. G. Cox, and Mr. A. N. Hill. Messrs. Davies and Fowler were elected auditors. Mr. A. J. Trubody proposed, and Mr. Manley seconded, that no dealer of cage birds be accepted as member of this society. Definition of a dealer a person that got his or her living out of cage birds. Carried unanimously.—C. E. BROWN, Hon. Sec.

NORTH MANCHESTER C.B.S.

At the General Meeting held Jan. 8th, the following members were elected officers for the ensuing year: President, Mr. Balshaw; Treasurer, Mr. Aspinall; Assistant Sec., Mr. Slater. Committee: Messrs. Wilkinson, Hall, Norris, Aspinall, Harvey, Vint, Clarke, Thomason, D. Bardsley, and J. Connor. Hon. Sec., John Davey. We have decided to abolish the radius clause, and are now open to receive members from any district. The next meeting is Jan. 22nd, at 8 o'clock, at headquarters.—JOHN DAVEY, Hon. Sec.

PORTOBELLO C.B.S.

A Meeting of the above was held on Jan. 7th. Final arrangements were made for the Washing Exhibition on first Monday in February, and a paper on "The breeding and preparing for exhibition of Scotch Fancy Canaries" was promised by Mr. John Bell. This will be read at the meeting on first Monday in March. The society placed on record its sincere regret at the death of Dr. Andrew Balfour, its first patron and warmest supporter. After the business an interesting discussion on the Scottish National Show was taken part in by all the members present.—W. LECKIE, J. LEACH, Hon. Secs.

CHESTER AND DIS. C.B.S.

Annual Meeting, Nag's Head Cocoa House, Jan. 7th and 8th. Following officers elected: T. S. Moore, Esq., President; Messrs. Lloyd and Slovin, Vice-Presidents; Messrs. Bracegirdle, Crane, T. Jones, Swindley, T. Wright, and R. Williams, committee; Messrs. Woodcock and Red were re-elected Treasurer and Secretary. Hearty vote of thanks was accorded the Treasurer and Secretary for their services during the past year. The Treasurer then distributed prizes won at Old Bird Show. The advisability of extending the society's radius was then considered, and after considerable discussion it was unanimously resolved that the radius of the society remain as at present fixed, viz., 10 miles from Chester Cross. Decided that we hold a Pair Show next meeting, Feb. 5th, at Mr. Whitlow's, The Boot Inn, birds to be staged not later than 7 o'clock. Entry fee 3d. per cage, to be divided into three prizes.—A. J. RED, Sec.

LOUGHBOROUGH & DIS. C.B.A.

A very successful meeting in connection with the above was held on Jan. 8th, 28 names being enrolled for membership, which we think is highly satisfactory for a first meeting. Mr. Glover was elected Chairman for the year, and much enthusiasm was shown by those present, almost everyone taking part in the business, which speaks well for the future success of the society. It was decided that meetings be held every fortnight for the first six months, on Wednesday evenings, at 7.30. A room in the Charnwood Coffee House, Mill Street, has been engaged for the purpose. The next meeting will be held on Jan. 23rd, at 7.30 p.m. The subscriptions were fixed at 4s. per year, to be paid quarterly in advance, first payment to be made next meeting. We should be pleased to hear from any fancier who would be kind enough to give us a helping hand by way of a lecture on any subject connected with the fancy that would be of interest to the novice.—E. THORP, Hon. Sec., 34, Oxford Street, Loughborough.

BURY & DIS. C.B.S.

The Annual Meeting was held at the Textile Hall, Jan. 8th. A large number present. Chair was occupied by the Rev. R. P. Hudson, President. Balance sheet, showing the society to be flourishing, was unanimously adopted. Following were elected officers: President, Rev. R. P. Hudson; Chairman, Mr. J. R. Greenwood; Vice Chairman, Mr. J. E. Wolstenholme; Secretary and Treasurer, Mr. W. P. Turton; Assistant Secretary, Mr. F. E. Holden. Committee: Messrs. Fallows, Clark, Ramsbottom, Hall, Farraday, Hamer, E. Lord, Gibson, G. Austin, Brough, Jameson, Lomax, Wheateroft, Gorton, and Boothman; Auditor, Mr. H. Fortman. Decided to hold first feather show July 13th; annual autumn show Nov. 9th. Question of continuing the drawing competition for boys at the annual show was discussed, and it was decided to arrange some suitable competition, the nature of which was left to a committee. Retiring officers were thanked for services rendered during the past year, and to the Rev. R. P. Hudson for presiding.

DULWICH AND PECKHAM C.B.S.

Annual General Meeting, held Jan. 10th, when the following officials were elected: Patron, A. Bonar Law, Esq., M.P.; President, J. Peacock, Esq.; Vice-Presidents, Messrs. Bussey, R. Brownlie, G. Sands, D. Mabey, Robson, H. E. Tringham, G. Dansie, F. Godwin, T. Boydon, A. E. Crowhurst, and D. Sidgwick; Hon. Treas., Mr. W. Goodwin, the Herne Tavern, Forest Hill Road, S.E.; Trustees, Messrs. G. H. Garlick and J. B. Waterman. Committee: Messrs. G. F. Woolhouse, Chairman, F. J. Day, J. W. Cranfield, E. S. Lee, W. R. Wall, N. A. Meredith, S. D. Kell, A. E. Rogers, A. C. Wetenhall; Auditors, Messrs. F. S. Matthes and W. Morris; Hon. Secretary, W. Hodson, 209, Crystal Palace Road, East Dulwich, S.E. Monthly meetings are held on first Thursday in each month: Committee meetings third Tuesdays. Subscription, 2s. 6d. Entrance fee, 1s. Headquarters, the Herne Tavern, Peckham Rye S.E. Number of members 50. It was decided to hold a members' show at the Herne Tavern on Feb. 7th. All information from the Hon. Secretary, W. HODSON, 209, Crystal Palace Road, East Dulwich, S.E.

Some Desirable Aliens.

By "CATALONE."

Some practical hints on the birds shown in Mr. Goodchild's wonderful plate.

One great reason why the keeping of foreign birds has not made even greater progress here than has actually been the case is that beginners do not know what are the best—and especially the hardiest—kinds, and so are apt to buy indiscriminately, and get discouraged at the outset. The birds in the coloured plate, however, are all eminently suitable for the tyro in aviculture, and if he keeps nothing else but these for the first year or two, he will have no cause for regret. All will winter out of doors, and if the aviary is large enough, can be lodged together, and all have been bred, though not with equal ease by any means.

THE BUDGERIGAR.

(Melopsittacus undulatus.)

The Budgerigar is, taking it all round, the pick of the group, for no bird is so easy to keep as this. It will live happily in a cage, and even sometimes breed therein; in an aviary it will be happier still, and be practically certain to reproduce, especially if several pairs are kept. It requires the minimum of attention, making very little mess, requiring no bath, and being able at a pinch to dispense even with drinking water for weeks together. No special food is wanted for bringing up the young, and a cocoa-nut husk is a sufficient nest. Thus this is pre-eminently the busy man's bird, and may be bred by the dozen in aviaries by any one who can spare a few minutes daily. The food is simple—canary seed, millet and oats, with groundsel, chickweed, and especially flowering grass, as green food. If there is a grassed outdoor flight to the aviary, the labour of applying green food is much reduced, of course. Although it has only been in cultivation for about half a century, and thousands are still imported from Australia—where it is known as the "Shell Parrot"—the Budgerigar has already produced variations, one of which (the yellow form shown in the illustration) is now a fixed breed; absolutely pure yellows, however, though not unknown, are exceedingly rare, as is also the blue variety. The present writer recently saw a male specimen with the head nearly all black. When ready to breed, Budgerigars may be easily sexed by the colour of the cere, or skin surrounding the nostrils; this being bright blue in the cock and pale brown in the hen. Young birds have bluish-white ceres in both sexes, and are less brilliant in colour than adults. If hand-reared, young males will learn to talk, and even old ones have learnt the songs of other birds; while the training of these little parrakeets to "tell fortunes" has made them so familiar in our streets that they are better known to townspeople than are most British birds.

THE JAVA SPARROW.

(Munia oryzivora.)

The Java Sparrow is more than twice as old a favourite as the Budgerigar, and more than twice as cheap; in fact, he is the cheapest of all foreign birds, a fact which may make his flower-like delicacy of colouring less appreciated than it should be. He will live on the same food as the Budgerigar, but must have his drink and his tub, and is all the better for some soft food when feeding young. The ordinary Grey Javas, however, are not very free breeders, nor are they at all easy to sex, at any rate for a beginner, the slightly bolder head and bill of the male being the only distinction. The white domestic variety bred by the Japanese and Chinese in cages is naturally a ready breeder, but is very much more expensive, perfectly pure whites fetching about half-a-guinea a pair. These white birds, however, with their pink bills showing "like rosebuds on a bank of snow" have a beauty of their own that is quite unique, and they are much more easier to sex than the grey ones, the larger size and stouter bill of the males being quite perceptible if several are examined.

Javas will build in cocoa-nut husks or other covered nest-places, like Budgerigars, but they need some nesting material. As with Budgerigars, several pairs can be kept together, and as Javas are themselves pretty hard biters, they will do well along with these little parrakeets, even in a confined space. Thus, by keeping the pale varieties of each kind as well as the normal birds, a very pretty and easily-managed collection can be had by the use of these two species alone. In the case of both, the colour-varieties can be bred true if properly paired to start with; if a normally-coloured Java or Budgerigar pairs with one of the light birds the offsprings are most likely to resemble the naturally-coloured parent.

THE RIBBON-FINCH.

(Amadina fasciata.)

Often known by the somewhat repulsive, though highly appropriate name of "cut-throat," this modestly-coloured little bird is one of the most commonly-seen foreigners. It has the great advantage of being readily sexed—the hen lacking the crimson half-collar—and of being almost the easiest foreign bird to breed in a cage. In such a case, one pair only must be kept, and must have the cage to themselves. The nest-box provided must be a covered one, and soft food be given to the parents while they have young. In the ordinary way, canary and millet will suffice for them. Although much smaller than the Java Sparrow, and not suitable for close association with it, this bird must also not be put with species smaller and weaker than itself (such as Waxbills), unless there is plenty of room, as in a large aviary. This species is an inhabitant of Africa, and is widely spread across that continent.

THE RED-CRESTED CARDINAL.

(Paroaria cucullata.)

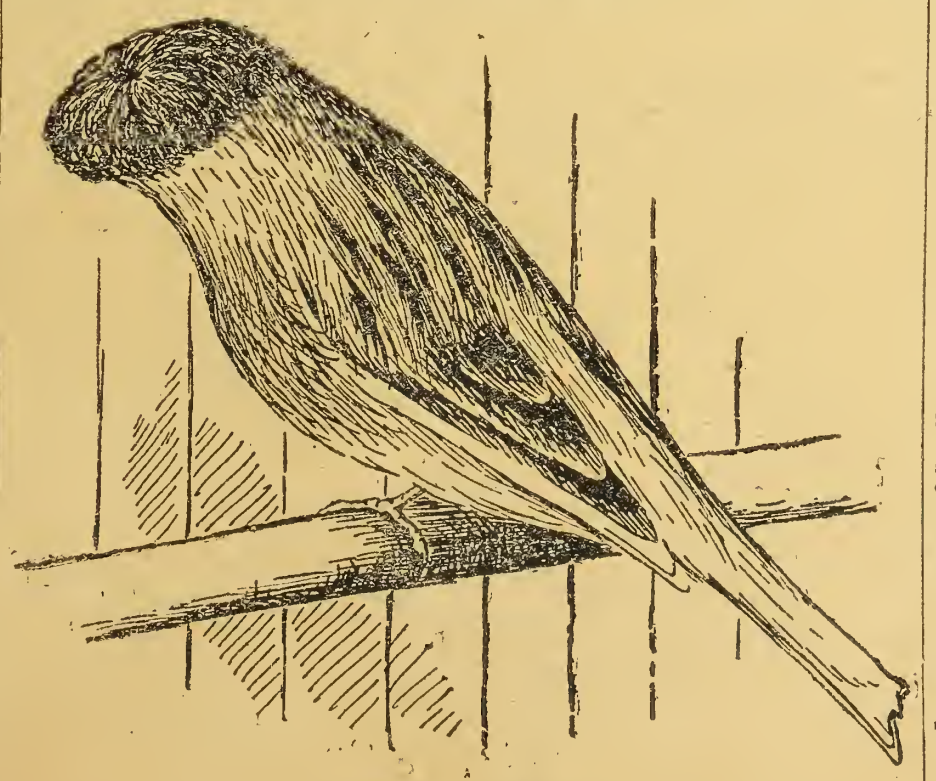
As the only large Finch imported in great numbers, this species has a position of its own in the trade, and it unfailingly attracts attention by its smart and showy appearance. As Mr. Goodchild's beautiful drawing shows, it has the neat and slender appearance of a soft-billed bird rather than the heavy make of a Finch. The sexes are practically alike, but on comparison it is possible to pick out pairs by noticing the stouter and more arched bills of the cocks, and the farther extension down the breast of the red colour of the throat. The specimens often seen with the head rusty orange, instead of scarlet, are young birds in their first feather.

Of the selection on the plate, this species is the best suited for keeping as a single pet bird in a cage. If so treated, the cage should be a large one, and those used for Thrushes will be found suitable. The ordinary bird-seeds should form the staple diet, with such fruit and green food as are found acceptable; but it should always be borne in mind that this bird, like Cardinals generally, is to a great extent insectivorous. A few mealworms or any other available insects should therefore be offered daily, or in default of these some soft food containing dried flies, ants' eggs, or egg, or all three of these ingredients. In an aviary this species will breed, but if this is wished not more than one pair must be put in, and it is not wise to allow these birds where small and weak species are kept, as they sometimes develop carnivorous tastes. As companions to Budgerigars a pair would be ornamental and harmless. The nest is an open one, built in a bush like a Thrush's, and a good supply of animal food must be kept up during breeding. Although hardy, this bird comes from a hot climate, ranging from Brazil to Bolivia. One has been known to live two years at large in a London park.

THE PEKIN ROBIN.

(Liothrix luteus.)

Although this bird is a "soft-bill," and hence gives more trouble than its companions in the picture, needing a continual supply of soft food, it is, on the whole, the most desirable of all, owing to its beauty, its fine song so freely given, and its gentleness and intelligence. It is also a very cheap bird—at any rate at this time of the year, when the main importation of the species takes place, the birds being chiefly brought from China, though also found in the Himalayas. So brightly-coloured a specimen as the bird illustrated would probably be a cock, as the hens are usually a little duller, and in particular show little or no orange on the breast; but this is a very variable species, and the best way to be sure of getting a true pair is to get one or two caged separately, when a male is pretty certain to sing in answer to the calls of his companions. The attachment of these birds to each other is very great, and a bird set free, even outdoors, will usually return to its comrades or mate in captivity, so that anyone who will lodge a pair of these birds in a two-compartment cage with sliding partition may enjoy the spectacle of seeing one hopping about in the open, its companion being retained as a hostage for its return. A cage for Pekin Robins should be large and box-shaped, as they are very nervous at first—though soon becoming tame—and need much exercise, besides being perfectly frantic bathers. With regard to their food they will eat practically anything, insects, seeds and fruit being their natural dish. The great thing is to give them variety. They are, unfortunately, very shy breeders, even in an aviary; but one cannot have everything, and except for this point, it would be almost impossible to name a more perfect pet bird than is the present species.



CRESTED CANARY.

Winner of Second Prize at Plymouth Show. The property of Mr. W. C. French.

"STARS OF THE SEASON."

NOTES BY THE OWNERS.

(See Mr. Norman's Felicitous Creation.)

Mr. W. H. Shackleton (Girlington) writes:—In response to the Editor's invitation to write a few notes on my Yorkshire Canary, a portrait of which appears in this issue. I may say that this bird is a grandson of my old champion ticked buff, and was bred in 1905. He is the winner of numerous prizes, including 1st Shipley, 1st Laisterdyke, 1st Prestow, 1st Bradford West, 2nd Sandy Lane, and 2nd Thornton, beaten on the two latter occasions by his aviary companion when he was not quite fit.

I consider the bird one of the best I ever bred, as he possesses in a marked degree all the essential qualities required to make a really typical Yorkshire.

Perhaps it may be of interest to note that the parents of the above bird were both 1st prize winners, as also were his grand parents, and great-grand parents. By the foregoing it will be at once apparent that I have a predeliction for inbreeding; that being so, I may say that in my humble opinion it is the only royal road to success Having bred fancy stock for over forty years, I have had ample opportunities of testing the various modes of procedure to gain and fix any particular point or quality in the stock operated on, and the results obtained by practical experience extending over such a lengthened period have convinced me more thoroughly than ever that one must work on scientific lines, and that pedigree breeding must be our motto if success is desired no matter whatever the variety may be.

Some breeders of the Yorkshire Canary will, I know, argue that our birds will deteriorate in size and stamina by inbreeding. To those I would say that there are ways and means at our command which can be adopted to counteract this tendency, and which would obviate the necessity of introducing fresh blood for a lengthened period. Now, by way of illustrating my meaning, I may remark that it is a well known fact to anyone who has cultivated either flowers or fruit for exhibition, and where size is the most essential quality desired, that the whole of the blooms on a given plant or tree are not allowed to mature, and the same applies to fruit on any plant or tree set apart for a like purpose. In both cases the flowers and fruit are systematically thinned out so as to allow the full strength to flow to the remaining few, and by these means far greater sizes are obtained. In the production of size in the Yorkshire Canary the same principle must be applied as illustrated above—that is to say, if there are from four to six fertile eggs in one nest, one half of these should be removed, and placed under feeders specially provided for the purpose. By these means I have known the size to be increased wonderfully.

Personally I never allow more than three young to be reared in one nest—two for choice—as I am of the opinion that the makings of a really good bird are done in the first three weeks of its existence, and I spare no effort to do anything that will conduce to their development during this period. Perhaps I may deal more exhaustively with this subject on a future occasion, but this must suffice for the present as no doubt space is a serious consideration in this issue.

Mr. J. F. Bishop writes:—This is the way my dear yellow Champion, 1906, was bred:—Bred by owner, April, 1903, from a ticked yellow cock and ticked buff hen, both medium-sized birds, and bred by owner, winning as an unflighted in 1903 and 1904:—2nd Northampton, 2nd Derby, 2nd Leicester, 1st Nottingham, 1st Pendleton (England and Scotland), 2nd Crystal Palace (Champion Class, 1st Burton-on-Trent. 1904-5:—2nd Derby, 3rd Manchester, 2nd Hinckley, 4th Nottingham, 1st Crystal Palace Champion Class. 1905-6:—Not shown on account of broken leg. 1906:—London and Provincial O.S.:—1st and special for best Norwich in Show and diploma, 2nd Sheffield, 1st Nottingham; and will be shown at the coming Crystal Palace Show.

Barbary Doves at Large.

These pretty birds are popular, and in some of the Royal parks they may be occasionally seen at liberty. At St. James' Park they have had a strain of free birds for many years, though the birds are not often seen, and this year (1906) a pair haunted the corner of Regent's Park, opposite the "York and Albany," for some months, and one or other might often have been seen feeding by the cab-rank. This cheap and ornamental bird might easily be established as a park species, but cats would inevitably take a heavy toll of them, as, being bred in captivity, they are deficient in the wariness of wild birds.

By using Eiffel Tower Bun Flour the most inexperienced person can make *light* Buns and Cakes with certain success. Try a 1d. packet. Save Eiffel Tower Labels for 1/6 picture free.

Ye Ancient Art of Falconry.

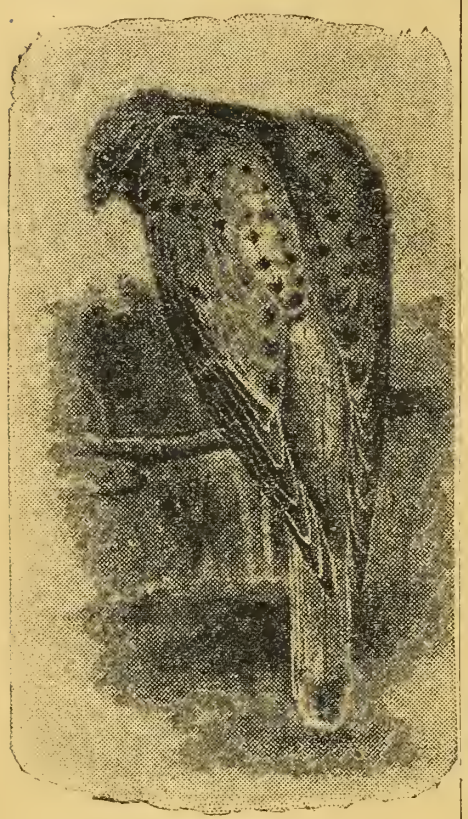
By H. P. Ledbitter.

A Chat about Hawks and Hawking.

Hawks used in Falconry are divided into two classes—long and short-winged, or, more strictly speaking, Hawks and Falcons. Of the former are Goshawks and Sparrow Hawks; of the latter Gerfalcons, Peregrines, Hobbys, Merlins and the plebian Kestrel. The art of Falconry is, in a nutshell, the making of a wild caught Hawk so attached to its trainer that it is willing to exchange the sweets of freedom for the care and protection of its sometime enemy, man. The pursuit and killing of the quarry is merely a carrying out of its natural instincts.

"WILD AS A HAWK."

I do not purpose, within the limits of this short article, to give particulars of the training of the large and expensive Hawks, but will confine myself to such as are comparatively easy to obtain, and can be reclaimed and flown by persons with



THE KESTREL.
Ready for his next meal.

but limited leisure and means to bestow upon their hobby. I have myself kept the Peregrine and Goshawk, as well as the smaller kinds, but do not advise anyone taking up the former, unless they have at least a few hours every day to give up entirely to each bird, or an assistant to do nothing else but attend to their wants.

Of all the birds I have kept I have found the Falcons the most intelligent and companionable. Whoever originated the saying, "Wild as a Hawk," had evidently never kept one. The Merlin is one of the easiest to get steady, or, as a Falconer would say, to "man." The last wild caught female I was lucky enough to get, ate its first meal in captivity on my fist, and would fly across the room to be fed three days after it was caught.

HAND-REARED HAWKS USELESS.

The first difficulty that the budding Falconer has to encounter is getting a suitable Hawk. Hand-reared birds are absolutely useless. You may with luck get a Sparrow Hawk, or Merlin, from a bird-catcher or game-keeper. If you get it as soon as it is caught, and uninjured, you are to be congratulated, for such are invaluable. I would here say that almost all country people call the Kestrel the Sparrow Hawk, consequently the beginner, unless he is acquainted with both kinds, should be on his guard lest he wastes time and patience uselessly, so far at least as sport is concerned. Trained Kestrels will not kill live quarry. Broadly speaking, the Sparrow Hawk has yellow eyes with transverse breast bars, and the Kestral dark brown eyes and longitudinal breast streaks.

On getting your bird you will first put on the jesses. These are a strip of thin leather (as sketch), varying in size and strength according to the size of the

Hawk's Jesses.

Hawk. For a Sparrow Hawk or Merlin, 4 inches long by ¼-inch wide is ample. B, C and D are slits: the distance between B and C should be sufficient to just go round the bird's leg—not too tightly, or it will chafe the leg; nor too loosely, for the bird will pull its foot through. If you are not used to handling Hawks throw a cloth over it, and get someone to grasp it firmly round the wings, legs upwards, tail outwards. Take a jess, put the end A round the leg, through the slit C, and draw tight; now put the end D through the slit B, draw tight; do the same with the other leg, and your jesses are fixed. Next get a swivel hook (for the small Hawks I use watch-chain hooks) and attach to the slits D, then get a leather boot-lace (porpoise hide is safest), tie a firm knot in one end, slip the other through the ring of the hook, and you have your leash.

FIRST STEPS.

Your Hawk should now be temporarily tied down by means of a staple to the floor of a quiet room, or loft, with straw for bedding. Your next care will be to get your newly-caught Hawk to feed. To do this will require a lot of patience, but once done you are safe from further trouble on this score, at any rate. First put a glove on the left hand, for you will have found by this time that your captive has claws and can use them. Go up to your bird quietly, stoop and gently stroke it down the breast and legs with your gloved hand. Probably, being fresh caught, it will dance about and scream, striking at your hand with its claws; if you find it will not step on to your hand on gently pressing backwards against its legs, unfasten the leash, take hold of the swivel end of the jesses with the gloved hand, and stand up. Your Hawk will, of course, be struggling about, head downwards; keep your left hand firm, and it will probably soon come to its senses and take up a more natural position on the nearest perch—in this case your hand. Once it has taken perch, hold the jesses tight by winding the leash round the little finger of the left hand, thus preventing it jumping off. You will have had in readiness some fresh, raw, lean meat, cut up in small strips. Take a piece in the right hand, touch your Hawk on the shoulder with the forefinger, which will cause it to strike at you with open beak. This is your opportunity. Before it can decide exactly what you are going to do, slip the meat as far as possible into its open beak. The first piece or two will probably be flicked angrily away, but after a time, finding the flavour agreeable to its palate, it will, especially if a Merlin, soon peck the pieces freely from your fingers. Having given it a good feed you will transfer it to its straw bed, placing an upright block of wood for it to perch on if so inclined. Why I advise tying it to the floor when newly caught is because it will not be so liable to hang itself as if tied to a perch. When partly trained a screen-perch should be used. A screen-perch is a padded pole fixed in a horizontal position about four feet from the floor. Hanging from the underneath part is a piece of canvas stretched tightly to the floor. To this perch trained, and partly trained Hawks are tied, leaving only the length of the jesses free. The canvas is to help them regain the perch after trying to jump, or, as we call it, "bate off."

OUT OF DOORS.

You will repeat the feeding process every day, twice a day in the case of a Merlin, giving a little fur or feather each time for castings, which you should find every morning. After a time get the Hawk to walk a few inches for its food, and jump on to your hand, gradually increasing the distance till it will fly to you across the room to be fed. You will be surprsied how soon it will do this. You can now continue your practice out of doors. Take off the leash and attach a light cord to the swivel; the cord may be as long as you please, but should be as light as possible, compatible with safety. Place the Hawk on a gate, or some other suitable perch, and retire to a little distance. You will have had something in your pocket that the bird knows by sight and thinks is good to eat, such as dead or stuffed bird. Taking this out you will show it, when your Hawk will probably fly to you at once, if sharp set, and you should never take them out except when hungry. Do not give it this lure, but reward with a small piece of meat. Repeat this practice day after day, until you are quite certain your pupil will fly to you whenever you show the lure. Its training is now complete, but your difficulties are by no means at an end. Take your Hawk to some quiet place, detatch the leash and start it off at the quarry intended for it, quite free. If it kills, well and good; if not, but takes perch in a tree, call it down with the lure and try again.

For further details the amateur should procure a modern work on Falconry. These are published, I believe, by the "Field," though you can sometimes get them second-hand.

I have not mentioned hoods, as it is not necessary to hood the smaller Hawks. In olden times Peregrines were "seeled"—i.e., their eyelids were sewn together with a fine needle and silk, and as their training advanced the stitches were let out one by one. It is not a practice I would advocate, and it should never be attempted except by an experienced hand.

Merlins are generally flown at Larks, and Sparrow Hawks at Blackbirds and Thrushes. In all Hawks the female is much the "better half," being far superior in size, strength and courage to the male.

PRICE OF FOOD.

As to the price of untrained Hawks, a female Peregrine would cost 40s., Goshawk 30s., Merlin 15s. or 20s., Sparrow Hawk 10s., Kestrel 3s. 6d. Males of all kinds considerably less.

As regards food, most people think anything in the way of meat will do for a Hawk. I am frequently reproved for giving a nice, plump, young pigeon to a Peregrine. To think they will do on anything is a great mistake. Merlins are especially troublesome. I have found the best food for these to be a morning meal at eleven, consisting of 2 oz. of sheep's heart, without eastings, and in the evening, at six, either a freshly-killed Sparrow or, what is vastly better, a full-grown mouse. I keep a stock of tame mice and kill them as required. Sounds rather barbarous, doesn't it?

Except in the case of the large Hawks, you should never throw down the food promiscuously. Take the Hawk on to your hand and let it feed there. Sparrow Hawks are much less delicate and will do with one meal a day, which should consist of Sparrows, Blackbirds or Larks, freshly killed if possible, though this is not absolutely necessary, as is the case with the Merlin. They seldom, if ever, drink, but should have a bath at least once a week.

The only person I know who can supply falconers' requisites is C. T. Mollen, Falconer, Valkenswaard, Holland.

In conclusion, I would say that no one will succeed as a falconer unless he has, in the first place, a natural love for Hawks (not merely a passing fancy), and is prepared to spend unlimited time and patience in attending to their wants. Speaking for myself, I can say that the sympathy and companionship you will derive from your pets will repay you for any amount of trouble.

The Best Shilling Handbook on Canaries Published
THE
BRITISH CANARY.
By that well-known Judge, Expert and Journalist,
C. A. HOUSE.
This thoroughly practical book treats of the Varieties, Characteristics, Breeding and Management of the Canary, and has reached its fourth edition. We have had it illustrated by "Cage Birds'" artist-in-chief, Mr. H. Norman, and it is now absolutely the best Shilling book on the subject procurable. Post free, 1/2, stoutly bound in cloth, 2 -, post free.
"CAGE BIRDS," 154, Fleet Street, London.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

Uncle Peter wonders if his nephews and nieces are ever puzzled, as he himself has often been, by the different coloured plumage the same bird puts on at different times of the year. Uncle Peter's own particular pet bird at present is a Weaver from South Africa, and while all the summer-time he is dressed in the most gorgeous black velvet and orange satin, in winter he wears a shabby suit of brown feathers, just like a hen Sparrow's.

On or over the water in every London park now, as well as on the Embankment, you may see the graceful little Black-headed Gulls flying and swimming about. But if you see them in winter only you will wonder why they were named "Black-headed," as in winter their heads are quite white. Only in the summer-time, when they fly away from London, they wear their dark brown hoods. But you can always recognise them by their pretty red feet and beak. The common Gull has yellowish-green bill and legs; while the Kittiwake's feet are black. Our other three Gulls are so much larger than the Black-headed one that they could not possibly be mistaken for him.

You will all be able to think of other birds whose feathers are not so brightly coloured in winter as they are in summer-time; and of some which change their colour completely, as the Ptarmigan does, from brown to white.

* * The Dotterel.

This bird belongs to the Plover family, and is a summer visitor to our country, and in many localities where it used to be abundant, or at least common, it is now rare or almost unknown. This is the case on parts of the Yorkshire Wolds, as well as in the Lake district. The female makes no nest, but lays her three eggs in a slight cavity on the ground near high mountain tops. The eggs are of olive hue, spotted plentifully with brownish black or dark brown. The Dotterel is largely caught by fowlers. They follow the bird to its resting-place with lanterns. The bird fascinated by the light copies its pursuers' motions extending a wing in imitation of an arm held straight out, lifting a leg, and strutting, bobbing its head down and so on. Its feathers are used for dressing flies used in trout fishing.—Sent by W. Hollings (age 11), Gas Works, Llanidloes.

* Happy, though Afflicted.

One morning I found the wires of our aviary covered with blood and dark feathers. Looking on the floor inside we found our poor little Linnet with a wing torn from its body by a cat. After careful nursing he got better and was put back with the Canaries. Within six weeks he was the father of a handsome nest of Linnet Mules, and although with only one wing my favourite bird is in the best of health and sings beautifully.—Sent by Florrie Marley (age 8 years), 85, Manor Road, Leyton, Essex.

Our Skylark Jack.

We have a Lark, he is two years old and is in full song now (Christmas), and has been for this last month, by gaslight and daylight. We feed him on the usual Lark food, with an additional packet of dried flies and ants' eggs. We always give him a little of whatever we are eating, and nothing seems to upset him. I have heard father say the last Lark he had lived to be 11 years old, and he had for his staple food nothing but bread, cheese, and crushed hemp, and the usual tit-bits from the table. The one we have now my mother hand-reared.—William Trueman (age 12), 43, Mill Street, Ilkeston, Derbyshire.

*Twice Caught.

I caught a Bullfinch in my garden and sold it to one of my school mates for 1s. A few days after he went to get it some water and left the door open; when he went back with the water he found it had gone, and a day or two after I hung my trap cage out again, and when I came home from school I saw that the same bird was caught again, which was a very strange occurrence indeed. How I knew it was the same bird because it had lost half its tail and some feathers off its head. My mate lives quite a mile and half away from me, but however I took the bird to my mate again and he gave me 8d. more for my trouble.—Sent by Algar Bevan (age 14), 28, Belle-Vue Road, Ipswich.

The Two Parrots.

In the town of S————e, two gentlemen, who lived next to each other, had each a Parrot. During fine weather the two cages were hung outside the windows of the houses and the pedestrians passing by had sometimes the opportunity of hearing amusing disputes between the two birds. These conversations often used to show up the characters of the two owners. The first Parrot would open the "dispute" with—

1st P.: "You shut up, you don't know what you're talking about."

2nd P.: "Those are gross, insulting words."

1st P.: "You mind your own business, or I'll come and thrash you well."

2nd P.: "For what we are about to receive may the Lord make us duly thankful."

Sent by Leonard P. Luke (age 15), 17, Crossley Street, Lower Newlands, Brighouse, Yorkshire.

A BUCCANEER BIRD.

The Frigate Bird at the Zoo.

(*Fregata aquila.*)

At last, after many years, the celebrated Frigate or Man-of-War bird is again represented in Regent's Park. This creature, perhaps the most wonderful and interesting of all sea-fowl, is remarkable for the immense span of its wings, the size of which may be judged even when they are closed, by the forward projection of the pinion-joints, to say nothing of the long flights. As the tail is long and forked, and the feet very small and imperfectly webbed, the Frigate bird has some resemblance to a gigantic Swallow a yard long, though its bill much resembles that of a Cormorant, to which bird it is related.

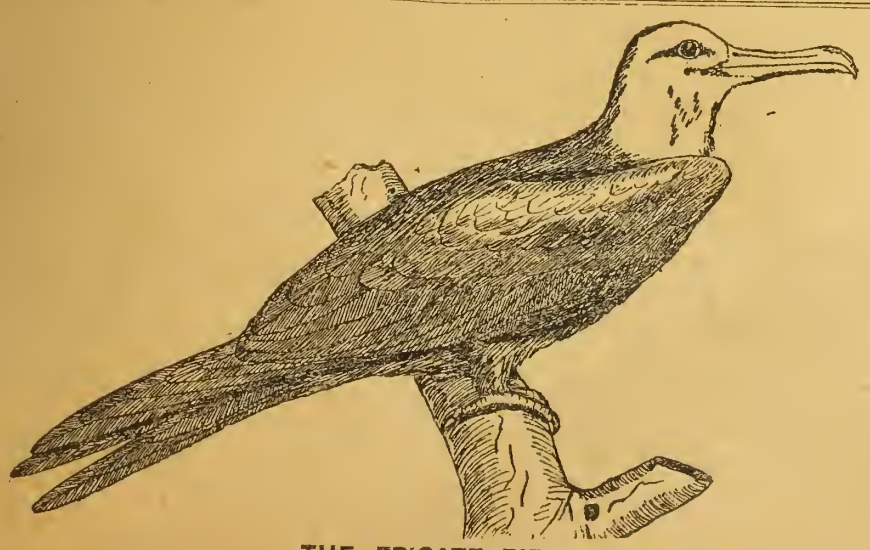
It feeds, however, in a very different manner, hardly ever settling on the water, but soaring aloft like a Kite, and swooping down on any surface-swimming creatures of the sea, such as fish, cuttle-fish and young turtles. It is, however, a thorough pirate, gaining much of its living by hunting gannets, gulls, or terns, until they vomit their prey, which its seizes in mid-air and greedily devours. Nor are the young of these birds safe from it; in fact, like so many sea-birds, it will devour any animal food it can get down—and, like rascals generally, seems commonly hard up and in want of a meal.

The Frigate bird is found all through the tropical seas, but only breeds locally, making a nest of twigs on trees or bushes, and laying one egg; the nestling is clothed in white down, and as soon as fledged begins to fly abroad and practice swooping and picking things off the water, though still fed by the parents. The bird at the Zoo is in young plumage—dark brown with a white head and breast. In females the breast always remains white, but the adult male becomes of a fine glossy black and has a scarlet pouch on his throat which he blows out to a huge size when courting; at the same time drooping his wings as he sits on a tree. When not at roost, this bird is constantly flying, and is probably the finest performer on the wing of all known birds; on the ground its walk is slow and feeble, and it is doubtful if it can swim—indeed, as mentioned above, it is rarely seen even to float. Those in the Zoo previously have proved very sluggish birds, as they naturally require much space in which to exercise their enormous wings; but the exhibition of such a bird at all is of the greatest interest.

F. Finn, F.Z.S., &c.

Catching Dotterels.

Of all our waders, the pretty Dotterel is probably the least suspicious, and consequently the easiest to approach. But the following account of an old method of taking them reads very much like a rather tall yarn:—"The Dotterell is, in its manner, a very singular bird, and may be taken by the most simple artifice. The country people are said to go in search of it in the night with lighted torch or candle; and the bird on these occasions will mimic the actions of the fowler with great archness. When he stretches out an arm, it stretches out a wing; ◆ he moves a foot, it moves one also; and every other motion it endeavours to imitate. This is the opportunity that the fowler takes of entangling it in his net."



THE FRIGATE BIRD.

A Pirate of the Air.

WILD BIRD LIFE

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to J. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

The Way of the Snipe.

To thoroughly study bird-life in winter one should live near the sea, or upon the banks of some big tidal river with long stretches of marshy land running by the water. There one would be in constant touch with wild-fowl of all species frequenting our shores during the winter months, and which, in consequence of their wild, wary habits, are all of them difficult birds to approach. Weather conditions naturally affect such birds to an extraordinary degree, and old marsh-men, who are used to the ways of Wild fowl, will be able to say with tolerable certainty if there is any likelihood of certain species being about.

THE WILY SNIPE.

In a marshy district in Kent it is useless looking for the elusive Snipe unless an east wind has been blowing during the night. This brings the birds with it up from the mouth of the rivers, and they settle to feed upon favourite spots along the banks. The Snipe is possibly one of the most conservative birds in existence. I well remember certain boggy patches, each some dozen yards square, where, under certain conditions one or two of these birds could for a certainty be found, although, to an ordinary observer, there were miles of marsh-land exactly similar. But there was evidently something in those few square yards of ground which in some way suited the requirements of these birds, and each fresh arrival was quick to note the fact.

The majority of these visitors were the smallest of the Snipes—that is, the Jack Snipe. This bird breeds in Northern Europe and is only a winter visitor to this country. One has no trouble to watch the doings of this Snipe, for if disturbed he takes wing, executes a few twisting movements, and then settles again almost immediately, not only once, but several times. One bird has been known to keep a bad shot going all one morning.

The Common Snipe is a larger bird, and breeds with us on marshes and boggy moorlands. The nest is placed in the centre, or by the side of a tuft of coarse grass or rushes. It is lined with dead herbage and grass. The eggs are very large for the size of the bird, handsomely and richly blotched with dark brown, and paler markings of light brown and grey. Several pairs of birds may be found breeding upon one stretch of marsh land, although each pair keeps to themselves.

This is the time to watch the peculiar antics of the cock bird. Rising quickly from the ground, he flies round in zig-zag fashion and appears reluctant to leave the spot. Then suddenly he commences to mount until he is almost lost to view. This is not performed in the manner of the Sky-lark, but in a twisting, gyrating fashion. Up, up, he goes; then as suddenly shoots downward, and to your astonishment as suddenly stops. Then up yet again, to repeat once more the performance. And if you are observant you hear a peculiar humming noise, a sound as mysterious as the booming of the Bittern. How is it done? Some contend that it is a vocal production; others that it is produced by the wing or tail feathers cutting the air in the bird's headlong descent. But while in the air other sounds are heard, unmistakably bird notes. The "drumming" of the Snipe is a weird, uncanny sound.

Notes and Queries.

Astounding Bird Intelligence.

During the recent severe weather (a correspondent writes) a Robin was noticed to be carrying away large pieces of bread from a window-sill at Semer House, near Hadleigh. As it was recognised that it could not possibly eat all that it took away, a watch was kept upon its movements, and it was discovered that it carried the food to a Rook which sat on the snow in a meadow immediately adjoining the house, and about 100 yards distant from the window-sill. The Robin continued to do this work as long as the snow was on the ground.

The Bullfinch in Dulwich.

The residents of East Dulwich have a very natural place for birds, namely, Peckham Rye Park. It is well wooded for nesting, etc. While walking round yesterday I saw a cock Bully hanging on to some fern stems. As I had never seen this bird before, I came to the conclusion it must have been one that had escaped. Do you think it had been driven close in by the snows? I have seen many other birds there, but never the Bullfinch.—F. Russell (East Dulwich).

[It is very probable the Bullfinch seen was a wild specimen, as the sharp weather we experienced caused most species to move nearer dwellings.—H. N.]

Migrating Skylarks.

I was under the impression that the general migration of birds takes place in spring and autumn, and so was somewhat surprised to notice flocks of Skylarks, about fifty strong, passing over from east to west at intervals all day on Dec. 29. From Eastbourne I hear that continuous flights of birds of many species, and in number amounting to several thousands, were noticed there all the morning of Dec. 27, flying also from east to west, and following the coastline. Some of your readers may have noticed these moving armies, and may be able to account for the migration at what seems to me an unusual time of year.—M. T. (Chertsey), *Queen*.

Crossbills in Flight.

A huge flock of Crossbills must be a singular and interesting sight. Lord Lilford, in one of his books, mentions an enormous flock in Spain; thousands could have been shot had the observers wished to do so; as it was they killed 150. The curious part about it is that previously these birds were quite unknown in the district. The movement was evidently very extensive, for by the same post he received intelligence of a large number in another part of the country.

The Effect of Sunshine.

Sunday was a glorious day, quite spring-like in character, and we registered several hours of bright sunshine. And what a difference it made to the feathered tribe. The Thrush that has been silent since the spell of snow at Christmas, commenced again with seemingly renewed vigour to cheer us with his loud song. Several Larks were in the air together, singing with full deliberate notes, unable to resist the influence of the glorious day. Even the Tits were shouting a perky little song as they chased each other from tree to tree. The Starlings were noisy, and took the opportunity of having a regular washing-day. A Starling can manage his bath as well as most birds, even when water is scarce. No wonder his jacket shines.

Fate of a Heron.

A Hunstanton reader, Mr. E. Langford, sends an account of a Thrush's nest having been found in Berkshire, which is not an impossibility, although quite unseasonable. He also sends a cutting about a Heron being killed by coming in contact with overhead wires. If it was possible to keep a genuine record of all the birds killed in this manner, it would no doubt be quite a formidable list. At different times I have heard of the death of several species, but this is the first time I have noted the Heron. It is possible the accident occurred late in the evening, as these birds occasionally return to roost when it is almost dark.

Advertisements continued from page 81.

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

Foreign Exhibitors Note.

Having taken over extensive business, I am compelled to part with my team of winning Foreign birds (late Osbaldeston's), consisting of noted Touraceo, winner 1st and specials Manchester, Warrington, Morecambe, Preston, Scottish National, etc., Toucan, great winner, also the champion Red and Blue Macaw, never yet been beaten, also Leadhetter Cockatoo, winner of many prizes; grand opportunity to be at the top in Foreign Fancy anyone taking the lot; certain Palace winners.—A. Burrows, Builder's Arms, Preston.

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

THE

Bird & Live Stock Stores,

34, George Street, HULL; and
Station Square, HARROGATE.

Patronised by Royalty.

In thanking our numerous customers all over the country and also abroad for their kind patronage during the last few years, we take the opportunity of informing them that we have removed from the Central Arcade, Harrogate, to more convenient premises in Station Square, Harrogate, close to the N.E.R. Station, and we trust that we may still continue to receive the same favours as in the past.

Our position at Hull enables us to secure from the steamers constantly arriving there from foreign ports many excellent specimens of **FOREIGN BIRDS** and **ANIMALS**, and we shall always be pleased to endeavour to secure anything that our customers may require, if we do not happen to have it by us at the time.

At present we have large stocks of the following:—

All kinds of **FINCHES**, etc., for Show or Aviary.

Various kinds of Cockatoos Parrots, Parrakeets, Love Birds, etc.

AUSTRALIAN FINCHES of various kinds.

YORKSHIRE & NORWICH CANARIES.—Having a large quantity of these birds on hand we can supply specimens for Show Bench, Breeding Pairs, or Songsters, at moderate prices, and all from the best Exhibition Strains.

HARTZ MOUNTAIN ROLLERS.—We receive regular supplies of these direct from abroad, and can guarantee perfect satisfaction.

SIBERIAN BULLFINCHES & GOLDFINCHES.—We also receive regular supplies of these beautiful birds, which are privately brought over, and thereby have careful attention.

BRITISH Bullfinches, Goldfinches, Linnets, Chaffinches, Redpolls, Reed Buntings, Yellow Hammers, etc., etc.

MONKEYS, JERBOAS, and other small pets.

TOY DOGS of many varieties, Poms, Yorkshires, Toy Spaniels, Terriers, etc.

PERSIAN CATS and Kittens, for Show or Pets.

CAGES.—We hold a very large stock of cages of every kind at most reasonable prices.

GRIT.—We would specially draw attention to our fine Sea-Shingle for Cage Birds; this is a Speciality of ours, and we shall be pleased to send a sample free on receipt of postage; we think there is nothing to beat it.

CAGE ROOM Accessories of every description at the lowest possible prices.

BIRD STUFFING by most experienced workmen.

We shall shortly have ready a descriptive catalogue, which will be sent post free on application.

All we solicit are your enquiries—we guarantee to please you.

Proprietors—**HOLLINS & SON.**

BUSINESSES.

OWING to decease of proprietor, a well-appointed bird, seed, and cage business for disposal at a big sacrifice; cash sales £600 yearly.—Johnson, 64, Shaw Street, Liverpool.

DRUNKARDS CURED. *Speedily, permanently, secretly, unknown to sufferers, as grateful thousands testify. Cost trifling. Save loved ones; you can with certainty; Sample 1d.*—CARLTON CHEMICAL CO., 582 Guildhall Buildings, Birmingham.

Give your Feathered Pets

SPRATT'S BIRD SEEDS.

These are carefully selected and of the best quality only. They are perfectly free from dust and dirt, being treated by a special process to secure absolute purity.

CHEAP SEEDS of inferior quality will injure your birds, affect their health, and retard the proper development of their singing powers. Don't be "penny wise and pound foolish"—give your birds the best foods and get the greatest pleasure and profit from them.

Experienced Canary Fanciers

USE and RECOMMEND

Spratt's Cod Liver Oil

Cage Bird Food

FOR

YOUNG CANARIES from the Nest.

Mr. WM. HIRD writes:

High Street, Hanging Heaton, nr. Dewsbury, August, 1906.

I am highly pleased with your Cod-Liver Oil Cage Bird Food. It is a most suitable food for the birds, and gives good results, both in the rearing of the young birds and in the production and quality of the feathers, and I shall recommend it to my brother fanciers.

Sold in 3d. and 6d. Tins; also in 2/6 Bags.

Medicines

FOR

CAGE BIRDS,

PARROTS, etc.

Sold in 1d., 1½d., 2d., 3d., 4d. & 6d. packets, and 1/- tins.

Parrot Food.

Mr. F. H. JUDGE writes:

4, Tryent Cottages, Kingsbury, London, N.W., July, 1906.

I thought you would feel interested to hear of the success I have achieved by using your excellent Parrot Food. I exhibited for the first time at Great Missenden, on July 12th, my green Amazon parrot, in an amalgamated class of English and Foreign birds, and was successful in carrying off first prize. Her excellent plumage was much commented upon, and I attribute this to having always fed her on your food, which sustains her through her moults and keeps her in good health.

Sold in 2d., 4d. and 6d. packets, also in 1/- tins and 6d. and 3d. bags.

Booklet on "Parrot Keeping and Feeding," post free for three penny stamps.

Sold by all Corn Dealers, Grocers, Chemists, &c.

Send postcard for samples, also Free Booklet on "Canary & Cage Bird Rearing."

ALWAYS USE OUR DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

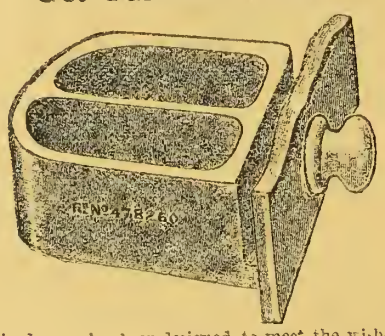
Satisfaction guaranteed, or money returned in full. Wholesale prices sent on application.—T. A. Fox, 7, Liverpool Road, St. Helens.

PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex" Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

OPINIONS OF VALUE AND SATISFACTION.
"Brookfield, Westbourne Grove, West Kirby, Jan. 18th, 1907. Birds to hand. Am very pleased with them. F. Richards to W. Rudd." "Scaldwell, Northamptonshire, Jan. 17th, 1907. Please send a 4d. tin of Bird Lime. It is the best I have ever used: the last tin was wonderful. F. Howard to W. Rudd." "Grange, Kilmore, Co. Wexford, Jan. 17th, 1907. The Lime you sent is the best I ever had. Please send two more 4d. boxes. Jno. Bates to W. Rudd."
Marvels of Cheapness, as Catalogue States.
"59, Browning Road, Enfield, N., Jan 17th, 1907. I received cages quite safe. I am very pleased with them. They are indeed, as your catalogue states, marvels of cheapness. Many thanks for prompt attention. W. J. Pike to W. Rudd." "Pinecroft, Brookwood, Jan. 14th, 1907. The Crystal Palace aviary arrived safe. I am very well pleased with it, and thank you very much for prompt attention. R. S. Clarke to W. Rudd." "28, West Terrace, Burnhope, Jan. 14th, 1907. Received breeding cage. I think it is a splendid cage for the money. T. Johnson to W. Rudd." "Cannington, Jan. 14th, 1907. The Bird Lime I had of you has repaid itself. H. Goddard to W. Rudd."
W. RUDD, The Bird Specialist,
NORWICH.

MEDICINES.
MEDICINES. Canaries off song require a dose of Welham's Wonderful Canarydine Tonic; the grandest reviver known.—Welham and Co., Bird Specialists, Peckham, London.
DIARRHŒA, inflammation cure, used by most of the leading exhibitors, will cure any bowel trouble; I have cured when all others have failed, I hold proofs of same; 7d. per ounce, free advice given. —Mather, 65, Albert Road, Widnes.

PANNASSINA.
A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Austey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

To Make Your Parrots Talk
And save their lives, send for my Feeding of Parrots, a sure cure for picking their feathers, and guaranteed to keep them in good health. Thousands of testimonials. Oxford Street, London, W.—Dear Sir,—Many thanks for your Recipe. You have saved my Parrot's life. He began to talk nice after using your Recipe.—H.H. Send 1s. at once, and stamp address; my usual price 5s.—J. Horner, 174, Portland Road, South Norwood, S.E.

FOUND AT LAST.
BRONCHITE.
Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.
"66, Moston Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorine. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. bottle.—Crawley, 112, Radford Boulevard, Nottingham.

THE HYGIENE OF BIRD KEEPING.

By W. GEO. CRESWELL, M.D., L.R.C.P., F.Z.S.

Price 1/1, post free from CAGE BIRDS Offices,

154, FLEET STREET, LONDON, E.C

OPINIONS OF THE PRESS.

LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."

COUNTRY LIFE: " . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

BRITISH BIRDS.

HARRY ALLEN.

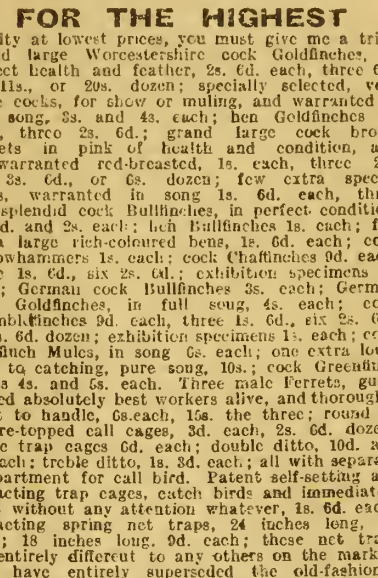
Still to the front. 1st, 2nd and 3rd prizes at Old Kings Head, Leeds, and 1st and 3rd at Newtown, in one day. A record, but nothing surprising with the kind of birds I keep and send out. Good, honest Linnets, well pencilled, largest size, 1s. 6d. and 2s.; extra picked birds, very tame, sure winners and sure mulers, 2s. 6d. and 3s. each. Showmen, please give me a trial order and you will never regret it. Grand cock Linnets, singing beautifully, in a polished singing contest cage, with a packet of my special mixture and instructions how to feed, 3s. the lot. Young, house moulted Linnets, taught by my champion, 6s. 6d. and 7s. 6d. each, cage included, bargains, sure winners in contests; four packets of my special mixture, 1s. (see Singing Results.) Please notice, I beat the challengers. Everybody welcome to hear my birds.—Harry Allen, 42, Brown Hill Crescent, Harehills Lane, Leeds.

FOR THE HIGHEST

Quality at lowest prices, you must give me a trial. Grand large Worcestershire cock Goldfinches, in perfect health and feather, 2s. 6d. each, three 6s., six 11s., or 20s. dozen; specially selected, very large cocks, for show or muling, and warranted in free song, 3s. and 4s. each; hen Goldfinches 1s. each, three 2s. 6d.; grand large cock brown Linnets in pink of health and condition, and all warranted red-breasted, 1s. each, three 2s., six, 3s. 6d., or 6s. dozen; few extra special cocks, warranted in song 1s. 6d. each, three 3s.; splendid cock Bullfinches, in perfect condition, 1s. 6d. and 2s. each; hen Bullfinches 1s. each; few extra large rich-coloured hens, 1s. 6d. each; cock Yellowhammers 1s. each; cock Chaffinches 9d. each, three 1s. 6d., six 2s. 6d.; exhibition specimens 1s. each; German cock Bullfinches 3s. each; German cock Goldfinches, in full song, 4s. each; cock Bramblefinches 9d. each, three 1s. 6d., six 2s. 6d., or 4s. 6d. dozen; exhibition specimens 1s. each; cock Goldfinch Mules, in song 6s. each; one extra loud, used to catching, pure song, 10s.; cock Greenfinch Mules 4s. and 5s. each. Three male Ferrets, guaranteed absolutely best workers alive, and thoroughly quiet to handle, 6s. each, 15s. the three; round or square-topped call cages, 3d. each, 2s. 6d. dozen; single trap cages 6d. each; double ditto, 10d. and 1s. each; treble ditto, 1s. 3d. each; all with separate compartment for call bird. Patent self-setting and self-acting trap cages, catch birds and immediately reset without any attention whatever, 1s. 6d. each; self-acting spring net traps, 24 inches long, 1s. each; 18 inches long, 9d. each; these net traps are entirely different to any others on the market, they have entirely superseded the old-fashioned ones and will catch and hold anything from a Wren to a Rook; every description of cage in stock from 3d. to £5. Dealers should send stamp for wholesale list, prices will astonish you. Real Japanese bird lime, absolutely strongest ever made, does not freeze, guaranteed to hold a Hawk, and will hold birds even in the rain, 6d. ½ lb., 10d. ½ lb., 1s. 6d. lb., all post free, full weight guaranteed; clap nets, 3 yards long, 4s., 4 yards 5s., 5 yards 6s., 6 yards 7s., 7 yards 8s., 8 yards 9s. 9 yards 10s., 10 yards 11s. per pair, all 4 feet high, and sent complete, with peg poles, lines, etc, all ready for immediate setting. Loose netting, ¾ inch mesh, made from genuine thread, 6 feet deep, 3d. yard, 8 feet deep, 4d. yard, 12 feet deep, 5d. yard, all post free; this netting is made specially for me for bird netting, and must not be confused with the thick American cotton netting now being sold as bird netting; pure hemp pull lines, 65 yards long, 1s. 4d. each, post free; send stamp for full priated list of all catchers' appliances with sample of netting, for comparison with others. Thousands of testimonials published in this paper, all speaking in highest terms of praise of the quality of my birds and goods. Please note everything I sell is sent on approval at my risk on receipt of cash, or deposit system of CAGE BIRDS. I make no absurd conditions or restrictions, but advertise my conditions in plain language. I was first advertiser in England to send all wild birds on approval, and am still the only one to do so all the year round. (Will copyists please note this.) All birds are guaranteed properly staged, steady, and well on hard seed, not sent straight from the nets to die as soon as you get them. I have 10 years' reputation at stake with everything I send out. Personal inspection invited. Seven minutes walk from New Street Station; trams pass the door.

W. Gore, 219, Sherlock St., Birmingham.

BIRDCATCHERS.



NETS AND ALL APPLIANCES.

Write for prices; satisfaction guaranteed.—Barnes, Naturalist, Wallsend-Tyne.

Retiring from the Fancy.

To be sold in one lot, or separately, the entire stock of our Norwich Plainheads, Cinnamons, Mules, Hybrids, and British birds, including a large number of very valuable exhibition specimens, the best collection in the West of England, having won a large number of prizes and specials at all the principal shows, including several challenge silver cups, one of our Cinnamons having been shown 20 times and won 19 firsts and 17 specials, also winning the large silver cup at Sidmouth for best bird in show—a real topper. The Mules include some grand specimens in Light Mules and Hybrids, our Goldfinch-Bullfinch having been first almost every time shown—a gem. The Soft Bill British are some of the finest specimens ever exhibited in the West of England, some very rare specimens including Wryneck, Waxwing, Tree Creeper, Whinchat, and Redstart, all having won many first prizes under specialist judges; also our noted Clough, "Cornishman," a safe Palace winner, pronounced by specialist judges to be the finest specimen shown, holding an almost unbeaten record. First-class show cages for every specimen. Stamp, reply, for full particulars and prices.—Tickell and Son, Bodmin.

I AM NOT EXHIBITING at the Palace, and am offering the following well-known Winners. All are now in Tip-top Condition and ready for the Palace. Linnet, 50/-; Cirlbunting, 30/-; Meadow Bunting, 30/-; Crosshill, 20/-; Chaffinch, 20/-; Meadow Pipet, 12/6; Yellow Siskin Mule, 30/-; Buff Greenfinch Mule, 30/-; Buff Goldfinch Mule, 30/-; Linnet Greenfinch Hybrid, 30/-.

2 days approval.

WALSH, BIRD SPECIALIST, **Blackburn.**

ARTHUR THOMPSON,
197, BRADFORD ROAD,
FRIZINGHALL, BRADFORD.

CHAMPION CRESTS & NORWICH PLAINHEADS.

These are the two varieties I keep, and no one in England has better. Last Season I had three Fanciers breeding for me with birds of the highest quality. Neither money or sound judgment has been wanting in getting one of the finest stocks in the world together; and remember I don't exhibit now I breed for my customers to win. Hundreds of Winners sold by me, and reasonable. 30 years breeder. Have had the honour to judge at over one hundred shows. If fanciers cannot get the right birds from me, where can they get them? All on approval.

T. BILLINGTON,
220, COLWICK ROAD, NOTTINGHAM.

Dutch Frills.

HIGH-CLASS Dutch Frills, cocks and hens; list free.—Rudd, Bird Specialist, Norwich.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: **MACKLEY BROS., (Jacob Mackley), NORWICH.**

SEE R. HANFORD'S

Last week's advertisement on page 10, which still holds good for this and next week. Send post-card for my free illustrated price list before purchasing elsewhere.—R. Hanford, Derby.

D. MALLINSON AND SON

Can spare a few grand pairs of Norwich, same strain as our winners at Halifax, Brighouse, Huddersfield, Bradford West; pairs matched for breeding, 20s., 25s., 30s. a pair; every bird guaranteed in good condition. Stamp for reply.—D. Mallinson and Son, Victoria Street, Huddersfield.

NOTICE, CALL OR WRITE

and inspect my Norwich. I have a splendid collection in all colours, except greens, and every bird is in the primest condition and feathered like silk; cocks, in full song, 7s. 6d., 8s. 6d., 10s. 6d.; hens, 4s., 4s. 6d., 5s., 5s. 6d.; all on seven days' approval; P.O. or deposit; note, inspection invited any time.—William Shaw, 97, Essex Road, Islington, London, N.

WILL YOU, PLEASE?

Will you please send me your name and address on a post card, upon receipt of which I will forward you, post free, my New Illustrated List of Canaries and British Birds? I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. to 15s. each; matched pairs from 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d., 15s. upwards. See what customers say:—"Cercy Street, Cork, January 18th, 1907. Received the bird on 15th, and am highly satisfied; it is extraordinary good value for the money.—B. Bramhald to Miss Storey."—"Memock, Dumfriesshire, January 19th, 1907. I am exceedingly well pleased with the birds you sent me. They give every satisfaction.—T. Cross to Miss Storey."—"Victoria Road, Hatherleigh, January 18th, 1907. Bird received quite safe, in best of health. I am more than pleased with the quality of the bird.—C. Short to Miss Storey."—"36, Long Causeway, Perth, January 19th, 1907. Bird received safely, and gives every satisfaction, for which accept my thanks. R. Taylor to Miss Storey."—I have thousands similar to the above open for inspection. New Illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on 7 days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

SANDIFORD'S FAMOUS Norwich.

READ OF SUCCESS FROM BIRDS

I have supplied, also of our noted Wins at all leading Shows, including Derby, Leek, Hinckley, Carlisle, Gateshead, Sunderland, Crewe, Edinburgh, etc., etc. Won this Season—34 Firsts, 26 Seconds, Gold and Silver Medals, 50 Specials, etc. At Hartlepool, N.P.C. Also, in the year 1900, we won 50 First Prizes, Seconds, Specials, etc. 1901, 44 Firsts, 30 Seconds, Specials, Cups, etc. 1902, 40 Firsts, 40 Seconds, 35 Thirds, Scores of Specials including Championship Medal for Best at Crystal Palace. 1903, 35 Firsts, 40 Seconds, Specials, etc., including the N.P.C. Challenge Cup, which we won at Three Shows against all others Five Shows, also Gold Medal at the N.P.C. Club Show for best Norwich. 1903-4, Won 50 Firsts, 40 Seconds, 25 Thirds, N.P.C. Challenge Cup second year in succession, also 2 Gold Medals at the International Show, England v. Scotland. 1 for Best Norwich in Show. 1905, Won 30 Firsts, 25 Seconds, Spls., etc. If my strain can't claim to be the best on earth none can.

I am offering for two weeks only 20 Grand Matched Pairs, to breed Winners, at 20/- pair, must clear. Also other Pairs at 25/, 30/-. Odd Yellow or Buff Cocks, 10/-, 15/-, 20/-, 25/ 30/-. Odd Yellow and Buff Hens, 10/-, 12/-, 15/-, 20/-. All on approval two days. If you want the blood that wins order at once.

Mr. Melver, Port Glasgow, Jan. 8, 1906.—"Sir, The Norwich Cock you sent me won 1st and Special in class 11, against all colours." Have scores like this.

Established 1879.

J. SANDIFORD, Canary Breeder, PRESTON, LANCS.

Silk's Champion Norwich.

My name and fame as a breeder of Norwich Plainbeads is so well known to every fancier that my birds need no paper recommendations. I breed to sell, and most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. A strain of years standing. Pairs to breed winners, 15s. to 30s.; odd cocks and hens, 7s. 6d. to 15s., grand stock birds; approval willingly.—Silk, The Aviaries, Whitstable.

Rollers & Singing Canaries.

MUST sell, five hens 12s., or nearest offer.—Shlor, Blyth Road, Worksop.

FINE 1906 green cock Canary, grand sougster 5s.—J. Wager, Cainscross, Gloucestershire.

ROLLERS.—Wanted, a few Seifert cocks, 1905 or 1906; birds on approval.—King, 6, Addington Road, Ramsgate.

HARTZ cocks, lovely songsters, 7s. 6d., 8s. 6d.; crests and crest-bred cocks, 8s. 6d., 12s. 6d.; hens, 7s. 6d.—Barrows, Rann Street, Birmingham.

SEIFERT Rollers, hens, 4s. and 5s. each. These birds all carry club rings.—Swift, 56, Potter Street, Worksop. x263

THREE 1906 Seifert hens, Rochl's strain, wearing club rings 4s. 6d. each; six hens, not rung, reliable birds from 2s. 6d., or exchange Roller cocks.—Arthur Locker, 85, Lytham Road, Blackpool.

GENUINE home-bred Rollers, cocks, in splendid song, 6s. 6d.; bens 2s. each, or 10s. 6d. per half-dozen; carriage paid.—Thurstan, 53, Darlington Street, Wolverhampton. x264

TEN Roller Canaries for sale, four or five cocks amongst them; what cash offers for lot? 1906-bred; room wanted; highest bidder gets them.—Willows, Draper, Wednesbury, Staffs.

SEVEN days' approval willingly.—St. Andreasberg cocks, in full song, 7s. 6d., 8s. 6d., 9s. 6d. upwards; hens, 2s., 2s. 6d. Intending breeders please order at once.—Vernon, 120, Jamaica Street, Stepney.

ON Approval.—Hartz Mountain cocks, splendid day and gaslight singers, 3s. 3d. each, including cage, two for 6s., hens 2s.—Skilton, 28, Smith Street, Stepney.

PAIR pure 1905-bred Rollers, 20s.; four pairs of 1906, bred from the above pair, 15s.; a few hens, 3s. 6d. each; on approval seven days; Seifert strain; hens cold-room; kept specially for breeding.—Stanley, Roller Breeder, Studley, R.S.O. x263

TRUE and Seifert strain, green and yellow, and pure yellow cocks, £1, splendid singers; also Seifert hens, 3s. each, and several 1906 Seifert cocks from 7s. 6d. to 10s., healthy birds.—Address, Miss Richardson, 20, Bigly Street, Brigg, Lincolnshire.

BARGAIN.—Pure bred St. Andreasberg Roller cock, 1906 bird, magnificent songster, singing day and night, Hummel's strain, cost 20s., will accept 7s. 6d.; also 2 hens same strain, 2s. 6d. each.—Simmonds, 5, Railway View, Old Hobicus Lane, Langley Green, Worcestershire.

CHAMPION Seifert Rollers.—Having selected my breeding stock from Mr. Tweed's bird-room, at great expense, I now offer a few young Greens for sale, same strain as his Palace cup-winners, undoubtedly the finest strain in this country; cocks 15s to 50s.; Lons 5s. Approval.—Low, Moray Place, Elgin.

SEIFERT Rollers of the highest excellence, brothers to my recent silver cup winner, School-masters and contest singers, 30s. to 60s.; these birds are home bred, not imported hot-house plants that die off when you have had them a week or ten days; inspection invited by appointment.—Foulds, 213, Brunswick Street, near Owen's College, Manchester.

TO Roller Fanciers.—I have for sale breeding pairs from 15s., singing cocks from 8s. 6d., hens from 3s. 6d., contest singers at higher prices, all wearing the B.R.C.C. closed ring, and related to my winners, 1st and 2nd at L.C.B.A., 2nd Champion Section, London B.R.C.C., 1st and 2nd Wakefield, only times out this season.—Whittaker, Rose Street, Moses Gate, near Bolton.

THE LITTLE WONDER.

First-class St. Andreasberg Rollers, in full song, 6s. 6d., 7s. 6d.; special Schoolmasters, 10s. 6d.; every bird sent out on approval, and if not approved of your money returned.—W. Garner, 19, Chalton Street, Euston Road, London.

BUY DIRECT OF

Breeder and Trainer. Finest strain of Rollers in the country; trained to perfection, 7s. 6d., 10s., 12s. 6d., 15s. upwards; hens 2s. 6d., two for 4s. 6d.; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster; established 1888.

PURE SEIFERT ROLLERS.

Cocks, 8s. 6d., 10s. 6d., 12s. 6d.; hens, same strain, 4s., 5s.; on 7 days' approval, cash or deposit.—G. Percival, 24, Wellington Road, Wrexham.

IMPORTANT NOTICE.

Notice, my first consignment of St. Andreasberg Rollers has arrived; they are constant day and gaslight songsters, with all the sweetest, softest, and most musical changes of song; water-bubbles, runs, silvery trills, piccolo, harp, and deep bass rolls, etc.; all on six days' approval on receipt of P.O., or deposit the amount with the editor; 7s. 6d., 8s. 6d., 10s. 6d.; perfection. Schoolmasters, 12s. 6d., 15s. 6d., 18s. 6d., 21s.; inspection invited any time.—William Shaw, 97, Essex Road, Islington, London, N.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only 20s.; no fancy prices; Hummel hens 5s. each; a beautiful pair of Hummels for 22s. 6d. St. Andreasberg Rollers, 7s. 6d. and 10s. 6d. each. Thousands of of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

THERE'S ONE POINT

I wish to impress upon your memory—viz.: That if you want to own the best Roller Canary that money will buy, you must have a "Leipzig" Roller from me. There can only be one best in anything, and the best Rollers on the market are undoubtedly those imported by me. I have an immense stock of these pure St. Andreasberg hollow Rollers, all in full song, day and gaslight, with long hollow and double rolls, sweet silvery trills, waterbubble runs, soft roulades, piccolo trills, hollow bell and deep bass tours, Nightingale jug-jug, harp and gong notes, etc., etc., and guaranteed absolutely free from any harsh or objectionable notes whatever, price 7s. and 8s. each. Special Bandmasters, which excel in the deep bass tours, and are a fountain of ever flowing exquisite music, 10s. each. Pure Roller hens, guaranteed same strain as above, cocks, 2s. 6d. each, 4s. couple. Ordinary loud free singing Hartz cocks, often described and sold as Hartz Mountain Rollers at fancy prices, my price, 5s. 6d. each, two 10s., seven 33s. 9d. Hartz hens, 2s. each, 3s. 6d. couple. Every bird is guaranteed exactly as described, and sent on full week's trial entirely at my risk during the whole time, either on receipt cash or on CAGE BIRDS' deposit system, and money instantly refunded in full if perfect satisfaction is not given. Scores of testimonials arriving daily, all speaking in highest praise of these "Leipzig" Rollers. Few published below. "Leo House, Amblecote. Jan. 1st, 1907. Mrs. Pearce wishes to say that the Roller Canary sent by Mr. Gore gives the greatest satisfaction. It is the most beautiful singer, both by day and night." "66, Minto Street Ashton-under-Lyne. Jan. 3rd. Sir,—Roller arrived safe, and commenced singing half an hour after arrival. It is in good condition, and a good songster. Thanks for your selection and attention.—Yours, Wm. Berry." "North End, Cambusbarrow, Scotland. Jan. 3rd. Sir,—Just a line to say I received birds on Tuesday, and am highly pleased with them both.—Yours, Wm. Gow." "4, Gladstone Terrace, Radnor Park, Clydebank, Scotland. Jan. 5th. Sir,—I have instructed Editor to pay you the deposit, as I am greatly pleased with the Roller; he is a good bird and one worth keeping, which says a lot for your honest advertisement and straightforward dealings, for which I thank you very much.—Yours, P. McKinlay." "Feathers Hotel, Hall Street, Rhos, near Ruabon. Jan. 5th. Sir,—Many thanks for splendid Roller you sent me a month back. I am again asking you to send me a Bandmaster, as I am so pleased with the birds you send me from time to time. Again thanking you for your prompt attention and your honesty in dealing.—Yours, Wm. Price." "25, College Street, Swindon. Jan 7th. Sir,—Birds to hand, and quite satisfied with same; they are both good.—Yours, Miss Fowler." "27, Falmouth Street, Middlesbrough. Jan. 7th. Sir,—I have much pleasure in forwarding P.O. for the Bandmaster cock and two hens. Thanking you very much for the good birds you have sent. I am quite pleased with them, and shall want more later on.—Yours, C. Hopkins." The above letters by no means exhaust my stock of testimonials, as I shall be pleased to show bundles upon bundles of them to anyone at any time. All are unsolicited, and very few of them have ever been published. Readers will notice that the above letters are from all parts of the United Kingdom, as I do not believe in publishing those of my local friends, and to prove this I publicly offer to give £100 to any person that can prove that I have ever, either directly or indirectly, solicited a testimonial during the whole course of my 16 years' business career. I earnestly invite all intending purchasers to have a Roller from me on week's trial at my risk, and test it against any of the higher priced ones advertised by others. See British Bird column.

W. GORE, Direct Importer, 219, Sherlock Street, Birmingham.

W. WHITTAKER,

Rose Street, Moses Gate, near Bolton, breeder and exhibitor of Seifert Rollers. My strain has won most of the prizes of the leading shows in England; good song birds always on sale.

I ASK YOU

To give us one trial, and I am sure you will be pleased. All cock birds; 7 days' approval; any not approved exchanged. Yorkshire or Norwich cocks, 6s. 6d., 7s. 6d., 10s. 6d.: hens 2s. 6d., 3s. 6d., 4s. 6d. Real Rollers, 5s. 6d., 7s. 6d., 10s. 6d. No fancy names. Try one. Hens 2s. 3d. Send for list.—West Riding Aviaries, Castleford.

St. Andreasberg Rollers.

Trained to perfection under Nightingale, Titlark, Woodlark, etc., daylight and gaslight songsters; they give satisfaction wherever they go; 6s. 6d., 7s. 6d., 8s. 6d. each; hens, 2s., two 3s. 9d.; Norwich cock Canaries, 6s. 6d., 7s. 6d., 8s. 6d. each; hens, 4s. 6d., 5s. 6d., 6s. 6d. each; Yorkshire cocks, 6s. 6d., 7s. 6d. each; a few Border hens, 2s. 6d. each.—Matt Hopkins, Bird Specialist, 38 and 41 Fylde Street, Preston, Lancashire.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3s. 9d. each; 21s. a stick, try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, January 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"January 2nd, 1907.—Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"January 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Stratford, London.

C. A. LUER,

Largest Importer of Hartz Rollers in the United Kingdom.

SPLENDID HARTZ SINGING COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 7/6, 8/6.

NOTE! These are exactly the same as some of the so-called wonders with fictitious names and no names at all, at 15/- and 20/- each.

N.B.—Some grand home-bred Trute and Seifert Hens, 5/- each; also few Cocks, trained, do., 10/- to 30/-.

READ HARD FACTS.

Best Ever Heard.

"15, Eight Street, Bowhill, Fife, Jan. 4th, 1907. Hartz Mountain Rollers arrived safe, one started singing as soon as unpacked. He is the best songster I ever heard, and I thank you for the straightforward way in business transactions. J. Penman to W. Rudd." "40, Judge Street, Callowland, Watford, Jan. 15th, 1907. I received Hartz Mountain Roller quite safe and in splendid condition. He is singing beautifully, and I am quite pleased with it. J. Munt to W. Rudd." "2, Prospect Place, Quaker's Yard, Glamorgan, Jan 15th, 1907. We received the bird quite safe by first train this morning. Thanking you much. We are highly pleased with it. A. Furze to W. Rudd." "96, Malthouse Road, Crawley, Jan. 18th, 1907. I am pleased to tell you the Hartz Mountain Roller you sent is doing well and sings well. Miss D. M. Bourne to W. Rudd." "Shelbrooke House, Kibworth. Jan. 15th, 1907. The Roller received all right. He sings beautifully, and I am pleased with it. I like the folding cage; it is so neatly constructed and cosy. C. A. Green to W. Rudd."

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

If you want to know about these beautiful and interesting songsters, send for my book
'Profitable Canary Breeding as Practised in Germany'
By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and sole owner of copyright, W. Rudd, or from the office of "Cage Birds."

W. RUDD, The Bird Specialist, NORWICH

SEIFERT AND TRUTE'S

Genuine Rollers are ready; these are all bred in England; fanciers who want to improve their stock should have them; week's approval; 12s. 6d. to £3; hens, cold room kept, 5s.—Corkindale, breeder-trainer, Studley, Warwickshire, England.

14 Days' Free Trial

Allowed on all our Roller Canaries, and we offer you real masterpieces, and certain contest winners at 15s. each, and understand it is impossible for anyone to sell a better or more classical songster even if you pay any kind of fancy price ranging up to 50s. for it. So do not be misled by bluff or bounce, or large displayed advertisements. Send your money to the Editor of CAGE BIRDS, and don't let go your hold on it till you are satisfied. And remember we allow you 14 days' free trial at our risk. No other dealer will do this. Deposit your 15s. at once, and let us send you one of the purest St. Andreasberg Rollers ever imported. We give full instructions with every one, and a recipe worth £5 to any Roller fancier how to keep them in full and perfect song. German Hartz cocks, in full song, like those advertised by others as St. Andreasberg Rollers, our prices 5s. 6d. and 6s. 6d. each. These are called best imported by some dealers. Bow fronted box cages, splendid for singing Rollers, 1s. 9d. each, complete. Always deposit your money, no matter who you deal with. Current price list post free. Anything alive bought, sold, or exchanged.

Northern Aviaries, Preston.

I INVITE YOU

to send a post card for my new illustrated list of Canaries, British Birds, and Cages. I offer you the best of birds at reasonable prices. I pay carriage on all my Canaries, and allow you seven days' approval with every bird, taking all risks (if any), and exchanging any bird that does not give you entire satisfaction. That is one reason I sell so many birds. The superior quality of my genuine highly trained Rollers is too well known to need any comment. Note these prices:—Genuine St. Andreasberg cocks, in full song by day and artificial light, 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d. each; pure Roller hens, 2s. 6d., 3s., 3s. 6d. each; for British bred and contest singing Rollers see my illustrated list. For many years I have led the way with untrained Hartz Mountain Rollers, and always have over 500 to select from. These birds are the best, loud and freest songsters obtainable; an ideal working man's bird. Cocks, in full song, by day and gaslight, 5s. 3d., 5s. 9d., 6s. 3d., 6s. 6d. each; matched pairs, for breeding songsters, 7s. 6d., 8s., 8s. 6d.; for further prices of all kinds of birds, see my new illustrated list. It may interest you to know that I received no less than 164 unsolicited testimonials last week, of which I give you samples. These are genuine 1907 unsolicited testimonials:—"Movesby Parks, Whitehaven, January 4th, 1907.—Received the Roller safe, I am very pleased; he is a champion. He commenced to sing on arrival, after a journey of 260 miles. He is just like a little organ. I would not take £2 for him."—J. Mossop to Miss Storey. "Delph Cottage, Brierley Hill, Jan. 4, '07.—I am well satisfied with the bird you sent me. He is a beauty, whistling day and night."—A. Brown to Miss Storey. "18, Barrs Land, Kilsyth, Jan. 1, 1907.—Roller safe to hand, in excellent condition. This is the third I have had from you, and have been dealt with honesty and uprightness in each case. Thanking you for your selection and promptness."—J. Brown to Miss Storey. "2, Mill Lane, Halstead, Jan. 6, '07.—I received birds quite safe, and am well satisfied with them."—G. Johnson to Miss Storey. "10, Wison Cottages, Cork, Jan. 4, '07.—Bird to hand. It is a grand songster after so long a journey. It surprises me how you can sell such a good bird at the price. I am more than pleased."—W. Bickley to Miss Storey. "4, Stanley Street, Bourne, Jan. 5, 1907.—Received the birds in the best of health. Thank you very much for your kind attention. They are five fine birds, and they sing beautifully."—T. Cunnington to Miss Storey. If you want further proof of the quality of my birds, have one on approval, and compare it with any other. Neat and comfortable travelling cages, 2d. each. All birds carriage paid, on seven days' approval.—Miss E. L. Storey, Crowle, Doncaster.

NOTE.—Show and Stock birds can be had on the Easy Payment System, in Yorkshires, Crests, and Norwich. Birds sent off at once on receiving first payment. Send stamp for full particulars. Illustrated Price List post free. All birds are sent on 7 days' approval.

J. TAYLOR,

9, Northdale Road, Frizinghall,
BRADFORD.

FACTS FOR . . . Fanciers.

E. TAYLOR,

Bird Specialist,

3 & 7, Thornton Road, **BRADFORD,**

is one of the best known men in the above line of business. His operations on the Bird Markets of the country date back from the year 1858. He is therefore no mere mushroom development, and is known both at home and abroad. His transactions have been recognised and patronised by Royalty, and awarded many Gold and Silver Medals in due recognition of the splendidly high-class character of his Stock and Exhibits, and for the marked superiority of his operations as a Breeder, Dealer, Importer and Exporter of Canaries of every known variety. If you are on the out look for Birds, or are seeking Bird Appliances and Specialities of any class, then **E. TAYLOR,** of Bradford (and 22, Thornton Arcade, Leeds), is **THE** man you want to know. Don't make the mistake of mixing up the name of **E. TAYLOR** with that of any other dealer. Send for E. Taylor's Catalogue, and you will receive something well worth studying. You can have it gratis, post free, and with business-like promptitude, and you can pin your faith to its honesty and accuracy. Strictly honourable dealing guaranteed, and no effort spared to give satisfaction all round.

E. TAYLOR, Bird Specialist, 3 & 7, Thornton Rd., BRADFORD.

YORKSHIRES. The largest stock in the World of this variety. Remember that my establishment is the recognised Headquarters by Breeders, Fanciers and Dealers. Never in the whole course of my career have I been in a position to give such value. You will save money by purchasing now, instead of delaying your purchase. My Stock includes Cinnamon marks, Green, clear Buffs, and Yellows. Matched pairs from 7/6, 8/6, 10/6, 12/6 upwards, Cocks from 4/6, Hens from 2/6.

PLAINHEAD NORWICH. The true Bullfinch type, wonderful value in Matched Pairs at 8/6, 10/6, 12/6 upwards, Cocks from 5/6, Hens from 3/-.

CRESTED & CRESTBRED NORWICH. Exceptional fine specimens. Kindly state your wants, I can give you satisfaction at a reasonable price. Properly Matched Pairs at 12/6, 15/-, 20/-, 25/-, etc.

PURE LANCASHIRE. Very moderate in price considering quality. Send for Price List.

LIZARDS. Matched Pairs at 8/6, 10/6, 12/6, etc., Cocks from 6/-, Hens from 3/6.

CINNAMONS. Yorkshire and Norwich Type. Cocks from 7/6, Hens from 3/6, Matched Pairs at 10/6, 12/6, 15/-.

SCOTCH FANCIES. Large number of Cocks from 10/6, Matched Pairs from 25/-.

HARTZ MOUNTAIN ROLLERS. The Genuine Seifert Strain at 10/6, 12/6, 15/- and 21/-. German Songsters at 5/6, 6/6. Hartz Rollers at 7/6, 8/6, Hens 1/9, 2/6.

Light and Dark Goldfinch and Canary Mules.

Linnet and Canary Mules.

Sib Bred Hens, and Selected British Goldfinches, Linnets, Bullfinches, etc.

TRAVELLING CAGES charged 3d. extra.

E. TAYLOR,

Bird Specialist,

3 & 7, Thornton Road, BRADFORD.

Cuthbertson's Yorkshires.

Still to the front, winner of over 100 prizes and cups, including the Taylor cup for third year in succession; grand stock birds and winners for sale cheap; approval; stamp, reply.—Cuthbertson, Manor House, Hughington, via Darlington.

H. W. WALSH, HALIFAX.

If you require new stock kindly let me know, and I will do my best to suit you. Every bird I have for disposal is bred from or is related to my exhibits, which have won at all the leading Yorkshire shows; cocks from 8s. 6d.; pairs from 12s. 6d.; approval, cash or deposit.—Cecil Street.

HIRST'S YORKSHIRES.

Wins at all big shows—see reports; clear, green, or cinnamon-marked cocks and hens, 10s., 15s., 20s. each; guaranteed my own breeding; approval, inspection invited.—29, Charter Street, Accrington.

MUNDELL & SON

Have for disposal some typical Yorkshire cocks from 15s.; hens from 7s. 6d.; feathered like wax.—6, Carlisle Place, Bradford. x263

Shackleton's Yorkshires

Still lead the way. See reports of all principal shows. Some splendid birds for either show or stock; prices reasonable.—Stamp and address for particulars, The Paragon, Girlington, Bradford, Yorks.

CHAMPION YORKSHIRES.

Fine typical birds, ticked and clears, all clean moulted and colour fed; Buff Yorkshire cocks at 6s. and upwards; Yellow cocks 7s. 6d. upwards, all on song; hens, 4s. 6d., 5s. 6d.; pairs, 10s. 6d. upwards. —A. Smith, East Morton, nr. Bingley, Yorks. x263

Ogden Bros. Coruscating Yorkshires.

Winners of over 200 prizes, cups, medals, specials, etc., during 1906, at all the principal shows in England. Have about 100 surplus birds for disposal, splendid birds for either stock or exhibition purposes; matched pairs from 15s. 6d., approval, deposit or P.O., cold room, and every bird bred from or related to our winners, in grand condition. See CAGE BIRDS' ANNUAL or show reports for winnings. —Ashwood House, Dudley Hill, Bradford, Yorks.

BAILEY AND SWANGER'S YORKSHIRES,

Still leading. When we put down we win. See latest show reports, Scottish National, and Wimbledon, and other big shows. Having close on eighty pairs, we have decided to send them out for a speedy clearance at 15s. to 25s. per pair, cocks standard length, and hens feathered like box, sure to give satisfaction; three days' approval, cash or deposit; can be seen any day with pleasure.—24, Sandy Lane, Allerton, Bradford.

Mallinson's Cinnamon Marks

Are undoubtedly the finest stock in the world, our winnings numbering thousands of prizes, specials, and trophies, see reports of Halifax, Great Horton, Eccleshill, Huddersfield, Brighouse, Bradford West. Every bird exhibited by us is our own breeding, and not bought specimens. Circumstances prevent us from exhibiting any more this season, so we have a few first-class birds to dispose of, either for showing or stock purposes, all in good condition; stamp for reply.—D. Mallinson and son, Victoria Street, Huddersfield.

WINS CHAMPIONSHIPS.

I earnestly ask you for trial order to prove I give satisfaction. Sent on week's approval at my own risk; cash or deposit. Having finest stock in West England, and sold some most prominent on show bench, which wins championship and medals. This strain wins 200 prizes. Cocks, 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; clears or ticked hens, 3s., 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; pairs, matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards; Sib-bred cocks and hens for light moulting, same price.—C. Baker, Herbert Street, Bedminster.

CHAMPION YORKSHIRES.

SPECIAL NOTICE.—Write or call at any time and see my splendid lot of long, slim, straight, upstanding Yorkshires; every bird in the primest condition, with plumage like silk; every cock warranted singing; all cold-room bred and kept. I have them in all colours except greens, and all on seven days' approval; cash or deposit; yellow cocks, orange-yellow, 8s. 6d., 9s. 6d., 10s. 6d.; buffs, cocks, 7s. 6d., 8s. 6d., 10s. 6d.; orange-yellow hens, 4s. 6d., 5s., 5s. 6d.; buff hens, 3s. 6d., 4s., 4s. 6d.; inspection invited.—Shaw, 97, Essex Road, Islington, London, N. x 228

Champion Yorkshires.

Splendid type. Standard length. Now is the time to buy Stock Birds. Matched pairs, 8/6, 10/6, 12/6, 15/-, £1. Buff Cocks, 5/-, 6/-, 7/6, 10/-. Yellow Cocks, 5/6, 7/6, 8/6, 10/6. Buff Hens, 3/-, 4/-, 5/-. Yellow Hens, 4/6, 5/6, 6/6.

ARTHUR THOMPSON,
197, BRADFORD ROAD,
Frizinghall, Bradford.

Glantaf Aviaries,
Abercanaid, MERTHYR.

OPINIONS Worthy Attention.

Got Good Value for Money.

"Lodge Road, Knowle, Jan. 16th, 1907. I have great pleasure in saying I am very pleased with the pair of Norwich Canaries. The cock sings splendidly by daylight and gaslight. I am sure I have got good value for money. H. Clayton to W. Rudd."

Passed Expectations.

"Gordon Villa, King William Road, Gillingham, Jan. 18th, 1907. Received birds quite safe. Very pleased indeed with them. Have passed my expectations. M. A. Blackman to W. Rudd."

"Glendale, Leyfield Road, West Derby, Liverpool, Jan 12th, 1907. Last year you sent me a Crested hen. She mated when I had her a week, and two of her young ones are worth (I'm told) £3 each. I now want a few more large birds. M. Powell to W. Rudd."

"Plummer's Plain, Lower Beeding, Horsham, Jan. 15th, 1907. Crested bred cock arrived quite safe to-day. Well satisfied. H. W. Cripps to W. Rudd."

Winners at 20/- per Pair.

"139, Pennant Street, Ebbw Vale, Jan. 15th, 1907. I beg to tell you that I am exceedingly pleased with pair of Norwich received a fortnight ago. I got 2nd prize with the hen. I shall certainly recommend you to my fellow fanciers. G. Powell to W. Rudd." "11, Cleveland Road, Chichester, Jan. 15th, 1907. Bullfinch quite safe to hand. Very pleased indeed with it. H. Miles to W. Rudd."

Never Before, etc.

"15, Portland Terrace, Newhaven, Jan. 17th, 1907. The bird you sent has started singing lovely; and everyone admires. I wish I had sent to you before, as we have spent a lot of money on birds and never had a good one before, although we have given a good price for them. A. B. to W. Rudd." "5, Thomas Street, Prospect Row, Sunderland, Jan. 12th, 1907. Birds arrived safe, and I am satisfied with them. R. Mitchinson, sen., to W. Rudd."

Knock Out of Date for Quality.

"The Gardens, Hylands Park, Chelmsford, Jan. 15th, 1907. Birds arrived safe. I am delighted with them. They knock my other bird out of date for quality. W. Frost to W. Rudd."

Much Better than Expected.

"16, Montpelier Crescent, Brighton, Jan. 17th, 1907. Birds arrived quite safe. They are much better than I expected. A. J. Luce to W. Rudd."

"13, West Road, Portway, West Ham, London, E., Jan. 18th, 1907. I beg to acknowledge the receipt of the two Yorkshire birds. They arrived quite safe, and I am very pleased with them. They are good birds for the money. B. H. Cault to W. Rudd."

Delighted.

"Eddleston Hall, Derby, Jan 17th, 1907. Birds received all right, with many thanks. I am delighted with them. The Goldfinch is so tame, and all in the best condition. D. T. Smith to W. Rudd."

Nothing Like Them for the Money.

"12, Dial Row, Halton, Leeds, Jan. 13th, 1907. Very pleased with the pair of Plainheads. They are going on well. There is nothing like them for the money. Wm. Maltby to W. Rudd."

Honest Money's Worth.

"4, Storrer Terrace, Sheffield, Jan. 14th, 1907. Bird came quite safe, and am glad to say I am well satisfied. I have honest money's worth. It was singing two hours after arrival. J. Morement to W. Rudd."

Read some of this week's prices, and kindly remember you have

THOUSANDS

to select from, which can be seen. See page 15 of last week's "Cage Birds."

Practical Bird Specialist,

NORWICH,

ENGLAND.

NORWICH AND YORKSHIRE

Canaries.—Cock Canaries, in full song, 5s. 6d., 6s. 6d. and 7s. 6d. each, hens 2s. 6d.; sent on approval.—J. Thorn, 37, Plumstead Road, Woolwich. Telephone 365, Woolwich.

BE YE WISE

and send your orders for Canaries or British birds to Miss Storey, Bird Specialist, Crowle. You will thus be sure of receiving extraordinary good value for your money. I certainly have the finest stock of birds ever seen in an aviary at the lowest possible prices. Champion Yorkshires, all clean moulted, cold room bred and kept, feathers like wax, in the best of health and condition; typical cocks, in song, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. each; properly matched breeding pairs, 8s., 9s., 10s. 6d., 12s. 6d., 15s. pair; large cobby high-class Norwich, in all colours, birds of the right type, cocks, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; Norwich hens 3s. 6d., 4s., 4s. 6d., 5s. 6d., 6s. 6d. each; matched breeding pairs, 8s. 9s., 10s. 6d., 12s. 6d., 15s. pair; send for my new illustrated price list of Canaries and British birds. Note what customers say:—"2, Albert Street, Clitheroe. January 4, 1907.—Received bird all right. I am very pleased with it. Thanking you for straightforward dealing."—W. Robinson to Miss Storey. "29, Clifford Road, West Stanley, 5/1/07.—Received bird in splendid condition. Indeed, it is just the bird I wanted. Thanking you for your prompt, honest manner of conducting business."—W. Roe to Miss Storey. "31, Gwerwibayn Terrace, Tylorstown, 4/1/07.—"Kindly forward another pair of Canaries. I cannot too highly praise the quality of your birds; they are worthy of all the praise they get in other people's testimonials. Your mode of packing is excellent."—W. Wilson to Miss Storey. "19, Prospect Place, Neath, 3/1/07.—I am more than pleased with the pair of Norwich, and so are all my friends that have seen them. Please send me another Norwich cock."—J. Rees to Miss Storey. "1, Wottons, Pinhoe.—I am more than pleased with the bird you sent me. I consider you have treated me well."—C. Chamberlin to Miss Storey. I send all Canaries, carriage paid, on seven clear days' approval; send for my new illustrated list, post free. —Miss E. L. Storey, Crowle, Doncaster.

IMPORTANT NOTE.

Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one advertisement.

IF YOU ARE

Requiring Yorkshires, you should try me. I will give you satisfaction both in price and quality. Typical stock birds, all colours, finest blood procurable; cocks from 6s., hens from 4s. 6d.; properly matched pairs from 10s. 6d.; all related to winners. Week's approval.—Kemp, 270, Girlington Road, Bradford.

COWGILL'S YORKSHIRES.

Birds that I have sold have won over 40 1st prizes this season in the keenest of competition, which is proof of their quality. I have still some good ones for sale, for show, or stock; matched pairs from 15s. to 50s., cocks from 8s., hens from 7s.; approval; cash or deposit; stamp reply.—115, Washington Street, Girlington, Bradford.

YORKSHIRE AND NORWICH PLAINHEADS.

Special Notice.—Having selected my breeding stock, have about 100 high-class stock birds for disposal. Cocks from 5s. 6d.; hens from 3s. 6d.; special matched pairs 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. per pair. No better value offered. First orders first choice. Satisfaction guaranteed. Seven days approval. Note address:—Spence (Breeder), Mount Pleasant, Norristhorpe, Liversedge, Yorks.

THE CHAMPION WINNING STRAIN.

Winner of the Championship Diploma, Crystal Palace, 1906. Those who are intending going in for this strain, we are offering some high-class Yorkshires, including Greens, long slim Yellow and Buff cocks, from 10s.; hens from 7s. 6d.; pairs properly matched at 15s., 20s., 25s.; also to dealers, forty or fifty cocks at 5s. each; inspection invited; satisfaction guaranteed, or money returned; seven days' approval; P.O. or deposit; stamp reply.—Gill and Pickup, 1, Cragg Street, Gt. Horton, Bradford.

KNIGHT'S YORKSHIRE AVIARIES.

150 pairs high-class Yorkshire Canaries in all varieties and colours, without doubt the finest selection of this variety in the North; suitably matched and unrelated pairs, 12s. 6d., 15s., 20s., upwards; cold room bred, reared and kept; single birds, proportionately. Few Show specimens from 20s. each upwards; approval, cash or deposit. My 25 years' experience in breeding and keeping Yorkshires only is sufficient guarantee of purity of breed without further comment. Before deciding a purchase, read my newly-published booklet, "The Whole Art of Colour-feeding and Training Yorkshire Canaries," sent post free on receipt of 2 stamps, together with full price list.—Jonas Knight (Author of "The Yorkshire Canary: Its Breeding and Management," published by "Feathered World," 1898), Allerton, Bradford, Yorkshire.

BENNETT'S

Champion Yorkshires, highest awards, ten guinea challenge and other cups, Palace, etc.; finest strain in the world; few properly-matched pairs cheap, same blood as those supplied by me to England's most successful exhibitors of Yorkshire Canaries; price list free.—59, Waverley Road, Great Horton, Bradford.

Winners Cheap.

Having purchased 300 typical Yorkshires, including 30 winners, and promising young birds (this being the whole stock of a noted breeder and exhibitor), I offer every brd for sale at reasonable prices. State requirements. Full particulars free. I can offer exceptional good value; cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s., 25s., 30s.; racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; all birds in excellent condition. Sent carriage paid on seven days' approval. Send post-card for my new illustrated list.—Miss E. L. Storey, Crowle, Doncaster.

Various Canaries.

FEEDERS.—Six good strong common hens, 12s.—Pearson, Greenwich.

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

Kindly thank all applicants who replied to my advertisement. The enquiries are too numerous to answer.—J. TROMANS (Cradley).

CHELLOW DEAN CINDERELLA FUND SHOW.

This cage bird Show was held in the City Council School, Allerton, Bradford, on Saturday, January 19th. Alderman David Wade, J.P., opened the Show, and remarked that he was very pleased to see so many fanciers present who took such an interest in birds. He wished the club every success, and hoped that the gentlemen present would carry on the Show year by year, as the object for which it was held (the benefit of the poor children of Bradford) was a good one. We noticed many old fanciers present during the afternoon, including Mr. Brotherton, Chairman of the Cinderella Fund, Mr. Sunderland, Treasurer, Mr. Bastow, the excellent Secretary, and the Committee, Messrs. Greaves, Crabtree, T. and H. Clegg, Wenock, F. Wood, F. Hammond, S. Dean, and J. Clark, who are entitled to every credit for their share in this deserving Show. Also to be seen were our old friends, J. Knight, E. B. Denton, E. Smith, Gibbons (Manchester), A. Hirst (Accrington), Geo. Wear (Skipton), etc. The judges elected for the Show were Messrs. Ambler, Cowgill, and Mundell, who had made their awards by 12.30, so that all cards were placed and the Show was open to the public by 1 o'clock. A good attendance followed, and we heard from the Treasurer, Mr. Sunderland, that he will have a balance to hand over to the Cinderella Fund of £10.

CL. YELL. YORKS. (15): 1, spl, 3, Radley, first the old champion looking well, grand position, full of quality, well on leg, third rich colour, full of quality, well on leg, grand position, good flights and tail; 2, Shackleton, very slim, full of quality, well on leg, good head, wings and tail; 4, Wood, paler colour, nice quality, well on leg, grand wings and tail; vhc, Crossley, blaze of colour, good long flights and tail; hc, Bailey and Swanger. GREAT YARMOUTH.

This the Twelfth Show of the Hand-in-Hand F.S., held December 26th, was as usual a most excellent exhibition. Congratulations are due to Mr. J. Marshall (Chairman), Mr. Bowles (Vice-Chairman), Mr. F. W. Clarke (Hon. Sec.), and Mr. H. J. Smith (Hon. Treas.). There was a record number of entries, and quality was quite as evident as quantity. Mr. J. Mackley (Norwich), judged.

CHAMPIONS, NOR. PLAIN.: 1, 2, 3, W. Tiptod. BUFF: 1, 2. Tiptod; 3, Leighton. TICK. YELL.: 1, Marshall; 2, Tiptod; 3, Whittleton. BUFF: 1, Tiptod; 2, Marshall; 3, King. CINN. CITY OF BRADFORD O.S.

The Final Show, Members' Competition, for last season was held on January 12th, at the Travellers' Rest. Extra prizes to the value of 30s., 10s., 5s. were offered in each section (open and novice) for most points at the six Members' Shows, three highest birds to count. So tight was the race between the leaders in each section that not till the last class was judged could the winner be declared. The final result was:—F. Ludbrook and Wharton Bros. tied with 85 points for 1st and 2nd, J. Hartley 3rd with 73 points. Novice Section: 1, E. W. Pollitt, 97 points; 2, Hellewell and Wilford, 96 points; 3, T. Fortnam, 95 points. The judge, Mr. A. Spencer (Doncaster), had 62 birds to adjudicate upon, and his decisions were very well received. CL. YELL. YORKS.: 1, 2, Wharton Bros.; 3, Ludbrook; 4, Hartley. BUFF: 1, 2, 3, vhc, Wharton Bros.; 4, Hartley; YELL. BEN: 1, 3, vhc, Ludbrook; 2, hc, c, Wharton Bros.; 4, Hartley. BUFF: 1, 4, Hartley; 2, 3, c, Wharton Bros.; vhc, hc, Ludbrook. NOVICE CLASSES: CL. Byard; 2, 3, vhc, Pollitt; 4, Brown; hc, Hellewell and Wilford. BUFF: 1, vhc, c, Pollitt; 2, 4, Hellewell and Wilford; 3, Horsfield; hc, Ramsden. P. Stansfield Sec.

CINN.—MKD. YORKS. C.C.

At a committee meeting held at Bradford City Show, the Secretary reported that a society to whom we had given patronage had decided not to hold a show, and it was decided to give our patronage instead to the Shipley and Dis. Show, and that the members of the committee guarantee the Cinn. mark classes at the Shipley Show also the Charity Show to be held in Bradford. The result of the voting for Palace judge was in favour of Mr. W. Mundell. The competition prizes, along with those presented by J. Brotherton, Esq., to the C. M. Y. C. C. and Y. C. C., were on view at the Charity Show, and were much admired. It has been decided to have a "smoker," at which to present our prizes; this will be held at the Market Tavern, probably on March 2nd. Messrs. Wharton (Pres.), Greaves (Vice-Pres.), Crabtree and Garnett were appointed a sub-committee to make arrangements. Mr. Gibbons, of Manchester, has given a special for the novice members of the club for season 1907-8, and seeing that the Palace committee have allowed us to select our own judge, I hope all members will make as many entries at the Palace Show as possible.—R. Garnett, Hon. Sec.

QUEENSBURY C.B.S.

An enthusiastic meeting was held at the Granby Hotel, on Jan. 15th. Mr. J. Hartley, of Lidget Green gave a washing exhibition. There were a large number of members and friends present. Mr. Hartley explained the various positions in turn as he put the birds through. After he had finished questions were asked and answered by him in an interesting manner. During the evening one or two members also washed birds.—S. Jagger, Sec.

DARLINGTON C. & B.B.F.A.

First annual meeting, January 1th, at George Hotel, Mr. W. A. Simpson, Chairman. The Secretary presented the balance sheet, showing a good balance in hand, which is very satisfactory, considering the short time the Association has been formed. The balance sheet of our first open show, which was held on December 21th, was also accepted, and showed a balance which will go to the funds of the Association. The following officers were elected for 1907: Chairman, W. A. Simpson; Vice-Chairman, J. Cuthbertson; Treasurer, J. Wildsmith; Auditors, H. Hawkins and G. Telson; Secretary, R. S. Black. It was decided that we hold a pair show at our next meeting on February 15th for Yorkshires, Norwich, and pairs for Mules or Hybrid breeding. Entry fee 6d. per cage; the entrance money and a suitable amount from the Association funds to be paid as prize money in each class. One of our members has promised a special prize in cash for the best pair of birds shown for breeding. Two new members were admitted. A vote of thanks to the officers for their services during the past year brought the meeting to a close.—R. S. Black, Hon. Sec.

Feathered Songsters Should Have

SPRATT'S MIXED BIRD SEEDS.

SOLD IN PACKETS AND TINS.

Send postcard for Samples, also **Free** Booklet on "Canary and Cage Bird Rearing."

PARROT FOOD

Mr. F. H. JUDGE writes:

4, Fryent Cottages, Kingsbury, London, N.W., July, 1906.

I thought you would feel interested to hear of the success I have achieved by using your excellent Parrot Food. I exhibited for the first time at Great Missenden, on July 12th, my green Amazon parrot, in an amalgamated class of English and Foreign birds, and was successful in carrying off first prize. Her excellent plumage was much commented upon, and I attribute this to having always fed her on your food, which sustains her through her moults and keeps her in good health.

SOLD IN PACKETS AND TINS.

Booklet on "Parrot Keeping and Feeding," post free for three penny stamps.

SPRATT'S PATENT, LTD

24 & 25, Fenchurch Street, LONDON, E.C.

JUDGES OF CAGE BIRDS.

The Champion One Day Show of the North.

THE DARLINGTON CAGE BIRD SOCIETY SHOW will be held on **Saturday, November 30,** 1907. E. BRUNSKILL, Secretary.

SINGING CONTESTS.

PENTONVILLE.

At the Bee Hive, Cynthia Street, Pentonville Road, Saturday and Sunday, there was a large gathering of bird fanicers, and handicaps were won by C. Meacock, Mason, Snow and Smith. Earlier in the week C. Meacock also won. A free handicap for Linnets will take place Sunday, January 13th, 1.30. Hand-painted mirror 1st prize.—Timekeeper, BILL MORRISON.

LEEDS.

Linnet Singing at the Old Bird House.—A great gathering of the quality Linnet singing brigade assembled to witness the week-end contest. Twenty-one selected prize winners at various contests competed for four good prizes, given by Mr. J. Booth. The birds were in splendid condition, and gave a grand display. Result:—1st and 2nd prizes, H. Hayes; 3rd, Sam Hardcastle; 4th, T. Stead.—J. MELIA

BLACKBURN LINNET ASSOCIATION.

The Small Bird Protection and Linnet Fanciers' Association Club held their Annual Feather Show on January 19th, when twenty birds competed. The following are the prize winners: 1, spl, Christopherson; 2, Rostron; 3, McGrevey; 4, Christopherson. At the evening meeting a resolution was passed:—"Any person wishing to become a member of the above Society will kindly give in their names on or before Shrove Tuesday to the Secretary, RD. HAYHURST."

NEWTOWN, LEEDS L.A.

Members and friends of the above met on January 20th, in large numbers to witness a contest between fifteen of the best picked birds in Leeds for three good prizes given by Mr. J. R. Saynor. Judges, E. Wood and T. Craine. Timekeeper, B. Jackson. 1st, H. Allen; 2nd, A. Binner; 3rd, F. Allen.—E. WOOD, Hon. Sec.

A CHALLENGE.

Seeing that we, the members of the Prince Albert Inn Linnet Association, Newtown, Leeds, have got no good Linnets equal to the King's Head Association, we are open to sing the King's Head brigade for a supper (on any date), ten to twenty birds each, the winning team to have their supper where they like, the Editor of this paper to pick three paid Judges. The losing team to pay 5s. a piece, so as it will run at 2s. 6d. per head, all-round. Quality singing; match time; one half of the birds to sing at the King's Head, and the other half at the Prince Albert Inn. Hoping they will show up and see what they are made of.—E. WOOD, Hon. Sec.

[We scarcely feel equal to the responsibility of selecting three judges for the proposed contest. Though anxious to assist we must ask to be excused on this occasion.—ED. "C.B."]

HAMMERSMITH.

A Chaffinch handicap was held at the Duke of Edinburgh, Hammersmith, with the following result:—Clements, 4 x 7, 1st; Cook, 3 x 14, 2nd; W. Smith, 1 x 16, 3rd. A good race between the first and second, who were drawn together, and did not open till the last five minutes, when it was a battle royal which was well worth listening to, both doing pleasant song. After the handicap a match was sung between H. W. Cooke and F. Milsom with Linnets, resulting in a victory for the former.—DARKEY LAWRENCE, Timekeeper.

BURY AND DIS. C.B.S.

I wish to thank the Committee and every member for the way they have worked during the past year. I have had occasion to come in contact with members of other societies, but have failed to find any more enthusiastic than our own. We commenced the year with twenty-four members—now we number seventy, and we may look forward to our show of 1907 being one worthy of any society. I may say that a good prize may be offered by one of our patrons for Hybrids, and he is anxious to see some competition.—W. P. TURTON, Sec.

Continued from page 58.

the mixture and put it on a course of Parrish's Chemical Food for a fortnight. Keep warm (not a dry heat) and free from draught. When covering up a cage at night, cover it up all round, but not over the top.

Blue-winged Lovebird.—(1) What is its food in captivity? (2) Is it hardy enough to winter out of doors? (3) Do they breed in this country? (4) Is White-headed another name for the Madagascar Lovebird?—S.G.

(1) The Blue-winged Lovebird, or properly the Passernic Parrakeet (*Psittacula passerina*) is very modest in its requirements, taking little beyond Canary, white and spray millet, a little ripe fruit, and greenfood. (2) These birds are decidedly delicate when they first come over, but with care they become quite hardy; do not put them out of doors till June for the first year, and then about October bring them indoors for the winter; put them out again the following May, and after that they can be left out altogether. (3) I have a remembrance of their having nested in this country (but cannot be quite sure from memory), but they certainly are shy breeders in this country. The late Dr. Russ, however, reared young in his bird-room. (4) Yes, both names refer to the same bird.

A Feather Plucker.—My grey, a good talker, has now no other interest than that of plucking itself till the blood drips. It eats well of biscuit, bread soaked in tea, and also Indian corn. Can you give me a remedy?—"A."

This annoying habit is almost incurable once a bird becomes confirmed in it; it is mostly the result of unwholesome food bringing on indigestion, skin irritation, and other ills, in its train. Correct its diet, and give it a cooling aperient, once or twice a week, so as to keep its bowels moving freely, but not loose, one teaspoonful of Dinneford's magnesia to each ounce of its drinking water. Keep up a regular supply of cuttlefish; also on the days you are not giving the magnesia, colour the drinking water with Parrish's chemical food. Get a box of spermaceti ointment, and rub this on the bare and sore parts, but do not make it too greasy. Have a piece of steel chain about 6in. long fixed to the collar, so that it will hang over the bird's breast. I prevent feather plucking by a wholesome diet, but with a bird in such a condition as yours advertiser's remedies would be worth a trial. Diet:—A mixture of two parts each canary, millet, and oats, and one part each of hemp, sunflower, wheat, and dari; well mix, and keep a supply continually in the cage, also regular supplies of grit, cuttlefish, green food, and ripe fruit. To vary the diet give boiled potato, raw carrot, plain biscuit, nuts, and dry crusts of stale household bread. Do not give sops, slops, or animal food of any kind whatever. Do not use a metal drinking vessel while giving drugs. Note replies to other querists in this and past issues.

What Parrot?—What Parrot would make the most companionable and lively pet? One that would come out of the cage and allow itself to be handled. Would a Single Cockatiel answer these requirements?—L.G.

This is a difficult matter; some Greys, Amazons, and Ring-necks, with others, become sufficiently tame to be handled, but most of them are unsafe in this respect, and are liable to give an unsuspected nip that is decidedly unpleasant. I should hesitate in recommending either of them generally as meeting your requirements, and yet there are individuals of all of them that would fulfil your conditions. I have known many Cockatiels as tame and reliable as you require, when caged young and kept as a pet, but I could not say this for the species as a whole. I should recommend you to try a Tui Parrakeet, or better, a pair; they are beautiful little things, and would, I am sure, fully meet your requirements, if you lead them on step by step. Unfortunately they are not always on the market, and are rather expensive, but they are worth what they cost.

Avadavats Dying.—(1) When these birds came to hand, two were rather frail and shortly began to wheeze, so I put a few drops of glycerine in their water, and soon after they were seized with cramp and convulsions, and two died the same day, and the third the following day. Can you give the cause? (2) When can I put a pair of Budgerigars out of doors that have been flying loose in my sitting room for the past three months?—G.O.W.

(1) These interesting little birds come to hand often tainted with septicæmia and lung troubles as a consequence of the insanitary conditions, etc., on the voyage. These are small birds, and you possibly gave an excess of glycerine in the water. The better plan would have been to make it just saline with Epsom salts, and if the wheezing had continued given half a teaspoonful of Ipecacuanha wine, oxymel of squills, and glycerine in equal parts, in four table-spoonfuls of water, and let this be their drinking water, taking away same once during the day and substituting clear water in its place. In future, separate the frail birds from the healthier ones; keep all in quarantine for a few weeks; give a dose of salts as above, and then slightly colour their water with Parrish's chemical food and feed on usual diet, with the addition of a little slightly damped sponge cake, and a few ants' eggs if they will eat them. All new purchases for the first few weeks should be kept fairly warm and out of draught.

Red-headed Lovebird with Cough.—My bird, kept with Budgerigars, had done well, but I procured a mate, and since then it has developed a cold accompanied with quite a cough, and pants. Have given a little castor oil, and put it in a warmer position, and it seems better.—A. BARKER.

(1) It is always unsafe to put new purchases among stock birds straight away, as without any intent to impose on the part of the dealer (his object being to get rid of them as quickly as possible) many of these birds come to hand in a very delicate and disease-tainted condition; they should always be kept in quarantine for a few weeks before being placed with healthy stock. But it is possibly only a cold your bird is suffering from. See that its bowels keep moving freely, not loose, and use either castor oil or Dinneford's magnesia as required for this purpose. Get from your chemist the following mixture: Ipecacuanha wine, oxymel of squills and glycerine in equal parts; put half a teaspoonful of the mixture to two tablespoonfuls of water, and let the bird have only this to drink till relief is given. Let it have a lettuce leaf, and a little ripe apple or banana if it will eat it. Keep warm, quiet, and quite out of draught; at the same time, it ought not to be in too dry a heat. The bird should have room to climb about if it desires to do so. Do not spray again till it has recovered, and then only on warm, genial days, while the winter lasts.

POST MORTEMS.

Mr. J. North, 435, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a reply direct, 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Canary (F.G.S.).—This bird died of inflammation of the liver and lungs, and as you have lost others, it seems quite possible that this disease has assumed an infection form. Should this be the case, you should run any birds you have left into perfectly clean cages, and have a thorough clear-up and disinfection. The disease, in this form, is incurable, but "prevention is better than cure."

GENERAL.

Answered by the EDITOR.

Cuttings (R. H.).—Thanks for cuttings. Glad to hear that you appreciate CAGE BIRDS.

Lurgan Show (S. M'Collum).—Accept our best thanks for your endeavours in our interests.

Lantern Slides (British and Foreign).—If you require lantern slides of British and Foreign birds try Newton and Co., 1, Fleet Street, London, E.C.

A County Court Case (Constant Reader).—Consult a solicitor. It does not appear to be a case in which we can be of any assistance to you.

What Numbers? (Finch).—The illustrated articles on washing birds for shows appeared in our special issue, No. 198, post free, 4d. Dysart show report is in No. 251, Scottish edition, post free, 1½d.

Bath Show (G. E. Lanham).—You did not send your notice early enough. It could only have appeared in the present issue, and as your show was dated the 24th it would have been quite useless.

Sport of Kings (John B. Waterman).—While deeply interested in your spirited letter, we fear that its insertion in CAGE BIRDS might provoke a controversy entirely foreign to the purpose and aims of this paper.

Society and Glossary (G.H.).—You will find a full list of societies, also a complete glossary or dictionary of fanciers' terms in "Cage Birds' Annual for 1906," which we can send you on receipt of a sixpenny postal order.

Names of Publishers (Reader).—We cannot give you such information, but we shall be pleased to supply any works on ornithology, etc., at precisely the same prices as you could obtain them if you sent direct to the publisher. We can send you "British Birds' Eggs and Nests," by the Rev. J. C. Atkinson, with coloured plates, for 4s., post paid.

"Advertisers Want Results" (J.T.).—The utter worthlessness of such testimony, sent doubtless for the sake of the gratuitous advertisement attaching to it, is more than proved by the fact that even though we have returned their advertisements and twice told these men we do not want their advertisements, they still insist on sending them in to us. This test shows very plainly where their much-boomed "results" actually come from.

Alleged Political Bias (A. R. Coe).—Your letter comes as an unpleasant shock. If there is one thing we pride ourselves upon in this office it is the even balance of political opinion. On the one hand, your humble servant, a believer in High Conservatism and old port; on the other the sub-editor, a fiery Radical, with well-developed Anarchistical tendencies. The Advertising Manager is a believer in Tariff Reform, and the Publisher is a Free Trader. The office boy dreams of developing into a Labour M.P., with "reduction in hours and labour" as the chief plank in his platform. And yet you accuse us of "surreptitiously introducing" political bias. Coe away—life would not be worth the living if we did.

The most serviceable, striking, yet tasteful and economical

LIVE BIRD LABELS

are those obtainable from "Cage Birds."

For the convenience of readers we have had printed a quantity of address labels suitable for use when despatching live birds on journeys by rail, etc. These are printed in red ink, on paper gummed at back, and

LIVE BIRDS

THIS SIDE UP.

WITH GREAT CARE.

If delayed will die.

"CAGE BIRDS" ANNUAL

FOR 1907.

IMPORTANT NOTICE.

To Secretaries.

Secretaries of all Cage Bird Societies should favour us at once with the following particulars concerning their Society:—(1) Full name; (2) Full list of active cage-bird officials; (3) Place of meeting; (4) Dates and time of meeting; (5) Entrance fee (if any) and subscription; (6) Secretary's name and postal address. Members will oblige by drawing their secretaries' attention to this announcement.

To Judges.

We are anxious to make our list of judges of cage birds complete and up-to-date, and ask you to favour us with a postcard notifying any change of address since our last **"ANNUAL"** was published. We shall also be pleased to include the name and address of any recognised judge on receipt of same. No charge whatever is made.

To the Trade.

If you are interested in the cage-bird hobby from the trader's side, send your name and address on a postcard, also stating the particular branch of the hobby catered for (birds, cages, wire fronts, seeds, insectivorous food, medicines, etc.), for insertion in our "BIRD TRADE DIRECTORY." Name, address and three words of description FREE, all words over the three must be paid for at the rate of one penny per word. Name of firm thrown up in conspicuous black type at a charge of sixpence.

Please write very plainly

and note that all communications intended for the 1907 edition of

"CAGE BIRDS" ANNUAL

must reach us not later than Tuesday, January 29th next.

ADDRESS,

Editor, "Cage Birds" Annual, 154, Fleet Street, London, E.C.

West Riding Aviaries writes:—Last week's advt. has done very well; 150 replies already.

Mr. H. Sainter, late of Charles Street, has removed to 57, Royds Street, Stockport Road, Manchester.

I gave you an advertisement some time ago. It did splendidly—am yet doing business as the result of it.—J. HARRISON (Greenock).

REVIEW OF SCHEDULE.

Nantwich.—Feb. 8 and 9. Judges, Messrs. F. W. Heaton and W. O. Barlow. Nineteen classes. Nor. 6, Yorks. 4, A.O.V. 1, Mule 1, Brit. 4, For. 1, Sell. 2. Prizes 10s., 5s., 3s., 2s., and spls. Fee 1s. 6d. Entries close Jan. 28 to F. POWELL, 33, Welsh Row, Nantwich.

MICE

IN THE BIRD ROOM.

Rats, Mice, Field Mice, &c.,

EXTERMINATED BY DANYSZ VIRUS

Discovered and Prepared by
Dr. DANYSZ of the Pasteur Institute, Paris.

When affected with the Virus the Vermin leave their usual haunts and die in the open. The remedy is harmless to other animals and human beings and may be used everywhere with absolute safety.

For MICE only, 1/- per tube.

DANYSZ VIRUS Ltd. (Box 74)
52, Leadenhall St., London, E.C.

At the last monthly meeting of the London C.B.A. Mr. Hobby tendered his resignation as Hon. Sec., and Mr. F. Wade was duly nominated to the vacant post.

British bird lovers will be interested to hear that Mr. F. Turnbor will read a paper on the Yellow Bunting at the next meeting of the City and Suburban A.C.B. For time and place see Club Notices.

Mr. Robert Bald, Secretary Bathgate and Dis. C.B.S., writes:—There have been a few printer's errors in Bathgate Show Catalogue, but the right results appeared in last week's CAGE BIRDS. All prize money has now been paid.

The Lincolnshire F.A. has been re-organised, and by the tone of the last few meetings great hopes are entertained for the future. The Hon. Sec. is Mr. Thos. Howell, and Cage Bird Committee Messrs. R. Sharp and H. Willerton.

Mr. J. Tyson informs us that no less than 36 members have resigned from the London C.B.A., giving as their reason the Association's affiliation with the Cage Bird Union. Fortunately, the same number of new members have joined, so the total of membership is the same as last year.

Will you kindly mention in "Twitterings" this week: "It was not stated in London and Provincial O.S. National Show schedule that competitors in British Roller Canary, Young Bird class, must use the Club cage, or they will not be eligible for the Roller Club specials"?—H. LAMBERT BROWN, Hon. Sec.

At a meeting of the Dulwich and Peckham C.B.S., held January 15th, it was unanimously decided that the membership of Mr. P. G. Sprules should cease from that date. The following were elected members:—Messrs. A. Cunningham, Harris, Dales, May, Luff, Eastwill, Richardson, and Johnston.—W. HODSON, Hon. Sec.

The L.C.B.A. Show.

The next annual Show of the London Cage Bird Association will be held at the Royal Horticultural Hall, Vincent Square, Westminster, on Friday and Saturday, December 6th and 7th, 1907. Secretaries and societies kindly note dates, to avoid clashing. —JOHN TYSON.

Specials at the Palace.

The following Extra Specials are offered at the forthcoming Crystal Palace Show:—Special No. 184, 10s. 6d., presented by the Victorian Canary Society, per F. White, Esq., of Prahran, Melbourne, for the best Norwich Plainhead in the Show; 185, 10s. 6d., ditto, ditto, for best Crest; 186, 10s. 6d., ditto, ditto, for best Crestbred; 187, 10s. 6d., ditto, ditto, for best Cinnamon; 188, bound Vol. "Strand Magazine," presented by G. Newnes, Ltd., for second best Border; 189, bound Vol. "Tit Bits," presented by G. Newnes, Ltd., for second best Belgian; 190, Yarrell's "British Birds," Vol. I. (Newton's 4th edition), presented by J. F. Hills, Esq., for most points in Mr. S. Cook's classes; 191, 2s. 6d., presented by Mr. J. Nadin, for best Lancashire Coppy; 192, 2s. 6d., presented by Mr. W. Hardy, for best Lancashire Plainhead; 2s. 6d., presented by Mr. J. Law, for best vlie Lancashire. The three specials are confined to members of the L.C.A. Members must write L.C.A. on entry form.

The L.C.B.A. Balance Sheet.

The London Cage Bird Association has every cause for self-congratulation on the balance-sheet for 1906, which has just been issued, duly audited by Messrs. Clarke and Boxall. The heavy nature of the work undertaken by the Association during the past year will be familiar to most readers, including, as it did, the great Show at the Horticultural Hall; and under these circumstances it reflects great credit on the Hon. Sec., Mr. W. A. Hobby, and the Hon. Treasurer, Mr. J. Tyson, to come through with a cash balance increased from the £4 12s. 5d., at which it stood in 1905, to £9 2s. 9d. The total assets of the Association reach the fine sum of £61 16s. 9d., the L.C.B.A. being notably rich in challenge shields and trophies, silver cups and bowls, etc. The receipts for the past year total the huge sum of £405 17s. 6d., a gratifying item being £119 19s. 2d. received for gate, stalls, advertisements and catalogues at the Horticultural Hall Show—a result which must have well pleased its promoters. On the expenditure side appears an item of £10 donated to the Lord Mayor's Crippled Children Fund.

Order Your "Bird World" at once.

Mr. J. W. B. Goodwin (Lyddington) writes:—Will you please thank Messrs. E. Collins and W. Earp for their information re the Brent Goose? I am much obliged to them for it.

We learn that Mr. W. Price-Jones, the well-known Welsh exhibitor, has purchased at a good figure the noted jongue Canary-Bullfinch Hybrid, "Invicta," from its breeder, Mrs. Skey, of Plymouth.

Cardiff C.B.S. will hold their annual Concert and Smoking Concert on Jan. 31st, when a presentation will be made to the esteemed Secretary. Contributions towards this from any who may not have had an opportunity of subscribing are invited by F. G. DYMOND, 71, Clive Road, Canton, Cardiff.

All prize money has now been paid in full for the open section of West London F.A. Show. Members who have not received theirs will do so at our next meeting, February 7th. I also wish to thank you for your kindness in giving a prominent position to our advertisement, also a full and good report of the Show. —J. DEWHURST, Hon. Sec.

Mr. E. Houghton (Warrington) writes:—I am very pleased to tell you that Mr. J. D. Leigh, the well-known exhibitor of Crests, Mules and Hybrids, is recovering from a very severe illness. Will all fanciers who have written to him lately please accept these few lines of thanks for the present. All who know J. D. will, I am sure, wish him a speedy recovery.

A sample of "Pannasina," the widely-known medicinal preparation for cage birds suffering from asthma, wheezing, loss of song, and like troubles, and which also helps the birds to come easily through the moult, reaches us from the proprietor, W. J. Hammond, 19, Anstey Road, Coldharbour Lane, London, S.E. It is very simple in use, half-a-teaspoonful being mixed amongst a little soft food and given to the birds fresh daily. Many testimonials have been received, and fanciers in need of such a preparation should certainly give "Pannasina" a trial.

OBITUARY.

MR. B. McCORMICK (London.)

We regret to have to announce the death of Mr. B. McCormick, of Old Kent Road, London, who exhibited British birds largely, and was well-known as a whole-hearted lover of our native birds. Influenza was the cause of his decease. Mr. McCormick had reached the age of 48 years, and leaves a widow and six children, to whom the sympathy of all will go out in their bereavement.

JOHN FARQUHARSON DEWAR.

The death occurred, at the age of 77, on January 21st, of Mr. John F. Dewar, father of Mr. Jas. F. Dewar, the well-known naturalist and judge, of Edinburgh. A full obituary notice appears in our Scottish edition.

Leeds Society have selected Messrs. Battye, Parker Robinson and Robson as judges for Annual Open Show, Friday and Saturday, Nov. 15th and 16th, 1907.

Mr. Anthony Brown (Gateshead) has consented to lecture to the members of Wallsend and Mid-Tyne C.B.A., subject to be "The Norwich Canary and Preparation for Breeding." All fanciers kindly invited to attend Station Hotel, Thursday, January 31st.—JOHN R. EVANS, Hon. Sec.

C.B. Annual Register of Wins.

In response to numerous requests, we have decided to postpone publication of our forthcoming "Annual Register of Wins" until after the Palace Show, so that all the wins for the season may be included. It will appear, accordingly, as a separate publication, part II. of CAGE BIRDS ANNUAL, price sixpence each part. The shilling edition of the Annual will not, therefore, be issued until both parts are ready. But our form must be filled up without delay.

An L. and L.F.A. Appeal.

The members of the L. and L.F.A. are earnestly requested to do their utmost to send a bumping entry to the Palace Show, and find that worthy judge, Mr. S. R. Compston, something to do, also to make the competition keen for the cups and novices' gold medals. Every Lancashire novice has a good chance of securing the gold medal at this Show. They should send for a schedule to the Secretary. Members, kindly do your best and let the whole Fancy see that the Lancashire and Lizard Canaries, and their Association, are well to the front.—H. O'BRIEN, Secretary.

CLUB NOTICES.

No charge is made for notices of forthcoming meetings, but they can only be inserted once. Should secretaries desire to secure immediate insertion of their announcements **exactly as written** they can do so by prepayment at the rate of three words a penny.

Blaydon-on-Tyne and Dis. C.B.S.—Feb. 2nd, at Co-operative Hall, Blaydon, 7.30 p.m.; election of officers. Members all attend.—D. A. Ogilvie, Sec.

Bolton and Dis. O. and R.C.S.—Special Meeting Jan. 28th, 1907, 8 p.m., at Joiners' Arms Hotel, Deansgate. Arrange stewards, etc., for open contest.—J. Stringer, Sec.

Bournemouth and Dis. C.B.A.—Annual general meeting at Headquarters, Quadrant Restaurant, Tuesday, Jan. 29th, 1907, at 8 p.m.—E. Leech and G. W. Jones, Hon. Secs.

Cardiff C.B.S.—Jan. 31st, at Maskell's, Queen Street, 7 p.m. Annual dinner and social, tickets 2s. 6d.—W. Sampson, Sec.

City and Suburban A.C.B.—Monday, Jan. 28th, at the Church Institute, Paddington Street, off High Street, Marylebone, W., 8.15 p.m. Paper on "The Yellow Bunting," by Mr. F. Turnber. All British birds lovers heartily welcomed.—Victor Wynn, Sec.

City of Bradford O.S.—Saturday, Feb. 2nd, at Travellers' Rest, Leeds Road, 8 p.m. Practical demonstration of washing and preparing birds for exhibition, by Mr. James Hartley. Fanciers welcome, and novices especially.—P. Stansfield, Sec.

Coventry O.S.—Feb. 6th, at Crystal Palace, Table Show of pairs Norwich matched for breeding; also members' judging competition, one pair per member only; Birds will be accepted till 7 p.m. day of show, when they must be on the table. Mr. J. Tansley will judge.—G. Turrell, Hon. Sec.

East Bowling and Dis. B.F.A.—Jan. 26th, at Barley Mow Hotel, 7 o'clock Members' Show; election of officers.—F. E. Higgins, Sec.

Federation of C.B. Societies.—Feb. 2nd, at George and Dragon, Market Place, Ashon-under-Lyne. Election of officers, and other important business.—A. Ackroyd, Sec.

Gt. Harwood and Dis. C.B.S.—Jan. 28th, at Late Queen's Hotel, Town Gate, 7.30 prompt. Annual meeting; election of officers; passing of balance-sheet, etc. All members attend.—F. Sharples, Sec.

Greenwich and Deptford C.B.S.—Thurs., Jan. 31st, "Two Brewers," Church Street, Greenwich. Pair Stock Canary Show, and lecture by J. Robson. All friends and fanciers invited.—Geo. Hill.

Hyde and District C.B.S.—Jan. 28th, St. George's School, at 8 prompt. Open Show business.—T. Allsopp, Sec.

Lancashire C.A.—Sat., 2nd Feb., at Rochdale Ornithological Club Rooms, Crook Street, off John Street, Rochdale, 7 p.m. prompt. General business, Palace Show, etc.—Jas. Law, Sec.

L. and L.F.A.—March 2nd, at Spinners' Arms, Oldham, 6 p.m. prompt. Annual general meeting; election of officers; Secretary's report and balance-sheet.—Hector Oliver, Sec.

N.B.B. and M.C.—Jan. 31st, at 25, High Holborn, 9 o'clock. To consider best means to increase the membership. All members invited.—Plumbridge and Carr, Secs.

Rochdale O.C.—Jan. 26th, at Club Rooms, 8 p.m. All England Show business.—J. Butterworth, Sec.

Rotherham C.B.S.—Jan. 26th, at College Inn, 8 p.m. Annual meeting for election of officers, etc.—Ducker and Twigg, Secs.

Seaham Harbour and Dis. C.B.B.A.—Jan. 26th, at Station Hotel, 7 o'clock.—J. M. Nicholson, Sec.

Sunderland C.B.A.—Feb. 2nd, Fawcett Street Cafe Smoke Room, 7.30 p.m. Minutes; 2s to contributions decreasing; motion for marking and ringing birds for exhibition.—F. Gordon, Sec.

Tamworth and Dis. C.B.S.—Feb. 2nd, 1907, at College Lane School, 7.30 p.m. There will be a variety of birds on view. All members and intending members attend this meeting.—J. E. Brown, Sec.

Wallsend and Mid-Tyne C.B.A.—January 31st., Station Hotel, Wallsend, 7 p.m. Lecture by Mr. Anthony Brown on "Norwich Canary and Preparation for Breeding." Fanciers invited.—John R. Evans, Sec.

Warrington C.B.S.—Jan. 31st, at Blue Bell, Horsemarket Street, 8 prompt. Arrangements for Members' Show in Feb., and election of officers. Members particularly requested to attend.—J. D. Leigh, Sec.

Wibsey and District C.B.S.—Members' Show, Jan. 26th, at Headquarters; birds staged at 6; classes as before; judge, Mr. J. Hodgson.—W. E. Norton, Sec.

Wolverhampton C.B.S.—Jan. 29th, at Vine Hotel, 8 p.m.—F. Hokes, Hon. Sec.

Yorkshire Union of O.S.—Jan. 26th, at Oddfellows' Hall, Thornton Road, Bradford, 5 p.m. Contract for Novice Medals and other important business.—F. Armstrong, Sec.

The United States Department of Agriculture (Bureau of Plant Industry) has written to Mr. J. W. Ramsden for a sample of his "famous Spanish paprika pepper."

Mr. C. Fox, Rothwell, Leeds, writes:—"Will you thank the many readers who replied to my advertisement in CAGE BIRDS. I was inundated with replies from all over the British Isles, which speaks well for the circulation you have."

Great National Cagebird Show, Crystal Palace, 1907.—R. A. Newley begs to announce that he will have a fine exhibition of bird cages and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visiting is respectfully invited. Address all communications to R. A. Newley, 24, Stockwell Green, London, S.W.—(ADVT.)

The Best Shilling Handbook on Canaries Published

THE

BRITISH CANARY.

By that well-known Judge, Expert and Journalist,

C. A. HOUSE.

This thoroughly practical book treats of the Varieties, Characteristics, Breeding and Management of the Canary, and has reached its fourth edition. We have had it illustrated by "Cage Birds'" artist-in-chief, Mr. W. Norman, and it is now absolutely the best Shilling book on the subject procurable. Post free, 1/2, stoutly bound in cloth, 2/-, post free.

"CAGE BIRDS," 154, Fleet Street, London.

C.B.'s "GREATEST" BIRTHDAY NUMBER.

WHAT READERS THINK ABOUT IT.

We beg to tender sincere thanks on behalf of our staff and selves to those readers who have so cordially acknowledged the efforts made by us on behalf of the cage bird Fancy. A few of the many encouraging and kindly comments received are printed herewith. With future numbers, and the same generous measure of support extended to us, we shall hope to further improve the status of this journal and increase its attractiveness to cage bird keepers of every class.

Very pleasing.—G. Rickings (Bristol).

A real treat. No fancier should miss it.—C. Mulligan (Sligo).

A real marvel.—A. Livesey, Hon. Sec., Bingley and Dis. O.S.

Monster value in the plates themselves.—F. Cockerill (Stockport).

This week Cage Birds is extra, and surpasses all others I have had. The plates are splendid. —H. Halsall (Southport).

Birthday Number a bumper. When are you going to finish? The progress has been wonderful.—R. Sharp and Son (Lincoln).

The best issue you have yet presented to your numerous readers, and reflects great credit upon you and your very able staff.—Geo. Peacock (Gravesend).

The Birthday Number was very good. Coloured plates splendid, and Calendar simply grand. The Bullfinch set it off to perfection. —F. Barwick (Ripponden).

"Many happy returns." You have knocked us clean over this time with surprises. Your Birthday Number would be cheap at 1s.—C. G. Martin (Haverstock Hill).

"Grand" Birthday number; all my friends here are pleased with it, especially the coloured plate, "Stars of the Season," with the inset of good old Norwich.—G. Wright (Norwich).

Congratulations on Birthday Number! It is excellent, coloured plates are beautiful. Cage Birds is without a doubt the one and best advertising medium placed before the public.—W. Harrington and Sons (Cardiff).

Congratulate you on the magnificent birthday number of Cage Birds; it is simply grand, nothing ever like it before; glad to say Cage Birds is taking on here, and wish it all the success it deserves.—J. Hicks (Holsworthy).

As one of your workers and well wishers, I must say the Birthday Number is wonderful, and I feel highly delighted to observe the very rapid strides Cage Birds has made. By united efforts no doubt still greater things will be accomplished.—John C. Barnes (Sheffield).

I congratulate you upon the excellence, artistically and otherwise, of your Birthday Number and supplement. By the bye, the border to the plate of Hybrids is a bit cryptic. "Industry and wisdom leading to wealth," eh? J. S. Clinch (Liverpool).

The splendid Birthday Number you have just issued is a perfect treat for all bird-lovers, for the coloured plates alone are worth double the money. It is really as little as we can do to push forward the sale of this magnificent paper as a small recompense for the good value which you give us.—H. Hill (West Bowling).

A revelation of sparkling beauty! Well may we bird fanciers mention it as our finest Journal on the subject. And the coloured plates, well, they are superb, and well worth the 3d. each, especially the Foreign Bird plate, which is a masterpiece. Many happy returns! —H. Rees (Clapham).

I cannot realise how you have got it to such perfection, everything in the right place. Art plates! there never were such on record. The Calendar is so neat and plain that even the poorest of scholars could understand it. I cannot see how you could have done it for the price; it is honestly worth double. You will still go forward in prosperity.—W. R. Berkshire (Balham).

Plates are simply perfection, and do you and staff the greatest credit. The Foreign Bird plate was a work of art, well thought out. The Bullfinch is without doubt a "masterpiece." The Norwich and Yorkshire are a splendid pair, well-drawn, and do Mr. Norman great credit. I am sure all your readers will be pleased with this, the greatest of all "Birthday Numbers."—Jos. Jones (Dudley).

The splendid Birthday Number is beyond doubt the finest contribution the weekly Press has ever given to bird lovers generally. The taste of all sections has been well considered, and equally liberally catered for. As a printer, I can say the supplement and the plates are executed on a high grade, and are worthy examples of our noble art as practised at the present day. I trust this last production will bring a large influx of new patrons to the gallant banner of Cage Birds, and I feel sure it will.—J. H. Henstock (Ashbourne).

I hasten to congratulate you on the arrival of Cage Birds sixth Birthday Number, apparently more interesting than ever. What a magnificent supplement! Great credit is due to each and all your staff, not forgetting Mr. H. Norman and H. Goodchild for their work, which deserves high credit indeed. I can picture some scores of friends this morning with a gladsome mind and glad heart scanning their beautiful copies, which will come as a surprise to thousands of bird lovers. Wishing Cage Birds a prosperous future.—William Dean (Liverpool).

Your Birthday Number quite surpasses anything of the kind produced by a Fancy journal. The supplement and coloured plates are equal to, and in some respects, superior to, the publications devoted solely to art. If Cage Birds increases in size at the present rate, I can quite see that the normal weekly number will be the size of, let us say, the "Field," and the art supplement a small edition of the "Studio." As a reader from No. 1, I have watched with interest the marvellous growth of "C.B." and quite anticipate that the "Bird World" will reach its public, and so induce a greater number of non-fanciers to enter into our fascinating pastime.—David Hall (Brixton Hill).

I was charmed with Birthday Number of Cage Birds.—Oscar Th. Schmitt (Chester).

Very pleased with Birthday Number. You improve with every issue.—A. E. Richardson (Brighton).

Very pleased with your Birthday Number. It cannot be bettered.—John Challenger (Porth C.B.C.).

Last week's Cage Birds was certainly the best ever produced. The calendar was simply perfect and the plates were splendid.—Howard Goodwin (Edgbaston).

The coloured plate called "The Stars of the Season" is one of the best that has ever been published. I shall not give dada any peace till he frames it.—Alice Cox (St. John's Wood).

Excellent Birthday Number, must have been an eye opener for readers of Cage Birds. The plates alone are honestly worth 3d. each, and cheap at that.—A. Watson, Hon. Sec. Civil Service F.A.

I am a old subscriber to your grand bird paper, Cage Birds, and think it gets better every week. As for yesterday's Birthday Number, I cannot find words to say how greatly I enjoyed it.—Mrs. Alice Eddy (Penzance).

Once more we have to thank you for all the good things you are doing for us. When one looks at first issue, it hardly seems possible that such strides could be made in such a time. Well, we surpass ourselves sometimes.—W. Spillman (Devonport).

Coloured plates grand—this week Cage Birds has indeed increased by jumps and bounds; there is a lot of difference between now and the first number. I may say I have taken it from No. 1, and always look forward for Friday for Cage Birds.—Hugh Tyrer (Warrington).

Last number defies competition, especially the Foreign Bird plate. Copies, here in Luton, were at a premium. Long may "C.B." live, and give us poor fanciers, who cannot get to see the places where the foreign birds live, the benefit of other's experiences!—E. Cherry (Luton).

Congratulate you upon the success of the 1907 Birthday Number. The plates and supplement far surpass any previous ones. In fact if these are going to continue to improve the same as they have been doing, I cannot imagine what we shall get in a few years time. I am very pleased the birthday does not happen on the 29th of February. May Cage Birds continue to prosper.—W. H. Nobbs (North Walsham).

Congratulations! The Calendar and coloured plates are splendid, whilst the supplement is a veritable work of art; the whole forming a magnificent production, and all for a modest three-d. Present day fanciers have much to be thankful for in having a Journal all on their own. I look forward every week for my Cage Birds, by which I keep in touch with the doings of the West and the Fancy at large.—Jas. H. Halliday (Plymouth).

Allow me to heartily congratulate you on producing such a magnificent number. It is the cheapest threepenny worth I have ever seen. The coloured plates are perfect, and your artist seems to improve every plate he paints, though goodness only knows there is precious little room for improvement. I'm now thinking what *next* year's Birthday Number will be like. You cannot better last Friday's at the price.—A. Morris (Ilford).

I should like to take this opportunity of congratulating you most heartily on the magnificent Birthday Number of Cage Birds. It is a splendid production—the coloured plates are superb, and the other matter most interesting. It must have cost a pile of money to produce, and I am very pleased to notice how well you are supported by advertisers. They evidently know when they have secured a good medium for doing business.—G. E. Wilkinson, Hon. Sec. Nottingham O.S.

May I say how delighted I was with your grand Birthday Number? It certainly outshines all previous issues by a long chalk. When I received your very first issue of Cage Birds, I wrote you a note which you kindly published in the next week's number, predicting a great and successful future. But I never expected it to reach the high pinnacle to which Cage Birds has attained. May continued success be your portion is my sincere wish. Last week's issue is nothing but what you promised—magnificent.—F. J. Weaver, Chairman Wolverhampton Cage Bird Society.

Hearty congratulations on your magnificent and instructive Birthday Number, which you may justly claim as a work of magnitude. The artistic coloured plates are superb. Calendar is life-like. Bullfinches really natural amongst the hawthorn blossoms. "Rare exhibits" make my mouth water and cause me to think of summer and my rambles amongst them ..... Your artist has the natural position of each bird portrayed to perfection. It makes one listen for the notes and call of each, and especially does this refer to the Reed Warbler. Long may you be spared to lead the Cage Bird Fancy with such works of art!—J. Patterson (Chirnside).

Your Birthday Number was splendid.—B. Fisher (Wandsworth).

Your Birthday Number grand; shall have plates framed.—H. Gray (Lee).

A treat it is, a pity we cannot have a number like it more often.—W. F. Hayhurst (Carnarvon).

Number is truly excellent; the coloured plates are really fine, and worthy of a frame.—Miss Falding (Heaton).

Many thanks for a truly magnificent number, which leaves all other records behind.—Claude St. John (Dudley, Worc.).

Beautiful number this week. It is simply marvellous, where are you going to get to in the finish?—Wm. Hornley (Leeds).

Plates this week are really grand, as well as instructive, and the Birthday Number a grand treat to all.—H. Brown (Tamworth).

Delighted with the Birthday Number. The coloured plates beautiful; I am going to have them framed.—H. Allsop (Abersychan).

Your magnificent Birthday Number exceeds all expectations; it's truly wonderful and reflects the greatest credit on all concerned.—F. J. Green (Redhill).

Congratulating you for such a splendid Birthday Number. I feel sure it will result in increased circulation and sales. Best wishes.—A. E. Gay (Selly Oak).

Congratulations on Cage Birds birthday. The first number compared with the last is like comparing a perfect Tit with an Ostrich.—S. C. Roberts (Emsworth).

The Birthday Number is quite a marvel, and should charm every bird lover or anyone who is interested in the Fancy. It is absolutely beautiful.—G. H. Barnwell, Hon. Sec. Harrogate C.B.S.

Once more accept congratulations on a very healthy birthday with many happy returns. Another tremendous improvement. The youngster is getting very strong.—John Harris (Newcastle).

Cage Birds is a grand success, this week especially. The coloured plates have beaten any we have had before, and we have had extra good ones no mistake.—Ernest East (Rhondda Valley).

Congratulate you on your Birthday Number. It is not often I speak of them, but I cannot refrain this time as the production is "one of the best" I have seen; the plates are very fine. —J. A. Reece (Bristol).

I must congratulate you on the excellence of your Birthday Number of Cage Birds, and also Mr. H. Norman, for the way in which he has drawn my clear yellow champion, which is hit off to perfection.—J. F. Bishop (Radcliffe-on-Trent).

Your Birthday Number could not be excelled. It is marvellous how you can issue such beautiful work at the price charged. It is most encouraging to the Fancy. Your wonderful paper, Cage Birds, deserves every success.—T. Brown (Netherton).

Congratulations on your Birthday issue. It is simply grand; the plates are something worth looking at. In fact, the number is a bumping threepenny worth, and one plate worth more than that itself, without the paper, etc.—W. Simpson (Fort William, N.B.).

The Birthday Number of Cage Birds is really grand. I don't know how you manage it. It is all the talk about here. With every one I meet the question is: Have you seen Cage Birds? All are delighted. The "Bird World" is also bright reading.—H. Moreland (Falkirk).

I have been a reader for three years, and have found Cage Birds of great value for the money, so much so that I have done what I could, and have been successful in getting a few new readers, who, along with me, claim it to be the best birdy paper. It stands second to none.—W. Methven (Govan).

Allow me to express my appreciation of your Birthday Number. The supplement, in my opinion, far exceeds anything you have previously turned out, and I don't think it possible to improve upon. The coloured plates and calendar must be a special treat to all bird lovers. Wishing "our" paper still further success.—James Peters (Barrhead).

Your Birthday Number to hand is certainly a treat, and is the best I have ever seen. I may add that I advertised Siberian Hen Bullfinches in your paper last week, and I had only eleven to sell, but I received over 200 applications for same. I only answered those who enclosed stamps. If I had answered them all I should have been out of pocket with so much for postage. Wishing you every success. —J. Walsh (Blackburn).

The sixth, and so far the largest and most successful, Birthday Number of Cage Birds has just been published; price threepence. With this issue are given a sixteen-page art supplement, two splendid coloured plates entitled "Desirable Aliens" and "Stars of the Season" respectively, and also a tri-coloured and exceedingly attractive calendar for 1907. Such a large number establishes something in the way of a record for a specialist journal.—"The Dundee Courier."

A stormer.—G. A. Hamilton (Peverell).

"A real beauty."—Chas. Smith (Blackburn).

"C.B.'s" Birthday Number is grand. I have taken Cage Birds for nearly two years and it is the best.—J. Linstead (Surbiton Hill).

I can only find one word of praise for that great Birthday Number of Cage Birds, and that is *perfection*.—A. H. Jones (Leicester).

Supplement and plates are magnificent works of art, and are indeed a great credit to those responsible for their production.—W. C. Freeman (Hatfield).

Last week's Cage Birds was exceedingly grand throughout. A decided bargain at such a low price. Well worth double the money.—G. E. Lanham (Bath).

A splendid number. Coloured plate, Calendar, and Art supplements are all magnificent. The fanciers in this district are all highly pleased.—W. Stafford (Stockport).

Many thanks for the life-like illustration of my Norwich cock on Cage Birds' front last week. I consider the Birthday Number a marvel for the price.—W. R. Miles (Chichester).

Permit me to express my appreciation of the excellent article in this week's Cage Birds by my fellow townsman, Mr. Cochrane, also the still greater excellence—if that be possible—of the illustration on page 1 of your supplement. —Jas. Hay (Edinburgh).

Your paper this week is just charming; regular "living pictures." I showed the plates to some of my non-fancier friends, and they all agreed that your Mr. Norman should have R.A. after his name, and I am sure he deserves the honour.—J. Osborne (Sligo).

Birthday Number this week is very pleasing. Thanks for the beautiful calendar and gorgeous coloured plates. I am sure we all appreciate the wonderful way in which you keep your paper second to none, and so interesting and instructive.—Geo. F. Hope (Edinburgh).

Allow me to congratulate you on your magnificent Birthday Number. It augurs well for the continued success of Cage Birds. One word of praise to your artists for the refinement, completeness and exactitude shown in their coloured plates.—Thos. Bennett (Great Horton).

Your splendid Birthday Number was beyond all expectations. It is a grand number; the only fault that I can find is that it is too much for me to read in one week. How can we have so much for our money? Wishing you every success and well wishes.—E. W. Sellick (Ashbourne).

FIRST PRIZE AND SPECIAL

For best number. Beats all previous numbers by a long way.

Hearty congratulations, Birthday Number to hand. Plates (superb), supplement (full of interest). Well deserves the support of all bird lovers; let us tell it out to others.—F. Walter (Worthing).

We expected something good for the "Birthday Number," but this beats all expectations. I am just off to the picture frame makers with the "Stars of the Season." H.N. has certainly excelled himself this time. Wishing you still greater success.—A Fanciers' Wife (Chorlton-cum-Hardy).

A few lines to wish you "Many happy returns." Your Birthday Number cannot be equalled by any other paper. The coloured plates and calendar are perfect, as they always are, and great credit is due to your artists and staff. Hoping you will continue to prosper, and still be able to beat all records in the future.—John Forster (Durham).

Your magnificent Birthday Number is a treat, also the supplement, and the coloured plates. Why they cannot be described! For they get better! The Calendar is a gem and worth fixing up in any home. I have taken "C.B." since the third week of publication, but there has been some great improvements since then, and from what I can see about "C.B." you mean to go on with improvements.—Jos. Smith (Mansfield).

We live in a record-breaking age, and you are truly marching with the times. The Birthday Number of Cage Birds is indeed a revelation, crammed with good things. Fanciers' who miss it will lose a real treat. I found the many articles so engrossing last Sunday afternoon that I was compelled to forego my usual siesta, and I can assure you it must be something very exceptionally good to cause me to do this! The coloured plates, too, are charming works of art, and made up into splendid pictures for the bird-room. I sincerely hope the great enterprise you have shown in the production of this gigantic threepenny worth will be fittingly rewarded.—John B. Waterman (East Dulwich).

Your valuable paper, Cage Birds, is the guiding star of the Fancy, what with its coloured plates and almanack. The Norwich and Yorkshire plates were simply grand, and by the time you receive this letter, will be hanging in my room in a handsome frame. Your artist, Mr. A. Norman, is without a doubt an expert with the paint brush. The Cardinal in the Foreign Bird plate struck me very much, and when I start foreign bird keeping, he will be my first to buy. I read in Cage Birds the week previous to the Birthday Number that you would beat all previous efforts, and, my word, you have done so! There is not a bird paper in London or elsewhere to equal the old favourite, Cage Birds.—Arthur H. C. Lego (Porth, Glam.).

HUNDREDS OF COMPLIMENTS AND CONGRATULATIONS CROWDED OUT.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions rc advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, querics must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are reccived the better attention they are likely to have.*

(7)—*Qucries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on rceeipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answercd. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Norwich Plainheads.—**J. H. Payne.** Yorkshires.—**H. W. Battye.** Crests & Crestbreds—**W. E. Greeves.** Cinnamous & Miscellaneous Canary Queries—**J. North.** Border Fancies—**J. Patterson.** Scotch Fancies—**R. Wright.** Lizards **Barker Clegg.** Lancashires—**S. R. Compston.** Greens—**S. Hadwin.** Belgians—**W. B. Cobb.** Rollers—**F. A. Lester.** British Birds, Mules & Hybrids—**G. E. Weston.** Foreign Birds—**Wesley T. Page,** F.Z.S., M.B.N.H.S., &c. Park and Lake Aviculture—**Frank Finn,** B.A., F.Z.S., M.B.O.U. &c. Wild Bird Life—**H. Norman.**

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Pairing Information (Two Year Reader).—Yes; you can pair your yellow Cinnamon cock to one of the variegated Norwich hens, if you are not particular as to the colour of the progeny. You will probably get the majority self colour, either Cinnamon or green. If you are going to pair up the other hen, I should advise you to select a mate for it which is quite clear.

Hen Wheezy (R.H.E.).—Give your Norwich hen, in its drinking water for a fortnight, fifteen drops of syrup of tolu and ten drops of glycerine, well mixed. Keep her in a warm and bright corner away from any draught, and cover over at night with a warm cloth. Feed on plain Spanish canary, but on three days in the week give a small teaspoonful of German rape and best English linseed. It is impossible for me to tell you the cause of its illness, hut tbe probability is that it has at some time or other caught a severe cold, and not being treated for it in time, it has developed some ailment of the bronchial tubes.

Out of Condition (Mr. Plainhead).—Keep your bird in a box cage and in a place where there are no draughts. Cover over at night with a warm cloth. Give three times a week a small teaspoonful of crusbed biscuit and grated egg, to which add six drops of Parrish's chemical food. Let the staple seed be best Spanish canary. Twice a week give a little of the following mixture:—Hemp, inga, German rape, and linseed, also give occasionally a pinch of maw seed. Let bim have now and again a piece of boiled carrot. (2) No; I should not rccommend you to use oilcloth for the bottoms of cages. You would find coarse sawdust suit much better. Of course, you would let tbe birds have some sand or grit.

YORKSHIRES.

Answered by H. W. BATTYE.

Shedding Feathers (W.R.P.).—Loose, soft, eross, French, or whatever kind of moult people like to call this unnatural way of moulting, trouble many bird-keepers at this season of the year. Much of this trouble is brought about by changing into fresh rooms, fearing they cannot stand the cold, or, in other cases, by introducing heat into the room they are kept in; or again, in bringing a bird into the living-room, where the temperature is continually varying. Another cause is stopping up all means of ventilation, and then burning stove or the gaslight in bird-room for an hour or two at night. Tbe birds are bound to inhale poisonous air, and when this is the case is there any wonder at birds getting wheezy? Yet another cause is damp birdrooms and draughts. "Prevention is better than cure," but when a bird has got into this loose moult I am a firm believer in the policy of moulting it through by forcing a proper moult; this is better than tinkering with a lot of nostrums. One of the best means to induce a thorough moult is, if it has been kept in a cold room, to take It into a warm, and if it has been kept in a warm room to put it into a cold one. Feed liberally on egg food and as much maw seed as it will eat, in addition to its ordinary seed, until the bird has got rid of most of its old feathers; then curtail the supply of maw seed and egg food and give a few drops of chemical food on the egg food, or a few drops of tincture of steel in its drinking-water. Give either of these for a week or two, but, in any case, it will not be in breeding condition until well on into the season, say June or July. To pair a cock to a hen when he is not in proper breeding condition simply spells disaster; better wait longer and have the cock thoroughly fit than waste the hen's strength in laying and trying to hatch unfertile eggs. (2) Whether ammoniated citrate of iron and ordinary citrate of iron are one and the same thing I am not prepared to express an opinion, as I am not a chemist.

(The two drugs mentioned are different preparations, and used for quite different purposes.—EDITOR.)

Pecking Feet (I.F.M.).—I do not think there is anything seriously wrong with your bird; you may have been giving it a too stimulating diet, but you do not say how you feed. If you have been giving, say, egg food and hemp seed, stop anything of this kind and keep on plain white Canary seed for a fortnight, and give ten drops of limejuice in its drinking-water for the same length of time. Or you may not have suitable perches; these should be of soft wood, and not less than half an inch wide, and rounded at corners. Or it may be merely a mischievous habit; if so, immerse its feet in a strong solution of quassia chips. Scald the chips with boiling water, let the decoction cool, hold the bird's feet in it for five minutes; this will make them taste bitter and may break it of the habit.

Loose Moult—Mating Geeens (C.R.).—(1) Keeping birds in a living-room is not a thing I should advise where it is avoidable, but as you say your other birds are healthy, evidently the hen that you bought in September is in the loose or soft moult, and for that I should advise change of temperature. Take it from the warm corner of your living-room and put it into a cold room, giving a little egg food and maw seed daily in addition to its ordinary seed. Please see reply to "W.R.P." (2) For the noise your bird makes you may try twelve drops of glycerine and twelve drops of good whiskey, fresh daily, well mixed in the bird's drinking water. (3) From the description you give of your pair of birds you may pair them together when the time comes, with confidence that they will be all right. You will probably get birds of good colour and quality, and if the type is right you will be well satisfied with your youngsters.

Another Loose Moult (J.M.).—Please see reply to "C.R." in this issue, as your birds seem to be in a very similar condition. You might, perhaps, with advantage, read also reply to "W.R.P." as well, as all the three of you seem to be having the same kind of trouble with your birds, viz., cross moult.

Temperature of Room (New Reader).—Yes, but you must be careful to feed them liberally for a week or two on egg food, in addition to their usual seed, after you have removed them into the co'der room. Make a special point of removing them early some bright morning, as this will give them a little time to get accustomed to the change of temperature; for a week or two cover the cage front every night with a thin cloth. If you follow the above directions, I don't think your birds will be any the worse for their change of quarters.

CRESTS AND CREST-BREDS.

Answered by W. E. GREEVES.

Mating Crested Canaries (Beginner).—Mate the yellow wing marked Crested cock with a clear buff Crest-bred hen or one very lightly marked. When mating yellows with buffs, always get buffs with long dense head feather. The yellow Crested cock, if bred from good birds, you might find useful as a breeder; mate him to a big buff hen with plenty of head feather, either clear or marked.

BORDERS.

Answered by J. PATTERSON.

Hen Unwell (I.L.).—Your Border hen has evidently caught a chill, and both her bowels and liver are affected therefrom. Feed on plain canary seed (no rape), and twice a day, for a week, as much milk sop as she will eat; throw away any not eaten each time you renew. Put a little milk into a cup, place the cup in a small saucepan with a little water; put on fire, and bring it to a boil; let cool, then add ten drops of brandy; dip a piece of bread into it, squeeze out some of the milk, give a good dusting of powdered chalk and a little maw seed, and place in wires of cage. Give cold tea to drink one day then add to drinking water five drops tincture of steel and ten tincture of quinine; give fresh daily for one week, withdraw the sops, and only give every other day; give a half-teaspoonful egg food next day, made up with Osborne biscuits, add three drops chemical food mixed well through it; give in water instead of the steel and quinine ten drops syrup of buckthorn and five drops tincture of gentian; any time the bowels are relaxed fall back on the sulphate of iron. Keep her warm, and allow her a good hop in a large flight if possible.

Pairing (Alfred).—Much of your success will depend on your birds being properly matched so as to produce their young up to the standard type, etc. I am afraid I cannot thoroughly advise you without seeing the birds, but from your description I should say pair up the foul yellow cock to No. 6 buff hen, the cock being rich in colour will make up for her deficiency; No. 2 eock to No. 2 hen, the careless wing carriage in cock will be well counterbalanced by the hen; No. 3 ticked yellow cock (if bred from marks) to your No. 4 evenly marked buff hen; No. 4 eye and wing marked cock to No. 5 uneven yellow hen; No. 5 green cock (marked bred) to No. 3 clear bred from marks; and No. 6 cock to No. 1 hen. The great point is always to look out any fault in your cock, and try and make it up with a hen excelling in any point wherein the cock may fail. (2) Choose all hens as true to type as possible, tbe eocks will supply tbe colour.

LIZARDS.

Answered by BARKER CLEGG.

Hens Dull and Moping (W. Nix).—The condition of your Lizard hens may easily have come about through insufficient cage room and imperfect ventilation. You must allow them more exercise, and fresh air in the room each day. Give a dose of Epsom salts, as much as will lay on a sixpence, to a half glass of soft water (it would be better for you to boil the water and use when cold). Allow this one day a week only, early in the day at this time of the year. Syringe them with warm water to which has been added a solution of quassia chips. Feed on canary seed, with a little sweet apple or boiled carrot. Do not give egg food at present. Write again, when I will advise you. Glad to hear that CAGE BIRDS has been a great help to you.

GREENS.

Answered by S. HADWIN.

Green Hen Moping (Novice).—From the description you give of your bird I should imagine it has been rather loose in its bowels, probably accompanied by inflammation of the bowels. Examine its stomach, and if swollen and inflamed paint with equal parts of paraffin and olive oil, and give two drops of warm olive oil in its beak. This I have found a very good remedy. Your feeding is all right, but you might give a teaspoonful of egg food twice a week, and add to egg food twelve drops chemical food.

ROLLERS.

Answered by F. A. LESTER.

Breeding for Song (W. Merrit).—You want to breed Canaries for song and to know which to buy? Ignore fancy names, write to a reliable breeder of British Rollers and use the deposit system. Buy a rung bird, and you will be sure of it being acclimatised; crossed with a Yorkshire you should get a bold, long, free singer.

Bird Chewing Seed Husks (Noel).—Delighted to be of assistance to you; the treatment should be continued for one month at least. If you have not supplied her with cuttlefish bone or grit, try her with it; it may help her to give up the objectionable habit of chewing her seed husks.

Colour-Feeding (Victor Zorn).—You want to colour-feed Rollers; will it harm them, you ask? I do not see any harm in slightly colour-feeding the birds; it will add to their beauty and will not hurt the song. You will see among the numerous advertisements in our Norwich column this week something that will suit you; use the deposit system. The Norwich should be about 6 to 6½ inches long, and thick and cobby. Good birds will be good prices.

Food and Breeding (G. Williams).—(1) Tbe first part is correct; but give apple in winter and greenfood late spring, summer and early autumn. (2) A little egg food is beneficial. (3) No egg food during sitting, put in day before hatching is due. Your other information is correct; one month old put young on egg food and crushed canary, rape, and hemp. The secretary, Mr. J. J. Norris, will supply rings; his address is 31, Scylla Road, Peckham Rye, S.E. Take the cock away as soon as he has paid attention to the hen, the hen will sit and rear better by herself; the cock will be ready for another hen in a few days. You can start to breed when your hens are ready, and that you will find out by the enhanced size of the vent, and their attentions to the cock when they hear him sing. Birds hatched this year would not be fit to breed till next year.

Roller not Singing.—As your bird has not sung for twelve months the case looks rather hopeless, but try this mixture: One pennyworth of Ipecacuanha wine, one pennyworth of Glycerine, one pennyworth of simple syrup, one tablespoonful of whisky; shake well and put a teaspoonful in drinker; keep this going for a fortnight. Keep in box-cage and below gas, and not in a temperature higher than sixty degrees.

Roller not Singing (A.R.W.).—Will you try my recipe as advised to "Mountain Roller" tbis week? Keep it up for three weeks or month. Keep the bird in a box-cage, or cage in a box. Temperature should not be more than sixty degrees. Try fat bacon now and then. Yours is not a hopeless case; write again and I will give you another recipe if necessary.

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Soft Moult.—Six Canaries gone into moult. How shall I treat them, and will they breed this season? They are singing a little. I keep them in the kitchen.—CONSTANT READER.

Unless your kitchen is unusually large, it is not a suitable place in which to keep so many birds. The variation of temperature is too great and the heat is very likely to upset birds. You cannot do better than feed them well and get them through their moult as quickly as possible. Give soft food, and such salad as can be procured. If there is any scarcity of it, sow rape seed in sand and give it to the birds while the seedlings have only two leaves.

Suitable Place for Canaries.—Would the following be a suitable place to keep and breed Canaries in? Scullery, off kitchen, 8 feet square and 8 feet high, window 20 inches by 27 inches, in centre of wall, facing direct north, walls all match-boarded. Door opening south, opposite window; cement floor; a little damp; no fire-place.—ANXIOUS ONE.

Much more depends on the weather during the coming summer than on the construction and situation of your room. If the sunshine prevailed, as it did last year, your room might answer the purpose, assuming it got quite dry, and you admitted plenty of light and air. But if there was a lot of rainy, dull weather the birds would naturally become depressed and not likely to be very successful as breeders. An upstairs room, with large windows and dry floor, would be much more serviceable.

Off Song.—Three Canaries off song since last moult. The father is two years old, and the others are last season's birds. When they chirp their note is very cracked. Fed on seed, and three drops of Parrish's Chemical Food to each bird twice weekly.—NOVICE.

Do not be surprised if your two young Canaries prove to be hens. So, if their sex is wrong, treatment will not make any alteration. The parent bird should now be making progress with his whistling. Are you keeping him in a comfortable cage by himself? Let him have a little soft food in addition to his usual seed, and Parrish, and give him a leaf or two of watercress, groundsell, chickweed or dandelion.

Clipped Tail.—Canary had its tail clipped last spring. Did not moult properly. Has not reproduced tail, nor grown any feathers on its back, which at times looks inflamed. Plumage appears dull and dirty, yet the bird keeps in song.—CAMPSEA.

It is quite feasible that this bird went through an abnormal moult before you bought it; again, it may be infested by red mite or microscopic insects under the skin, for both of which conditions advice has been quite recently given in these columns. Kindly refer to same, and in addition to usual seed diet and sweet apple (which may be given daily) let your bird have some sprouting rape seed. Sow it in saucers of sand and give it to the bird as soon as the leaves expand. Would it not be helpful to extract the remaining tail-feather stumps?

Cause of Death and Oil Stove.—Two Canaries died within a few days. They started sneezing and wheezing, then gasped for breath. During late frost and snowstorm I used an oil stove. Was this right? Do you think tbe birds were subject to asthma, or got a chill? I have also noticed one or two birds drop their wings and let them tremble. Is this a minor ailment?—PUZZLED.

There is nothing more hazardous than giving a certificate of death without seeing the patient, either alive or dead. In canarydom the latter could be accomplished by a postmortem examination, rules for the guidance of which are published every week. If your last query includes the state of affairs first described by you, it certainly is not a minor ailment. I can only assume that your birds contracted pneumonia—or inflammation of the lungs—because they were too delicately constituted to stand the very low temperature experienced just after Christmas. The oil stove probably only aggravated the mischief, because, if it is like other oil stoves, it most likely vitiated the air while it was burning, and then burnt itself out just when the frost was keenest. By the time you observed the birds' breathing to be laboured, the mischief had gone too far for medical treatment. If it was absolutely necessary for you to keep the birds in such a cold room (which may also have been damp or draughty), the birds should have been run into large cages, so that they might have kept up their natural warmth of blood by exercise; or this might have been done in another way by the giving of seed remarkably rich in heat-giving properties, such as hemp and rape, when the frost first set in. The dropping of the wings, now and then, even with gentle shaking or trembling, is more a sign of the bird wishing to cleanse itself than of ill-health, unless there are other indications of its having "taken cold or chill," as your birds seem to have done. Sometimes an early removal to a warm room, and the giving of bread and milk sop sprinkled with maw seed, will afford relief. The best medicine is ten drops of the homœopatbic tincture of aconite in two tablespoonfuls of drinking water.

Loss of Upper Mandibles.—The upper mandibles of all a friend's birds have rotted completely away, and now I find one of my own going the same, although it has never been in my friend's room. The lower mandible is quite perfect. Could you tell me the cause, how to cure it, and whether they will grow again? Our drinkers are glass and kept perfectly clean.—W. F. H. and R. E. J.

This is indeed a very curious and serious state of affairs, and extremely difficult to explain, not only because I cannot examine the birds, but also because I know nothing of their antecedents, whether you bred the birds or bought them, and, if the latter, how long since. One of the most curious points is that, although the upper mandible is disappearing, the lower one remains intact, which precludes the idea of any chemical substance, such as sulphate of iron or permanganate of potash being the cause. Again, if the plumage is not also disappearing, one cannot suspect the ravages of skin parasites. I fear the mandibles will not grow again, and it will be advisable to keep the birds supplied with some soft food, such as crushed biscuit or "Canary cake," crumbled up and slightly moistened with a little milk. Make a lotion of one drachm of boric acid to a pint of hot water, and when cold bathe the affected part every day.

Off Song and Getting Old.—Canary, nearly eight years old, ceased singing a year ago. He is frequently moulting slightly, and is continually crouching on the perch. His appearance is good.—G.W.W.

I cannot see that there is anything much amiss with your bird, at least anything that medical treatment can cure. Old age is coming on him, and he is not likely to be so active as formerly or to exert himself in whistling; in fact, he is docile and indolent. But it is quite reasonable to hope that he will improve as the spring advances. Give him a little soft food every day, on which you have let fall three drops of Parrish's chemical food. A slice of sweet apple occasionally would be very acceptable, alternated with a few leaves of watercress, groundsell, or young dandelion.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Lark Off Song (J.H.B.).—From your letter I should think your Skylark has caught a chill by some unfortunate means or other, and has so "lost its voice." Keep it in quable temperature (not hot), out of draught, and mix five or six drops of tasteless cod-liver oil amongst its food daily until well. Put in its drinking water (two tablespoonfuls) a small teaspoonful of a mixture in equal parts of best glycerine and honey. Continue this for 10 or 12 days; then, if no improvement is manifest, change to our Mr. North's bronchial syrup. Glycerine oxymel of squills and Ipecacuhanha wine, half ounce of each; dose the same as the honey mixture. Feed the bird well, giving mealworms freely.

Four Birds (Novice B.).—A couple of daily doses of sulphate of soda will, I think, put both Linnet and Goldfinch right. Dissolve as much as will lie on a sixpence in two tablespoonfuls of drinking water. Let them have as much maw and inga as they care to eat. They should both have teazle in their stock mixtures. I really cannot understand your Skylark refusing mealworms. Mine would come and lug them out of my fingers in "double quick" time, as the soldiers say. Leave off his food box for a few hours, until he becomes thoroughly hungry, then let him have the opportunity to devour one or two. I'll wager he'll seize both—by which I mean the opportunity and the mealworms. The "hunger" treatment will also get him used to feeding out of the outside food box, especially if the place a few cut-up mealworms on top of the food therein. Greenfinches need neither soft food nor mealworms as a usual thing, though often an ailing or moulting bird relishes a little of the former, and one or two of the latter. Sunflower seed is the chief item in their diet. In addition to this, the usual Finch mixture of hemp, canary teazle, summer rape, and linseed should be given—not over-much of the former.

Goldfinch not Eating Canary Seed (H.J.C.).—There are hundreds of Goldfinches which will not eat canary seed—among them some of the best in the land. So why worry? Your Goldie is a sensible bird to prefer hemp and teazle to it; they will do him much more good. So, once again, why worry? He is alive and flourishing, when so many nice Goldies are "memories only" to their sorrowing owners. Of course, if you desire to go into mourning, by all means endeavour to force him to eat the canary seed. But don't blame me should he then decide to quit this life. Leave him without food for two or three hours, until thoroughly hungry, then tempt him with the golden grains. He will no doubt eat them; and he may quite likely thrive on them. Likewise, he may not.

Siskin Over Fat (Down-hearted).—Siskins are terrors at putting on superfluous fat when kept in small cages, and once used to cage life, fattening seeds should be but sparingly doled out to them. Gradually stop the hemp, and give the bird the following stock mixture: Teazle and canary two parts each, summer rape one part. A little maw twice a week in a separate vessel. Give a course of gentle saline medicine, say as much sulphate of soda as will just cover a sixpence, dissolved in two tablespoonfuls of drinking water. For one week give this on alternate days; then for another week, at intervals of three days—that will be six doses in just over a fortnight. Let him out of his cage daily, for an hour or two, to exercise about the room. This will bring him down to a more reasonable girth. In the warmer days of the spring could you not arrange to let him have a few weeks in an out-door aviary? At that period, too, you should gather him seeding shepherd's purse and chickweed, flowering heads of groundsel, and young juicy dandelion leaves. Mind they are not given with "frost" on. Give them a dip in warm water afterwards dabbing them dry with a towel, if you are in doubt on this point. Your sample of wild seed seems to be a good one, so far as I can tell.

The Standard Guide to the Bird Fancy.

CAGE BIRDS' ANNUAL for 1907

NOW IN PREPARATION.

Many new features. Entire change in shape and form.

PUBLISHED IN TWO PARTS.

Part 1, Ordinary Annual. Part 2, Annual Register of Wins.

All the winners of 1st, 2nd and 3rd at "guaranteed" shows during the year 1906 (otherwise shows which have appeared in our "Dates Fixed" column) will be alphabetically arranged, and the full name and address given in each case. We shall include, where desired, the wins of any fancier at non-guaranteed shows on payment of 6d. per win, provided the prize won is not less than a fourth, and we shall also include 4th's or vhc's at Guaranteed Shows upon the same terms.

PRINCIPAL CONTENTS.

1. List of Names and Addresses of the principal Breeders, Exhibitors, and Dealers in Cage Birds.
2. Coloured Plate of "A Bird of the Year."
3. Many Illustrations of Champion Canaries, Hybrids, and British Birds.
4. Many interesting and instructive Articles.
5. A Review of the last Show Season, by Experts.
6. Standards of Points and Descriptions of all Ideal Canaries and other Cage Birds.
7. Stud Table and Guide to Breeders.
8. List of all Cage Bird Clubs, with Names and Addresses of Secretaries, and particulars of Membership.
9. List of Judges of Cage Birds, with Addresses in full.
10. Much useful General Information.
11. Yearly Cash Account.
12. Breeding and Show Registers.

7d. post free.
Bound in stout cloth covers, post paid, ONE SHILLING.

A MOST USEFUL AND INDISPENSABLE HANDBOOK TO THE FANCY.

C.B. ANNUAL FOR 1907. *Order Form.*

Entries close finally JANUARY 29th.

ENTRIES CLOSE SECOND TUESDAY IN JANUARY, 1907.

To the Manager of "Cage Birds" Annual,
154, Fleet Street, London, E.C.

Sir,

Kindly insert my advertisement in "C.B." Annual for 1907, as follows:

TARIFF FOR ANNUAL ADVTS.

½ inch Card .. .. (not more than 30 Words)	2/6
1 inch Card .. .. (not more than 70 Words)	4/6
¼ page	6/-
½ page	10/6
1 page .. .. .. (ordinary position)	£1
1 page Special Position	£1 5 0

RATE FOR COPIES.

1 copy	.. post free 7d.
2 copies	.. „ „ 1/-
1 dozen	.. 4/6 carr. paid

Breeder's Card _____ (State space)

_____ page advertisement ... ... to cost

My Name and Address in Breeder's Directory under the heading of _____

_____ Wins at "Non-Guaranteed" Shows as per accompanying form, at a cost of 6d. the first win, and 1d. per win for every subsequent win.

_____ copies of "Cage Birds" Annual for 1907 ... ...

Total amount remitted £

Full Name and Address _____

COST £ s. d.

C.B. Annual Register of Wins for 1906

WILL BE PUBLISHED SEPARATELY, PRICE 6d., AS PART II. OF "CAGE BIRDS" ANNUAL.

Dear Sir,

Kindly notify in "Cage Birds" Annual for 1907, that the following wins were secured by me during the past year, 1906.

Entries close finally Jan. 29th, 1907.

At "Guaranteed" Shows: _____ } Entries here may be made free of Cost.

At "Non-Guaranteed" Shows: _____ } Entries here are charged 6d. for the first win, 1d. for every subsequent win.

Full Name and Address _____

NO PRIZE LESS THAN A FOURTH CAN BE COUNTED.

A "Guaranteed" Show is a Show that has appeared in the "Dates Fixed" column of "Cage Birds" during 1906.

ANY REMITTANCE TO BE MADE SHOULD ACCOMPANY THIS ORDER.

You can send all your wins if you like, and we will cross out those secured at non-guaranteed events if directed to do so.

Send direct to the Editor, "Cage Birds" Annual, 154, Fleet Street, London, E.C.

Bullfinch-Bramblefinch Hybrid (J.C.).—I have no recollection of either reading or hearing of anyone trying to obtain a Bullfinch-Bramblefinch Hybrid. Still, by all means try for it, if you feel inclined. An example of this cross, I should imagine, would be a most beautiful bird; it would certainly be very valuable, and a sure prize-winner. Personally, I should prefer to mate up the other way round, viz., cock Bramble to hen Bullie. Cock Bullfinches are not good at fertilizing eggs in a state of captivity; few seem to do so. You will find several articles on Mule and Hybrid breeding in our pages during the next week or two.

Goldfinch Ailing (Stroud Green.).—If you keep catching your Goldies to look at their stomachs, I don't wonder at them dying. Your letter gives one the impression this is your practice. Your feeding is perfectly correct, and you ought to have no trouble with the birds. I experience very, very little with my own; and many fancier friends I know are equally fortunate (if that is the right word to use). Substitute sulphate of soda for the Epsom salts. The former seems less drastic in its action on the bowels, and it has hardly any taste, consequently does not turn the birds against their drinking water. Above all, let your birds alone as regards handling them.

Blackbird Not Yet Singing (G.H.).—It is pretty evident from your description that the Blackbird was very nearly a newly-caught bird when you bought it. Therefore it could not be expected to sing just yet. I consider it is doing very nicely, under the circumstances, to be now "singing the wild song of the Blackbird, but very low." That proves it to be a cock, and no doubt it will turn out an excellent songster when once Old Sol begins to exert his powers, and cheer us with sunny days. He will get steadier in due course. Don't over-do the cooked meat in his food; a regular supply of mealworms and black beetles would be better. A green-house, especially if damp, through plants being kept in it, is a most unhealthy place to keep birds in.

Concerning a Linnet (A.R.W.).—Feed your Linnet as advised "E. Burgess" last week. As the breeding season approaches, give a pinch of hemp, inga and maw seeds three or four times a week; also gather and give the green foods advised "Down-hearted" in the present issue. Read reply to "R.H.E." this week as regards the bird's chance of muling.

Canary Seed Samples (Con.).—All the three samples seem to be really nice seed, and I don't think you could go wrong with any of them. Personally, however, I should plump for number two, which looks and tastes like high-class goods.

Dead Goldfinch (Dereham).—I cannot see that an expression of opinion on my part would do you any good: the bird's dead—and there's an end to't. The body was in a very much the "worse for wear" condition when I got it, so I could not pretend to appraise the bird's value when alive. It was a Cheveril Goldfinch, in fcid plumage, and, judging by the state of the upper mandible, it had been exceedingly intractable subsequent to capture, the feathers and skin being knocked away to quite a considerable extent at the base of the beak.

Cock Linnet "Nervous" (All-wire Cage).—No living-room is likely to be "too cold" for a cock Linnet (except, of course, a bird used to a hot room). You do not say whether your bird is housemoulted or not. In either case, however, there can be but little doubt that the all-wire cage is the cause of the bird's nervousness. If it is not housemoulted, such a cage is bound to conduce to unsteadiness on its part; if it is house-moulted, I have no doubt it's previous owner kept it in a more suitable style of cage, and the change would certainly make it nervous. Should the bird be a newly-caught specimen, however, you could not reasonably expect it to be steady after, apparently, only a short time in a cage—and the latter the most unsuitable you could possibly have chosen. Get a proper Finch cage for the bird, viz., a box cage (wired in front only), such as is illustrated and described in last year's CAGE BIRDS' ANNUAL. Then you may expect to soon find a great change in its behaviour. Once the Linnet has become tame (well-domesticated), possibly the glaring publicity, if I may so put it, inseparable from the round all-wire type of drawing-room cage may not be so distasteful to it.

Concerning an Aviary (R.B.B.).—Your aviary, 12ft. by 6ft., with a wood shelter, and roofed for half its length, seems a very promising erection. In it you could turn a dozen or so pairs of small birds with every prospect of some of them breeding. You seem to have got the notion, however, that every pair you turn in is sure to breed; if you wish to save yourself feelings of disappointment in the near future, you will cease thinking so at the earliest possible moment. Further, it is no use your entertaining the idea of turning Kingfishers in along with the other birds—especially in the hope of them presenting you with a few baby Kingfishers. You fly at high game with a vengeance! A nice task you would find yourself confronted with, when called on to supply the birds with live fish sufficient to fill the capacious maws of their nestlings. If you had any other daily toil to attend to, I'm afraid you'd have to learn to exist without sleep. Seriously speaking, though, be content, in the beginning, to try with a few of the "smaller fry" amongst birds; when you have felt your feet, then try your hand (forgive the mixture of metaphors) at "big fish," should you think well to do so. Make your selection for the first season from among the better-known Finches, but do not include more than one pair of Chaffinches. Don't over-crowd them, and be absolutely sure the sexes are equally represented; that is to say, have neither unmated males nor females present—it is a moot point which make themselves the worst nuisance. You should begin to get the inmates of the aviary together now. Birds kept in such a place would never get "tame"; that is, in the sense fanciers understand that term. Have given several answers lately on bushes, etc., for aviaries (one last week), so kindly look them up. You must not use wire of a less mesh than three-quarter inch, and five-eighths inch is much better, in fact, I always use half-inch in my own places. If you particularly wish to include an insectivorous bird or two, a pair each of Grey Wagtails and Meadow Pipits will probably do well, given, of course, suitable food.

Pairing Up Muling Couples (A. Hall).—There is no great difficulty in getting a cock Greenfinch to mate with a hen Canary, as a rule. I am assuming, of course, the former to be a steady, well-domesticated bird. A "wild" Greenie, not settled to cage-life, can hardly be expected to breed. The simplest and most straightforward procedure is that I am always recommending, viz., to get a two-compartment breeding cage, and run the hen in one half and the cock in the other, the wired slide being between them. They will thus get well acquainted before the time for muling comes round. When the hen shows a desire to go to nest, hang in the nest-box, give a supply of nesting material, and draw out the dividing slide. You can, if you choose, give the birds a run together for a time daily before leaving them finally together. Sometimes, however, if one should happen to be ardent and the other not yet properly heated by "love's fire," this leads to the former experiencing disappointment. The result, sad to say, is usually a fight. The procedure when Mule-breeding is practically the same as when Canary-breeding, and you should most certainly invest in a book dealing with the latter, and carefully study the instructions given therein for the mating of birds, and for the management and feeding of young. There can be no "exact date" for pairing any breeding couples. If two birds are in "breeding condition" they will produce young in January; but if either one or both be not in "breeding condition," it will not matter one jot whether the month be Jan. or June, the result will be the same: unfertile eggs. Therefore, it follows that no one can give a definite date to pair up on. Breeders have to settle the point for themselves, being guided by the state of their birds. You will find plenty of signs to help you. When the cock begins to take an interest in the hen, he will be found feeding her through the wires of the sliding division; he will also serenade her in most vigorous and adoring tones. She, on her part, will accept his offerings of fodder, and as the pairing fever fills her veins, will "bounce" from perch to perch, flapping her wings, and "calling" to her Romeo in a high-pitched voice—a sort of delirious shriek. One of the best things to do, however, when an understanding seems on the verge of being arrived at between any given couple, is to keep a sprig or two of nesting material in the lady's side of the house. When she begins to carry this about in her beak, and to look for a suitable place in which to deposit it, get a move on you at once—put in the nest-pan, and pull out the slide. Afterwards you must be guided by what happens between them. Should the cock bird interfere with the nest, only let him run with the hen a few hours daily, say in the morning, and shut him off entirely after the third egg has been laid.

Linnet for Muling (R.H.E.).—Once again, as the the song says. Really, I have heaps of times this winter told one querist or another that there is no reason whatever why Finches caught this season should not successfully breed with hen Canaries this coming spring, providing only that they be used to cage-life—that is, are steady and well-behaved. This applies to Linnets and all the usual Muling Finches. Everything depends on the disposition of the birds; and thus I can pass no opinion without first seeing them. You cannot do better than provide for your Linnet's mate a yellow hen of Norwich type (that is, of good substance of body), either clear, or lightly, or heavily marked. The resulting Mules will be beautiful songsters, especially if trained under a sweet-voiced, free-singing Linnet. They will also be of better colour—hence more attractive—than if bred from a Buff hen.

Meadow Bunting (Orlando).—A really good Meadow Bunting stands an excellent chance on the show-bench. Several have been winning prizes during the present show season. It is not an exhibit recognised by the British Bird and Mule Club, so could not count in any competitions for that body's medals. At the same time, it most certainly could win prizes at shows held under the auspices of the N.B.B. and M.C. if the judges chose to award it the same.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Birds for Outdoor Aviary.—How many pairs and what are the most suitable to keep in an outdoor aviary, 5 by 5 by 2½, having regard to attractive plumage and simplicity of treatment? What food would they require?—"QUIDNUNC."

It is only possible to keep such birds in so small an aviary all the year round that will readily take to boxes or husks for night shelter. Here are two alternatives. (1) One pair each yellow and green Budgerigars. These would settle down to breeding and are handsome and interesting birds. Canary, white and spray millet, greenfood, grit, cuttlefish and water are all they require. (2) One pair each Zebra and Ribbon Finches, Silverbills, Avadavats, Grey Java Sparrows and Spice Birds. Put up a number of nest boxes and one or two cocoa-nut husks, and some of them will probably breed. Diet same as in series one, with the addition of a few ants' eggs (cocoons), and a small saucer of some good soft food mixture. Note: Your aviary is very narrow, only 2½ feet wide; cannot you put an all-wire extension in front of your present structure? It would not cost much, would be better for the birds, and be far more interesting to yourself. Such an addition could be sown with grass, Canary, rape seed, etc. The smallness of your aviary limits your choice. Only the hardiest can be chosen.

Grey Parrot Talking.—Two years ago I bought a young grey, warranted a talker, but it only whistles and screams, and has never spoken a word. It growls and makes a fearful noise when a stranger comes near. What can you advise?—K. I. J.

Keep some of the seed mixture regularly recommended in this column in its cage, or sooner or later your bird will be down with a severe attack of indigestion; make a practice of putting some of the seed mixture under the boiled maize; numbers of Greys have been induced to eat the dry seed mixture by this method. The bird certainly ought to have begun to talk long before this, and I fear it will not do much in the talking line now. Try putting a cover over its cage whenever it starts screaming; again, keep it in your ordinary living-room where it will always have someone about it; avoid sudden movements as far as possible when in its vicinity, as it is mostly fear which causes screaming, though with some birds it is vice. Try to induce it to take a little greenfood (leaf of lettuce at this season or apple). Don't give it pastry, and only a little cake; try plain biscuit or a dry crust of household bread.

Perch for Cockatoo.—Is a wood or tin perch best for my Rose-breasted Cockatoo. He is a very fine talker, and I don't want to lose him, his feet are very cold when he is taken out of cage. He is very destructive to wood.—LOO.

Metal perches are very injurious, and by causing chills through cold feet are responsible for many ills. Give it a wooden perch, and supply it with a chunk of some non-splintery wood (poplar or willow), cotton-reels etc., to chew up, and it should soon learn to leave its perch alone. I was interested in noting your bird has a vocabulary of fifty words, as this confirms the reputation they bear in their native country, and you are to be congratulated on possessing so talented a bird. Give regularly cuttlefish bone, and feed as frequently advised in this column.

Nonpariel and Greenfinch.—My cock Nonpariel paired up with a Greenfinch, and produced fertile eggs, which were duly hatched, but young were thrown out of nest. They are flying in my aviary with other British and Foreign birds. Would they be better in a flight cage, 4 feet by 3 feet high?—T. L. PLUM.

The Greenfinch is a free breeder in captivity, and there is no reason why they should not be successfully reared. A little later try them in your flight cage; if they make no signs of resting you can then turn them out again into the aviary with as good a prospect of success as you had last year. If you have any more young hatched, supply some good insectile food, and as many ants' eggs, green fly, gentles, etc., as you can obtain. Instead of putting all the eggs under Canaries, try half of them, but you must make up the full number of clutch in nest by putting in some of the Canary's eggs. I am rather inclined to think the Nonpariel would not pair with the Pintail, and if it did, the two birds are so similar in colouring that the crossed progeny (if reared) would have little value if any beyond that of the pure birds. According to Dr. Russ, the Nonpariel has been crossed with the Canary. I do not remember noting a record of their having done so in this country. These birds eat a lot of greenfood when rearing young.

Outdoor Aviary.—Please advise me as to erecting my aviaries from particulars herewith. Would a wooden floor be suitable for the house? What would be the best time to stock the aviary? What about cats? Should the roof of flight be netting or wood?—NOVICE.

I do not care for wooden floors, as they absorb so much of the moisture of birds' excreta, but you can use it, and put on top of same three or four inches of peat moss litter, rake this over weekly, and replace with fresh as necessary. What I really recommend is a layer of half-inch mesh wire netting, with six inches of earth over same for the floor and on the top of the earth keep up an inch of bird grit. Your arrangements promise well, but I should have the roof of outside flight boarded and felted for the first four feet adjoining the shed; you will have to use half inch mesh wire netting. It is no use your planting trees in the large enclosure, the Parrakeets would destroy these almost at once. Put in some dead trees or, rather, branches, and sow the ground with grass, oats, Canary seed, etc. In addition to the birds you name you could put in pairs of Rosella Parrakeets and White-eared Conures. In your smaller aviary for Finches, I should advise you to leave out the Chaffinches, Blackbird and Thrush from those you name, but the Pekins should do well with the others. The open flight of this enclosure you could plant with trees and shrubs (but not lilac, laburnam or syringa). As regards cats, if your aviary is not near to other buildings from which the cats could jump on to your aviary, you can keep them off the top by having, say, twelve inches of the netting extending outward from the aviary at a slight angle pointing upwards. Budgerigars, Cockateels and Rosellas you can purchase from outdoor aviaries and put in at once; the others purchase as on the market, but keep them indoors till May. They can then be left out altogether. Two-inch quartering will be ample for the frames, and the wire-netting should be stretched on the inside of these so that all ledges may be outside. As a further safeguard against cats, you could stretch another course of one-inch mesh netting on the outside of the frames, and your birds would then be quite safe from Grimalkin. You will not require artificial heat. If you need any further specific help please write again.

Napoleon Bishop.—Please describe the full plumage of this bird. My bird is said to be a young one, and is not very brilliant. Can it be kept in a cold room?—AMATEUR.

The prevailing colour of this beautiful bird is brilliant chrome-yellow; cheeks, chin, nape of the neck chest, and centre of abdomen, velvety-black; wings and tail, brown. The above plumage is only worn during the breeding season, the remainder of the year it is a plain brown bird, slightly yellow in parts. The female is a plain brown bird, somewhat like a Corn Bunting, but becomes slightly yellowish in parts during the breeding season. The intensity of the colouring increases with age. If the cage is sufficiently large to allow it moderate exercise it will do well in a cold room, for it is a hardy and robust species; it would thrive and do well in any ordinary living-room. This species is out of doors all the year round in my garden aviary.

Red-crested Cardinals.—What is the best kind and size of cage for a single bird? How can I sex these birds? It does not sing, and even its chirping is faint and infrequent. Is it a male?—DOUBTFUL.

I am afraid you have no remedy, for when you released the deposit the transaction was closed finally for "C.B." The sexual distinctions are almost infinitesmal, and it is most difficult even for an expert to pick out the sexes from a mixed lot of birds, which are usually of varying ages. In fully adult birds the beak of the female is narrower and more pointed than that of the male, and the scarlet of her crest and throat not so intense in colour, but the distinctions are not striking. Many dealers are not sufficiently acquainted wth them to do more than make a shrewd guess, and I am bound to admit that they mostly manage to pick out the sexes fairly well—an error is not fraud. I have not a great opinion of the song power of the Red-crest. I have possessed many undoubted males that have been very chary of using their voice; on the other hand, at the present time, I possess quite a lusty songster. When the bright weather comes round again you will be better able to judge. As regards cage, it should be of the box type, and certainly not smaller than a Blackbird's cage. You can have mealworms sent you per parcel post by any of our advertisers. The birds should certainly have two or three daily, also fruit. The mealworms keep without trouble in a tin canister containing a little bran.

Green Amazon.—I have a young bird, and shall be glad if you will tell me how to teach it to talk. I have had it six months, and it mimics one or two sounds, and appears strong and healthy. It is fed on mixed Parrot food, sops of bread, and clean drinking water. This is my seventh bird. Please advise me if I am not treating correctly.—HETTY.

Diet your bird as follows: A little boiled maize, prepared fresh daily, as it soon turns sour; when the bird is a little older it will be sufficient to give this boiled food twice a week. Get a quart each Canary, millet and oats, and one pint each hemp, sunflower, dari and wheat; mix the whole well together, and always keep a supply in the cage. You must not give milk, tea, or coffee slops, or soppy bread of any kind. Ripe fruit, greenfood, grit, cuttlefish, plain biscuits should also be given so as to vary the diet. These birds are robust, but need protection from draught. Spray the bird once a week during the winter, and keep it strictly out of draught till dry. The only method of teaching to talk is constant repetition of a word or two till thoroughly learned, then begin again with something fresh. Hope your bird will do well. Read replies to other querists.

All-Green Parrakeet.—Does the All-Green Parrakeet (*B. tirica*) possess any advantage over the Tovi Parrakeet, as regards quietness and musical voice? Which would you recommend as a pet? Are they both about the same size and imported equally freely?—F. C. P.

I have only slight experience of *B. tirica*, but an avicultural friend speaks of his individual as making an excellent pet; but from my own experience I should advise you to decide on a Tovi, or, if you have the accommodation, why not have both? They are plain feeders and easy to keep in health; neither are really noisy birds, and their voices are very similar. What advantage there is, I should say Tovi has it. Tirica is the larger bird of the two, and is the least frequently imported. The Tovi is the smallest of this genus, and, to my mind, the most engaging, becoming very tame when thoroughly accustomed to its owner and cage. Most of these come to hand in a very scared and wild condition, but with gentleness they soon settle down, and though all have somewhat shrill voices, none of them are screamers, so far as my experience goes, both of my own birds and specimens at the Zoo.

Virginian Nightingale.—What is the minimum size cage? What temperature is required? How soon will it begin to sing? What diet?—E.G.

The smallest cage should be a full-sized Blackbird's cage; but one 24in. by 18in. by 24in. high would be far better. I prefer a box type cage to any other. I have only found these birds to sing between March and September; during the other portion of the year a few notes are muttered, but nothing worth mentioning. Your bird will probably commence in either April or May. Diet:—Small maize, oats, hemp, sunflower, rape, millet and canary, ripe fruit, greenfood, and some insects to keep it in health, such as mealworms, smooth caterpillars, spiders, beetles, cockroaches, etc. They are hardy birds, and so long as they are out of draught, the temperature of any living-room will be ample.

What Bird?—My bird was bought as a Pekin Robin, but have been told it is a South African Robin (description herewith). Can you tell me which it is? What is its diet? Is it a male, and what kind of songster is it?—J.H.R.

The South African Robin is quite an uncommon bird in this country. From your description I think you have a young Pekin Robin. It is impossible to say what its sex is at present. If a male, it will duly sing; as regards song, there is a great deal of variation in individual birds, but a good songster is a treat indeed. Its song is very melodious, rich, and full. Diet:—Some good soft food mixture (see advertisement columns), ripe fruit, greenfood, live insects (such as mealworms, beetles, spiders, etc.), grit, cuttlefish, and water for drinking and bathing. Protection from draught.

Nutmeg Finches.—My birds started moulting six weeks ago, and one of them, except for a few wing feathers, has been in quite a naked condition for the past three weeks.—I.Y.G.

Keep in a fairly warm room, and strictly out of the way of draught. Let it have a daily bath (midday), unless weather is very severe. Diet: Canary, white and spray millet, a little of some good soft food mixture, cuttlefish, some of which should be crushed and scattered over sand tray, greenfood (leaf of fresh, tender lettuce), two or three mealworms daily, also such spiders as you can capture. Colour the drinking water with Parrish's Chemical Food till the plumage grows again. For one day only, put six drops of tasteless castor oil on its soft food. The following would be a good mixture at the present juncture: Two parts crumbled sponge-cake and one part each of ants' eggs, dried flies and fine crissel; well mix and make crumbly moist. It should be kept in a box-type cage as a precaution against draught, and then the temperature of an ordinary living-room should be sufficient. These birds are quite hardy, and will live out of doors all the year round. Till the feathers grow again, it would be well to fix a small box in the cage, and put a portion of a Canary nest-bag or loose hay in same.

Indian Green Parrakeet.—My bird appears to have some disease round the nostril; it is a kind of growth, and I fear it will eat right down the beak. What can I do to stop it?—NO NAME.

I am afraid I can give you but little help, you make no mention of diet or other treatment. More than this, it is necessary to see such case in order to give adequate advice, and I strongly recommend you to let a vet. see it, who would possibly be able to cut away or open the growth and give almost immediate relief. If you elect to do the best you can with it yourself, touch the growth, if hard, several times daily with a camel-hair brush dipped in tincture of iodine; if it is a running sore it must be regularly cleansed and anointed with zinc ointment. Keep bowels open, not loose, with Dinneford's magnesia, half a teaspoonful to one table-spoonful of water, and let it have only this to drink for that day. Keep up its strength by colouring its drinking water with Parrish's chemical food when not giving the magnesia. Do not use a metal drinking-vessel when giving drugs. For diet see other replies in this and previous issues.

Walnuts for Grey Parrot.—Do you think dry walnuts bad for Grey Parrots? I give mine two daily; they are a special "tit-bit," and a good plaything.—J.A.R.

You need have no fear in using these; they are among the most suitable for the purpose, and in the quantities you are giving are perfectly harmless. You might try a few "monkey" nuts as a change at times; do not shell these, but give them as bought; it will give the bird a little occupation to strip them.

White-eared Conures.—What is the correct diet and treatment?—H.P.

These birds are very modest in their requirements. Canary, millet, green food, ripe fruit, grit, and cuttlefish, with constant supply of clean water, is about all they require to keep them in health and condition; a little hemp in cold weather, and a handful of oats twice a week, makes a wholesome change. They are a hardy species, and can be kept out of doors all the year round, providing they are put out, in the first instance, in the late spring. However, unless they have plenty of space, they should not be associated with any kind of birds smaller or weaker than themselves.

Grey Parrot III.—For the past two years this bird appears to have had colds in the head, and just now it is snuffling frequently, breathes heavily, and is very mopy; however, it eats well. It is kept in a warm corner and out of draught. I have given a bit of bread and a drink of milk occasionally.—G. MERRIMAN.

Stop giving milk in any form and diet as follows: Seed mixture: Two parts each Canary and oats, and one part each millet, wheat, dari, hemp and sunflower seeds; well mix, and let this be your staple food, of which a supply is always in the cage. Daily supplies of grit, cuttlefish and greenfood must be given; also, so as to vary the diet, ripe fruit, plain biscuits, nuts, boiled potato, and a dry crust of household bread; water to satisfy its thirst three times a day. Spray or bathe its nostrils with diluted glyco-thymoline. Get the following from your chemist: Ipecacuanha wine, oxymel of squills and glycerine in equal parts; put one teaspoonful of this to each ounce of the bird's drinking water, and continue till relief is given. For one day only, soak half-a-teaspoonful of tasteless castor oil into a small crust of household bread, and see that the bird eats it; let it dry in before giving to the bird; repeat this, if needful, in three days' time. The bowels must be kept moving freely, but must not be really loose. As soon as the bird's breath is all right, stop

FANCIES OF THE FAIR: LADIES' DAY AT WIMBLEDON SHOW.

Mrs. MERRINGTON'S winning Grey Parrot.

Miss M. WALKER'S Clear Yellow Yorkshire, first and special, Members' Novice Section.

Miss B. HARDWICK'S unflighted Yellow Norwich, first in S.N.P.C. Novice Section.

Mrs. A. M. COLLIN'S Clear Yellow Norwich, first and special, Member's Novice Section.

Mrs. A. VIPOND-CROCKER'S Clear Buff Yorkshire, first and S.Y.C.C. Novice special for best cock.

Mrs. G. GRIFFITH'S clear body Grizzle Crest, first and special Open Members' Classes.

WOLVERHAMPTON.

The First Show of the newly-formed C. B. S. came off on Jan. 19th, and was a decided success in every way. About 120 birds were staged, and the quality was much above the average seen in South Staffs. Mr. G. E. Russell judged, and his awards met with general approval; he complimented the society on their splendid show, and especially the attractive manner in which the birds were staged. Norwich were a very hot lot. The special for best in show was found in this section, a very fine clear yellow, shown by Mr. F. J. Weaver, second best special going to a grand young yellow Yorks, owned by Mr. F. Howes. Special for best Hybrid was won by Mr. J. A. Tonks, with a very fine Goldie-Greenie, one of a grand team of Mules, shown by this exhibitor. The winning yellow Bunting of same owner was much admired, as was also the Bullie shown by Mr. G. Osborne, which carried off special for best British. The Goldies were the best and most level lot seen in the district, and were not easily divided. This was the Secretary's (Mr. F. Howes) first experience of show management, and great credit is due to him for the most able manner in which everything was carried out.

YORKS. YELL.: 1, Jones, Cinn. mkd., rare length, quality, and style; 2, Jones, another good one, in nice trim, grand type and size; 3, r, vhc, F. Howes, good team, third, very stylish, grand colour, well up on legs. BUFF: 1, Jones, clear, fine, well-drawn, good position; 2, 3, Howes, good type, close feather, standing like guardsman. UNFLI. DO.: 1, sp, 2, hc, Howes, grand team, leader, finely drawn yell., good colour, second, another same stamp, close up; 3, r, vhc, Jones, all buffs, little to choose between them, very lengthy, good quality. HENS: 1, 3, Howes, leader big buff, a beauty, fine length, good back, close-packed wings, feathered like a Java, third, good hen, just a little out of condition; 2, r, vhc, Jones, second, yell., grand type, well drawn, nice condition. NOR. YELL.: 1, 2, 2 spls, Weaver, first, great size, deep chest, fine carriage, good colour, well-carried wings and tail, a gem, second, well-known saddle-mark, grand quality, tight as wax, presses winner very hard; 3, Willoughby, clear, very typical, hardly the substance of leaders, nice, jaunty carriage, grand colour; r, Steadman; vhc, Willoughby; hc, Weaver; c, Garfield. BUFF: 1, Weaver, beautiful quality, clear, lovely colour, good front; 2, Willoughby, neck tick, nice head and neck, good colour; r, Steadman; vhc, Weaver; hc, Willoughby; c, W. Weaver. UNFLI. YELL.: 1, Steadman, big, bouncing clear, full front, good neck and head, full of colour; 2, Weaver, grand colour and type; 3, r, Willoughby, clear, plenty of size, good type and quality; vhc, Steadman. BUFF: 1, Willoughby, clear, fine size, splendid quality, good head and best of wing carriage; 2, Weaver, clear, grand colour, splendid type; 3, Willoughby, another typical exhibit, tight feather, grand wings, clean cut; r, vhc, Willoughby; vhc, Weaver; hc, Tonks. HENS YELL.: 1, Willoughby, lovely type, good colour, shines like satin; 2, Weaver, very similar bird, nice head and substance; 3, Willoughby, grand size, good colour, hardly so fine as leaders; r, Weaver; vhc, hc, Willoughby; c, Birch. BUFF: 1, Steadman, clear, good colour, typical, close feather, nice wings; 2, Weaver, grand hen, feathered like a Java, hardly so large as winner, close up; 3, Willoughby, unfli. clear, grand quality and substance, good colour; r, hc, Weaver; vhc, Garfield; c, Willoughby. LIGHT MULE (4): 1, sp, 2, r, Tonks, leader grand Goldfinch-Greenfinch, splendid size and shape, lovely face and wings, in great form, one of the best, quite an attraction, second, big, nicely-marked Linnet, in good trim; 3, Weaver, yellow Goldie, nice colour and size; r, lightly marked buff Goldie. DARK or PIED (6): 1, 2, Tonks, first, a yellow Greenie, splendid size and shape, beautiful rich colour, in fine trim, second, pretty yellow Goldie, nice shape, red-hot colour, bit small; 3, Gadd, nice sized Pied Greenie in good feather and trim; r, Weaver, Pied buff Goldie, nicely fed, in good order. GOLDFINCH (6): 1, 2, Weaver, first, a bonny Finch, very shapely, grand rich, square cut blaze, beautiful tanning, second, another good one, a little brighter blaze, nice wings and buttons; 3, Potter, similar to first, not quite so large in face, but a beautiful colour throughout, presses; r, Tonks, a noted winner, met his equals here, still a grand, rich-coloured Finch, very sleek and shapely, grand rich blaze; vhc, Smith, very small, nice colour. BULLFINCH or GREENFINCH (12): 1, sp, Osborne, the Hanley winner, great size, good cap and wings; 2, Weaver, topping yellow Greenie, nice level colour, in grand bloom; 3, Tonks, sweet Bullie, dense back cap, nice back and bars, deep rich breast; r, Osborne, another nice Bullie, in beautiful feather; vhc, Gadd; hc, Smith; c, Potter. A. O. V. (9): 1, sp, hc, e, Tonks, first, a topping Yellowhammer, great size, beautiful head and cheek markings, red-hot colour, faultless, hc, Linnet, c, Siskin; 2, sp, Gadd, nice size Chaffinch, of good colour and sheen; 3, Osborne, Redpoll, nice shape and colour, beautifully laced; vhc, Potter, Bramble, good size, grand rich colour throughout, nicely spangled and laced, very steady.

HARROGATE C.B.S.

Third Monthly Show on Wednesday, January 9th. Some very nice specimens were on view. Mr. W. Brown, of Harrogate, officiated as judge, and his awards gave every satisfaction. YELL. YORKS. HEN: 1, Walker; 2, Bennison. BUFF: 1, Bennison; 2, Head; 3, Bennison; 4, Head; vhc, hc, Walker. NOR. HENS 1 4, Barnwell; 2, 3, Gregg. BRIT. 1, Gregg.—G. H. BARNWELL, Hon Sec.

LLANDILO.

Held Thursday, January 17th, unfortunately clashing with a fixture at Swansea, thereby affecting the entry. We were sorry to note this, as this young Society has had an uphill journey from the outset, and the show is run by a few true fanciers whose aim is to pay their liabilities to the fullest extent. They held their first show to try to foster the Fancy in the neighbourhood, and this clashing proved most unfortunate. However, what the show lacked in quantity was amply atoned for in quality, some of the very best birds on the bench being seen in most of the classes. Mr. D. O. Jones, the very excellent Hon. Sec., is to be complimented on the brave fight he made against adverse circumstances, and he was well backed by a hard-working and energetic Committee, headed by Mr. H. Hopkins, who is an "old soldier" at show work in many varieties. The gate was extra good, and quite a fashionable gathering was seen in the afternoon, the President, Captain E. Richardson, and most of the best-known gentry in the neighbourhood being present. The Judge, Mr. J. Robson, had a very hard time of it, particularly with the Rollers, the singing contest taking the best part of two hours to adjudicate upon.

NORWICH YELL. (8): 1, Portman, well-known, a slasher for size, grandly feathered, rare type, very nice win; 2, Wosley, another good coloured one, exceptional head properties, nice, short and chubby, well carried wings and tail; 3, Dummett, close up to leaders, a topper for size, substance and type, clothed with the silkiest of feather, good short wings and tail; 4, Prichard, also a real good one, faultless for type and quality, nice size, built on the cobbiest lines; vhc, Tedstone; hc, Slocombe, a real topper; c, W. Jones. BUFF (11): 1, spl, Sheldon, monster, varieg. buff, grand type, rare quality of feather, lovely head and neck, wins well; 2, Gwilliam, neatly finished one, well furnished body, correct type of head, rarely carried wings and tail; 3, J. Houghton, another topper for size and substance, correctly built on the soundest of Norwich lines, well clothed; 4, Dummett, typical one of nice quality and type, much admired; vhc, Prichard; hc, Stephenson; c, Slocombe. YORKS. YELL. (7): 1, spl, best bird in show, T. Morris, with his well-known clear, rare position and carriage, neatly fitting wings and tail, straight as a gun barrel, wins comfortably; 2, T. Morris, similar type, not so nicely filled in at back and neck, neat wings and tail, fine length; 3, hc, Smith, we liked, correct upstanding position, nice legs, good wing and tail carriage, full of style; 4, hc, Creber, Green of exceptional merit, nice length and style; vhc, c, Williams and Morgans. BUFF (6): 1, 4, hc, Smith, grand clr. leading, fine length and position, feathered like boxwood, in the best of order, nice win, fourth also a neatly feathered one, grand position, full of style, beautiful carriage; 2, hc, Morris, neatly finished one, grandly drawn, in best of feather, put down in well-known style; 3, Griffiths Brothers, very stylish one, plenty of length, good position, straight as a gun barrel, neatly carried wings; vhc, Lovell, good specimen; c, Miss M. Williams. BORDER YELL. (9): 1, R. H. Jones, neatly got up Border, teeming with quality, neatest of wings, closely carried, nice waxlike feathers, beautiful mover, good win; 2, Jenkins, rare coloured one, close up, rare typical model of a Border, very tight and trim, best of wing and tail carriage; 3, Tedstone, neatly staged, nice wings and tail, gay and jaunty in carriage, a Border all over; 4, Richards, neat, good coloured Green, rare type and finish; vhc, Jenkins and Nicholas; hc, Hakin. BUFF (10): 1, 2, D. Jenkins, clr. buffs both, hen leading, a perfect model, neatly finished body, best of wings and tail, rare quality and faultlessly staged, stands away; 3, R. H. Jones, good, sound specimen, neat head, good quality of feather, best of carriage, taking exhibit; 4, Sheldon, also good, put down in splendid style; vhc, Tedstone; hc, Prosser; c, Nicholas. SCOTS OR BELGIAN (3): 1, 3, J. H. Jones, good Belgian leading, topper for substance and shape, good stiff, straight back and legs, put down in rare order, third well-known Scots., nice sided one, in rare form to-day, works without the slightest handling; 2, B. Davies, well-known, in the best of condition and feather. A.O.V. (5): 1, Kearle, Crest, in good feather, nice radiation, well clothed, good size. The rest were all "wrong classed," being unevenly mkd. Yorkshires. SELLING, £1 (8): 1, Davies; 2, Griffiths Bros.; 3, Creber; 4, Prosser; vhc, Prichard; hc, Jenkins; c, Jones. SELLING, 10s. (8): 1, c, P. Jenkins; 2, Griffiths Bros.; 3, Prosser; vhc, Beard; hc, Stephenson; c, Griffiths. HYBRID, LIGHT, ETC. (10): 1, 4, Shellam, Greenie-Bullie leading, looking well, rare size and colour, well defined cap, good bars, wins well, fourth Siskin-Greenie, rare size, excellent feather, a lovely specimen of this cross; 2, Wasley, good yell., light Mule, nice face and bars, rare colour, plenty of size and substance; 3, vhc, Price-Jones, Linnet-Bullie, nice size, shows parentage to a nicety, latter also good; hc, Shopland; c, Miss Williams. DARK (8): 1, 2, Price-Jones, cinnamon Greenie, winning in fine form, nice level colour, rare shape, wins well, second buff Goldie-Canary, good face, bars and back, in best of feather; 3, D. G. Lewis, rare shaped, and coloured Siskin-Canary, distinct cap and thigh marks, in waxlike condition; 4, H. S. Davies, good coloured yell. Greenie Mule; vhc, Williams and Davies; No. 82, Wasley, alleged Canary-Bullie, wrong classed by the judge, who states it was Greenie-Bullie. This bird was devoid of lacing on back, as seen in the Canary-Bullie cross.

In answering advertisements kindly mention "CAGE BIRDS."

GOLDFINCH (16): 1, Hurst, "Pride of Liverpool," rare polish and finish, a real jonque, grand large blaze, shade dirty in whites, very expansive and rich running, good buttons and bars, beautiful blaze colour; 2, 3, D. G. Lewis, rare faced one, exceptionally expansive, cleanly cut at base, bottom and corners, rare finish, could be improved upon in tans, which we consider his only failing, good bars, buttons and back colour, third rounded face, good tans and buttons; 4, T. W. Richards, neatly finished one, nicely polished face, rare tans, nice bars and buttons, not a big one; vhc, J. W. Davies, typical Britisher, nice expansive blaze of sound colour and polish; hc, Hopkins, reported to be the seventh moult of this bird in captivity, in rare bloom, nice cut face, good at all points; c, Ball. GREYPATE GOLDFINCH (16): 1, 2 Carrier, a couple of good big ones, with nice coloured expansive faces, rich tans, bars and buttons, rare colour and polish, like moulted specimens; 3, we missed the name, a neatly got up Finch, in rare feather, good square-cut face, rich body colour, bright yellow bars, hard to find fault with; 4, Jackson and Lohr, neat faced bird, good size, good body and wing colour, nicely buttoned; vhc, Bird, nice one, had twisted his feathers at neck, which spoilt his chance; hc, W. Lewis; c, Herbert. GREENFINCH OR BULLY (13): 1, A. E. Lovell, with a rich coloured Bullie of nice type and quality, rich front and beautifully dense black cap, wing points, and tail, with a metallic sheen, wonderful condition and polish; 2, A. Howe, superb Greenfinch, rare size and shape, wonderful colour and sheen, exceptional head properties, very close up; 3, Nicholas, "Silver King" in nice feather and condition, put down in well-known style; 4, c, Coffey; vhc, Taylor; hc, Raven. BRAMBLEFINCH (6): 1, Lee, nice size and spangle, too black for our liking, lovely condition, in rare feather; 2, Coffey, good shaped one, well cut breast colour, neat spangle on back, good wide bars; 3, Bowker and Cliff, nice size and colour, rare shape; 4, Richards, good big one, natural colour; vhc, Raven. LINNET (7): 1, Lovell, lovely shape and colour, good head and neck, laced from neck to vent in rare style, wins nicely; 2, Hurst, rare coloured one, in fact too much so, which makes the marking appear a bit cloudy, not so tight in feather as we like them; 3, Coffey, good sized one, nice shape and colour; 4, Nicholas, good sound coloured Linnet, neatly marked, nice polish, the correct nutty brown, with a solid front; vhc, Lee, big, full of colour, devoid of markings; hc, Thomas; c, Taylor. REDPOLL, ETC. (12): 1, Price-Jones, rare Twite for colour, size and markings, staged in nice style, wins comfortably; 2, Hurst, nice coloured Siskin, good cap and eye marks, well laced at thighs; 3, Nicholas, rare-coloured Redpoll, nice frontal, rare quality of feather, fails bib; 4, hc, Hurst, Mealy Redpoll, large and well laced, inclined to be colourless; vhc, Bowker and Cliff; c, Isaac. THRUSH (6): 1, H. S. Davies, really fine Thrush, rare colour, beautifully spotted, rare size and finish, wins well; 2, 3, Walters, very good specimens, in nice feather, well spotted, good stamp and size. A.O.V. HARDBILL: 1, 3, Price-Jones, Corn Bunting, at the top at last, beautiful specimen, one of the best we have seen, in grand order, beautifuly marked, champion for size and general finish, third nat. coloured Yellowhammer, good head marking, nice size and feather; 2, A. Howe, noted Hawfinch, in clinking fettle, a wonder for condition and marking, must have pressed; 4, vhc, Raven, Meadow Bunting, good, in rare feather; hc, Ray; c, Nicholas. SOFTBILL (6): 1, 3, Raven, superb Waxwing, in grand feather, nice shape, good distinct wing tips, extra good in crest and bib, nice win, third large, dense coloured Blackbird, rich bill and ceres; 2, H. J. Ford, lovely Tree Creeper, quite at home, in rare feather and condition; 4, Brotherhood, Waxwing, nice size, shape and bib; vhc, Johns; hc, Hopkins. FOREIGN, LARGE (5): 1, Bowen, good Amazon, in rare bloom, well staged; 2, 3, Thorne, fine glossy Starling and silky Cowbird respectively. SMALL (6): 1, Cram, neat pair of Black Throated Cardinals in rare feather, tastefully staged; 2, 3, Thorne, scarlet and superb Tanagers, put down in fine style, beautiful sheen and polish; 4, J. H. Jones, Gouldian, nice size, good colour; vhc, Raven; hc, G. Jones. GIFT: 1, Lee; 2, Jones; 3, Davies; 4, Thomas. ROLLER SINGING (21): 1, Hawthorn, excels in hollow bell roll, grand deep bass tours, and also gluck, free to open, wins easily; 2, Roebuck, good bird, strong forte appeared to be hollow bell, fair bass tours; 3, Netherwood, lovely rise in the hollow bell, rare flute, bell, and bass tours, short duration, or perhaps would have been higher; 4, Hawthorn, good bass tours, also hollow bell, fair rise; 4, G. W. Payne, good steady rise in the hollow bell, bars not of sufficient depth; 187, J. W. Morris, real good one, but inclined to be shy, pure tone, good bass, but too short; vhc, J. E. Bowley.

QUEENSBURY C.B.S.

Members' Show, held Jan. 19th. Mr. J. Wilman (Great Horton) judged, and had a stiff task. About 70 birds were staged. Mr. H. Myers won first for most points, Mr. J. N. Fowle second, and Mr. A. Craven third. CL. YELL.: 1, Jowett; 2, Myers; 3 J. H. Fowle; 4, Jagger and Ackroyd. BUFF: 1, H. Smith; 2, Bramfit; 3, Fowle; 4, Jowett. TK. or UN-MKD. YELL.: 1, Waterhouse; 2, Jagger and Ackroyd; 3, Craven; 4, Myers. BUFF: 1, Myers; 2, Craven; 3, Allen; 4, Fowle. CL. YELL. HEN: 1, Smith; 2, 4, Fowle; 3, Myers. BUFF: 1, Fowle; 2, Wilkinson; 3, Smith; 4, Jowett. TK. UN-MKD. YELL.: 1, 3, Myers; 2, Smith; 4, Jowett. TD. MK. BUFF: 1, Craven; 2, Fowle; 3, 4, Myers. A.V.: 1, Fowle; 2, Allen; 3, Myers; 4, Craven. SELL., 12. 6d.: 1, Fowle; 2, 4, Myers; 3, Allen. HEN, 10s.: 1, 4, Fowle; 2, Bramfit; 3, Smith. H. Smith wins special for member who has never won a first.

WALLINGFORD.

This Annual Show, held in the Corn Exchange, on January 16th, was in every respect a success. The cage-birds were well staged on a raised platform at a comfortable height. The Corn Exchange is a thoroughly well-lighted and ventilated building—just the place in which to stage birds in comfort. The entry was a nice one, and the quality excellent, particularly in British and Foreign birds. The Society enjoys the patronage of the leading residents in the town and neighbourhood, Mr. H. Du Cros, M.P. (Howberry Park) is the president, and the Committee is composed of the following fanciers:—Messrs. S. Taylor (Chairman), G. A. Cole, W. Goswell, J. J. Hall, A. Honeybone, W. D. Jenkins, Junr., F. Whichells, with Mr. W. Honeybone, of Magpie-Pigeon fame, as hon. secretary, and Messrs. F. Snow and Fred Whichells as assistant hon. secretaries. Judging was over in good time, and the catalogues were out with awards a very short time after judging was completed. A large number of fanciers from Reading, Abingdon, etc., visited the show during the afternoon and evening, and, judging by appearances, the gate was a good one. In the British section Mr. W. G. Poole's Cornish Chough came in for a good deal of scrutiny; while in the Foreign section much admiration was bestowed upon Mr. F. Howe's magnificent King Parrot. Mr. Poole also sent a very pretty specimen of the Golden-crested Wren, and Messrs. C. Pearce and Son's lovely little White-throat was the cynosure of many eyes. Mr. G. H. Billett judged. NOR. YELL. (5); 1, 3, Yates, leader, nice shape, well proportioned head and neck, level colour, fine quality, just a trifle open in feather, third var., very fine feather texture and hot in colour, just a shade long in flights and tail, but should breed some good ones; 2, Lewis, warm and level in colour, nicely polished, a gem for quality; res., Yates, nice type, little slack in feather. BUFF (10): 1, 3, res., Yates, leader very chubby in build and nice in feather, neat head and neck, but wanted tightening up a bit, third grand quality, might be a trifle stouter, res. rather long and upright, but rich colour and quality; 2, Lewis, very fine boxwood feather, nice undercolour and mealy, a gem for quality; vhc, Brooker; hc, Pearce and Son, Miss Thomas. YORKS. (8): 1, Martin, yell., very stylish, rich level colour, well polished, goes up like a dart, neat head, level back, nice tail, a good one; 2, Spring, yell., rather more length, but not so well finished; 3, Shetler, buff, very fine quality, close in feather, nice style; res., Yates, very neat yell.; vhc, Martin; hc, Miss Stevens, Shetler, Coates and Humphries. CREST OR C.B. (1): 2, Fifield, very neat wing mark., with nice level drooping crest. A.O.V. (4): 1, 2, 3, Yates, fine trio of cinns., rattling buff leading, closely followed by a bright, pure coloured, well burnished yell.; res., Miss Thomas. HYB. (7): 1, Jupe, the well-known Goldie-Bullie, in fine colour; 2, Lamb, well-known Linnet-Bullie, bright, rich and lustrous, must have pressed the winner hard; 3, Lewin, even buff Goldie-Can.; res., Lamb, a topping 6-pointed yellow Goldie-Can., made a bold bid for a place in the money; vhc, Mitchell and Needham. GOLDFINCH (6): A good class for quality; 1, Marley, not quite so large as some, but full of quality, colours well defined, clean cut; 2, Howe, well-known, larger, rich blaze; 3, Levitt, rare depth of blaze colour, not so lustrous as the others; res., Jupe, fine Finch, little to choose between the pair; vhc, Pearce and Son; hc, Levitt. FINCH A.O.V. (10): 1, 2, Levitt, Bramble leading, not quite in such tip-top condition as might be, second nice Bullfinch; 3, Jupe, a nice bird, shown in good condition; res., Mitchell and Needham; vhc, Sims, A. Howe (2), including his noted Greenfinch, Mitchell and Needham; hc, Pounsett. A.O.V. BRIT. SMALL (7): 1, Poole, beautiful little Golden-crested Wren, tame and in fine feather; 2, Pearce and Son, an equally charming Whitethroat, first at Abingdon; 3, Marley; res., Miss Hopwood, a really good Yellow Bunting; vhc, Levitt; hc, Miss Thomas. LARGE (4): 1, Poole, Cornish Chough, nice feather, except soiled tail; 2, Burrows, capital Ring Ousel, in spick and span feather; 3, Fisher, fine Magpie; res., Pearce and Son, lovely Song Thrush, rich brown, very steady. FOR. A.V. (9): 1, F. Howe, King Parrot, very brilliant, in splendid feather; 2, A. Honeybone, very fine specimen of the Lemon-crested Cockatoo; 3, Poole, rich in colour and in nice feather; res., Leavers, grass Parrakeet, in nice feather; vhc, Coles, Miss Brasher, Poole; hc, Miss Thomas. SELL., 15s. (6): 1, Yates; 2, Burrows; 3, Miss E. Stevens; vhc, Brooker, Poole, Yates. BRIT., LOCAL (4): 1, A. Honeybone; 2, Pounsett; 3, Fisher.

STOURBRIDGE.

This Show was held in the Drill Hall, January 18th and 19th, a good place for a Show, with plenty of room and grand light. The exhibits were well looked after by a capable set of Stewards; the Secretary had everything well in hand, and cards quickly put up. Mr. J. N. Harrison judged to everyone's satisfaction. Through shortness of entries the first and third prize in each class was withheld.

CAN. A.V.: 2, 4, Jones and Bradley, yell. cinn. leading, nice rich even colour, fair size, wins well, fourth very nice gold spangled Liz., both birds well shown; res., vhc, Fallows, yell. Yorks. leading, Netherton winner, beaten here, vhc, buff Yorks., fine long buff, frilled a bit on breast. BRIT. A.V.: 2, res., Jones and Bradley, Nightingale and Blackcap, in the order named, two grand birds, hard to part; 4, Poole, well-known Chough, looking rather down in condition when we saw it; vhc, Harris, a very nice conditioned Skylark, well shown.

HAVE YOU SEEN OUR PICTURE POSTCARDS?

WIMBLEDON.

The Second Annual Show of the Wimbledon and Dist. C. B. S. was held in the Worple Hall, Wimbledon, on Jan. 16th and 17th. Some birds of excellent quality were on view, but considering the patronage of several specialist societies had been worked for, the entry certainly was not anything nearly so good as this splendidly-managed and progressive society deserved. The Yorks. C. C competition attracted some of the "cracks" of the county of many acres down South, and these lent distinction to the collection of lengthy beauties. The S. Y. C. C. and S. N. P. C. also lent their patronage to the fixture. Taken on the whole, the display of Yorkies was an attractive and interesting one. Some of the younger hands would do well to study the fine art of staging, for in many instances neither they nor their birds could be said to shine (appropriate word) in this direction. The Norwich Plainheads were a good, level lot, and we experienced quite a pleasant spasm of astonishment to como face to face with a few good Lancashires, a real novelty London-way. The Hybrid, British and Foreign sections, made a varied show, and well repaid inspection. The local and children's classes were also most interesting. The birds were well looked after and beautifully staged, and no praise could be too high for the hall, a spic-and-span, roomy place, splendidly lighted, and kept at an even, suitable temperature. The society is fortunate in its possession. Another possession they have cause to congratulate themselves upon is their worthy Hon. Sec., Mr. W. H. Colman, an excellent official in every sense, capable and courteous. In Mr. W. H. Stoakley he had the support of a good Chairman, while the committee, Messrs. Broome, Codd, Day, Dell, Dyke, Griffiths, Piper, Rorke, Smith, and Warley, are all enthusiastic fanciers and hard workers. Mr. Whittome also ably assisted. The catalogues, with awards in the margin, were out and on sale at 2.30 p.m., a feat on which the management justly prided themselves. Mr. J. Wheeler won the trophy for most points throughout the show; Messrs. Bailey and Swanger the cup given by Mr. R. P. Broome for most points in Yorks. classes; and Mr. F. J. Day the medal for the hottest bird fed on Ramsden's pepper. Mr. T. Heath judged the Yorks. and S. N. P. C. classes, Mr. J. Robson the remainder. Their awards were well received.

YORKS. CL. or TKD. (10): 1, 2, Bailey and Swanger, the noted clear and thigh tkd., in grand trim, good in length, A1 style and position, wax-like in plumage, a grand pair; 3, Webb, clear, full of colour and quality, well moulded, fairly good length, little slovenly in wing; vhc, Pattrick, very nice, typical bird, stands grandly; hc, Crisp, the well-known neck tkd., failing in bloom to-day, yet a grand one; c, Easterling, in lovely order. BUFF (11): 1 vhc, Bailey and Swanger, tkd. wing, a beautiful Yorkie, hard to beat for style, quality, and pose, splendid length, grand legs, neat as a new pin; 2 Easterling, another wonderfully neat bird, fine length, well drawn, nicely moulded, still has not quite the style of the winner; 3, Wilcock, clear, carries a little more timber than leaders, yet of lovely shape, neatest of heads, wings, and tail, full of quality; hc, Mabey, nice stylish bird; c, Davis, good length and type. MKD., ETC. (12): 1, Wilcock, not the lengthiest, but a gem all over for quality, perfect feather for texture and tightness, stylish, lovely-shaped bird, Cinn. mkd. buff; 2, Bailey and Swanger, the well-known eye and wing mkd. buff, magnificent shape and style, again feather like glass, does not carry quite the colour of winner, yet runs him close; 3, c, Easterling, stylish buff, Cinn. mkd. wings and head, very long and well-drawn, has a grand pair of legs, neat to a fault; vhc, hc, Crisp, two lovely birds for type, but right out of it for tightness and condition. UNFLIGHTED (14): 1, Bailey and Swanger, superb clear yell., gem for quality and colour, takes a beautiful stand, neat, round head, well-filled in back, A1 wings and tail, wins nicely; 2, Wilcock, eye and wing mkd. yell., beaten a shade in condition, but well on winner in other respects, very taking style, fine length, beautifully moulded body; 3, Mabey, another clinker, rare good length, plenty of leg, and knows how to stand, very shapely and neat all over; vhc, sp, hc, Easterling, two exceedingly nice youngsters; c, Parrott; No. 13, Miss Price, S. Y. C. C. sp for best lady's exhibit. HENS YELL. (9): 1, 3, Bailey and Swanger, leader grand one for shape and style, excels in silky texture of feather, a charming hen, third, mkd. wings and eye, little longer, very slim and shapely, teeming with quality; 2, S. Y. C. C. sp best hen, Easterling, Cinn. mkd., just beaten in "the altogether" by winner, yet ran her a close race, lovely damsel, full of true Yorkie qualities, rare style and silky feather; vhc, Webb, again a taking hen, nice length and shape; hc, Wilcock, very typical, shade on the stout side; c, Easterling. BUFF (8): 1, Bailey and Swanger, a little gem, marvellous quality of feather and bloom, shines like satin, nice length, beautifully drawn, stands perfectly; 2, Crisp, another gem for colour and quality, rare silky jacket, wonderful legs, straight as a rush, grand length and style, just beaten by the wax-like finish of winner; 3, Peverall, yet another exceptionally good hen, has length and quality, well drawn, neat, full of style; vhc, c, Parrott, two sweet specimens, need tightening up a shade; hc, Easterling.

GIFT: 1, Carson; 2, Dell; 3, Colman; vhc, Smith; hc, Tringham; c, Broome.

DOVER.

The First Annual Show of the Kent County C.B.A. was held in the Institute Hall, Biggin Street, Dover, January 9th. The Committee are a body of enthusiastic cage bird fanciers' not afraid to work all night in order to get the birds staged in good time. The Show was opened by Mr. Councillor Appleton with a few appropriate words bearing on the advantages of aviculture as a recreation and hobby for those who work with their hands or with their brains. He congratulated the Committee on their fine initial display and wished the members continued success. Mr. Birch, the Chairman, suitably responded and thanked Mr. Appleton on behalf of the Society. Nearly 300 exhibits faced the judge, Mr. J. North, and the adjudication gave him more than a full morning's work, but in most cases his awards were well received. This young Society deserves great praise for the manner the show was got up, the arrangements being first-class. Mr. H. Sarjeant, the hon. sec., was full of energy, and was ably assisted by his fellow officers. The Committee, with Mr. Appleton and the judge were duly photographed.

NOR. AMAL. (10): 1, 2, 3, vhc, hc, Gibbs, winner buff of splendid type, colour and quality, second large yell., trifle long in body and feather, but full of colour and quality, third a bird of standard type and Nor. properties; c, Taylor. TKD. OR VAR. YELLOW CK. (5): 1, 2, 3, Gibbs, well-known birds of excellent type and colour; vhc, Taylor; hc, Patterson. BUFF CK. (5): 1, vhc, hc, Gibbs, winner nice short flights and tail on typical body; 2, Taylor, beautifully smooth plumage; 3, Patterson, trifle soft at time of judging, but first-rate type. YELL. OR BUFF HEN (5): 1, 2, spl for best Nor. hen, Gibbs, grand buff leading, followed by good style of yell. not quite right in flights; 3, Patterson, nice condition; vhc, Taylor; bc, Birch. VAR. HEN (4): 1, withheld; 2, 3, Gibbs, leader a yell. in bigh condition, latter very nice var. mealy; vhc, Taylor; hc, Patterson. UNFLI. CK. (5): 1, Patterson, cl. buff of nice size and splendid type; 2, 3, Gibbs, var. yell., and neat buff of good type; vhc, Taylor; hc, Abbott. HEN (5): 1, Patterson, cl. buff, lovely feather; 2, Taylor, tick. buff, good type; 3, hc, Gibbs, winner nice var. yell.; vhc, Hogbin. CRESTS (8): 1, spl, for best bird in show, Miss V. Conway Gordon, green of good spread and density; 2, 3, McCreath, second dark crest, good front, not so thick as winner, third a nice long-feathered crest; vhc, hc, Birch, of good quality, but inclining to Lancashire type; c, Ivatt. CRESTBREDS (6): 1, 2, Hogbin, grand lightly var. feathered birds, plenty of head feather, second thickset bird, good head and short beak; 3, Company, not so large but still good in cresting properties; vhc, McCreath; hc, Birch; c, Sarjeant. CINN. SELF OR FOUL (7): 1, spl, 2, 3, vhc, c, Ward, winner good sized yell., trifle long as such are apt to be, second mealy of perfect Nor. type, third another nice feathered yell.; hc, Abbott. YORKS. CK. (5): 1, 3, vhc, spl for best Yorks., and Hyde's spl, Leaver, leader the well-known exhibit, of remarkably graceful pose; 3, Gibbs, nicely moulded bird, but not so steady. TKD. OR VAR. CK. (9): 1, Sarjeant, var. yell. of splendid length and style; 2, Reeve, good yell., not so slim; 3, vhc, hc, Leaver, cinn. var. buff, of high quality; c, Gibs. UNFLI. (6): 1, withheld; 2, Sarjeant, var. yell. of lovely quality; 3, Raynor. Three birds in this class were marked "wrong class," for in addition to colour-fed tails and partial flights, the Judge detected other signs of full maturity. HEN. ANY COL. (6): 1, Gibbs, beautifully smooth buff; 2, 3, Reeve, former tick. yell. of high type; vhc, hc, Austen. BOR. CL. (8): 1, 2, Lockett, winner colour-fed specimen of high quality, natty style, typical shape, second non-fed, almost its equal; 3, vhc, hc, Bowes, all birds of perfect type and condition; c, Abbott (2). TKD. OR MKD. (6): 1, hc, Abbott, leader tick. buff of splendid shape and feather; 2, 3, c, Bowes, former nice yell., trifle wide in tail, otherwise very neat, third bird of similar type; vhc, Lockett; hc, Abbott. LIZ. (5): 1, Company, silver, beautifully spangled very good cap, lovely quality; 2, 3, vhc, Heritage, former gold of nice lacing, size, and colour, third silver, nicely marked back; hc, Ward. MULE-LIGHT (5): 1, withheld; 2, spl for best Mule, 3, Ward, leader six-pointed yell. of good size, colour and splendid feather, third well-marked buff for size and quality; vhc, Mrs. Ivatt, beautiful quality Mule, well-marked. DARK (7): 1, Ramsden's spl, Ward, Jonque Goldfinch-Can., exquisite colour and quality; 2, Eade slashing mealy Goldfinch-Can.; 3, Taylor, Greenfinch-Can. in perfect plumage; vhc, Raynor; hc, Stokes; c, Eade. A.O. HYB. (3): 2, Thompson, Greenfinch-Goldfinch; 3, Taylor, Siskin-Greenfinch, both perfect plumage. GOLDFINCH (14): 1, spl for best Goldfinch and spl for best in Brit. group, Kew, fine, large, colour-fed bird, big blaze, nice buttons, perfect feather; 2, Shinner and Pankhurst, grand exbibit for size, colour and quality; 3, Wickham, not so large, but all there for colour, marking and quality; vhc, spl for best black-legged, field moulted bird, Austen; hc, Soames, Stokes, Austen; c, Ward, Brett. BULLFINCH (7): 1, Wickham, housemoulted, good coloured, true Britisher; 2, Taylor, larger, but field moulted, steady, richly coloured; 3, Raynor, shorter bodied, nice type, perfect condition, housemoulted; vhc, Higgins; bc, Ward; c, Reeve, Sbarpe. GREENFINCH (10): 1, Ward, well up for size and colour; 2, Kew, also good in colour and feather; 3, Hogbin, nice size and condition; vhc, Taylor; hc, Brett, Sarjeant; c, Leaver, Austen. LINNET, ETC. (5): 1, Shinner and Pankburst, grand size Linnet, splendid nutty brown; 2, Wickham, steady Linnet of good colour and stand; 3, Raynor, Siskin, nice vhc, Soames; hc, Johncock; c, Brett. A.O.V. SEEDEATER (6): 1, Patterson, Nuthatch, in good condition, well sbown; 2, Thompson, Bramblefinch in high condition; 3, Wickham, Chaffinch, steady and well forward in colour; vhc, Soames; he, Johncock; c, Brett. A.O.V. (4): 2, Acland, lovely steady Song Thrush; 3, Brett; vhc, Kite; hc, Austen. PARROT, ETC. (4): 2, vhc, Conway Gordon, crimson wing and Parrakeet; 3, Branchett; vhc, Burnett. A.O.V. (4): 2, 3, Birch. Green Virginian Nightingales in splendid plumage and condition; hc, Gordon.

PAIRS MATCHED FOR BREEDING (7): 1, 2, 3, Gibbs, former a choice pair clear Norwich, followed by useful Yorksbires and a somewbat feathery Norwich couple; vhc, Patterson; hc, Company; c, Hogbin. GIFT (11): 1, Ward, a slashing big, variegated yellow; 2, Eade, a good Mule; 3, Abbott, nice cinnamon; vhc, Reeve; hc, Gibbs; c, Birch, a class much above the average. SELL., PAIRS, NOT EXCEEDING 25s. (5): 1, Boncey, useful variegated crest pair; 2, Taylor, smart ticked Norwich; 3, Eade, Norwich in good condition; vhc, Company; hc, Gibbs. COCK, 20s. (3): 2, Taylor, cheap Norwich; 3, Gibbs; vbc, Reeve. HEN, 15s. (4): 2, Taylor; 3, Ward. NOVICE, ANY VARIETY COCK (7): 1, Lockett; 2, Saunderson; 3, Berry; vhc, Raynor; hc, Whiting; c, Sharpe. LADIES' AND CHILDREN'S PET BIRD CLASSS (7): 1, spl, Mrs. Hogbin, a high-class Crestbred green, that has been successful before; 2, spl, Mrs. Leaver, nice variegated Goldfinch-Mule; 3, Miss McCreath, slashing Linnet-Canary-Mule; vhc, Lockct; hc, Whiting; c, Leaver.

S.W. LONDON C.B.S.

The result of the election of officers of the South-West London Cage Bird Society is as follows: Mr. Mabey, senior, Treasurer; Mr. Harris, Chairman; Mr. Lilley, Hon. Secretary; Mr. Miller, Assistant Hon. Secretary. Committee; Messrs. Graham, Berkshire, McLaughlan, Dales, C. Mabey, junior, Slade, Pocock; also four new members were proposed and accepted.

Advts. for No. 3 of the "Bird World" should be sent in at once.

SWANSEA F. & F.S.

Owing to the clashing with several other fixtures in South Wales last week, particularly Llandilo, which is not far distant, and was a Cage Bird Show only, the entry at Swansea was not quite what the promoters would have liked. Our Swansea friends could not, however, help themselves, as January 17th was the only day upon which the Market Hall was available. The Canaries, although not numerous, were of good average merit, and the competition was pretty keen throughout. In Norwich the special fell to a grand little buff, shown by that good fancier Mr. F. J. Eynon. The local enthusiast, Mr. H. Creber, succeeded in defeating some Northern cracks in the Yorkshire section, and the manner in which his team was staged reflected much credit upon him. The popular Borders were represented by birds of rare quality and style. "Scotties" made a good class, but the Llanelly winner went down; it was not his day out. In the Mules somewhat of a sensation was caused by the exhibits of Messrs. Jones, Coppy, Lees, and Robbins, all being passed as "wrong class," but, according to the wording of the schedule, the judge thought he had no option in the matter. British birds, as is usual at South Wales shows, went strong both in numbers and quality. Goldfinches were especially good, and the Greypate, shown by Mr. Davies, succeeded in wresting the special from Mr. Howes's crack. The Softbills were a hot lot all the way through, and a double set of winners could easily have been found. Our old and able friend, Mr. D. A. S. Longden, acted as chief steward of the cage bird section, and associated with him in the management were such good local fanciers as Messrs. J. B. Brader, W. Bowen, H. B. Gange, Chapman, P. Clement, S. Ford, D. Curvis, J. R. and W. Cooper, R. Winstone, D. Evans, W. Summerfield, and W. Taylor, whilst Mr. F. Slater made a most able and courteous Hon. Sec. With such a good lot of fellows associated in the management it goes without saying that all was done that could be done to make both exhibits and exhibitors comfortable. There was a fairly good attendance of visitors during the day, and we hope the first venture of the Swansea F. and F. S. proved a financial success. Mr. C. A. House judged.

NOR. CLEAR (6): 1, sp, Eynon, grand buff, beautifully feathered, nice even colour, very typical; 2, Pritchard, yellow, of beautiful colour and quality, grand cobby body; 3, D. Jenkins, buff, of grand shape, colour, and feather, not so stout in head; 4, Tedstone, rattling good buff, but needed the attention of the laundryman; vhc, Rees; hc, Hitchins, splendid bird, but unfortunately was lame. HEN (8): 1, G. Williams, with his well-known cl yell. hen, looking her best to-day, wonderful colour, and nice silky feather, wins well; 2, vhc, Pritchard, a sweetly pretty buff, shown in faultless trim, nice short one, good head properties, superb wing and tail carriage; 3, Love, var. buff, another special one, full of quality, nice head and chest, good wings and tail; 4, Rees, nice-shaped buff, rare quality, good order; hc, A. Hitchins. YORKS. (4): 1, sp, Creber, with his now famous buff, straight, lengthy, nicely drawn, beautiful wings and tail, put down in well-known style, wins; 2, R. W. Jones, wing tkd. yell., rare position and length, feathered like boxwood, beautiful finish, faultlessly carried wings and tail; 3, Walsh, not quite the style of leaders, good length and nice quality of feather; r, Williams and Morgans. HEN (4): 1, W. Walsh, tkd. buff, nice position and carriage, neat head and nicely filled at shoulders rare wings and tail; 2, 3, Creber, former, yell., tastefully shown, tight and trim, good length and position, third, buff, has also the essential length and position, feathered like wax, both neat and well finished; 4, Williams, shapely yellow, good length, nice feather. BORDER YELL. (7): 1, D. Jenkins, with his well-known cl, marvellous colour and condition, neat carriage of wings and tail, and staged like a new pin; 2, Nicholas, another clinking good Border, neat model, well filled in at all points, best of wing and tail carriage, well put down; 3, hc, L. M. Evans, a grand yell., good stamp, neat style and plenty of go, staged with taste; 4, Tedstone, splendid shape, colour and quality; vhc, Jones; c, Walters. BUFF (6): 1, D. Jenkins, a gem, neat finish all through, jaunty carriage, grand wings, closely fitting jacket, faultless condition; 2, Tedstone, very neat, gay carriage, well moulded, moves with ease and grace, in fine order; 3, R. H. Jones, close fight, similar stamp, with the best of wings and tail, neat carriage, well finished exhibit; 4, E. M. Evans, capital shape and position; vhc, P. Jenkins; hc, S. J. Nicholas. UNEVEN MKD. (5): 1, Nicholas, tkd. one, nice quality, with the smartest of jackets, jaunty carriage, best of wings, staged in nice order; 2, P. Jenkins, wing mkd. buff, in the best of feather, neat type, nicely moulded, good wing and tail carriage; 3, D. Jenkins, good green, well staged, nice mover, good type and quality, good race; 4, E. M. Evans, head and wing mkd. yell., very nice body, grand style; vhc, O'Connell. SCOTS (8): 1, 2, B. Davies, with his well-known couple, buff leading, nice circled one, finished off with plenty of weight on top, gets to work in fine style, well put down, second, piebald, grand substance, rough chest, gets head well down, good length of drive, well scooped out in front, not so quick coming into position as leader; 3, c, J. H. Jones, nice-sided buff, gets tail well under, good top, works very freely, very nice outline; 4, vhc, hc, Longden, foul-headed yell., very quick in action, grand shape, wants a bit more substance. MULE DARK (6): 1, 4, vhc, R. W. Jones, noted dark yell., leading, in rare fettle, like a lump of gold, immense colour and size, staged in superb style, fourth, beautiful jonque Linnet; 2, 3, Coffy, Linnet Mule, too dark for our fancy, in rare feather, good size, shines like satin, third, Goldie Mule, good face, nice body colour, in the best of feather, tastefully staged; hc, James. HYBRID (7). (Five were wrong classed here): 1, sp, R. W. Jones, with a class Grecnie-Canary, lovely yell., possessing beautiful colour and quality, rare size, staged in neat order; 2, Longden, Siskin Mule, nice colour and size, shows parentage very well, bonny specimen. BRIT. GOLDFINCH (12): 1, A. Howe, good-sized one, rare big face, nice tans and buttons, beautiful, not quite the cut of face we admire, hardly square enough underneath, still a good one, fit to win in most places 2, Martin, typical Britisher, nice colour, well polished face, neat tans, bars, and buttons; 3, Jeffries, neat, square blazed one, rare colour, good tans, staged in fine order; 4, Birchley, good expansive blaze, not quite the correct cut, nice warm tans, bars and buttons of the best; vhc, W. Lewis, just washed, which spoiled his chance; hc, M. James; c, Robbins. GREYPATE (7): 1, E. J. Davies, big-faced one, possessing the true characteristics of a Britisher, neat warm tans, good bars and buttons, wins; 2, Martin, big, neat Finch, grand-coloured blaze, nice shape, good tans and buttons; 3, Glover, going back in blaze colour, or might have won, very neatly cut face, good, rich, and profuse tans, nice buttons; 4, S. Evans, nice body colour, well marked; vhc, Jeffries; hc, c, Williams and Morgans. BULLFINCH (14): 1, 2, vhc, R. J. Howe, a team of extra good ones, leader not the longest, but rare colour, neat cap and bars, and as tight as wax, second, large, short, cobby one, quite the correct type, with an expansive cap and bib, not the clearness of breast colour possessed by leader; 3, Thorne, very shapely hen, good cap and bars, shortest of wings and tail, neat type throughout; 4, Raven, grand colour and feather; hc, Jupe; c, Coffy. GREENFINCH (11): 1, Birchley, not one of the largest, but rich green colour, nice shape, rich wings and tail, in good feather; 2, Raven, rather larger, in good condition, fine level colour; 3, R. J. Howe, possibly the best yellow seen in Wales, rare colour, size, shape, and polish, we thought had hard lines; 4, Jeffries, nice one for colour and shape; vhc, Nicholas, the noted buff; hc, P. Jenkins; c, Longden. SISKIN, ETC. (6): 1, sp, vhc, Nicholas, a nicely-coloured Siskin, in rare bloom, good cap and eye marks, nicely laced, vhc, Lesser Redpoll, Cardiff, Swansea, etc., winner, rare polish and bloom, grand colour and bib, well laced; 2, Jenkins, Lesser Redpoll, nice breast colour, well laced, put down in fine trim; 3, Robbins, nice-sized Mealy Redpoll, good colour and lacing, in remarkably fine order; 4, Jeffries, nice Twite, rare colour and markings, and shape; hc, Longden. BRAMBLE-FINCH (8): 1, 4, R. J. Howe, Chaffinch and Bramble respectively, former, rare colour and finish, shown in superb style, wins well, latter, rare breast colour, nicely spangled back and thighs, plenty of size; 2, Longden, good Bramble, nice size and spangle, well finished, rare front colour, put down in good feather; 3, Raven, neat Chaffie, rich breast colour, good cap and hood, nice shoulders; vhc, Williams and Morgans; hc, Richards; c, Pearce. A. O. V. HARDBILL (7): 1, R. J. Howe, lovely marked Meadow Bunting, nicely tinted throughout, in capital feather; 2, c, Jeffries, another Bunting, of the same variety (they are most plentiful on the bench this season), nicely feathered one, steady and well staged; 3, 4, Nicholas, good big yellow Bunting, nice colour, well marked head and thighs, fourth, Hawfinch, not looking his best to-day; vhc, Glover; hc, Raven. SOFTBILL (11): 1, Brotherhood, with the well-known Redstart, in the pink of condition, a remarkably fine exhibit; 2, 3, vhc, R. J. Howe, with his noted Blackbird and Thrush, put down in well-known style, latter, good Blue-headed Wagtail, in grand feather, staged in excellent style; 4, hc, c, Birchley, with a clinking good team, the latter Great Grey Shrike, might have won, but did not seem in the best of form. BRIT. SELLING, 15s. (6): 1, R. J. Howe, Wagtail Grey, in good form; 2, 4, vhc, Baverofi, good Goldfinch-Linnet and Greenfinch respectively; 3, W. Lewis; vhc, Messer. FOREIGN (4): 1, J. H. Jones, Red-headed Gouldian, nice size and colour, well staged; 2, 4, Thorne, Long-tailed Whydah, in good trim; 3, Raven, pair of Ruficaudas, neatly put down.

HASTINGS CENTRAL.

The Hastings Central C.B.S. held a very successful Members' Show on Jan. 15th, the entries numbering about 180, and the quality being tip-top. Mr. A. E. Silk judged. NOR. CL. YELL.: 1, Ellis; 2, Godden; 3, Chantler; vhc, Harris Bros.; hc, Bellamy; c, Ransom. BUFF: 1, Bellamy; 2, Godden; 3, Fuller; vhc, c, Harris Bros.; hc, Stubberfield. TK., etc., YELL.: 1, Godden; 2, Chantler; 3, Godden; vhc, Bellamy; hc, Ellis; c, Duck. BUFF: 1, Ellis; 2, Chantler; 3, hc, Bellamy; vhc, Pennells; c, Harris Bros. YELL. HENS: 1, Bellamy; 2, 3, Godden; vhc, Pennells; hc, Harris Bros.; c, Godden. BUFF.: 1, 2, Bellamy; 3, Ellis; vhc, Breeds; hc, Duck; c, Ransom. UNFLIG. YELL.: 1, Bellamy; 2, Fuller; 3, Godden; vhc, Pennells; hc, c, Harris Bros. BUFF: 1, Douch; 2, c, Bellamy; 3, Ransom; vhc, Upton and Button; hc, Harris Bros. YORKS. CLR. or MKD. YELL.: 1, 2, Nagel; 3, Miss Cooper; vhc, hc, Barham; c, Southon. MKD. BUFF: 1, Harris Bros. HENS: 1, Nagel. UNFLIG.: 1, 2, Barham. CRESTS: 1, 2, vhc, Upton and Button; 3, Duck. CRESTBRED: 1, 3, vhc, Upton and Button; 2, Duck. HYBRID: 1, 2, hc, Wappett; 3, Standen; vhc, Harris Bros. GOLDFINCH: 1, Ellis; 2, May; 3, Stubberfield; vhc, Duck; hc, Godden; c, Barham. BULLFINCH: 1, Pennells; 2 Ellis; 3, Chantler; vhc, May; hc, Barham; c, Godden. HARDBILL: 1, 2, R. Pennells; 3, Ellis; vhc, hc, Stubberfield; c, R. May. SOFTBILLS: 1, Upton and Button; 2, 3, vhc, hc, Barham. A.O.V. CAN.: 1, Duck; 2, Miss Maynard; 3, Miss Cooper; vhc, Breeds. STOCK: 1, 2, Douch; 3, Bellamy; vhc, Stubberfield; hc, Barham; c, Miss Earwaker. FOREIGN: 1, 2, Harris Bros. RESIDENTS, CAN.: 1, Miss Harmer; 2, Glenister; 3, Gooday; vhc, Mrs. Harris; vhc, May; hc, c, Boot and May. A.O.V.: 1, vhc, Lane; 2, hc, Herzeiden; 3, hc, Yarman, vhc, Harris; c, Morice

THE LIABILITIES OF RAILWAY COMPANIES.

SIR,—I beg to enclose you a report of a dog case, which I think worth while for you to print in CAGE BIRDS, for it interests all fanciers, and shows how the law stands re liability of railway companies to fanciers. I am, at the present time, on behalf of the C.B. Union, pressing a similar case against the same Railway Company. They admit liability and negligence, but claim that their liability is limited to 5s. per bird.—J. W. RAMSDEN.

£300 for a Dog.

Judgment against Railway Company.

In the King's Bench Division, on Tuesday Mr. Justice Walton delivered his reserved judgment in the case of Williams v. The Midland Railway Company. Plaintiff, Mr. T. Williams, solicitor, claimed damages in respect of a pedigree dog sent to the North of England, and which had been killed before being delivered by the defendants by the basket containing it being set on fire. The value of the dog had been agreed between the parties at £300. The dog was the well-known Rose of Gerwn, and had been sent to Chesterfield via Gloucester.

In giving judgment, Mr. Justice Walton said the case had presented some difficulty. The dog had arrived at its destination at six in the evening, and it was not convenient for the railway company to deliver it. Unfortunately during the night the dog was destroyed. That the dog was burned to death through the negligence of defendants' servants was admitted, and defendants brought into court that which they said was the limit of their liability. They relied upon the terms of the consignment note upon which admittedly the dog had been carried. This note stated that the defendants would be liable for £2, unless a higher value be declared; in respect of this higher value an excess of 1½ per cent. had to be paid, with a minimum of 3d. In this case, though the dog was worth £300, no declaration of excess was made; and of course the excess percentage had not been paid. Therefore, if the contract was binding upon plaintiff he could only recover the limited amount of £2. Plaintiff, however, relied on Section 7 of the 17 and 18 Vic., Chap. 31. The short effect of this section was that a railway company was made liable for a loss of such an animal as this dog, if the loss was occasioned by neglect or default, provided that at the same time the company should not be prevented from "making such conditions with respect to the receiving, forwarding, and delivering of such animal as shall be judged to be reasonable." Was the condition that the company should only be liable for £2 reasonable? A precisely similar question had been before the Court of Appeal in 1886. In consequence of the decision then given, all the railway companies of Great Britain and Ireland changed the form of their contracts for the carriage of dogs. They changed the charge for excess value from 5 per cent. to 1½ per cent. Since the change it had never been tried whether the 1½ per cent. was a reasonable percentage of excess value. The burden of proving that this percentage was reasonable rested with the railway company, but no evidence as to whether it was reasonable or unreasonable had been put before him. That the same percentage was charged whether an animal was carried one mile or 400 miles he must take to be not unreasonable. The evidence given him was that there was considerable risk of dogs getting lost in transit by reason of their trying to escape, often in the most extraordinary way. A witness at Swansea had said that it was a million to one comparing the risks to a dog and a passenger. But that was practical and metaphorical, and did not pretend to be statistical. He did not think the evidence was sufficient for him to say the 1½ per cent. was reasonable. It was for the railway company to prove it was, and he did not think they had discharged the burden cast upon them. There must therefore be judgment for plaintiff with costs.

Mr. B. Francis Williams asked for stay.

The Judge: Yes; I think it is a case for stay of execution.—"S. Wales Echo," January 17.

In enclosing a similar cutting, Mr. W. C. Baker (Cardiff) remarks:—"I think this case very important to all lovers of cage birds who from time to time get birds killed or lost on railway journeys, and never get compensation for same. It only shows what can be done by trying and fighting the railway companies."—W. C. BAKER.

PROPOSED SCOTTISH SPECIALIST CLUB SHOW.

SIR,—A meeting was held at 142, High Street, Edinburgh, on January 19th. Mr. John Ferguson, Glasgow (in the chair), said he was in favour of holding such a show, as there was little doubt the treatment the Specialist Clubs got from some of the open shows required to be put on a more satisfactory basis. He instanced the judge question. What was the use of those clubs selecting a list of judges? There was little wonder there was dissatisfaction, for men were very often selected who knew nothing about some of the varieties, and great dissatisfaction was the result. If such a club show could be arranged to take place about, say, the end of November, with a good classification, nothing but good to the various specialist clubs would result. He had heard rumours that this Club Show was meant to kill the open shows. He could assure them that he, for one, would have nothing to do with it if he thought that was the case.—D. Smith (Edinburgh) reminded the meeting that it had not been decided to hold the show as yet, but he wished those present to discuss the question. He wished to say that this was no new subject, as it had been long talked about and was very much wanted, and would come sooner or later. His idea was that each club taking part should have the best classification, and have the selection of its own judge. Each club to take its own entries, and send them on to the selected general secretary, whoever he was, to have them catalogued together. There were something like twenty specialist clubs, but no one supposed that all would agree to the proposal.—After a short discussion it became quite evident that those present were against such a large undertaking. It was agreed to confine the proposals to Scotland in the meantime, and it was agreed that D. Smith write the four specialist clubs if they would agree to such a proposal, and have a combined show this year. The following clubs will be asked:—Scottish Plainhead Club, Scottish Crest Club, Border Fancy Club, Scottish British Bird and Mule Club.—D. SMITH.

LLANELLY SHOW—ALLEGED TAMPERING IN TRANSIT.

SIR,—I should be very sorry to think that, as suggested by Mr. Thompson, the cause of his birds being returned home again before reaching Llanelly Show was due to the action of some fellow exhibitor, jealous of his success. I remember a case that occurred here, something similar, though, being at the close of a show, not much harm was done. Amongst the exhibits returned from a show held here a number of years ago now, was a hamper containing several Magpie Pigeons, belonging to an exhibitor from Oxford. The hamper, after apparently getting so far on its homeward journey, was returned here again the following day. After feeding and watering, the birds had to make another start for home. I wrote to the exhibitor stating cause of delay in returning exhibits, but whether he claimed from railway company for delay I never knew. The explanation given by the railway company officials of the returning of the birds was that they had been placed on the platform at some junction, had the label reversed in some manner, and were then put in the train coming North again. It appears careless work on someone's part sending on without either waybill or sender (that sounds odd); but I expect that, being livestock, the company will be anxious to get them delivered to someone. I think if the facts were known such will have been the way in Mr. T.'s case. That he may succeed better with the railway company in the matter of his claim is my best wish.—Jos. B. MOORE (Whitehaven).

SIR,—I can sympathise with your correspondent, J. Thompson, in the treatment he has received at the hands of some person or persons, as I have been treated in precisely the same way, and, strange to say, when sending to a show in the same district. I entered four birds for the Swansea C.B. Show, held on November 7th and 8th. I took them to Bristol Station on the 6th in good time, and handed them to the guard of the South Wales express myself. You can imagine my surprise when they were delivered to me again by the railway company's servant the next morning about 10 o'clock, with 1s. 11d. carriage to pay—needless to say I did not pay same. I immediately made out a claim against the railway company, 5s. for each bird for delay, as it was too late to send them on again, and four entry fees, 6s.; and carriage one way, 1s. 4d.; making a total of £1 7s. 11d. The only reason they could give me why they were returned was that the label must have been turned at Landore, as that was the only station where they would be changed. As in Mr. Thompson's case, they had no way-bill, but had traced them to Landore, quite close to Swansea. After waiting several weeks, the railway company offered me 15s. to settle the matter, which I accepted rather than have any further bother.—E. A. LOVELL.

Have you a Breeder's Card in the "Bird World" Magazine?

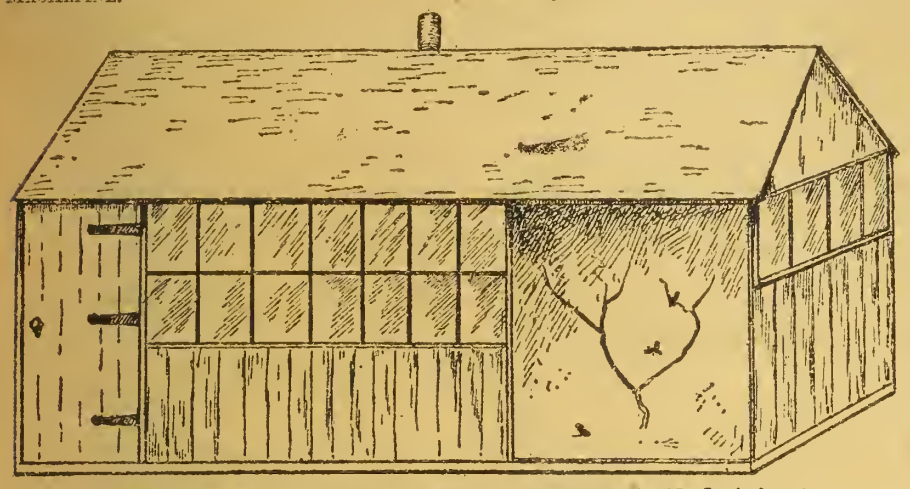
FORRES SHOW.

SIR,—I am sorry, very sorry indeed, that the proffered bait I cast out was swallowed. I made a silly arrangement of my views regarding "Crests," "Borders," and "Britishers," with the result that the admission in favour of my first contention has now been made. No mention of Section (Norwich) is at all in the Schedule, but simply "Scotch Fancies and Norwiches." Classes were provided for Scotch Fancies, Norwiches (fed and non-fed), Crests and Crestbreds, Borders, then "any variety Canary—not otherwise classed." An Esquimaux would have sufficient brains to understand what classification the above indicates; not Norwich, I feel certain of, and outside entirely the clause relating to colour-feeding. I would advise you to be more careful in future. We look for wisdom in the East, as wise men at one time came from that direction. Now I feel inclined to say that this virtue hath departed from amongst you, and leave you to mourn your discomfiture in sackcloth and ashes.—GEORGE MACALPINE.

SUCCESSFUL CANARY BREEDING IN AN OUTDOOR AVIARY.

SIR,—It may be interesting to some fanciers to know that I began my last breeding season at the latter end of March, in my outdoor aviary. The latter is 18ft. long, by 8ft. wide by 9 ft. high at the highest point, with large window at the front and small window at the end, this latter window acting as a ventilator also, being covered inside with ½-in. mesh wire netting, so that when opened for air none of the birds can escape. I have one part of the room 8 ft. square, netted off with ½-in. mesh wire. This is also 9 ft. high, so the birds have plenty of room to fly about. The door into this is very narrow, so that I can just manage to get through without any of the birds flying past me. I put one Norwich cock in with seven hens, and had very good luck with them. I had few clear eggs all through the season, this one cock being responsible for 45 young birds. Unfortunately some of them died, but I reared 33 of them healthy and strong, 23 cocks and 10 hens. I must say, too, that the old cock bird is looking very promising for another season. I also bred from one pair of Germans, in a separate cage, eight young ones, making a total of 41. I have a small one-legged table in the centre of the aviary, for the birds to feed from, so that no mice can get at the seed, and a good glazed dish for them to drink from, which they also bathe in, but it is emptied as soon as they have done bathing, and filled again with clean water. I always keep a jar filled solid with green stuff, such as dandelion, groundsel, lettuce, or watercress; I give mixed seed and egg and bread, with plenty of old mortar and sand on the bottom of the place. As soon as the young ones are able to feed themselves I put them away from the old ones into a part of the aviary which is wired off from the latter, but so arranged that they can feed through the wires if necessary. I let the youngsters remain in these places till after the moult, then cage them off, the cocks separate from the hens, four or five in one big cage. I keep a bit of fire going in a small stove in the centre of the room during the very cold weather, and the birds are very comfortable. I hope this will be interesting to readers of CAGE BIRDS, which I am sure is far the most valuable paper to all bird fanciers, including myself.—W. HALL.

[Thanks for your letter and kindly remarks. We are always pleased to hear readers' experiences in the hobby, and to publish them for the benefit of others.—ED.]



MR. W. HALL'S OUTDOOR AVIARY, facing West, 16 feet long.

KESTRELS IN CAPTIVITY.

SIR,—Before closing this correspondence allow me to thank Mr. Ledbitter for his capital article on Falconry, in which my queries were answered. The article was a treat, quite encyclopædic, yet practical, and perhaps the most unique contribution to your splendid Birthday Number. Metaphorically I raise my hat to him and to your other correspondent, Mr. J. S. Clarke. Both have entertained us royally!—TIERCEL.

SIR,—I thank you for your courtesy in affording me a further opportunity of replying to "Tiercel," but as he adduces neither excuse nor reason for his conduct, to which I took exception, no good purpose can be served by so doing. Bearing in mind the information he has received in your columns, I have no doubt he will be able to use the "nom de guerre" of "Constant Reader" (should he feel so inclined) on the next occasion he appears in print in your correspondence columns. Assuring him that I have no desire to "wring his neck," figuratively speaking or otherwise.—J. S. CLARKE.

NORWICH CLUB FOR IRELAND.

SIR,—I was pleased to see Mr. Mulligan's letter re above in your last issue, and am quite sure if a few more from north, south, east and west of Ireland appeared to like the idea, it would pave the way for a start, and it would get all my support. I have seen all the catalogues of the past shows, including so recent a one as Lurgan. This Ulster show, so near Belfast, was yet very badly supported—three and four entries in the Crest variety, while the Plainhead was only a shade better. Dublin Show was the best in Crests, and equal to Belfast in Plainheads, if not better; Cork was fair, and so was the Yorkshire C.C. Open Show, while Sligo was poor—only ten in two classes, while only one Crestbred put in an appearance. The previous year that the crack judge of Plainheads and Crests (Mr. John McLay) was there he had to face 36 birds in three classes of Crests and Crestbreds, which looked at the time as if this variety was forging ahead. I understand Belfast has a Norwich Plainhead and Crest Club. If so, they should support every show in Ireland, and let our Yorkshire friends see that the Norwich and Crest will hold their own. The Yorkshire Canary Club is a blessing to any show, as their entries (from patronage) more than cover prize money, which would apply to a Norwich Club for Ireland, as instead of having a couple of classes at most of the shows, it would allow of six or eight, and also encourage novices by providing them a share. It certainly would not take much to run it, and I would suggest that the City of Belfast Norwich Club should form itself into an All Ireland one. I have no doubt if the Ulster fanciers move in the matter it will be easy to get Munster, Leinster and Connaught to follow suit.—"IRISHMAN."

ABOUT A SPECIAL PRIZE AT CHELTENHAM SHOW.

SIR,—I am the recipient of a letter from Messrs. the Cheltenham Cage Bird Society, copy of which I enclose, which I think may be of interest to your readers. It will, no doubt, be remembered that these people advertised a competition, with reference to which it was distinctly stated that a prize consisting of a knife would be awarded to the most successful competitor. Believing their offer to be of a bona fide character, I submitted four valuable birds for exhibition, and I am of the opinion that a perusal of the letter referred to above may deter my fellow-fanciers from being decoyed by such specious advertisements.—J. SUMMERHILL and C. DAWES.

COPY.

From Messrs. The Cheltenham Cage Bird Society, to Messrs. Summerhill and Dawes.

Gentlemen,—I much regret that the firm of cutlers who promised the knife as a Special Prize, which was won by you, have informed me that they are unable to fulfil their promise owing to a very bad state of trade. Thanking you for your Entries and support which I trust we may receive another year. Yours faithfully, A. S. TREASURE.

HOW TO MAKE LIGHT BUNS.

By using Eiffel Tower Bun Flour the most inexperienced person can make *light* Buns and Cakes with certain success. Try a 1d. packet. Save Eiffel Tower Labels for 10,6 picture free.

A PRIVATE APPEAL.

SIR,—May I be permitted to make a suggestion to the Fancy at large? I don't know how many cage bird societies there are in the United Kingdom, but if each secretary or chairman be agreeable at their next meeting to allow a hat to be placed on the table, and if every member present would give a penny, or more if they felt disposed, we could make a grand collection for our old friend Verrall. I shall certainly suggest it at the next meeting of the Cardiff Society.—F. P. DYMOND.

SIR,—I have pleasure in enclosing 5s. to the Verrall Fund, and trust a few more may lend a helping hand to a fellow fancier. I hope he may have the pleasure of viewing the Crystal Palace Show once again, which will perhaps warm his heart—once as strong and as keen as that of the youngest amongst us.—J. PATTERSON (Chirnside).

"A Fancier" (Southport) subscribes 1s., and "C. Elegans" 2s. 6d.

DEFECTIVE EYESIGHT.

The Case of Blind Birds and the Show Bench.

SIR,—This question of sight is frequently before us during the show seasons, and cases of imperfections, or alleged blindness are suspected, more particularly in the Crystal birds. Even judges, at times, seem to draw their conclusions at once, if they perceive that a bird does not immediately act, or acquit itself according to their desires; and many birds have been passed as blind when such has not been the case. These birds with heavy crests, at times completely obscuring the eyes, are apt to get into a habit of movement, appearing as though they were sightless. The fact is, the bird cannot use the sight, the crest acting as a lid. After the show season is over, and the crest is cut away, the eye gradually gets into use, and the bird can see all right. I am not going to commit myself to saying that there are no blind Crests, or other birds; but I do say that judges are at times too impulsive, and for want of a little consideration at the moment, disqualify a bird as blind when at the same time there is a doubt. I have come to this conclusion:—That if a bird acquits itself in the show cage, and displays the necessary qualifications the bird should be placed in the prize list accordingly. If we are not going to give exhibits any consideration on this score, let the schedules and standards say, that shortsighted, one-eyed, and suspected blind birds will be disqualified. If you do this, why not say birds with imperfect wings, and tails or feet, or birds which are in any way imperfect, will have no consideration, no matter how good their properties are otherwise. Well after this, what use is our standard of points? The facts are here: Many of our judges, either have not got the idea, or don't care to use it, of considering an allowance of points for qualification, or defects. I say that if a bird is defective in sight but is able to show to advantage a higher qualification which more than equalises this many times suspected defect, it should be placed according to standard properties.—BARKER CLEGG.

THE JUDGES AT LLANELLY SHOW.

A CORRECTION.

SIR,—Re Llanelly Show, in your issue Jan. 12th, under "Twitterings," Mr. C. A. House is mentioned as having been wired for to judge in the place of Mr. Payne. I beg to contradict that statement, and to say that I was engaged to judge, and beg to enclose telegrams to confirm my statement. Mr. House was wired for, but not engaged. Please correct in this week's issue, and kindly return telegrams.—A. G. DAVIS.

COPIES OF TELEGRAMS.

Handed in at Llanelly, January 7th, at 2.15.

"Payne very ill to judge our show to-morrow, January 8th. Please can you come instead? State price, reply paid.—Lewis, Secretary, Llanelly."

Handed in at Llanelly, January 7th, at 4.2.

"Terms accepted, come without fail, don't disappoint us, wire when will arrive.—Lewis, Llanelly."

THE CAGE BIRD UNION.

SIR,—I was pleased to see the letter from Wm. Reid re the C. B. U. in your last issue. I am quite in favour of his move, for I feel certain that a host of fanciers have never given the Union a second thought, but naturally go with the prevailing sentiment of their society when voting. Perhaps it was because the C.B.U. was a new move in bird culture that societies made a rush to become affiliated, fearing everything, while there is nothing really to fear. What has been on my mind is this: Does the executive council think it right to forget any man who has been expelled from a society prior to the formation of the Union? The Union is supposed to have supreme power over all affiliated societies, therefore, I would suggest that any member expelled from any club before the formation of the Union be reinstated. Then the Union, the society and, the average exhibitor will start a new life under supervision and control of an independent governing body. Consequently the Union will have started its career with a perfectly clean slate, and then the council may expect progress. Let me put before the Union the name of Sandiford—a fancier full of youth and vigour. Sentiment is not in it, but something more important. What is more lamentable than to see a Union formed for the British Isles, with a Britisher deprived of its advantages. Let the C. B. U. start well, for in youth one learns some severe lessons. Let me appeal to fanciers not to forget the "soap trust," which was squashed by the British Public, and it would not be unreasonable to expect to see the Union put to flight, unless every British fancier comes within its bounds. When the Union have considered this matter, and reinstated all fanciers who were expelled prior to its formation, I will think the Union a grand thing, and worthy of its name. I should also like to suggest that any money in hand over and above the expenses connected with the Union be utilised to form an insurance against losses of birds in transit to and from shows. It is well known that many birds die during the show season as a result of travelling: therefore the bird-fancier will have something to look forward to should his bird die from such causes. The premium to be, say, 3d. for each bird shown in any one season, and the maximum claim be a sum not exceeding £2. Should the insurance show a profit (on the whole) in, say, 3 years' time, the policy holders to receive a percentage of same according to the number of birds insured at the Union during that time. However, I only make this as a suggestion, and trust some abler pen than mine will take it up. I wish it to be understood that I am in no way prejudiced against the Union, but it is only reasonable to expect the average working-man fancier to benefit to some extent for his outlay in making the Union a success, and the British workman is the backbone of the fancy, after all. I am entirely in favour of the Union when an understanding be made between the promoters and the average exhibitor. Let us not make it a limited combination, but a universal friendly affair, to the advantage of all its members, so that they have an inclination to uphold it, rather than to break down. Let us cultivate a new code of exhibition life: Jealousy is in our nature; let the Union do all in its power to thrust it from the Fancy.—J. KERSHAW.

THE LONDON DISTRICT SECRETARYSHIP.

SIR,—In your issue of CAGE BIRDS dated December 15th, 1906, appeared a paragraph to the effect that I had been elected Secretary of London District (II.). After taking 48 hours in which to think the matter over, I wrote Mr. Ramsden in the following terms:—"Dear Mr. Ramsden,—I was somewhat surprised to see in CAGE BIRDS that I had been elected Secretary for Division (II.). After giving the matter serious consideration I can arrive at no other decision than to most respectfully decline the office, having already as many irons in the fire as I can safely manage. I would like to return my sincere thanks to those gentlemen who so kindly voted for me, and must also apologise for the trouble I am giving you. I had no idea of being in the running for the office, or would have notified you that I was not a candidate. —Yours, etc." I have not up till now received any notification of my election (only through CAGE BIRDS), nor an acknowledgment of my letter. It appears that my brother delegates have not been notified of my decision, so trust you will allow me space for the above, which I hope will explain my part of the programme. Thanking you in anticipation.—A. W. CURTIS.

THE YORKSHIRE CANARY.

SIR,—I am a Yorkshire fancier, and the Yorkshire in coloured plate pleased me very well, as did also the description by its owner, Mr. Shackleton (Girlington). This gentleman has taught me a few wrinkles. He says this bird is bred from 1st prize winners, also the grand-parents and the great-grand-parents were 1st prize winners. That's good work for in-breeding. Forty years' experience has taught Mr. Shackleton a good deal. To prove his case out as regards in-breeding to a certain extent, the illustration of cultivating flowers and fruit for exhibition is, to my mind, very good indeed. The few notes Mr. S. gives your readers re number of young birds in each nest that are to be reared by their parents are practical and to the point. I trust that I and your 40,000 other readers will have the pleasure of reading in CAGE BIRDS (before many weeks have passed) a further instructive and practical letter on the Yorkshire by Mr. Shackleton.—ARTHUR H. C. LEGG.

SCOTTISH RAILWAY CHARGES.

SIR,—Your Scottish notes re railway charges are, indeed, very amusing. Why all these endeavours on the part of fanciers to hoodwink the railway companies? If fanciers would combine, and interview the railway authorities, and state their grievances in a business-like manner, I am sure they would be considered. It is certainly not a dignified thing to be "held up," and after running the gauntlet, made to stump up. Possibly if the Scottish C.B.U. gets into shape it might do something in this matter. Better late than never.—R. FARMER.

ANOTHER "HOMING" GOLDFINCH.

SIR,—I have in my possession a number of British birds, one of which is a pet Goldfinch, rendered somewhat more valuable from the fact of its having been awarded the third prize, some two years ago, at Manchester Show. The incident I desire to place on record regarding the above-named Finch is as follows:—Each of my birdcages is hung in the open yard in the daytime (winter and summer); one Christmas afternoon, unfortunately, the cage door was left unfastened, and master Goldie made his exit. The district was searched, but the bird could not be seen anywhere. We had given up all hopes of seeing our tame pet again, when, to my surprise, he returned to the outside of his cage, then flew into a pear tree close by. The cage was then, by means of a tall step ladder, handed up to him, and he stepped inside and was secured.—ALFRED ROGERS.

HOW SHOULD SLIDING PARTITIONS BE MADE?

SIR,—Will any of your numerous readers tell me the best plan on which to make the sliding partitions used in double breeders? I have given a standing order for the "Bird World." What a lovely plate this month; how happy could I be with either!—J. COOKE.

ALBINISM AND ITS CAUSE.

SIR,—Last autumn I saw in my garden a prettily-marked semi-Albino Blackbird; and but the other day I saw a House Sparrow with a white feather in its wing. On mentioning these facts to a few of my friends, all agreed that these abnormal-coloured birds were becoming more common around here (Bonnybridge). Can your talented contributor "Macalpine," who I see in a recent issue of CAGE BIRDS takes notice of birds so marked, or any other reader, say if such is the case in the district in which he himself resides? And if, as my friends declare, Albinism is becoming more common, what is the cause of it?—W. T.

AN EXTRAORDINARY EPIDEMIC.

SIR,—A curious epidemic has entered the bird rooms of myself and a friend. The upper mandibles of all my friend's birds (including every variety) have rotted completely away; and now I find one of my own birds going the same way, although it has never been in my friend's room nor in contact with any of his stock. The extraordinary fact is that the lower mandible is quite perfect and free from any signs of the above trouble. Both myself and friend would be much obliged to anyone who could tell us how to cure it, and what is the cause of the epidemic; also will the beaks grow again? It is a serious matter to us, as most are show birds, and we paid heavily for them.—W. F. H.

CLASSIFICATION OF YORKSHIRES.

SIR,—Mr. Ferguson has raised the question of the classification of Yorkshires, and I presume his remarks apply chiefly to the North-Western portion of England. We in the North-East find somewhat the reverse to be the case—the more liberal the classification the better response there is from exhibitors. For the benefit of secretaries and committees, I have classified the entries in seven of the principal shows in the counties of Durham and Northumberland:—

Society	No. of Classes.	No. of Entries.	Av. Entries.
Hartlepools ...	8	103	12.8
Darlington ...	5	62	12.4
Wallsend ...	4	49	12.2
Gateshead ...	4	48	12
Newcastle ...	6	55	9.2
Blaydon ...	3	24	8
Sunderland ...	2	8	4

Hartlepools and Darlington had the patronage of the Y.C.C., which probably accounts for their being at the top. The only exception seems to be Newcastle and probably the reason is that no whip-up cards were sent out. The N.Y.C.C., which was formed for furthering the interests of the Fancy in the North of England, hope to be able to still further extend the classification, but before it can ask societies to add more classes it must have the support of all the fanciers who keep Yorkshires. As its district is only bounded by the Southern limits of the Northern counties, we are anxiously awaiting the co-operation of our North-Western brother fanciers, as well as those in the Southern parts of its district. It would be impossible to foreshadow its policy at this present time, but the feeling seems to be to encourage the novice, whilst looking after the interests of the champions. I am in hopes that we may have a cup for each section, but this may not perhaps be the first year, unless some generous friend comes to our aid. But my intention was not so much to blow the trumpet of the N.Y.C.C. as to show how, by joining it, each fancier would be helping to extend the classification of this variety. If Mr. Ferguson, or any other gentleman, will write me I will send him full particulars to date, and will be glad to submit their names to the Provisional Committee for enrolment as members.—T. C. CRAWHALL, Hon. Sec. N.Y.C.C. pro tem, 121, St. George's Terrace, Newcastle-on-Tyne.

THE CHAFFINCH PROBLEM.

SIR,—Only a few days since many of us were talking with large hope about the possibilities of 1907, taking our failures for 1906 with calm resignation—buoyed up with expectation, and even strong faith in our success in 1907. The new year is with us. What luck does it contain? This year my endeavours are to be concentrated entirely upon the Chaffinch problem. I have put up five pairs—two Chaffinch and Canary pairs, two Goldfinch and Chamnch pairs, and one brown Linnet and Chaffinch pair. The Goldfinches are several times housemoulted and proved breeders by myself. One Goldfinch last year with one hen Canary filled 5 eggs: result, 5 mules, hen reared all; next nest, 6 eggs: 6 mules, hen fed and reared the six; same Finch put two more hen's nest—one had 5 eggs: 5 mules; other hen 4 eggs: 4 mules. Also this Finch was lent to a friend of mine—result, 4 eggs: 4 mules. The mules were not all reared—two hens proved bad feeders—but that does not affect the Goldfinch. This bird is now with Chaffinch hen in single breeding cage—both steady and both free bathers. The second Goldfinch is steady and safe with eggs; it is also with Chaffinch hen, and both steady. I have bought hens and discarded all which did not tame down until I secured steady birds. The cock brown Linnet bred 13 Canary Mules last season, and when in breeding condition will pair with anything. These birds are upstairs in my study, 4 ft. 6 ins. from ground, and are thoroughly accustomed to my presence in the room for several hours per day. Downstairs, in an outer kitchen, I have a cock Chaffinch and hen Canary together in a single breeding cage. The beak of the Chaffinch is tipped with dark blue, and he is in full song; this bird is finger tame, and bathes himself several times through the day. Outside in the back-yard I have a large flight cage: in this are two Norwich hen Canaries (been out since August), and they are right in feather and in pink of condition. With these there is a cock Greenfinch, also cock Chaffinch—been with the hens for two months. The cock Chaffinch's beak is white, and he does not sing. It is my intention to (expressing a friend's view) waste the whole of season 1907 upon trying if the Chaffinch hybrid can be produced without there being a dispute with reference to the parentage. If the hens will lay, I know the Goldfinches and Brown Linnet will breed. Do you think the fact of having cock Chaffinches within sound perhaps, but not within sight, will be detrimental to a chance with the Chaffinch hens or would you keep the cock Chaffinch, so that if the hens should manifest a desire to nest and come within the laying zone, the introduction of a cock Chaffinch in the same room in full song might cause the hew to call? If that came about, I'm sure my Goldfinches (one of them in particular) would pair immediately. This is a long letter, but the subject is intensely interesting, and I hope many others who have had any sort of experience with the Chaffinch in captivity will send you the result of their observation. In the interests of the Fancy, and purely for love of the hobby, I am launching out on what most bird lovers will call "a wild goose chase" this coming season.—FREDERICK RICHARDS.

LINNET SINGING: A CHALLENGE.

SIR,—I notice in last week's CAGE BIRDS that the members of the King's Head Bird Club, Leeds, are willing to back Mr. Whittaker's bird against any Linnet in Leeds, nobody barred, so I thought I would pay them a visit at their weekly contest, with the result that I won 1st, 2nd and 3rd prizes, also defeating the bird that they wish to back against any in Leeds. Now, I will match my Linnet against Mr. Whittaker's from £10 to £25 a-side for quality, singing, length, turns and form match time, one minute's spring and nine minutes' sing—ten minutes in all—both birds to sing out of Leeds, where they have never been before, the Editor to be stakeholder, and find two judges and timekeeper—not to be citizens of Leeds. I don't want any paper talk. Business only meant. I deposit £1 to make a match.—HARRY ALLEN, 42, Brown Hill Crescent, Harehills Lane, Leeds.

[The sum of £1 has been received, but we understand that Mr. Whittaker did not intend to include Mr. Allen in his challenge. —EDITOR, "C.B."]

FOREIGNERS IN BRITISH CLASSES.

SIR,—I beg to assure Mr. Lowne that I never doubted the nationality of his Bearded Tits. They were acknowledged genuine years ago, as he states, by judges who were competent. I am pleased to hear that they are multiplying and extending their habitat. But is there one in Scotland who can claim to show a genuine British specimen or beat a foreigner with it under a Scotch judge? I am assured by a friend who knows a Britisher that undoubted foreigners are winning in Scotland, and will continue to do so till Scotch judges learn the difference. Let them try to pass them as British under an English judge at the "Glass House" or any big show that engages a competent British bird judge, and we shall see if I am right in saying there are not threo genuine British specimens (cocks) in Scotland among the lot that have been winning. I hoped to have seen Mr. Lowne at some small Scotch show where there were, as sometimes happens, four or five others of the over-sea species. I beg it to be understood that it is only for the good of the softbill class that I have written my letters, as I am sure these foreigners are doing it a lot of harm. Tho amateur who, after all his labour in attending to and moulting a delicate specimen, finds it passed for a, perhaps, very wild and rough foreigner, cannot be blamed if he gives up that variety in disgust. I notice that some shows are now classing their softbills, any variety, and many have been cancelled. Surely there are plenty of good and beautiful specimens of British softbills to compete with, without fraudulently showing a foreigner as British.—J. STEEL.

WHY SHOWS ARE FAILURES.

SIR,—There has been a great deal of correspondence on the above of late, and the different causes. I will give you my experience with the Secretaries of Coventry Show, held last Thursday, Dec. 27th. I made my entries there, ten clear days before the closing of entries, which rule I endeavour to adhere to, seeing that it is always the cry with Secretaries to enter early; and I will try and explain to you the treatment I had with the Secretaries of the above Society, after entering early. I did not receive labels up to the morning before the show, Dec. 26th. I wired Secretary at 11.30, asking him what to do, but did not receive a reply to this telegram (which I enclose) until 8 o'clock same evening, telling me to send exhibits on; but it was too late then, as the birds would not arrive at Coventry in time. I wrote same evening, posting the letter at 7.30, before I received the above telegram, asking for the return of entry fees, and 7d. which I paid for catalogue when entering. I have neither had a reply to this letter, nor the catalogue, but I received the labels on the morning of the Show, at 8.30. This treatment does not give much encouragement to enter early, and I am not surprised that shows similarly conducted to above do prove a failure. Wishing you the compliments of the season.—J. H. JONES.

SIR,—I should like the opinion of the fanciers who exhibit, if they can give me any reason why The Barrow and District Cage Bird Associations' Show held on Dec. 7th and 8th, 1906, should be such a great failure, leaving us with a deficiency of about £10 10s.? We advertise in our Schedule that we pay full prize money, and no amalgamation of classes. And we have striven hard against cancelling. We cancelled no classes that had more than four entries in it. We paid full prize money on the following: One class with five entries. Six classes with six. Three classes with seven, and eight classes with eight entries. I think, that after paying on entries such as these, Barrow deserves better patronage. All exhibits sent were looked after and cared more for than our own, and anyone who wrote asking for their exhibits to be sent away on certain trains we did as far as laid in our power. We packed upwards of 300 exhibits by 5 o'clock, although our time of closing is not till 7 o'clock, and this is disappointing to visitors. What more do exhibitors want? We don't cry out "Stuck at Six." The fanciers of Barrow are of the right grit, and will stick at nothing. We shall run a show next year if we have to get our hands down deep to do it.—E. E. MILLER (Hon. Sec.).

P.S.—All prize money was paid out by the tenth day after the show.—E. E. MILLER.

A TAME ROOK.

SIR,—The following, from a friend's letter, may interest you. He says:—"I have a tame Rook, which stops with us all day in the garden, comes down to be fed, and at night when the other rooks fly over to the woods to roost, he flies off and follows them, coming back in the morning, waiting for me at the door." My friend also had one who followed him in his walks about the village, but to his grief it met with a cruel end, the boys "'eaved 'arf a brick" at him. I suppose they could not understand his being so tame.—EMMA S. PARK.

Don't miss Next Week's "C.B."

EXCURSIONS TO CRYSTAL PALACE SHOW.

SIR,—Re excursions to the Show. I am in correspondence with all the railway companies trying to arrange excursions, but, unfortunately, have nothing reliable to work upon. Briefly, provincial correspondents write: "An excursion would fill and pay well." Tho railway company replies: "Very good; take 100 tickets and we will run the excursion; take 200, and you can have a private train." Tho guarantee to take 100 tickets not being given, the matter generally drops. If provincial societies would only combine, and each take a few tickets, a private train could be run on most lines, stopping only at those towns where tickets had been purchased. An example: the railway companies will run a public train from Plymouth (ordinary fare 37s. 4d.) for 12s. return, if 100 tickets are booked, or a private train at the same fare if 200 tickets are booked. I hope to announce excursions in your next issue.—J. W. RAMSDEN.

EXCHANGE OF GOLDFINCHES AT BO'NESS SHOW.

SIR,—I at once admit that I accepted Mr. Nicholson's amended entry without comment, as I believe in being civil and obliging to everyone. I am not spiteful like Mr. Nicholson, as anyone can gather from his correspondence. Further, I never yet admitted that any mistake had happened with us. I certainly stated that if I could trace his Goldfinch, I would do it. As regards his remarks "abolutely certain it was not his bird," he certainly used these words, but it was after he had taken it to the dealer he bought it from, as in his letter of 14th Nov. to me, he says: "To make sure, I took it over to the gentleman I bought it from only 6 or 7 weeks ago, a well-known Edinburgh dealer and judge. We examined it carefully together, and he also is of my opinion." This does not say much for his absolute certainty, does it? Further, he says in his letter of last week, "Neck perfectly bare"; well, in his letter of 14th Nov., he says, "Neck perfectly bare when you blow up the feathers." How, then, can it be perfectly bare if you have to blow up the feathers before you can notice it? I think this is absolute rubbish. He also says his was perfect in feather in every detail. Well, it must be a stormer! Why then does he say he expected it to be out of the tickets? He must be a very curious exhibitor, as in my opinion all exhibitors expect perfect birds to win. Re conduct of Show. We thank Mr. Nicholson and his friend the prominent prize winner, "I don't think," for their kind remarks, but seeing they are birds of a feather, we take their remarks for what they are worth—nothing, as we have been congratulated on the management of our Show by numerous prominent exhibitors besides CAGE BIRDS' comments of 17th Nov. Re Mr. Nicholson's second last remark as regards my not wanting entries that have a chance to win. Surely he dreamt this, or was he holding CAGE BIRDS upside down when he read it? My remarks were the very opposite to what he states. Perhaps it might be a help to Mr. Nicholson if he got his friend, the prominent prize winner, to telephone him the meaning of my letter to avoid further misunderstanding. To conclude; if Mr. Nicholson would mind his own business, he will find he has enough to do, instead of poking his nose into other people's affairs.—FINDLAY MCGILLIVRAY.

SIR,—With reference to the latter statement of Mr. Nicholson's letter in your issue of last week, re missing Twito at the above show, I think I can be able to throw a little light on same. I sent 3 entries to the above show, and when I received my box back on the Monday, there was a cage awaiting, which contained a "Twite" when it left here. I wrote to secretary at once to see what had come over it, and did not get a reply from him till the Wednesday night, saying that it had been sent on to a Mr. Craig of Glasgow, and that he had written him to send it on to me. But on Tuesday a letter came from Mr. Livingston, of Bathgate, saying he claimed my Twite when at Bo'ness, and also sending 1st prize card, saying he had never seen my name before in the prize list; then on Friday night I received a letter from Mr. Craig, of Glasgow, saying he was sending on a Twite which was sent in a mistake from Bo'ness, and that he had never got his back yet, but had a letter saying he is in Bathgate, and will be sent on to Glasgow tomorrow. Now, how comes it, if Mr. Livingston claimed the bird that he was going to send it back? I was not satisfied at that, so I wrote the secretary, asking fuller particulars, which are as follows: "In our Catalogue your bird was No. 10, which you know was No. 11, No. 10 being Mr. Craig's, of Glasgow. Now on their Catalogue it is as follows: No. 9, Craigs; No. 10, Watts; No. 11, McGillivray. Of course the blame goes to the poor printer, but that still does not clear up the matter. I certainly received a Twite, but it is not mine. However, I will have to content myself with what I have got, as it is always something to feed. Also when the show season comes round I know where to show.—J. C. WATT (Innerleithen).

BREEDING CAGES.

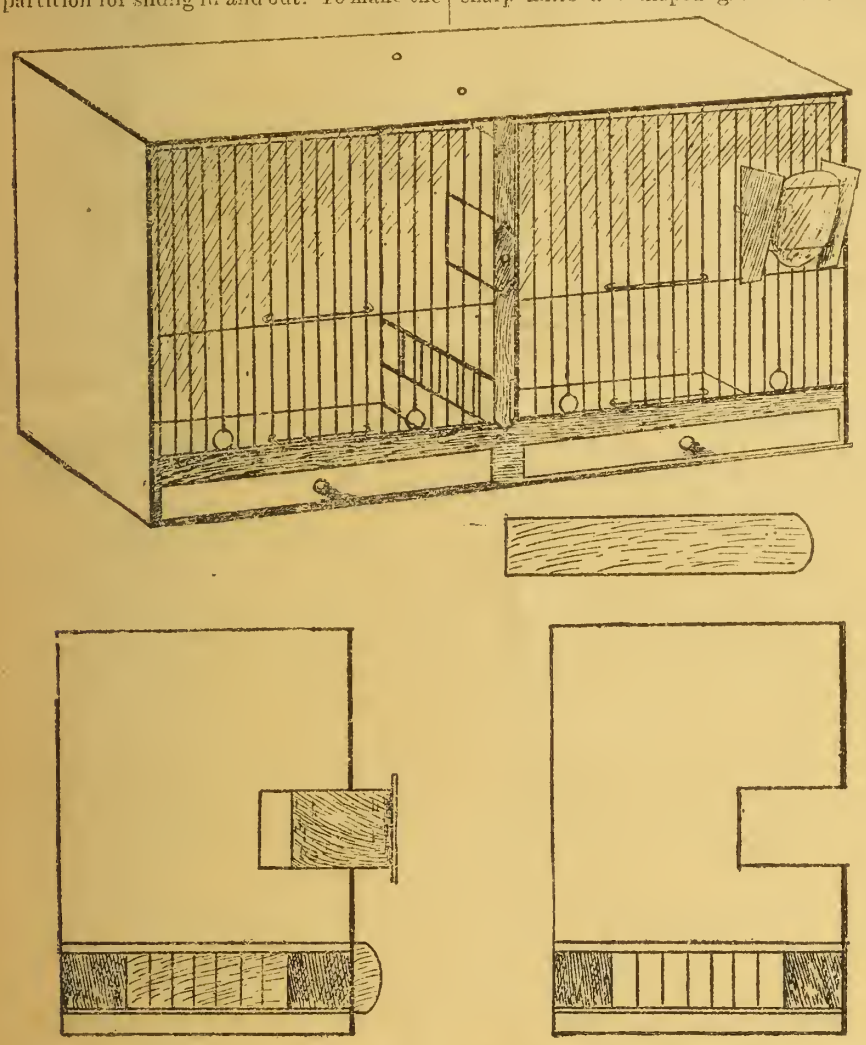
READERS DESCRIBE THE BREEDING CAGES THEY USE, AND EXPLAIN HOW TO MAKE THEM.

Mr. Fowler's Cage.

As the time is drawing near to make preparations for the next season's breeding, I thought a sketch of a very convenient cage would be a very useful thing to bring before your readers, especially to those who may be thinking about taking up the hobby. My sketch shows a very useful nursery, flight, and two-compartment breeding cage combined. I have used this kind of cage for seven years, and find it very convenient indeed, and not at all clumsy. If made right it looks very neat. It is a little trouble to construct, but fanciers who keep birds for a hobby do not usually take much notice of "trouble" in whatever they want in their bird-room.

My cages are made 30 inches long, 16 inches high, and 11 inches from front to back. Fig. 6 shows the cage finished, with partition in position; Fig. 4 the finished partition for sliding in and out. To make the fix in short wires ¾ inch apart. Then, to act as a slide to make the partition a "blank" at any time, get a Venetian blind lath, about 2 inches wide, and cut it as seen in Fig. 2. Get four bits of wire. Bend them up at one end and fix in two at top and two at bottom for this lath to run along on. This bottom wired part forms a feeding place for use when you separate the young (at about 14 or 15 days old) to prevent the old birds from plucking them, which they will often do if they are left together. This method is far better than hanging a nursery cage on the front. The two old birds can be left on the other side to feed their young, and to go to nest again.

Now mark from middle cross-bar of wire front, and cut out a square 4½ inches high and 3½ inches from front edge, inwards, so that the bottom edge will come on a line with the perches. See Fig. 3. Cut with a sharp knife a V-shaped grove on the top



Completed Cage with sliding partition and nesting rack in position. Venetian blind lath cut to make slide.

Centre sliding partition with all slides in position.

Centre sliding partition with all slides withdrawn.

latter cut two strips out of ⅜-inch board, 11 inches long, one strip 1½ inches wide, and the other ¾ inch. The 1½ inch strip is for the bottom, the ¾ inch one for the top. Cut a V-shaped grove on one edge of each strip, and use two screws at the bottom of cage and two at the top. The use of screws enables the owner to take the strips out and clean them at will. See Fig. 7 for sketch of strips. Let the front strip (above sand-tray) run right through from end to end, with a screw in the centre of the bottom V strip.

Fig 1 shows the middle partition, which is made by cutting a board 11 inches wide and 14½ inches high. You will find, when you have planed this down at the top and the bottom to a feather edge, it will fit in the two grooves at top and bottom of cage, and slide easily along. Then take a sharp knife and cut out a strip 7 inches long and 1½ inches deep. Cut at a distance of 1 inch from the bottom and 2 inches from each end, as shown in sketch, and and the bottom. Then cut another piece of wood to fit along these grooves with a screw eye in the centre to pull it out and push it in by, as shown in Fig 4. Fig 4 shows the partition with the two slides in, and Fig. 1 with two slides out. Fig 5 illustrates a nesting rack, cut out of two pieces of thin wood, tapered away to 2 inches at top and 1 inch at bottom. Get a piece of perforated zinc and tack this on the front and under the bottom edge so that nothing will fall out. Fix two pieces of wire on the side which fits up to the wire front, to keep it in position.

These cages can all be made in the same style, so that with the partition and two slides in they form a two-compartment cage. With the top, or small middle, slide in, and the bottom strip out, they are very convenient to mate the birds up in, and you have only to pull out the small middle slide to permit them to run together. With the partition out, they form nice-sized flight-cages.

Now for perches and mite-traps. I have tried all sorts of the latter. Powder does but little good; and if you use turpentine (which is a sure thing, I admit) it smells so strong that the birds fight shy of it. I find by using hollowed out elder twigs for perches in the breeding season, taking them out, and emptying, and scalding or baking them, at least two or three times a week, I can keep the mite down very well; once a week answers through winter. I took out 14 perches the last time I cleaned my cages out (every week) and only found two mites. I cut my elder perches to the length I want them. I then get a piece of stick, trim it round, and force the pith back about ¾ inch. Then I cut four very fine notches on the same end. This end goes to the back of the cage; I do nothing to the end that comes to the wire front. If your cages are made neatly, so that the hollow end of the perch is the only place for them to lurk in, you have a first-class trap for red-mite.—H. Fowler (Bristol.)

(To be continued.)

STRAY NOTES ABOUT BIRDS.

By Claude St. John.

FRESH AIR FOR BIRDS.

Fresh air is the latest suggested remedy for so-called asthma in Canaries. In some recent experiments with Scotch Fancies the trouble was found to disappear when the birds were exposed to fresh air, but returned when they were once more placed in the bird-room. Years ago the writer recorded similar instances of the freedom of birds kept in a pure and unheated atmosphere from this distressing "wheezy" complaint, and pointed out the folly of the enervating artificial conditions under which Canaries are too often kept. Perhaps such information was a little before its time, and naturally roused the opposition of the advocate of the artificial system, but, all the same, it made its mark on many a thinking fancier.

It is asked: Are Scotch Fancies more subject to asthma (?) than other varieties? Probably not; but being more valuable stock are all the more likely to be coddled, under the mistaken idea of taking good care of them. Belgians used to be considered the most delicate and frail variety, yet when kept and bred under normal conditions, they have been proved to compare favourably with most other varieties in health and stamina, without losing any of their show points.

A notable addition to the list of Foreign birds bred in captivity is the Black Lark, which has bred during the last season. This should stimulate the Foreign bird keeper to renewed efforts in this direction. The list of foreigners successfully bred in captivity is now quite a long one, but considering the number of species which are now regularly imported there is still plenty of scope and material to extend it. Almost every year now sees the successful breeding of one or more species which have not been bred in confinement before.

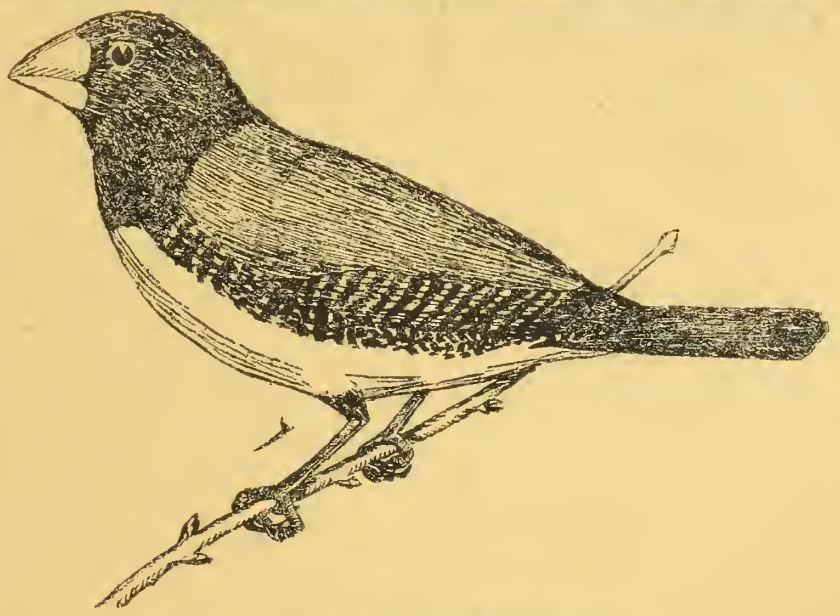
The idea that birds of the Thrush tribe "shed" or moult their shin bones, which we have heard of lately, must be simply an exaggeration of a notion as old as bird fancying itself. In our youthful days, when the "oldest inhabitant," initiating us into the mysteries of bird keeping, informed us how the Thrush "shed its legs" every moulting season, he merely wished to convey that the outer scales on the legs and feet were cast off and renewed. Quite a simple matter this, compared with the latest idea of shedding the "shin bones," the sheer absurdity of which does not seems to strike its votaries.

How many prospective Mule breeders during the coming summer have their breeding stock selected and running together in large flights? When this item is left until the birds are about ready to mate up in early summer, it is annoying to find week after week slipping away whilst the birds are getting through the initial stages of introduction. Much loss of valuable time is saved by selecting the stock in autumn, and keeping them together through the winter, and until the time to mate up is approaching.

If you are attempting to breed hybrids between several varieties of British birds, a point that must not be overlooked when running the pairs together to get them on a friendly footing in readiness for the spring, is to keep cocks and hens of the same species quite apart and out of earshot of each other, or you will find that your plans as a matrimonial agent will somehow persist in going wrong. Say, for example, one is working cock Goldfinches with hen Bullfinches, and cock Linnets with hen Goldfinches. Both sets of birds should be kept entirely apart, so that the cock and hen Goldfinches may not hear the "calls" of each other; neither should the cock Linnets or hen Bullfinches be kept within earshot of their respective natural mates. It may appear a small matter to the inexperienced novice, but it will have a distinct bearing on his success or failure.

Do not omit to utilise a proportion of wild seed for your British birds whether they are kept as song birds, show birds, or for exhibition purposes.

(To be continued.)



THE RUFUS-BACKED MANNIKEN.
(Spermestes nigriceps.)

A rare South African bird lately imported by Mr. C. A. Luer.

A RECENT RARE IMPORTATION.

THE RUFUS-BACKED MANNIKEN.

(Spermestes nigriceps).

The enterprise of one of our leading dealers has recently resulted in the offer for sale of about a score of pairs of an East African Mannikin, till then unknown in captivity in England, and scantily represented even in the British Museum. This species, a near ally of the Bronze Mannikin, about equals this in size, but in colour at first sight is very like the Indian Three-coloured Mannikin, with its chestnut back, black head, and white breast. It has, however, a black tail, and the wings and flanks prettily variegated with black and white, while it lacks the black band down the centre of the abdomen. The first specimens I ever saw were a few imported into Calcutta some years ago, and I little expected it would turn up again in England. It is very pretty, and should be a favourite with those who like these sober little Finches, besides, from its present rarity, being a suitable bird for show purposes.—F. Finn, B.A., F.Z.S.

NOTE: "Bird World" for January out of print.

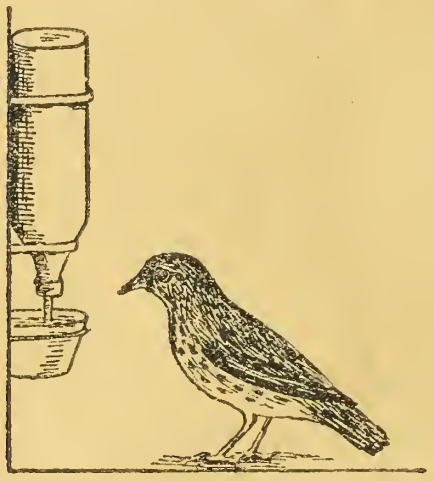
ILLUSTRATED IDEAS

Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 69.
FOUNTAIN FOR AVIARIES AND FLIGHTS.

Sent by J. Parker, 3, Dene Street, Shotton Colliery, Co. Durham.

I am sending you sketch of a fountain which I am now using, and find very useful. It keeps the dirt and sand out when hung about a foot (or less) from the floor. What you want are a small glass bottle (about 3-gill size), a bit of wood with a hole bored through it (this is to fit in the neck of the bottle), and an



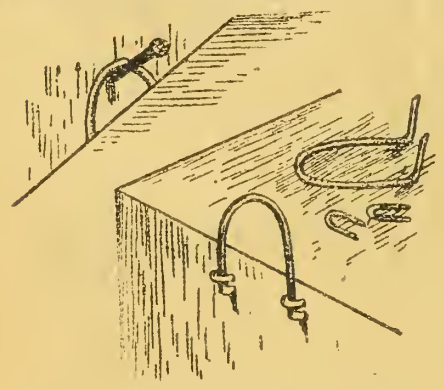
Mr. Parker's Drinking Fountain.

ordinary tin or glass drinker, to stand underneath the bottle, so that when the latter is hung upside down the wood cork comes down just inside it. The bottle can be fixed entire with wire or tape arranged round both ends of it. The drinker can also be fixed with wire. The sketch will explain the idea.—J. PARKER.

No. 70.
TO HANG CAGES ON WALLS.

Sent by W. Hinchcliffe, 2 Ct. 1, Hermitage Street, Sheffield.

This method is the one I use myself to hang cages on walls. I always think it a pity when cages are hung up to see a lot of nails sticking out inside them through the holes usually cut in the backs. I consider it spoils their appearance. I make loops of wire to hang mine on the nails with; then you cannot see the latter, and there is no fear of the birds catching their heads on them, which



Mr. W. Hinchcliffe's Cage Hanger.

I think may sometimes be the cause of the "sore heads" we hear about. The sketch will show the method of bending pieces of wire (cut to the required lengths) into shape, driving them into the back of the cage and fastening them with staples in the top board. I generally arrange to leave a loop about one-inch deep standing over the cage top. The wire should be of stout gauge, according to size and weight of cage.—W. HINCHCLIFFE.

"A Soft, Easy Fellow."

In view of the great reputation for intelligence which Robin Redbreast, the favourite bird of the English winter, enjoys and deserves, it is strange that "cock-robin" was formerly a slang word for "a soft, easy fellow." But so, the "Dictionary of the Canting Crew" tells us, it was in 1699, and Grose shows that so it still was in 1785. "Cock-robin shop," for a small printing establishment, in which cheap and poor work was done and bad wages paid, probably had no connection with "cock-robin" in Grose's sense, but referred to "Cock Robin" ballads, and so forth, which came from such houses. The pleasantest slang reference to the popular little bird, perhaps, is "Robin Redbreast," as a name for the old Bow Street runners, in allusion to their scarlet waistcoats.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

Uncle Peter is spending a week or two by the sea, and, although he is very busy, he usually finds time to have a look at the birds.

The other day he was walking along the sea-wall from Sandgate to Hythe, and he saw a sight which amused him very much.

Some long-necked Cormorants were diving in the sea for fish, and Herring-gulls were flying round like pirates and seizing all the prey they could from the hard-working Cormorants. Along the white edge of the sea-wall stood a long line of Rooks, like so many anglers along the banks of a French river on Sunday. As soon as the Gulls alighted to devour their ill-gotten spoil, the Rooks mobbed them and snatched all they could from the Gulls. One of Uncle Peter's little nephews, who was walking with him, rescued from them a very beautiful and curious fish—a kind of Gurnard—with large, red-spotted fins, almost as big as wings. Although one of its eyes had been pecked out, the poor thing was quite lively, so Uncle Peter put it back in the sea, hoping it would not be caught again by the birds.

* The Crossbill.

The Crossbill is a bird belonging to the family of Finches. The beak of the Crossbill is very peculiar, and instead of lying in a straight direction, the two parts of the beak cross one another towards the tip like a pair of scissors; that is where it gets its name from. The beak of the Crossbill is of very great use to these little birds in their peculiar habits. These birds live mostly on the seeds of the cones of the fir, and its funny beak enables it to tear in pieces the hard fir-cones, and pick out the seeds. They vary in colour from brown to olive green, variegated with red or orange.—M. PALFREYMAN (age 11), Cooks Cross, South Molton, N. Devon.

*A Tame Greenfinch.

I thought perhaps you would like to hear about my Greenfinch. I found it when it had hardly any feathers on. I fed it with dog biscuit ground up and mixed with water. I gave it to it on a piece of match stalk. It has grown so tame that it will run after my finger round the table, it will also take a bath in a saucer of water on the table, and when I want to catch it, it crouches down for me to get hold of it. My father has about twenty British birds at home, but I like my little Greenie better than any of them.—ERNEST KING (age 13), 58, Nowell Place, Harehills Lane, Leeds.

The Greenfinch.

The Greenfinches seem particularly fond of hips, and can be approached quite closely when at such a meal, so intent are they on reaching and eating the rose fruits. The Greenfinch is a handsome fellow seen at close quarters; his plumage is olive green, variegated with bright yellow; it cannot be appreciated so well in summer amid the thick green leaves.—Sent by HANNAH CROSLING (aged 11 years), 8, Fern Street, Bank Top, Darlington.

The Siskin or Aberdevine.

The Siskin is a pretty, merry, and interesting little fellow, his plumage is yellow breast, black cap and bib, yellow bars across wings, yellowish green back, with yellow feathers in tail, other parts slate colour with dark spots. His length is about 4½ inches; they are very tame when caged and come from Norway, Germany, and a few are found in Scotland. I have one myself; he will feed from my hand. I let him fly about the room, which he enjoys very much. I advise all boys and girls my age to try and buy a Siskin.—Sent by E. J STEVENS (age 10 years), Clarence Street, Egham, Surrey.

** The Raven.

This bird is to be found in nearly every northern part of the world. Once he was not uncommon in England, but we are not likely to meet him now in these islands, for the Ravens have almost all been shot. Yet in some wild places on the rocky sea-shore, or on lonely moors, this great Blackbird, like a big Crow, might still sometimes be seen. It is a pity that men have killed nearly all the Ravens in this country, for they are useful as well as amusing birds. And it is owing to the good work which birds of this sort do, that men and animals are able to dwell in health on this earth at all. The duty of the Raven is to clear from the ground bodies of dead creatures which are left lying about.—ELSIE HUMPHRIES (age 11 years), 74, Cedar Street, Bootle, Liverpool.

Will you kindly correct an error in report of Walthamstow Show, in which you credit Matthes 1st in the Norwich Ticked, etc., class. I secured that honour with my ticked Buff.—A. A. KIRK.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else. Sold in tins, 2d., 6d., and 1s each.

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

Birds and the Fog.

THE sense of direction in birds must be very acute. How is it they manage to find their way in a thick fog? When one is standing on a hill, it is at times possible to look down upon the thick mantle of mist in the valley below. This is not always the case, and then, if wild birds wish to descend from the hills they are obliged to pass through fog for probably the whole distance. This they manage to do with unerring accuracy. I have known a field which Rooks were in the habit of frequenting daily in their search for food, and although the rookery was quite two miles away, they managed to find their way to the same field in a dense fog. To do this, there must be some sense other than sight at work.

Sometimes, when walking across a field, or over the downs, one suddenly comes upon a flock of Finches. They are disturbed, and, without hesitancy, fly off, not always straight away from the intruder, but, occasionally, circling round him, and making away in some other direction, proving their knowledge of locality even in a thick fog. In the winter, in such weather, Sparrows and Finches will return again and again to a stack-bottom (which, in agricultural parlance, means the open ground where a corn stack recently stood), although driven away quite beyond sight of the spot.

While taking mental notes of the doings of wild birds in such weather, I have sometimes fancied that the twittering notes uttered by a flock when on the wing, are louder and more incessant than under normal conditions. Such a proceeding would be quite natural. Members of the flock on either hand would call incessantly, if unable to see the others plainly. So much does this appear to be a habit that one can daily hear flocks of all sizes twittering continually, even when quite close to each other.

Robins Pairing.

The New Year has only just commenced, and yet already we have signs of the coming breeding season in the actions of some of the birds. The Rooks are daily at their nests, and one may occasionally be seen fussing about the structure. It will not be long before repairs will be commenced, for these birds are early breeders. Both the Great Tits and the Blue Tits have been in pairs for some time, and I am rather inclined to think they pair for life, but one can hardly be certain of this. One would like to have the opportunity of carefully

Robin "Showing off."

noting the doings of the birds over an extended period. We get them in the garden from autumn to spring, but they generally come in family parties, and gradually diminish until only a pair or two are left.

The doings of the Robins just now are worth noting. It appears very much as though the usual order of things is somewhat reversed, and that the lady birds seek the society of the opposite sex. Our own Robin has been with us since the autumn, but lately two lady Robins have appeared. These were constantly chasing each other, but they never came together in a real battle, as two cock birds would have done. Our "Bob" made up to one of the visitors, and the other soon departed.

A Robin will get into some most extraordinary positions when courting: he will puff out his chest, and throw back his head until it nearly touches his back. He is fond of pointing his beak to the sky, and with swelling throat utters a peculiar twittering note, evidently a love song—or is it an endearing phrase, common to bird-land? This pairing of the Robins happened about the same time last year. One wonders if, given a severe winter the courtship would be delayed. Our knowledge of birdie ways is still weak.

Notes and Queries.

Hawks and the Bird Catcher.

Being a catcher of birds, it is my lot to often see curious and interesting studies of bird life, writes Mr. T. Hubbard. The Hawk is a crafty bird, and a keen eye and ears are necessary for all who go catching, as there is no warning when a visit from this fiend of the air will take place, and he will swoop down and carry off a highly-prized and trained bird out of the net before it is possible to grasp the pull-rope and capture it. The usual mode of the catcher who is ready for it is as follows:—As the Hawk is swooping down pull the nets sharply over before it can reach them. It will then skulk off. Occasionally this system terminates in its capture.

Caught in the Toils.

Lately, whilst experiencing a pleasant time, having settled down where Linnets were known to be swarming, with expectations of a good catch, I was surprised to find no birds visible. It was no fault of want of song to draw them, but, looking round, I saw a Hawk flying low over the feed where the birds were expected, and this explained the empty state of my store cage. I was shortly afterwards thinking of packing up, having no doubt that the birds had been scared away, when there was a general flutter in the net, and at the same moment, flying low and direct into the nets, appeared the Hawk. The nets covered it instantly, before it could grasp its victim, so it took its place in the empty store cage.

Hawk Chased by Crows.

The scream of the Hawk is often heard, and many times I have left the nets to watch a probable tragedy. A common spectacle is the tenacity of one, or sometimes two Crows chasing a Hawk, rising high and sweeping down, while the Hawk, screaming, darts low, then high, pursued by one or other of the Crows. But I have never seen a Crow actually strike. During one frantic struggle against two crows, after a long chase, the Hawk led over the top of a wood and suddenly, after a determined chase rising rapidly to evade the fierce onslaught—which seemed remarkable for a Crow—it apparently turned turtle in the air and darted direct below into the trees like a flash; the Crows did not follow it there. On another occasion there was a great commotion among a flock of Lapwings, and, as they came towards me, I heard the familiar scream of a Hawk. I had a good view, as they were chasing it away, and appeared to keep it going direct ahead. I watched the birds drop out of the running as the speed increased, until there were not more than three or four that were anywhere near it as it disappeared in the distance. Possibly one would fare badly if left alone with the Hawk.

Advertisements continued from page 52.

WANTED, offers Canaries; exchange pair Scotch blankets, 25s.—Drummond, Hutcheson Street, Glasgow.

OFFERS, Canaries; exchange silver English lever watch, 30s.—Drummond, Hutcheson Street, Glasgow.

WANTED, for cash, cocks, Norwich and Yorkshire Canaries; state lowest price.—Marsh, 45, Pereira Street, Bethnal Green.

WANTED yellow Norwich cock, give grand Yorkshire cock or 3 large hens, few for sale cheap.—Tyrer, Catherine Street, Warrington.

WANTED Clear Norwich Crests or Plainheads, exchange Winchester repeater or good phonograph records.—F. Dear, Dunsden, near Reading.

WANTED pair men's working boots, size eights, give cock Canary, 6s. 6d.—Warboise, Talbot Road, Wellingboro'.

BEST offers in breeding Budgerigars or aviary for 100 "Musical Home Journals." Palmer, 21, Knowles Hill Crescent, Lewisham.

WANTED, weekly, 100 good Yorkshire and Norwich Canaries.—Particulars, Parkes, 4, Cadogan Terrace, Victoria Park, South Hackney, London.

WANTED, to supply any quantity of Yorkshire Canaries, large or small lots; write for prices.—47, Snakehill Lane, Girlington, Bradford. x266

THE QUESTION OF THE MOMENT!

HAVE YOU HAD YOUR JANUARY "BIRD WORLD" YET?

If not, get it AT ONCE or you may be TOO LATE. "The proof of the pudding is in the eating," and the success of **THE BIRD WORLD** is proved by its reception. No. 2, like No. 1, is fast running out of print; repeat orders are coming in every day. This fact and the letters received daily from delighted readers prove that **THE BIRD WORLD** fills the proverbial long felt want.

The January Number contains a beautiful Coloured Plate of Canary Bullfinch Hybrids, from the brush of Mr. H. Norman.
An article on the Bird Pets of Royalty, by Princess Helene Vacaresco.
The first instalment of a highly instructive and extremely interesting Serial entitled "A History of Birds," by W. P. Pycroft, the well-known ornithologist.
An illustrated interview with a Champion Exhibitor of British Birds.
An article on Canary Breeding for beginners, and numerous other very interesting Articles and Illustrations.

The circulation which reached the unexpected figure of 12,500 has not been confined to the United Kingdom alone; our books already contain a large number of subscribers from Australia, New Zealand, India, Canada, British West Indies, etc., and we have already received several letters of congratulation from distant parts.

ADVERTISERS SHOULD NOTE that a wealthy class of buyer can be reached through THE BIRD WORLD, so do not miss being in the next Number.

Price 3d. Of all NEWSAGENTS and RAILWAY BOOKSTALLS. **Price 3d.**

SUBSCRIPTIONS:
English and Foreign, six months, 2/-; twelve months, 3/.

Advertisement Rates: 5/- per inch display (the same advt. inserted in "Cage Birds" and "The Bird World" for 7/ per inch inclusive).
Two Words a penny throughout undisplayed; special prices for large spaces.

ALWAYS USE OUR DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

WEAPONS OF DESTRUCTION.
The Elliston Patent Perch absolutely solves the red-mite trouble; used by all leading fanciers, sold by all seedsmen, bird dealers, etc.; or 1s. 6d. half-dozen, 2s. 9d. dozen from Elliston Perch Co., Erith.

3s. DOZEN.

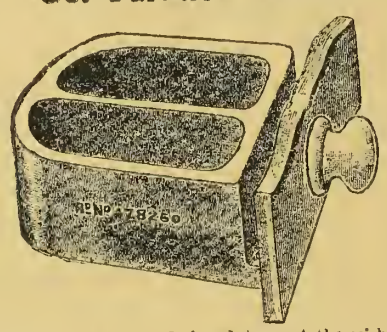
The original Challenge Canary nest pan, which has been on the market for the past 16 years, and has also been a pattern for others to work from. Have sold more pans than any other man living, and the only pan to-day that is sent out properly lined, made of white ware, swansdown lined, with wire bracket and screw hooks, all complete and carriage paid, 3s. dozen, large or small size; trade supplied.—Tom Thomas, Bird Dealer, Neath.

PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex"

Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

MY SELF-ACTING SPRING NET TRAPS
catch birds of every description without any attention, price 1s. 6d.; larger size 2s.; carriage paid. I have received hundreds of testimonials stating they are worth double the money of any trap advertised. Read two, and beware of cheaper imitations that are not worth the cost of carriage. "Sir.—I received the net trap; it is honestly worth a dozen of some of the nets advertised. I tried it this afternoon, and caught more birds in two hours than I have caught in other net traps in two months.—G. Matthews, 37, Myrtle Street, Stockport." "Sir,—Trap arrived safe. It is far superior to all others. I have to-day caught fifteen Linnets, six Redpolls, four Chaffinches, three Greenfinches. J. Scragg, The Brewery, Armitage Road, Rugeley." Patent self-setting trap, Patent 23,927, warranted to catch birds and re-set without attention, 1s. 6d.; call cages, 4d. each; trap cages, single 5d., double 8d., treble 1s. 3d.; birdlime, best and strongest in England, 1s. 6d. lb., 10d. ½lb.; send for sample tin, 3d. post free. Loose netting made from the best thread obtainable, ¾-in. mesh, 6-ft. wide, 3d. yard, 9-ft. wide, 4d.; Lark netting, 1½-in. mesh, 5 yards wide, 6d. yard, post free.—Henry Morris, The Aviaries, Cape Hill, Birmingham.

YOU NAIL THESE

together. Hurry up, only 18 sets left, at 1s. 8d. the set.—Hardy, 4, Winston Street, Hartlepool.

OPINIONS OF VALUE AND SATISFACTION.

"Brookfield, Westbourne Grove, West Kirby, Jan. 13th, 1907. Cages to hand. Am very pleased with them. F. Richards to W. Rudd." "Scaldwell, Northamptonshire, Jan. 17th, 1907. Please send a 4d. tin of Bird Lime. It is the best I have ever used; the last tin was wonderful. F. Howard to W. Rudd." "Grange, Kilmore, Co. Wexford, Jan. 17th, 1907. The Lime you sent is the best I ever had. Please send two more 4d. boxes. Jno. Bates to W. Rudd."

Marvels of Cheapness, as Catalogue States.

"59, Browning Road, Enfield, N., Jan 17th, 1907. I received cages quite safe. I am very pleased with them. They are indeed, as your catalogue states, marvels of cheapness. Many thanks for prompt attention. W. J. Pike to W. Rudd." "Pincroft, Brookwood, Jan. 14th, 1907. The Crystal Palace aviary arrived safe. I am very well pleased with it, and thank you very much for prompt attention. R. S. Clarke to W. Rudd." "28, West Terrace, Burnhope, Jan. 14th, 1907. Received breeding cage. I think it is a splendid cage for the money. T. Johnson to W. Rudd." "Camlington, Jan. 14th, 1907. The Bird Lime I had of you has repaid itself. H. Goddard to W. Rudd."

AVIARIES & CAGES FOR BIRDS;
and How to Make Them.
By I. W. HINTON.
JUST COMMENCED a most interesting series of articles which will be eagerly read by all bird lovers. Not only are the various kinds of Aviaries—outdoor and indoor—fully described, but a lot of useful information respecting their inmates is also included.
See Nos. 2,171 and 2,174 of the ENGLISH MECHANIC

THE HYGIENE OF BIRD KEEPING.
By W. GKO. CRESWELL, M.D., L.R.C.P., F.Z.S.
Price 1/1, post free from CAGE BIRDS Offices,
154, FLEET STREET, LONDON, E.C.
OPINIONS OF THE PRESS.
LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."
COUNTRY LIFE: ". . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

MEDICINES.

PARROTS going thin require a dose of Welham's Parrot Tonic; a few drops in water works wonders.—Welham, Peckham, London.

PANNASSINA.

A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

FOUND AT LAST. BRONCHORINE.

Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.

"66, Mosion Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorine. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. Bottle.—Crawley, 112, Radford Boulevard, Nottingham.

Hopkins, Bird Specialist and Cage Maker, 38 and 41, Fylde Street, Preston, Lancashire.

HARRY ALLEN.

What, again! 1st, 2nd, and 3rd prizes this week. How do you do it? Well, I am selling the secret of how to moult Linnets and get them to sing at one another with their wings down. I am, as usual, selling the very best and largest Linnets that can be got. Big, fine, well pencilled Linnets, stand well, 2s. and 2s. 6d.; extra picked birds, real beauties, sure winners in shows, 3s. and 3s. 6d. each. Showmen please give me a trial order and you will never regret it. Good cock Linnets, singing beautifully, in a polished singing contest cage, with a packet of my special mixture and instructions how to feed, 4s.; real bargains. Young house moulted Linnets, singing hard, taught by my champions, and finger tame, 6s. 6d. and 7s. 6d. each. Every bird in the best of health. See previous adverts for testimonials. (See Singing Contests.) Four packets of my special mixture, 1s. The secret I am selling is worth 5 guineas, but I have studied the working man's pocket, and therefore I am very nearly giving it away. Send in thousands, with stamped envelope. Now's your chance.—Harry Allen, 42, Brown Hill Crescent, Harehills Lane, Leeds.

British Bird Exhibitors

MOULT YOUR OWN WINNERS.

Hybrid and Mule Breeders, breed your own Winners.

Read of Success received this last two weeks. No fancy prices.

"Mr. Thomson, Markinch. Jan. 17th, 1907. Sir,—Bullfinch I purchased from you won 1st at Scottish National, Edinburgh, this month, beating all the English and Scotch cracks in a class of 38." "Mr. Turnbull, Jedburgh. Dec. 8th, '06. Glad to let you know of my success with Goldfinches you sent me, winning 1st and 2nd Jedburgh, 3rd Selkirk, 2nd Hawick, 2nd and 4th Carlisle. Send me two more beauties and a show cage." "Mr. J. J. Brain, Glastonbury. Dec. 4th, '06. I must thank you for Goldfinch for prompt dispatch. I received him in the evening and I showed him next morning, and won 1st in a large class. Thanks for same." "Mr. Turnbull, Jedburgh. Jan., '07. Goldfinch has added another 1st to his successes." "Mr. Ashurg, Bucknall Torkard. Sir,—Goldfinch you sent me stands 1st at our show in a good class." "Mr. Higgins, West Mallony, Kent. Jan., '07. Glad to inform you Bullfinch you sent me won 1st and special at Canterbury in a large class. Thanking you for such a good cheap bird." "Mr. Lee, Bandon, Cork. Glad to tell you I bred the light Mule, 1st and special Cork Show, from birds purchased from you." "Mr. W. Dyke, Longridge. Send a cock Goldfinch and hen Bullfinch. Pleased to see the Hybrid Goldfinch-Bullfinch I bred from the birds I bought from you has won 1st and special Leeds, Class 19, 3rd Halifax, 1st Leek, 2nd Hamilton, 2nd Hinckley, 1st Portsmouth, etc., etc."

Mr. Veitch, Jedburgh, Scotland, writes:—"Send cock Goldfinch, 3s., two hen Bullfinches, 3s. Glad to say young Goldfinch purchased from you won me two 1sts Hawick, 1st and special Kelso, 5th Edinburgh, Class 33, 3rd Galashiels, twice 2nd at our show." W. Jones, Altrincham, December 6th, 1905: —"Send two cock Linnets and two cock Siskins. Am pleased to say I won 2nd and 4th at Altrincham, Open Class with birds purchased from you." Mr. Ewan, Kirn, writes:—"Goldfinch arrived safe, and won 1st and special at our show." Mr. Weedall, Winsford, January 30th, 1906:—"Send another good Bullfinch. Glad to say last two have won 1st and 2nd every time shown. Unfortunately, best one just died; other won 4th large class at big Crystal Palace Show."

I sell more British Birds than any man alive. Thousands weekly, which enables me to pick so many winners. Beautiful British cock Goldfinches, guaranteed, 3/-, 4/- and 5/- each. LOW PRICES DO

not always mean cheapness. It is far better to pay a reasonable price and have exactly what you want than to pay a less price and get that which is absolutely useless to you, and is only an eyesore. I don't pretend to sell birds at less than they cost me (although some try to do so), but I do guarantee to sell genuine well caged steady birds exactly as described, and well on hard seed, and to give utmost value to every customer. Grand large genuine Worcestershire cock Goldfinches, in perfect health and feather, and warranted cocks, 2s. 6d. each, three 6s., six 11s., or 20s. dozen; specially selected large cocks, with large expansive blaze, for showing or muling, and warranted now in free song, 3s. and 4s. each; Worcestershire hen Goldfinches, 1s. each, three 2s. 6d.; splendid large German cock Goldfinches, very rich coloured, in full song, 4s. and 5s. each. Arriving this week, the second and last consignment of the real Siberian cock Goldfinches, grand birds, in splendid trim, and full song, 5s. each, two 9s. 6d., three 12s. 6d., or seven 28s.; extra special exhibition specimens, 7s. 6d. each, two 13s.; grand Worcestershire cock Bullfinches, steady and well caged, 1s. 6d. each; specially selected for show, 2s. and 2s. 6d. each; hen Bullfinches, 1s. each; few selected hen Bullfinches, very large and almost as rich in colour as cocks, price 1s. 6d. each; German cock Bullfinches, 3s. and 4s. each; cock Greenfinches, grand yellow birds, 6d. each, three 1s.; few extra large, for show or Hybrid breeding, 1s. each; cock Chaffinches, 9d. each, three 1s. 6d., six 2s. 6d., or 4s. 6d. dozen; splendid lot cock Brown Linnets, in tip-top condition and well on seed, 1s. each, three 2s. 6d., six 3s. 6d., or 6s. dozen. Specially selected large cocks, for show or muling, and warranted in song, 1s. 6d. each, three 3s. 6d., these Linnets are not seacoast rubbish, but genuine country caught birds; cock Goldfinch Mules, warranted in song, 5s. and 6s. each; cock Greenfinch Mules, grand free songsters, 4s., 5s., and 6s. each; Muling hen Canaries, 2s. 6d. and 3s. each; splendid large cock Twites, well on seed, 1s. each, three 2s. 6d., six 3s. 6d.; single trap cages, 6d. each; double ditto, 10d. and 1s. each; treble ditto, 1s. 3d. each; patent self-setting and self-acting trap cages, warranted to catch birds and immediately re-set without any attention whatever, 1s. 6d. each; self-acting spring net traps, 24 inches long, 1s. each, 18 inches long, 9d. each, these net traps are entirely different to the old-fashioned ones on the market, are extremely simple to set, and will catch and hold any bird, from a Wren to a Rook, without least injury; clap nets, 3 yards long, 4s.; pair, 4 yards, 5s.; 5 yards, 6s.; 6 yards, 7s.; 7 yards, 8s.; 8 yards, 9s.; 9 yards, 10s.; 10 yards, 11s. per pair, all made from thread netting, ¾ in. mesh, 4 feet deep, and sent complete with all pegs, poles, lines, etc., ready for immediate use; loose netting, ¾ in. mesh, 6 feet deep, 3d. yard; 8 feet deep, 4d. yard; 12 feet deep, 5d. yard, all post free, this netting is guaranteed genuine thread, and made specially for bird netting, and must not be confused with the thick American cotton netting now being sold for bird netting; real Japanese bird lime, absolutely strongest made, guaranteed to hold a Hawk or Rook, does not freeze, 6d. ½ lb., 10d. ½ lb., 1s. 6d. lb., full weight guaranteed, and sent post free; penny tin drinkers, 3 dozen, 1s. 3d., 6 dozen, 2s.; zinc ones, same size, 9d. dozen, 3 dozen 2s., 6 dozen 3s. 6d.; halfpenny tin drinkers, same size as usually sold as penny ones, 3 dozen, 10d., 6 dozen, 1s. 6d. Everything is guaranteed exactly as advertised, and sent on approval at my risk, either cash or CAGE BIRDS' deposit system, and money fully refunded if every satisfaction not given. Please note new address, by far the largest, cleanest, and best stocked stores in Midlands; personal inspection invited.

W. GORE, 131, Gooch Street, Birmingham.

IMPORTANT NOTE.

Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one advertisement.

EXHIBITORS AND MULE BREEDERS.

I have the largest stock of British birds in England. Large giant yellow cock Greenfinches, like Canaries, sure winners, 1s. each; extra large Peartree Goldfinches, for keen competition, deep square blaze, well buttoned and mooned, 3s. 6d.; specials, 4s.; large blood red-breasted Bullfinches, good black cap, nice wing bars, 2s. 6d.; specials, 3s.; large Yellowhammers, nice head markings, like yellow Canaries, 1s. and 1s. 6d.; extra large Brown Linnets, well pencilled, good brown backs, Norwich type, 1s. and 1s. 6d.; large Chaffinches, blue heads, nice wing markings and blood red-breasts, 1s.; Bramblefinches, Bramblefinches, fit for keen competition, well spangled heads, deep chest colour, extra large, with nice thigh markings, 1s.; specials, 1s. 6d.; large yellow Siskins, good cap, bib, and thigh markings, 3s.; Redpolls, good bib, and well marked, large, 1s.; large giant yellow Greenfinch hens, 6d. each; extra large Goldfinch and Bullfinch hens, for muling, 1s. each; all these birds are selected from hundreds, and are sent on three days' approval at my own risk, cash or deposit; state wants; post card before birds. Buy from the catcher for the best selected birds; inspection invited.—Matthews, Birdcatcher, 44, George Street, Hyde, Cheshire.

APPROVAL IS OUR

System of business on all birds' cages, etc., that we send out, so why send your money to such unscrupulous dealers, who have not really got change for sixpence? We have without doubt the largest stock of Worcestershire Goldfinches in Birmingham. Large warranted cock Goldfinches (not half hens), 2s. 6d. each, three 6s., six 11s., 20s. dozen; extra large selected, for singing, showing, or Muling, 3s., 4s. each, three 7s. 6d.; cock Goldfinch properly mated to hen Canaries, 5s. 6d. pair; ditto cock Linnets and hen Canaries, 3s. 6d. pair; large giant Siberians, cock Goldfinches, sure Mulers, 4s. 6d. each; extra selected, for show, sure winners, with full massed wings, good large square blaze and body colour, 7s. 6d. each, two 14s.; cock Bullfinches, 2s. each, hen Bullfinches, 1s. each; few large selected for Muling, 1s. 6d. each; selected cock Bramblefinches, 1s. each. Linnets! Linnets!! Large red-breasted cocks, three 1s. 9d., six 3s., 5s. 6d. dozen; extra selected singing, 1s. each, three 2s. 6d., six 4s. Larks! Larks!! Larks!!! Large upstanding cocks, three 1s. 6d., six 2s. 6d., 4s. dozen; few selected singing and caged off, 1s. each, three 2s. 6d. Norwich and Yorkshires.—Cock Canaries, 6s. 6d., 7s. 6d., 8s. 6d. each; Crested and Crestbred cocks, 8s. 6d., 10s. 6d., 12s. 6d. each; Muling hen Canaries, 2s. 6d., 3s. 6d. each. Cages! Cages!! Cages!! All made from best white pine. Goldfinches and Linnet cages, 4s. 6d., 5s. 6d., 6s. 6d. dozen; Lark cages, 3s. 6d., 4s. 6d., 6s. 6d. dozen; bow-front Lark cages, 2s., 2s. 6d. each; cottage top Thrush cages, 2s. 6d., 3s., 3s. 6d. each; singing box cages, 1s., 1s. 3d., 1s. 6d. each; large improved double trap cages, 1s., 1s. 3d. each; single tap cages, 6d., 9d. each; patent self-acting spring net traps, 1s. 3d., 9d. each; round or square top calling cages, 4d. each, 2s. 6d. dozen. Extra strong bird lime, hold anything, 1s. 6d. lb., 10d. ½ lb., 6d. ¼ lb., carriage paid; penny tins bird lime, six dozen, 3s. 6d., 6s. 6d. gross. Penny tin drinkers, 6d. dozen, three dozen 1s. 3d., 4s. gross.; 1½d. tin food fountains, with cover tops, 8d. dozen, three dozen 1s. 9d., 5s. 6d. gross. Penny bird calls, 8d. dozen, 6s. gross, carriage paid. Bird brace swivels, 6d. dozen, carriage paid. Loose netting, made from best superfine thread (not cotton), ¾in. mesh, 6ft. wide, 2½d. yard; 8ft. wide, 3½d. yard, carriage paid; 1¼in. mesh, for Larks, etc., 4½ yards wide, 6d. yard, carriage paid. ARTHUR THOMPSON,

197, BRADFORD ROAD,

FRIZINGHALL, BRADFORD.

CHAMPION CRESTS & NORWICH PLAINHEADS.

These are the two varieties I keep, and no one in England has better. Last Season I had three Fanciers breeding for me with birds of the highest quality. Neither money or sound judgment has been wanting in getting one of the finest stocks in the world together; and remember I don't exhibit now I breed for my customers to win. Hundreds of Winners sold by me, and reasonable. 30 years breeder. Have had the honour to judge at over one hundred shows. If fanciers cannot get the right birds from me, where can they get them? All on approval.

T. BILLINGTON,

220, COLWICK ROAD, NOTTINGHAM.

PRIZE-BRED Norwich Plainheads, same strain as my winners at Norwich, all in open competition; grand cocks, 5s. 6d., 7s. 6d. upwards; matched pairs, 8s. 6d., 10s. 6d., to 40s.; hens, 3s. 6d., 5s. 6d.; approval.—Geo. Wright, 51, Silver Street, Norwich. Aske Road, Middlesbrough.

GRAND Cinnamon jonque hen, typical shape, 5s. 6d.; exhibition ticked buff Norwich cock, third Coventry, 10s. 6d.; five grand clear yellow cocks, pepper fed, 7s. 6d. each; grand stock hens.—Freeman, Chapel Street, Birmingham; cash or deposit; stamp reply.

W. MILES, Aviaries, Chichester, has some grand Norwich for disposal; cocks from 7s. 6d., hens from 5s., all related to my winners at L. and P.O.S., Hastings, Cardiff, Swansea, S.W. London, Walthamstow; see CAGE BIRDS, Jan. 19th; state wants, approval.

WOOTTON'S Norwich; only six to dispose of, all buffs, related to my winners at Hanley, Scottish National, Coventry, Llanelly, Crewe, etc. Note.—All my winners my own breeding; cocks from 8s.; hens from 5s. 6d.; approval, deposit; stamp.—17, Wedgwood Street, Wolstanton.

EXCEPTIONAL offer of high-class Norwich Plainheads, large typical birds, from winning strain, at moderate prices, mostly unflighted, few handsome 1905 stock birds, pairs from 12s. 6d., cocks from 7s. 6d.; approval, cash or deposit.—Miss Gwyn, Somerville, Ramsgate. x266

ONE buff cock and one yellow Norwich hen, 35s., worth £3; also two spare buff cocks, £1 each, these are big bouncing birds, short tails and flights, ideal stock birds, scarcity of work reason for selling, see last week's advertisement.—Brown, 62, Long Lane, Moldgreen, Huddersfield.

300 HIGH-CLASS Norwich Canaries, cold room bred, cocks, in full song, 5s., 6s., and 7s. 6d. each; hens to match, 2s. 6d., 3s., and 3s. 6d. each; properly matched pairs 7s. 6d., 8s. 6d., 9s. 6d., and 10s. 6d. pair; satisfaction guaranteed.—Apply, Chapman, Haymarket Aviaries, Leicester.

GOOD Norwich cocks, in full song, 5s. 6d., 6s. 6d., 7s. 6d., 10s., 12s. 6d., 15s. 6d., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d., 10s. each; pairs, matched for breeding, 8s., 9s., 10s. 6d., 12s., 15s., 20s. pair; stamp, reply.—Stewart Brothers, Surrey Street, Norwich. x266

C. GODFREY has for sale three grand yellow Norwich, one slight tick on eye, first and second, also a clear, took two seconds only time shown, £2 each; a clear, third and vhc, 30s., grand feather; one buff, took two firsts, two seconds, two thirds, 30s.; all good stock birds, and several others smaller, but all bred from my winners, and can be seen any time.—25, Castle Bar Mews, Ealing.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: **MACKLEY BROS., (Jacob Mackley), NORWICH.**

NORWICH—continued

LOOK! Clear yellow Norwich cocks, 5s.; Buffs and Variegated, 4s. 6d.; full song hens, 2s. and 2s. 6d; pairs properly matched, 6s. 6d, 7s. 6d.: 10 pairs 60s. Satisfaction guaranteed.—Iliffe, 4, Grange Lane, Leicester. x264

SURPLUS stock from the breeders, satisfaction guaranteed, pairs matched for breeding from 10s. 6d., cocks from 6s. 6d., hens from 3s. 6d., also specials.—Secretary, Fye Bridge Association, 32, Colegate Street, Norwich.

POWICK'S Champion Norwich, the same strain as the winners at all leading shows, cocks 7s. 6d., 10s. 6d.; hens 5s. 6d., 7s. 6d. each; pairs, mated to breed winners, 10s. 6d., 15s. 6d., and 20s. per pair; no rubbish; ten days' approval.—Wm. Powick, Eastfield House, Dewsbury, Yorks.

HEALTHY Norwich plainheads, matched pairs, 7s. 6d., 8s. 6d., 10s., 15s., upwards; cocks, 5s. 6d., 7s. 6d., 10s. upwards; hens, 3s. 6d., 5s., 7s. 6d., upwards; special terms to dealers: inquiries invited; cold-room bred; approval.—S. Roberts, 39, Gloucester Street, Unthank Road, Norwich.

PURE-BRED Norwich cocks, in full song, 4s., 6s., 6s.; hens, same strain, 2s. 6d., 3s. 6d.; pairs, properly matched, 6s. 6d., 7s. 6d.; guaranteed large, healthy birds, cold-room bred (1906). If not satisfied money returned.—Fred Heathcote, 55, Havelock Street, Leicester.

ARTHUR BROTHERHOOD, Newport, Salop, can spare typical yellow cock, winner second and reserve, with buff hen, lovely quality and type, 22s. 6d.; rare quality buff cock, reserve, 12s.; chubby buff hen, beautiful quality, 7s. 6d.; all 1906; bred same as my winners, Oswestry, Madeley, Chester, etc.; approval with pleasure; stamp.

CHAMPION Norwich, Silk's and Sandiford's strains, winners of thousands of prizes, the finest procurable; cocks, 6s. 6d., 7s. 6d., 10s. 6d.; hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d.; pairs mated to breed winners, 8s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. pair; good breeding cages, 2s. 3d.; double, 3s. 6d. each; approval with pleasure.—J. Allen, 19, Albert Street, Wednesbury.

SPECIAL! Special!! Healthy large typical Plainheads of the right stamp and quality. A trial solicited, and the same high satisfaction guaranteed as for the past ten years; prize-bred matched pairs, 8s. 6d., 10s., 12s. 6d., 15s., 20s., 30s. upwards; odd cocks from 6s.; hens from 3s.; all cold-room bred. Enquiries invited; approval anywhere.—H. Amiss, Breeder and Exporter, Ashby Street, Norwich.

THE largest stock of high-class Norwich Canaries in the Midlands, cocks, in full song, 4s. 6d., 6s. 6d.; orange yellows, 7s. 6d. and 10s. each; good healthy hens for this year's breeding, 2s., 2s. 6d.; orange yellows, 4s. and 5s. each; pairs, properly mated for this year's breeding, unrelated, 6s. 6d., 7s. 6d., 10s. 6d., and 15s. pair. Most of these birds have been bred in out door aviaries. This is no flattering advertisement, but genuine 20 years' references. With my business extending so much I have had to take larger and more convenient premises. Please note change of address.—William Judd, Midland Counties Aviaries, 120, Belgrave Gate, Leicester.

C. ROBERTS.

Champion Norwich matched pairs, 8s. 6d., 20s. 6d., up to £5; single birds from 10s. 6d.; approval.—67, Whitegate Drive, Blackpool.

BEFORE PURCHASING

elsewhere, fanciers wanting genuine birds should write to Miles, St. Andrews, Norwich, for type and quality. Norwich cocks, 7s. 6d., 8s., 10s., hens, 3s., 4s. 6d., 5s.; pairs, matched for breeding winners, from 10s. 6d., 12s. to 25s.; approval, deposit.

WALTON AND NOAKES

now offer stock pairs, 15s. to 30s.; odd cocks, 10s. to 25s.; no odd hens.—14, Abney Street, Highfields, Leicester.

WM. BOWYER,

Gladstone Street, Leek, can spare few that can win; also stock birds, from 10s.; those wanting to improve colour, grand opportunity, as great amount green blood has been introduced into my stock; approval.

OWING TO INCREASE OF BUSINESS

Must sell my selected stock of Norwich, bred from Vardey's strain at great expense; price from 6s., best birds 15s. Genuine sale; approval.—Particulars, Pass, Cage Manufacturer, Hucknall Torkard, Notts. x264

E. F. Gowing's Crystal Palace Prize Strain.

Well-matched pairs, 25s., 35s., 45s.; some grand hens, 7s. 6d., 10s., 15s.; all related to my winners of firsts, specials, and other awards at Palace Shows, in open classes. Not showing this season. No reserve; approval with pleasure.—28, Castle Road, Colchester.

CHAMPION NORWICH.

From winners, Great Harwood, Nottingham, Hanley, Leek and District; also Leek Ornithological Society's Show, with 6 Norwich classes, 1 bred 5 of the 1st prize-winners, which is proof of qualtiy; pairs, from 15s. upwards; approval.—W. Wbetstone, 3, Parker Street, Leek, Staffs. x265

J. & J. HOPKINS

Have for disposal two unflighted Norwich cocks, yellow and buff, bred from our winning strain, 15s. each.—126, Bury New Road, Bolton, Lancashire.

THE GREATEST SUCCESS ON RECORD.

With fourteen exhibits at the late Norwich All-England Show I was awarded 13 cash prizes and 10 specials. Having selected my breeding stock of Norwich Plainheads and Crested, can spare some of the same strain at reasonable prices.—Mrs. Gaze, Aldeby Grange, Beccles.

IF YOU WANT

Reliable stock birds, note this week's prices. PAYNE & BENNETT, 73, Knowsby Road, Norwich.

CHAMPION PLAINHEAD. CREST.

I earnestly ask you for trial order to prove I give satisfaction. Send on week's approval, at my own risk, cash or deposit; this strain winners 200 prizes, including cup and medals, championship; Norwich Plainheads, Bullfinch type, cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; hens, 3s. 6d., 4s. 6d., 6s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; Crest and Crestbred, large feathery broad-skulled cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; hens, 3s 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d.; pairs matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards.—C. Baker, Herbert Street, Bedminster.

D. MALLINSON AND SON

Can spare a few grand pairs of Norwich, same strain as our winners at Halifax, Brighouse, Huddersfield, Bradford West; pairs matched for breeding, 20s., 25s., 30s. a pair; every bird guaranteed in good condition. Stamp for reply.—D. Mallinson and Son, Victoria Street, Huddersfield.

WILL YOU, PLEASE?

Will you please send me your name and address on a post card, upon receipt of which I will forward you, post free, my New Illustrated List of Canaries and British Birds? I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. to 15s. each; matched pairs from 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d., 15s. upwards. See what customers say:—"Cercy Street, Cork, January 18th, 1907. Received the bird on 15th, and am highly satisfied; it is extraordinary good value for the money.—B. Brambald to Miss Storey."—"Mcmock, Dumfriesshire, January 19th, 1907. I am exceedingly well pleased with the birds you sent me. They give every satisfaction.—T. Cross to Miss Storey."—"Victoria Road, Hatherleigh, January 18th, 1907. Bird received quite safe, in best of health. I am more than pleased with the quality of the bird.—C. Short to Miss Storey."—"36, Long Causeway, Perth, January 19th, 1907. Bird received safely, and gives every satisfaction, for which accept my thanks. R. Taylor to Miss Storey."—I have thousands similar to the above open for inspection. New Illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on 7 days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years' standing. Success certain. Every pair on approval, money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15s. 6d., 20s. 6d., 25s. 6d., 30s. 6d. per pair; some tip-top cocks and hens, yellow or buff, 7s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. each. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval, willingly.

Judge A. E. Silk, *THE AVIARIES,* **Whitstable.**

High-Class Norwich and Yorkshire Canaries.

JOHN C. BARNES,

BREEDER AND EXHIBITOR,

149, DUNCOMBE STREET, WALKLEY, SHEFFIELD.

SANDIFORD'S FAMOUS Norwich.

Patronised by Royalty.—34, George, Hull, and Station Square, Harrogate.

St. Andreasberg Rollers.

Trained to perfection under Nightingale, Titlark, Woodlark, etc.; daylight and gaslight songsters; they give satisfaction wherever they go; 6s. 6d., 7s. 6d. each; hen, 2s.; two, 3s. 9d. Norwich Canaries, bred from winners, 12s. 6d., 15s. 6d. pair; odd cocks, 7s. 6d., 8s. 6d., 10s. 6d.; odd hens, 4s. 6d., 6s. 6d.; Yorkshire cocks, 6s. 6d., 7s. 6d. each; Border hens, 2s. 6d. each.—Matt. Hopkins, Bird Specialist, 88 and 41, Fylde Street, Preston, Lancashire.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3s. 9d. each; 21s. a stick, try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, January 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"January 2nd, 1007.—Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"January 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varucy, Stratford, London.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 6s. and 7s. 6d. each. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

ALLOW ME, PLEASE,

to send you my illustrated Price List, which will only cost you a post-card. I offer all my Canaries carriage paid on seven days' free trial at my risk, and claim to have the best collection in the British Isles. Inspection invited. My stock consists of high-class British bred Rollers, bred from and related to the best of contest singers and winners. Cocks, in full song, 15s. 6d., 17s. 6d., 20s., 25s., 30s. A few extra special at 40s., 60s., and 60s. Hens to match same, 4s. 6d., 5s. 6d., 6s. 6d. each. Genuine trained St. Andreasberg Rollers, with full change of song by day and artificial light (no common German rubbish these), 8s. 6d., 10s. 6d., 12s. 6d., 15s. Pure Roller hens, 3s., 3s. 6d. each. Hartz Mountain Roller cocks, in full song by day and gaslight, very loud free songsters, 5s. 9d., 6s., 6s. 6d., 7s. each. Matched pairs for breeding songsters, 8s. 6d., 9s. 6d. The quality of my birds speak for themselves. I have many thousands of testimonials open for inspection, of which the following are a sample:—"60, Cairo Street, Hendon, Jan. 26th, 1907. Received Roller December 20th, and now, after a month I must give honour where it is due. I consider it a wonder. It sings splendid. I am highly pleased with it. I compliment you on the quality of your stock if this Roller is a fair sample. It has been admired by several. Again thanking you, etc.—J. W. Nicholson to Miss Storey." "Stanley Bank, St. Helens. Jan. 26th, 1907. Received the two birds in very good condition. I am well pleased with them. The Roller is a perfect treat.—J. Richardson to Miss Storey." "23, Bridge Street, Lisburn. Jan. 25th, 1907. The Hartz Roller to hand last night in pink of condition, after being 48 hours on the way, and it started to sing immediately put into the cage. Please send trained Roller. If it is much better than the one I received it will be a marvel.—J. Courtney to Miss Storey." "5, Meldrum Road, Kirkcaldy. Jan. 26th, 1907. The bird you sent gives every satisfaction. I am assured your birds are the best value for money. I have been a fancier for 30 years, but I have never had such satisfaction from anyone as I have from you.—T. Whittaker to Miss Storey." "8, Victoria Road, Platt Bridge. Jan. 26th, 1907. Received Hartz Roller. It is a splendid day and gaslight songster. It started to sing as soon as unpacked.—T. Richardson to Miss Storey." "20, Lower Grove, Wandsworth. Jan. 25th, 1907. Roller arrived quite safe. It gives great satisfaction. It it a nice songster.—S. Champion to Miss Storey." "Grassmere, Aldershot. Jan. 26th, 1907. Received bird in excellent condition. Must say it gives entire satisfaction.—H. Harrington to Miss Storey." "Tramway, Pwll, Llanelly. Jan. 26th, 1907. Roller arrived in splendid condition. Is first-class day and night songster. I enclose you further order for birds.—W. Davies to Miss Storey." "29, Clifford Road, West Stanley. Jan. 26th, 1907. Received Hartz in splendid condition. Started singing within ten minutes of arrival; indeed, it is the best and loudest songster I have ever heard. Just what I wanted. Thanking you for the prompt and honest manner of conducting business. Wishing you every success.—W. Roe to Miss Storey." If you want further proof allow me to send you the birds you require, carriage paid on seven days' approval at my risk. Illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

BUY DIRECT OF

Breeder and Trainer. Finest strain of Rollers in the country; trained to perfection, 7s. 6d., 10s., 12s. 6d., 15s. upwards; hens 2s. 6d., two for 4s. 6d.; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster; established 1888.

I ASK YOU

To give us one trial, and I am sure you will be pleased. All cock birds; 7 days' approval; any not approved exchanged. Yorkshire or Norwich cocks, 6s. 6d., 7s. 6d., 10s. 6d.; hens 2s. 6d., 3s. 6d., 4s. 6d. Real Rollers, 5s. 6d., 7s. 6d., 10s. 6d. No fancy names. Try one. Hens 2s. 3d. SEIFERT AND TRUTE'S

Genuine Rollers are ready; these are all bred in England; fanciers who want to improve their stock should have them; week's approval; 12s. 6d. to £3; hens, cold room kept, 5s.—Corkindale, breeder-trainer, Studley, Warwickshire, England.

WE CHARGE NOTHING

for sending our Rollers to you on approval, so that you cannot possibly lose anything by having one of our Rollers on triul, as we take all risk for seven clear days, and unless you are perfectly satisfied you only have to return it, and we will either replace it or return your money in full. We have on hand at present largest stock of pure St. Andreasberg Rollers in Birmingham, all with long, deep, sweet, soft, bass rolls, waterbubble runs, etc., bell, harp, and gong notes, etc., etc., 7s., 8s. each. Extra special Schoolmasters, 10s. each, two 18s.; hens, 2s. 3d. each, 4s. couple. Our St. Andreasberg Rollers are free from chopping or any harsh note whatever. We also have large stock of Hartz Mountain Rollers, pure day and gaslight songsters, 6s. each, two 11s. 6d.; hens, 1s. 9d. each, 3s. couple. Roller singing cages, 1s. 3d., 1s. 6d. each. Single Roller breeding cages, the idcal cage (not rubbish), 2s. 6d. each. Few second-hand double breeding cages, from 36in., 2s. 6d., 3s. each, nearly new. Cash to us or deposit with the Editor. Kindly read few testimonials published below. "40, Buckingham Road, Margate. Jan. 15th. Dear Sir,—Roller arrived safe. I am very pleased with it. I have instructed the Editor to pay over.—Yours, J. Dearing." "9, Avondale Terrace, Devonport. Jan. 14th. Dear Sir,—Bird arrived safely. I am well pleased with it. It had only been in the house an hour when it started to sing. No one here ever heard the like of him. I keep lot of birds myself, hut he is far better than any of my own.—Yoors, J. Pollard." "Dean Street, Oakham. Jan. 13th. Bird arrived safely.—Yours, J. Carter." Parker and Wilden, Bird Merchants, 257, Farm Street, Birmingham.

HOME-BRED AND IMPORTED HARTZ ROLLERS

which are

Reliable

for note, I do not profess to sell Imported Seifert Strain Cocks, at 10/6, and for a very good reason—others may profess what they like.

IMPORTED—Trained Cocks, 8/6, 10/6, 12/6, 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs, 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

SPLENDID HARTZ SINGING NEST TRAINED COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 8/6.

Home-bred (guaranteed) Trained Trute and Seifert Cocks 10 6, 12/6, 15/-; Hens, 4/6, 5/- each. These have been purchased direct from the breeder and trainer, and can be recommended.

Untrained—Strains unknown, Cocks 5/6, 6/6, 7/6; Hens, 3/6.

For testimonials, see last week's "Cage Birds."

Full printed instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

If you want to know about these beautiful and interesting songsters, send for my hook
'Profitable Canary Breeding as Practised in Germany' By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and solo owner of copyrigbt, W. Rudd, or from the office of "Cage Birds."

W. RUDD, The Bird Specialist, **NORWICH**

Use our Picture Postcards.

HARTZ CANARY KING.

William A. Gore, acknowledged by all to be the kiog of all Roller Canary retailers, still has u grand stock of pure St. Andreasberg hollow Rollers, all direct from Leipzig, all guaranteed in full song, day and gaslight, with long hollow and double rolls, sweet, silvery trills, waterbubble runs, soft roulades, piccolo trills, nightingale jug-jug, bent hollow tours, deep bass tones, bell, hurp, gong, and dao dao notes, etc., etc., and guaranteed perfectly free from any harsh or objectionable notes, whatever price, 7s. or 8s. each. Special Bandmasters, which excel in the deep bass tours and hollow runs and are perfect masters of their art, 10s. each. Twenty premier contest masters, specially picked from song boxes in Germany for me, in full song and fit for immediate contest winning here, price 15s. each. Only 20 for sale, so immediate application is imperative if yoo woold secure one of these unrivalled contest winners. Pure Roller hens, warranted same strain as above cocks, 2s. 6d. each, two 4s. 6d. each. Ordinary lood free Hartz cocks, in full, vigorous song, day and gaslight, 5s. 6d. cach, two 10s., or 33s. 9d. for seven. Hartz hens, 2s. cach, 3s. 6d. couple. Singing box cages, 1s. and 1s. 3d. each. Roller song cabinets, witb folding doors, made specially for my Rollers, 2s. 3d. each. Thousands of unsolicited testimonials have been published by me, and still they roll in. See following:—"19, Jacktrees Road, Cleator Moor. Jan. 21st. Sir,—Received Rollers all right on Saturday, and am highly satisfied; will give yoo another order later on.—Yoors, Eldon Barber." "4, Mill Street, Digils, Worcester. Jan. 21st. Sir,—Received Roller safe. He is a little gem. Started singing quarter of an hour after arrival. Thanking you for prompt attention.—Yours, S. Mason." "Spring Bank, Westbourne Road. West Kirby, Jan. 25th. Sir,—Received Roller in good condition. I am well pleased with it, and am instrocting Editor to forward you deposit.—Yours, T. Lee." "Holme Bank, Whitewell Bottom, Waterfoot. Jan. 26th. Sir,—Received birds all right, and am well suited with them. I have instructed Editor to forward you amount deposited.—Yours, James Whittaker." "8, Primrose Hill, Skinningrove. Jan. 26th. Sir,—Received Roller, and am highly satisfied.—Yoors, F. Jackson." "Queen Street, Hightown, Staffs. Jan. 28th. Sir,—Received Rollers all right, and am well satisfied. I have had a friend to see them, and he wants one the same, so please send on a St. Andreasberg Roller at 7s., and oblige.—Yours, John Fellows." The above are but a few taken from the heap received during last few days, but I shall be pleased to show piles upon piles to anyone at any time. All are sent on full week's approval (entirely at my own risk during the whole time), either on receipt of cash or CAGE BIRDS deposit system, and money fully and freely refonded if full satisfaction is not given and your every expectation not realised. These Leipzig Rollers are actually winners of innumerable contests both in England and Germany, and I ask all intending purchasers to have one on a week's trial and test it side by side with any other higher-priced Roller on the markct, and I shall be perfectly satisfied with result. My birds are being continually tested in this manner, and I am frequently being informed that my 10s. Bandmasters have beaten contest singers costing 20s., 30s., and even 40s. each. The leading breeders, dealers, and connoisseurs all patronise me, so if I can please them why cannot I please you? Wholesale prices on application. Please note new address. My business has grown so enormously that I have been compelled to take much larger premises, but only 50 yards from old address.

W. GORE, Direct Importer, 131, Gooch Street, Birmingham.

14 Days' Free Trial

Allowed on all our Roller Canaries, and we offer you real masterpieces, and certain contest winners at 15s. each, and understand it is impossible for anyone to sell a better or more classical songster even if you pay any kind of fancy price ranging up to 50s. for it. So do not be misled by bluff or bounce, or large displayed advertisements. Send your money to the Editor of CAGE BIRDS, and don't let go your hold on it till you are satisfied. And remember we allow you 14 days' free trial at our risk. No other dealer will do this. Deposit your 15s. at once, and let us send you one of the purest St. Andreasberg Rollers ever imported. We give full instructions with every one, and a recipe worth £5 to any Roller fancier how to keep them in full and perfect song. German Hartz cocks, in full song, like those advertised by others as St. Andreasberg Rollers, our prices 5s. 6d. and 6s. 6d. each. These are called best imported by some dealers. Bow fronted box cages, splendid for singing Rollers, 1s. 9d. each, complete. Always deposit your money, no matter who you deal with. Current price list post free. Anything alive bought, sold, or exchanged.

Northern Aviaries, Preston.

ST. ANDREASBERG AND HARTZ MOUNTAIN ROLLERS.

JUST ARRIVED. Consignment of these wonderful songsters. 3,000 sold last season.

Real St. Andreasberg Rollers, guaranteed pure notes, including Nightingale, Woodlark, Titlark and Waterbubble runs, perfect, price 6/6 7/6 each. Schoolmasters, 8/6, 10/6 each; hens, 2/-. Hartz Mountain Rollers, perfect music boxes, sing day and night, 6/-, two 11/6, seven 33/-. Hens to match 1/9 two 3/-.

Mr. J. PATTERSON, Cork, Ireland.—"Sir, I think it only right you should know that Roller you sent me won the All Ireland Roller Singing Contest, held here last November. He was a Champion."

This is only one. Send stamp for Catalogue of others and I will send you some real ones just as they have landed. They are coming every post. I guarantee or will wager my 10/6 Rollers are the best that ever comes in England, so why pay such enormous prices. Don't be gulled, send to a reliable firm, 25 years this address. Patronised by all the leading Judges, including Judges Bexson, Payne, Battye, Barnes, Irons, Roe, Vardy, Robson, etc., etc. Grand Box Cages, 1/10. Estd. 1879.

Powick, Eastfield House, Dewsbury, Yorkshire.

CHAMPION Yorkshires.—W. Binns, Albert Terrace, Blackpool, can supply first-class birds from 12s. 6d. pair; see my winnings at Wigan (1st), St. Helens (1st), Blackpool (five 1sts), Preston, and Altrincham (two 2nds), etc; on approval; satisfaction guaranteed.

YORKSHIRE hens, two yellow Cinnamon marked, one clear yellow pink-eyed, one buff Cinnamon marked, rare length, 6s. 6d. each; two clear buffs, 6s. each; five clear and ticked yellow cocks, 8s. 6d. each; with guarantee all 1906 bred, winning strain; approval.—Stansfield, Adelaide Street, Hebden Bridge.

BUY from the breeder. I have 40 cocks for sale, all young birds, clear or ticked dark-eyed, 8s., 10s., 12s. 6d.; grand yellow Cinnamon marked cocks, also clear pink-eyed yellow or buff cocks, 10s., 12s., 15s. These birds are in the pink of condition; sent on approval anywhere.—Sam. Taylor, Brook Street, Dewsbury, Yorkshire.

MR. BROWN has some good Yorkshire cocks and hens, yellow and buff, cinnamon and green ticked, these are standard length, bred from the winners he bought at Bradford and Eccleshill, and for which he paid a good price; give me a trial, and if not satisfied will return your money with pleasure; cocks from 15s., hens from 12s. 6d.—Brown, 62, Long Lane, Moldgreen, Huddersfield.

CHAMPION Yorkshire Canarics.—Fanciers wanting long, leggy, upstanding birds, have some magnificent cocks and hens, all colours, Buffs 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d.; Yellows, 7s. 6d.; 8s. 6d., 10s. 6d., 12s. 6d.; pairs, properly mated to breed winners, 15s., 17s. 6d., 20s.; cold room kept; sent approval, P.O. or deposit with Editor. 21 years breeder.—Frank Stevens, Great Ayton, Yorkshire.

YORKSHIRE and Norwich Plainhead. Special Notice.—Have some splendid stock birds for disposal, all colours, colour fed or natural; cocks from 5s. 6d.; hens from 3s. 6d.; special matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. per pair. No better value offered. Clean and healthy. Satisfaction guaranteed. Testimonials arrive daily Seven-day approval. Note address.—Spence, Breeder, Mount Pleasant, Norristhorpe, Liversedge, Yorks.

YORKSHIRES, from best strains extant. Winners Birmingham, King's Heath, Coventry, Stratford, Smethwick, etc., etc., only missed money once during whole season; grand yellow buff and marked cocks, feathered like wax, not Dutch Frills, but tight as drums, 6s. 6d., 7s. 6d., 8s. 6d., and 10s. each; hens, 3s., 4s., and 5s. each; matched pairs, 8s. 6d., 10s. 6d., and 12s. 6d. pair, all cold room bred; week's trial allowed, cash or deposit.—Gore, 131, Gooch Street, Birmingham.

ROOM being required, I have decided to dispose of the following birds:—Three grand buff Yorkshires, cocks, 6s., 15s., 25s. each; yellow cock, prize winner, 12s. 6d.; three pairs, 10s. 6d. pair: yellow marked hen, 7s. 6d.; four hens, yellow and buff, 5s. each; two large buff Norwich hens, 8s. each; two Roller cocks, 7s. each; Siskin cock, winner and muler, 10s.; two cock Siskin-Canary Mules, 7s. 6d. each; compulsory clearance; inspection invited.—Fred Tyler, Secretary C.B.F.A., Baildon, Yorkshire.

BEING overstocked I have several good Yorkshires to dispose of; lightly marked buff hen, 2nd in a strong class at Chester Show, very typical bird, 17s. 6d.; clear buff cock, vhc Chester, good stand and position, 15s.; another clear buff cock, 3rd Chester, 15s.; ticked buff cock, 1st pair class, 15s.; clear yellow cock, 3rd Chester, fine bird for carriage, 20s.; yellow cock and buff hen, 12s. 6d.; another similar pair, 12s. 6d.; some very good yellow cocks, 10s.; hens from 6s. All the above are strong and healthy and worth the attention of anyone looking out for typical birds.—Joncs and Chester, Grocer, 31, Princess Street, Chester.

AMBLER'S classical Yorkshires, winners in keenest competition. Having selected our breeding stock, we have for sale the choicest stock of Yorkshires in the Fancy, long typical cocks, full of style, and a magnificent collection of yellow and buff hens, correct type and feathered like silk. Our strain has been noted for over 20 years for breeding the biggest champions on the show bench; three 1sts, two 2nds, Manchester, 1906. This is a chance seldom met with to secure such classical birds at such reasonable prices; approval; satisfaction guaranteed; stamp particulars; ten pairs, matched to breed winners, 15s. pair.—17, Lytton Road, Bradford.

SAMUEL DEAN, 24, Crossley Street, Gt. Horton, Bradford, Breeder and Exhibitor of high-class Yorkshire Canaries, including Greens x259

W. RUDD, The Bird Specialist,
NORWICH.

COWGILL'S YORKSHIRES.
Birds that I have sold have won over 40 1st prizes this season in the keenest of competition, which is proof of their quality. I have still some good ones for sale, for show, or stock; matched pairs from 15s. to 50s., cocks from 8s., hens from 7s.; approval; cash or deposit; stamp reply.—115, Washington Street, Girlington, Bradford.

IF YOU ARE
Requiring Yorkshires, you should try me, for satisfaction, both in price and quality; typical stock birds, all colours, finest blood procurable; cocks 6s. and 8s. 6d. upwards; hens 4s. 6d., 6s. 6d. upwards; properly matched pairs, 10s. 6d., 15s., upwards; all related to winners; week's approval.—Kemp, 270, Girlington Road, Bradford.

LAWRENCE LANE
has some champion stock birds to part with, including dark and Cinnamon ticked and clear pink-eyed, related to my winners at Burnley, Rochdale, Ormskirk, Wigan, etc.; hens from 6s. to 10s., cocks 10s. to 20s. each; approval; satisfaction guaranteed or money returned in full.—16, Fountain Street, Barnoldswick, Yorkshire. x265

STEPHENSON (Leeds)
(Sec. Leeds C.B.S.), 19, Hartley Grove, Woodhouse, has some good Yorkshires for sale, cheap, to clear; cocks from 6s. 6d.; hens from 3s.; approval, deposit.

Shackleton's Yorkshires

Still lead the way. See reports of all principal shows. Some splendid birds for either show or stock; prices reasonable.—Stamp and address for particulars, The Paragon, Girlington, Bradford, Yorks.

Hudson's Champion Yorkshires.

Have a few pairs to part with, same strain as before, matched to breed winners, at 8s. 6d., 10s. 6d., 12s. 6d., 15s.; hens, 4s., 5s. 6d., 6s. 6d.; cocks at 6s. 6d., 8s. 6d., 10s. 6d.; on approval. I desire no man's money that does not get value for money; approval; stamp reply.—Hudson, Confectioner, Thackley, Bradford. x265

Southend-on-Sea Aviaries.

Yorkshires, finest strain in the world, highest awards, see show reports, properly matched pairs to breed own winners, 15s. to 25s. per pair; odd cocks, 9s.; hens, 6s.; cash or deposit; three days' approval; stamp, reply.—A. E. Pattrick, 115, North Road, Southend-on-Sea, late Bradford House. x267

WILCOCK'S YORKSHIRES, NORWICH.
I can supply you with either Yorkshires or Norwich Plainheads, for either stock or the show bench, all bred from my winners at all the leading shows, no better blood in the Fancy, pairs from 12s. 6d., 15s., 20s., 30s.; cocks or hens, from 7s. 6d., 10s. 6d., 15s., 20s. each; 3 days' approval.—14, Chapel Street, Eccleshill, Bradford, Yorkshire.

H. W. WALSH, HALIFAX.
If you require new stock kindly let me know, and I will do my best to suit you. Every bird I have for disposal is bred from or is related to my exhibits, which have won at all the leading Yorkshire shows; cocks from 8s. 6d.; pairs from 12s. 6d.; approval, cash or deposit.—Cecil Street.

CHAMPION YORKSHIRES.

Fine typical birds, ticked and clears, all clean moulted and colour fed; Buff Yorkshire cocks at 6s. and upwards; Yellow cocks 7s. 6d. upwards, all on song; hens, 4s. 6d., 5s. 6d.; pairs, 10s. 6d. upwards. —A. Smith, East Morton, nr. Bingley, Yorks. x263

Ogden Bros. Coruscating Yorkshires.

Winners of over 200 prizes, cups, medals, specials, etc., during 1906, at all the principal shows in England. Have about 100 surplus birds for disposal, splendid birds for either stock or exhibition purposes; matched pairs from 15s. 6d., approval, deposit or P.O., cold room, and every bird bred from or related to our winners, in grand condition. See CAGE BIRDS' ANNUAL or show reports for winnings. —Ashwood House, Dudley Hill, Bradford, Yorks.

BAILEY AND SWANGER'S YORKSHIRES,

Still leading. When we put down we win. See latest show reports, Scottish National, and Wimbledon, and other big shows. Having close on eighty pairs, we have decided to send them out for a speedy clearance at 15s. to 25s. per pair, cocks standard length, and hens feathered like box, sure to give satisfaction; three days' approval, cash or deposit; can be seen any day with pleasure.—24, Sandy Lane, Allerton, Bradford.

Mallinson's Cinnamon Marks

Are undoubtedly the finest stock in the world, our winnings numbering thousands of prizes, specials, and trophies, see reports of Halifax, Great Horton, Eccleshill, Huddersfield, Brighouse, Bradford West. Every bird exhibited by us is our own breeding, and not bought specimens. Circumstances prevent us from exhibiting any more this season, so we have a few first-class birds to dispose of, either for showing or stock purposes, all in good condition; stamp for reply.—D. Mallinson and Son, Victoria Street, Huddersfield.

WINS CHAMPIONSHIPS.
I earnestly ask you for trial order to prove I give satisfaction. Sent on week's approval at my own risk; cash or deposit. Having finest stock in West England, and sold some most prominent on show bench, which wins championship and medals. This strain wins 200 prizes. Cocks, 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; clears or ticked hens, 3s., 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; pairs, matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards; Sib-bred cocks and hens for light moulting, same price.—C. Baker, Herbert Street, Bedminster.

Champion Yorkshires.

Splendid type. Standard length. Now is the time to buy Stock Birds. Matched pairs, 8/6, 10/6, 12/6, 15/-, £1. Buff Cocks, 5/-, 6/-, 7/6, 10/-. Yellow Cocks, 5/6, 7/6, 8/6, 10/6. Buff Hens, 3/-, 4/-, 5/-. Yellow Hens, 4/6, 5/6, 6/6.

ARTHUR THOMPSON,

Frizinghall, Bradford.

E. TAYLOR, BIRD SPECIALIST, of BRADFORD.

would draw the special attention of Dealers and Fanciers generally to the fact that, in placing their transactions in **HIS** hands, they assure themselves of securing Birds of the most kingly quality in every detail. **E. TAYLOR'S** Birds are (every one of them) precisely what he represents them to be—the very best value obtainable for money, and on the accuracy of this assertion, **E. TAYLOR** is fully prepared to stake a long, honourable, and well-earned reputation. No one dealing with **E. TAYLOR** ever finds himself the victim of either imposition or disappointment, and every client of **E. TAYLOR,** when once secured, becomes a life-long customer. This gratifying position is not the effect of **magic,** but solely and purely the natural result of **merit,** and of that implicit confidence and esteem which is ever achieved by downright dealings, which can stand the light, and court the strictest investigation. You will do well and wisely in sending for **E. TAYLOR'S** Catalogue List and full particulars, which will convince you that you are in good hands, when you deal with

E. TAYLOR, Bird Specialist, 3 & 7, Thornton Rd., BRADFORD.

BRADFORD.

BE YE WISE

and send your orders for Canaries or British birds to Miss Storey, Bird Specialist, Crowle. You will thus be sure of receiving extraordinary good value for your money. I certainly have the finest stock of birds ever seen in an aviary at the lowest possible prices. Champion Yorkshires, all clean moulted, cold room bred and kept, feathers like wax, in the best of health and condition; typical cocks, in song, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. each; properly matched breeding pairs, 8s., 9s., 10s. 6d., 12s. 6d., 15s. pair; large cobby high-class Norwich, in all colours, birds of the right type, cocks, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; Norwich hens 3s. 6d., 4s., 4s. 6d., 5s. 6d., 6s. 6d. each; matched breeding pairs, 8s. 9s., 10s. 6d., 12s. 6d., 15s. pair; send for my new illustrated price list of Canaries and British birds. Note what customers say:—"2, Albert Street, Clitheroe. January 4, 1907.—Received bird all right. I am very pleased with it. Thanking you for straightforward dealing."—W. Robinson to Miss Storey. "29, Clifford Road, West Stanley, 5/1/07.—Received bird in splendid condition. Indeed, it is just the bird I wanted. Thanking you for your prompt, honest manner of conducting business."—W. Roe to Miss Storey. "31, Gwerwlbayn Terrace, Tylorstown, 4/1/07.—"Kindly forward another pair of Canaries. I cannot too highly praise the quality of your birds; they are worthy of all the praise they get in other people's testimonials. Your mode of packing is excellent."—W. Wilson to Miss Storey. "19, Prospect Place, Neath, 3/1/07.—I am more than pleased with the pair of Norwich, and so are all my friends that have seen them. Please send me another Norwich cock."—J. Rees to Miss Storey. "1, Wottons, Pinhoe.—I am more than pleased with the bird you sent me. I consider you have treated me well."—C. Chamberlin to Miss Storey. I send all Canaries, carriage paid, on seven clear days' approval; send for my new illustrated list, post free. —Miss E. L. Storey, Crowle, Doncaster.

YORKSHIRES! YORKSHIRES!
Champion Prize-bred Yorkshire.
Won hundreds of prizes.
This strain needs no puff. Send for a sample. Pair matched for Breeding Winners at 12/-, 14/-, 16/-, old Cocks, Yellows or Buffs, 6/-, 7/-, 8/-, 10/-. Hens, 4/-, 5/-, 6/-. Approval with any. Established 1879.

J. SANDIFORD,
Canary Breeder, PRESTON, Lancs.

THE CHAMPION WINNING STRAIN.

Winner of the Championship Diploma, Crystal Palace, 1906. Those who are intending going in for this strain, we are offering some high-class Yorkshires, including Greens, long slim Yellow and Buff cocks, from 10s.; hens from 7s. 6d.; pairs properly matched at 15s., 20s., 25s.; also to dealers, forty or fifty cocks at 5s. each; inspection invited; satisfaction guaranteed, or money returned; seven days' approval; P.O. or deposit; stamp reply.—Gill and Pickup, 1, Cragg Street, Gt. Horton, Bradford.

KNIGHT'S YORKSHIRE AVIARIES.

150 pairs high-class Yorkshire Canarics in all varieties and colours, without doubt the finest selection of this variety in the North; suitably matched and unrelated pairs, 12s. 6d., 15s., 20s., upwards; cold room bred, reared and kept; single birds, proportionately Few Show specimens from 20s. each upwards; approval, cash or deposit. My 25 years' experience in breeding and keeping Yorkshires only is sufficient guarantee of purity of breed without further comment. Before deciding a purchase, read my newly-published booklet, "The Whole Art of Colour-feeding and Training Yorkshire Canaries," sent post free on receipt of 2 stamps, together with full price list.—Jonas Knight (Author of "The Yorkshire Canary: Its Breeding and Management," published by "Feathered World," 1898), Allerton, Bradford. Yorkshire.

BENNETT'S

Champion Yorkshires, highest awards, ten guinea challenge and other cups, Palace, etc.; finest strain in the world; few properly-matched pairs cheap, same blood as those supplied by me to England's most successful exhibitors of Yorkshire Canaries; price list free.—59, Waverley Road, Great Horton, Bradford.

Winners Cheap.

Having purchased 300 typical Yorkshires, including 30 winners, and promising young birds (this being the whole stock of a noted breeder and exhibitor), I offer every brd for sale at reasonable prices. State requirements. Full particulars free. I can offer exceptional good value; cocks, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s., 25s., 30s.; racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; all birds in excellent condition. Sent carriage paid on seven days' approval. Send post-card for my new illustrated list.—Miss E. L. Storey, Crowle, Doncaster.

CHAMPION YORKSHIRES.

J. B. REES,
Glastaf Aviaries,
Abercanald, MERTHYR.

YORKSHIRES

AFRICAN TESTIMONIAL.

Received here Jan., 1907.—"The fourteen Norwich and Yorkshires arrived here per Mail Steamer Briton yesterday. The birds appear in the best of health and splendid condition. I am highly satisfied with the selection of these tip-top birds, which I feel sure will do justice to your reputation at our next Show."—L. C. Carrick, Cape Town, South Africa, to J. Taylor. Frizinghall."—Champion Yellow Yorkshiro Cocks at 6/-, 7/-. 8/6, 10/6, 12/6 each. Buff Cocks 5/-, 6/6, 8 -, 10/6 each. All on song, and about 7 inches long. Grand matched pairs at 8/6, 10/6, 12/6, 15/-, 20/- per pair. Clear, ticked, green marked, and cinnamon marked. Colour-fed or natural colour. Typical racy Yellow Hens at 4/-, 5-/, 6/-, 7/6 each.

Buffs at 3/-, 4/-, 5/-, 6/- each. All cold-room bred, kept, and healthy. Show birds very reasonable. State wants. 7 days' approval.

CRESTS & NORWICH.

Very large crested Cocks with immense crests on at 8/6 10/6. 12/6, 15/-, 20/- each. Massive broad-skulled crestbred Cocks, feather turns back to beak end, at 8/6, 10/6, 12/6, 15/-, 20/- each. Grand matched pairs to breed winners, at 12/6, 15/-, 18/-, 20/-, 25/- per pair. All colours in stock. Large crested Hens at 7/6, 10/6, 12/6, 15/- each. Some extra good crestbred hens at 6/6, 8/6, 10/-, 12/6 each, feather to beak end. Show birds now ready in Crested or Crestbreds, very reasonable. Champion Buff Norwich Plainhead Cocks at 6/-, 7/-, 8/6, 10/6 each. Yellow Plainhead Cocks at 7/-, 8/-, 10/6, 12/6 each. All on song, and large chubby birds. Colour-fed or natural colour. Grand pairs at 8/6, 10/6, 12/6, 15/-, 20/- per pair, matched to breed winners. Large Buff Hens, 3/-, 4/-, 5/-, 6/- each. Yellow Hens 4/-, 5/-, 6/-, 7/6 each. Exhibition Norwich, very reasonable. State wants.

Easy Payment System

NOTE.—Show and Stock birds can be had on the Easy Payment System, in Yorkshires, Crests, and Norwich. Birds sent off at once on receiving first payment. Send stamp for full particulars. Illustrated Price List post free. All birds are sent on 7 days' approval.

THIS IS

Not a Sermon

ABOUT MYSELF

(I LEAVE OTHERS TO DO THAT),

But to draw your attention to the fact that I can supply you from the largest varied Collection of Canaries in the World, and THIS CAN BE PROVED BY INSPECTION, with the Best Value Procurable. All are on approval, upon receipt of cash or deposit with Editor, and money returned in full if entire satisfaction is not given, or the bird or birds exchanged willingly, without fuss or nonsense, under the conditions of this paper, or my printed list. Besides those offered in other parts of this journal, I have

Lancashires, Belgians, Scotch Fancies, Dutch Frills, Cinnamons, Light, Variegated, and Goldfinch Mules, Siskin Mules, Greenfinch Mules, Hybrids, also Goldfinches, Bullfinches, Siskins, Linnets, Song Thrushes, and Blackbirds, Parrots, &c.

X Send for Printed Current Price List X

before finally deciding elsewhere. For Cages, see post free Catalogue, Easy Payments, &c.

To English, Irish, Scotch, and Welsh.

I submit this week but one specimen as proof of the claims I make as to superior value.

Read it and then use your own common sense judgment.

"Edinburgh,
Jan. 27th, 1907.

"Birds arrived in fine condition and very highly pleased with them. I have had birds from a few advertisers in "Cage Birds" and I can honestly say that yours are the best value I have yet received, and I will do my best in recommending you. Thanking you for prompt dispatch. A. Ritchie to W. Rudd."

NOTE.—All Amateurs should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10/6, 12/6, 15/-, and 20/-. Crested ditto, 15/-, 20/-, 25/- and 30/-. Yorkshires, 12/6, 15/-, 20/-. These are the *Best Value* ever offered.

Travelling Cages, 3d. extra.

HAVE YOU EVER

tried **"EGGERTINE."** It is the best, purest, and greatest bone and muscle forming food ever known, as the analytical reports of most eminent authorities prove. It will bring hens into sound and robust condition for breeding as nothing else will. This during the past twenty years has been proved by thousands. It is a genuine egg food made with fresh laid English eggs, with white, of course, included (and NOT foreign preserved yolk of egg) with other valuable properties combined Tins, post free, **1s. 3d.**; large size, **2s. 6d.** There is a saving in the larger size.

"ASTHMARINE"

IT SAVES WHERE OTHERS FAIL.

The greatest remedy ever brought before the Fancy, and has the largest sale of any similar article by far. Beware of imitations! For all lung affections it is marvellously efficacious — not a liver burner, but both soothing and healing. Thousands of testimonials received for this article alone. **9d.** and **2s. 6d.** per bottle, post free. Once used, always kept ready for any sudden attack.

P.S.—"CAGE BIRDS" PICTURE POST CARDS supplied by me and can be strongly recommended as Works of Art.

W. RUDD,

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

Parrot Aviaries, MORECAMBE.

LAISTERDYKE B.F.A.

Members' Fourth Show at the Royal Oak Hotel. There was a very good entry, and some well-known winners were staged. Mr. J. Greaves judged, and gave every satisfaction. CL. YELL.: 1, Padgett; 2, Moremont; 3, Armstrong. BUFF: 1, 2, Moremont; 3, Walton. TKD. YELL.: 1, Parker; 2, Walton; 3, Moremont. BUFF: 1, Bottomley; 2, Armstrong; 3, Brumfitt. YELL. HEN: 1, 3, Padgett; 2, Bottomley. BUFF: 1, Moremont; 2, Bottomley; 3, Padgett. CINN. COCK: 1, 3, Parker; 2, Coates. HEN: 1, 2, Bottomley; 3, Swaine. NOR. HEN: 1, Armstrong; 2, 3, Duckworth. SELL.: 1, 3, Brumfitt; 2, Armstrong. NOVICE YELL. COCK: 1, 3, Crame; 2, Coates. BUFF: 1, Danby; 2, Crame; 3, Coates. HEN: 1, Crame; 2, Danby; 3, Shoesmith. Winners of the medals:—First (gold), Padgett; second (silver), Moremont; third (silver), Walton. The runners-up for show cages were Parker and Bottomley. Special best cock, Padgett. Special best hen, Bottomley.

PENZANCE.

First show of the Penzance F.A., held in the Central Hall on Friday, January 25th. The birds were well staged on raised platforms, at a comfortable height, which proved a great convenience to visitors. The two classes for Goldies were the best we have seen for some time, the cage-moulted entry being 31 and the fresh caught 27. The special for best Goldie fell to E. White, with a grand cage-moulted Britisher. Some of the classes provided were cancelled for want of support, but nearly 300 birds faced the judge, Mr. J. Robson, whose awards gave entire satisfaction. Mr. J. C. Rogers is the Hon. Sec.; this was his first experience of Show management, and great credit is due to him for the capable manner in which all arrangements were carried out. He was well backed up by an energetic committee.

NOR. TICK. OR VAR. (8): 1, spl, res., Rickard, tick. eye and wing grand, bird lovely quality and colour, res. also a good one, but not so fine in feather; 2, Gaved, tick. eye, good specimen, teeming with colour and quality; 3, Paull, tail mark. a little slimmer than winner's, nice brown; vhc, Tickell and Son, grizzle back, good stamp, little loose in feather; hc, Menadue; c, White. HEN (12): 1, spl, res., White, var. yell., good colour and quality, rather slim, we preferred res., grand stamp, grizzle back buff, good chest and tail; 2, Gaved, buff, very neat, good wings and tail; 3, Tottle, tick. tail, fair bird, a little long, good quality; vhc, c, Menadue, neat yell., shapely, and good quality, bit wild or would have gone up. UNFLI. (7): 1, Bailey, good yell., grand body and quality; 2, Miss Hardwick, very sweet yell., shapely, and good quality and condition; 3, White, very attractive, teeming with colour and quality; res., vhc, c, Miss Hardwick. YORKS. CL. OR TKD. (14): 1, Mrs. Crocker, nice yell., good length and style, grand colour; 2, Roach, even-marked, grand shape, lovely condition; 3, Lobb, tick. head, full of quality, but not so slim; r., vhc, Bonney, yell., very neat, good length and style; hc, Webb; c, Harris. BUFF (10): 1, S. Chirgwin, grand buff, beautiful carriage, good quality and shape; 2, Mrs. Crocker, another good bird, lengthy and slim; 3, Farmer, fine quality, grand carriage; res., Harris; vhc, Thomas; hc, Angwin; c, Dyer. HEN (12): 1, vhc, Thomas, even-marked buff, long, well drawn, good quality; 2, Menadue, clear buff, pressed hard for first place, very typical, full of quality; 3, Roach, tick. eye and wings, good length and style; res., Dyer, neat, good quality and length; hc, Chirgwin; c, Farmer. PAIR A.V. (10): 1, spl, White, Nor., good pair, grand colour and shape; 2, hc, Miss Hardwick, Cinns., nice colour and condition; 3, Wills, Yorks, nice pair, well shown; res., Mewton and Biddick, grand pair Scotch, might have been in the money; vhc, Rickard. DARK MULE (8): 1, spl, Mrs. Skey, Canary-Bullic, a good yell., grand feather and condition; 2, Browning, Linnet-Bullic, good head and breast colour, nice feather; 3, Tickell and Son, Goldie-Bullie, fine colour and condition; res., vhc, Collins, Linnet-Bullic, good head, but hardly the colour of winner; vhc, Goldie-Greeny, good size, grand wing bars, lovely blaze; hc, Farrel; c, Chirgwin. GOLDFINCH, CAGE-MOULTED (31): 1, spl, 3, White, rare polish and finsh, very expansive and rich tanning, good buttons and bars, grand blaze, third not far behind; 2, Staples and Clarke, good face, buttons and bars rich body colour, well placed; res., Browning, big bird, with nice coloured and expansive face, rich body colour; vhc, Tickell and Son, good square cut blaze, fine chestnut, well buttoned; hc, Mewton and Biddick, colour well defined, grandly cut; c, Rowe and Hancock, not the largest, but good colour face, nice chest. This was a splendid class for quality; two sets of winners could easily have been found. NON-MOULTED (27): 1, 2, 3, Mewton and Biddick, winner charming bird, well buttoned, good blaze, beautiful tanning, second another grand one, larger blaze, nice wing and buttons, third not so large in face, good blaze; res., vhc, Rowe and Hancock, very sleek and shapely, rich blaze; hc, Collins, sweet bird, good-coloured blaze, nice moons and buttons, little small in face; c, Webber, not large in face, but a beautiful colour throughout. Grand class of Greypates. A.O.V. BRIT. (10): 1, spl, Tickell and Son, noted Cornish Chough, which came in for a good deal of scrutiny; 2, Mewton and Biddick, lovely Bearded Tit, in grand feather and condition; 3, Hosken, Girl-bunting, fair exhibit; res., Mitchell, Starling, grand sheen, well spangled, good condition; vhc, Staples and Clarke; hc, Rev. Cooper; c, Taylor Bros. SELL. £1 (10): 1, Bailey; 2, White; 3 (we missed), res., Mewton and Biddick, 12s. 6d. (12): 1, White; 2, Mewton and Biddick; 3, Tickell and Son; res., Bailey. LOCAL SECTION, NOR. (15): 1, Cock, nice shape, well-proportioned head and neck; 2, 3, Paull, warm and level in colour, nicely polished, third buff, well mealed, good quality; res., c, Oatey, nice one, good wings and tail; vhc, Polkinghorne; hc, Murley. YORKS (15): 1, spl, Mrs. Crocker, nice yell., beautiful carriage, very shapely, good quality; 2, vhc, Angwin, fine type, well up on legs; 3, res., c, Oatey, excellent shape and carriage, nice quality; res., good buff, gets well up, shapeley. A.V. BRIT. (13): 1, spl, Milton, Goldfinch, rare depth of blaze, well tanned, nice bars and buttons; 2, Rowe and Hancock, Bramble, nicely spangled and laced, good colour, not to steady; 3, Mabbott, Bullic, nice bird, lovely cap and breast; res., c, Coombe, Siskin, of good colour and sheen; vhc, Rogers and Hall; hc, Taylor Bros. NOR. YORK NAT. COL. (9): 1, spl, Oatey, tick. buff Nor., good stamp, very chubby, nice feather; 2, King, buff, fine feather, good bird; 3, Glanville, nice yell., a little too long; res., vhc, Batten, yell. Yorks good colour and style; hc, Cock. HYB.: 1, 3, res., Semmens, even-marked light Mule, nice size and shape, third sweet Siskin Mule; 2, Charlston, Greenfinch Mule, good size and colour; hc, Rowe and Hancock, good Goldie-Can., very nice colour, shade small.

BURY AND DIS. C.B.S. ROLLER CONTEST.

The second Annual Open Roller Exhibition took place in the Textile Hall, January 26th. The contest was well patronised by the public. Mr. J. Lyons judged. All prize money in open classes was sent away on day of Show.

Whittaker, hollow roll 5, hollow bell 3, purity 1, delivery 3—12; hc, Foulds, hollow roll 5, hollow bell 4, purity 1, delivery 1—11; c, Netherwood, hollow roll 4, hollow bell 2, bell tour 1, delivery 2—9. CLASS 2, OPEN: 1, spl, Percival, hollow roll 5, hollow bell 4, gluck 3, flute 3, bell 1, bass 2, purity 2, delivery 4—24; 2, Parr, hollow roll 4, hollow bell 3, bell 2, schokel 4, flute 2, purity 4, delivery 3—22; 3, 2, spl, Wilsden, hollow bell 4, bell roll 3, bell tour 2, schokel 2, flute 3, purity 3, delivery 3—20; vhc, Wilsden, hollow bell 4, hollow roll 4, water roll 2, bass roll 2, schokel 3, delivery 2, purity 2—19; hc, Percival, hollow bell 4, bell roll 4, bass roll 3, flute notes 2, purity 2, delivery 1—16; c, Norris, hollow bell 4, bell roll 5, flute 2, purity 2, delivery 2—15. MEMBERS' CLASSES, CLASS 3: 1, Lord; 2, Waring; vhc, Blackburn; hc, Ramsbottom. CLASS 4: 1, Lomax; 2, Lord; 3, Howarth; vbc, Burton; hc, Howarth; c, Blackburn. CLASS 5: 1, Lord; 2, Lomax; 3, Wheatcroft; vbc, Lord; hc, Waring; c, Austin. CLASS 6: 1, c, Waring; 2, Hamer; 3, Austin; vhc, Wheatcroft; hc, Blackburn.

LONDON & COUNTIES A.C.B.

Annual General Meeting, January 24th, "The Bay Malton," Great Portland Street, W. Mr. F. W. Thorpe occupied the chair. After the nomination of new members and the payment of prize money won at Pair Show, question of headquarters was discussed; after hearing sub-committee's report, it was unanimously decided in favour of "The Bay Malton." As it was necessary to alter the meeting night, room being engaged on Tuesdays, it was carried "That the meetings be held on the second and fourth Thursdays in each month." Votes of thanks to the retiring officers were then accorded The President, in reply, warmly thanked the members for the compliment they had paid him and said he was well satisfied with the state of the Association, also with the progress made during the past year, having some sixty members on the roll. He hoped they would continue to progress. Mr. Tringham, in moving a similar vote to the retiring Treasurer, Mr. Simpson, regretted the loss of a valuable officer, one who had worked hard for the Society. Messrs. E. Pretty, Williams, and Kelly replied for the Committee, and Mr. R. J. Pretty and Mr. A. Ransley acknowledged the vote to the Secretaries. The result of the voting for officers was:—President, Mr. F. W. Thorpe, 40 votes; Treasurer, Mr. A. Williams, 28 (being closely run by Mr. J. S. Key with 20 votes); Committee, H. Davis, 46; E. Pretty, 44; T. Kelly, 43; G. R. Elgar, 38; W. Orme, 32; W. Shakespeare, 31; W. Armstrong, 27; G. A. Morrison, 25; H. E. Tringham, 24; F. Sparke, 23; G. T. Pile, 21; and J. A. Simpson, 20; Secretary, R. J. Pretty, 50, and Assistant Secretary, Mr. Ransley 24. Mr. Nelson Paisley very kindly consented to act as Honorary Solicitor for the Association, an announcement received with applause. Mr. Adamthwaite (Auditor), regretted that he and his colleague, Mr. Pearce, had been unable to finish the balance sheet owing to pressure of business, but he assured the members that the balance was on the right side after a turn over of £51. He hoped to report at the next meeting. Messrs. Adamthwaite and H. Pearce were re-appointed Auditors and ex-officio members of the Committee. An animated discussion took place upon the word "frivolous" in one of the rules on the motion standing in Mr. Adamthwaite's name. The mover thought the word was out of place, and thought "substantiate" was better, for frivolous meant "silly," and he thought no man would lodge any objection that was frivolous. Both Mr. E. Pretty and A. Williams said that they knew from experience that fanciers did make frivolous objections; ultimately it was carried by ten votes to two to alter the word. The following fixtures for shows were carried: British Bird Show, Saturday, March 16th; Young Bird Show, November 15th and 16th. Smoking Concert, Thursday, March 7th.

EAST BOWLING & DIS. B.F.A.

First Members' Monthly Show of the year, held on January 26th. Mr. Wm. Richmond judged about 70 birds. CL. YELL. YORKS.: 1, 3, Bleazard; 2, Thompson; 4, Crowther; vhc, c, Bywater; hc, Casey. BUFF: 1, Bleazard; 2, Firth; 3, Cowell; 4, Lambert; vhc, Crowther; hc, Hudson; c, Bywater. TKD. YELL.: 1, vhc, Varley; 2, Thompson; 3, Sharp; 4, Cowell; hc, Birkett; c, Crowther. GREEN CANARY SHOW.

The Green Canary Association held their Annual Exhibition, January 26th, in the Caledonian Schools, Oldham Street, Renshaw Street, Liverpool. The room is very suitable in all respects and the birds were comfortably and well staged. Entries came up well, reaching about 400. Yorkshire Greens were, as might be expected, the main feature of the show, over 140 being staged in the eight classes provided, and the competition was exceptionally keen in this section. Norwich Greens, though not so numerous as the straight ones, were a good lot, Mr. Ryno's yellow cock winning the medal given for the best Green Canary over the Yorkshires. Perhaps a trifle on the long side, but in other respects a very typical Norwich with an exceptionally good head and chest, and wonderfully sound and brilliant in colour. We consider him the best Green Norwich that has been staged up to date. This medal is presented by the Toronto Cage Bird Society, Canada. Yorkshires and Plainhead Norwich of the clear and marked varieties were not very well represented, being neither so numerous nor of so high a quality as we have seen at Liverpool. Borders came up fairly well, Mr. Hadwin, the Secretary of the English and Welsh Border Fancy Canary Club, taking most of the prizes in this section with a capital team. The three British classes contained some excellent specimens, Mr. Coney putting down a team of more than average excellence, notably his winning Linnet, Twite, Greenfinch and Bramblefinch, all of which were worthy of more competition. Mr. Hadwin and his able and willing assistants had everything in grand working order and all seemed to go smoothly and well. H. W. Bayley judged.

YORKS., GREEN, SELF, OR FOUL (15): 1, Clayton; 2, Ryno; 3, Deacon; vhc, c, Thompson; hc, Handley. BUFF (21): 1, hc, Thompson; 2, Doughty; 3, Clayton; vhc, Drinkwater; c, Davie. NANTWICH

Feb. 8th & 9th. 46th Annual.

Fanciers, have you forgotten this good old and well managed fixture. Full prize money guaranteed in seven days. Entries accepted first post Monday. Send on and we will classify.

F. POWELL, Secretary, 33, Welsh Row, Nantwich.

METROPOLITAN A.C.M.H.B.

First fortnightly meeting at headquarters, Crown Hotel, Lavender Hill, S.W. The rules that had been codified by a Special Committee were read and adopted. It was resolved to have at the next meeting a judging competition, in matched pairs, for which two silver medals are to be given. Mr. J. Robson was elected to judge. Two fanciers were proposed for membership. A pleasant incident was the presentation to the hostess (Mrs. James Tindell) of a colour-fed Norwich, and a dome-shaped singing cage, which was much admired.—A. J. HEAD, Secretary.

CRYSTAL PALACE
BIRD SHOW,
FEBRUARY 15th, 16th, 18th & 19th, 1907.

No extra charge for admission.

Entries close Saturday, Feb. 2nd.

Better post them to-day to—

H. LAMBERT BROWN, 64, Manor Park, Lee, London.

LONDON CAGE-BIRD ASSOCIATION.

The L.C.B.A. Pair Show, held January 26th, at the "Napier," High Holborn, W.C., proved a great success in every respect. Not only were the entries in excess of many recent years, but the quality of the exhibits was quite exceptional. According to the remarks of the Judge, after the paying of the prizes, many of the exhibits were fit to hold their own in any competition—indeed, rarely, if ever, had he seen such a grand collection of pairs of Crests, Norwich and Yorkshires, and the A.O.V. in the champion section. The entries totalled 124 pairs, an increase of twenty-one over last year. The balance-sheet of the show is equally satisfactory, showing a net profit of 9s. 9d. on the venture, a very gratifying result. There was a large attendance of visitors and all seemed to thoroughly enjoy themselves. The medals for most points scored in the Champion, Amateur, and Novice Sections were won by Messrs. R. L. Crisp, J. Hawes and G. H. Neal respectively. Messrs. C. W. Baker and H. Trussler were the winners of the specials for second most points in the Amateur and Novice Sections. For the prizes in the Judging Competitions there was a keen struggle. Mr. B. Stevenson was the winner in the Champion Section, with Mr. A. Horton second and Mr. C. H. Cooper third. In the Amateur Section, Mr. J. Hawes stood first with Mr. C. W. Baker second, and Mr. A. W. Hart third. In the Novice Section, Mr. T. Miller secured the first prize, with Mr. G. B. Lewis second, and Mr. H. Trussler third. In the Hybrid Section, Mr. T. Easterling won the silver medal. Mr. J. Robson judged.

CHAMPION SECTION. CRESTS (15): 1, c, Tyson; 2, hc, Horton; 3, vhc, Turner. NOR. (20): 1, 2, Battison; 3, Lethbridge; vhc, Rennic; hc, C. H. Cooper; c, Curtis. YORKS. (19): 1, 2, 3, hc, c, Crisp; vhc, Burton. A.O.V. (9): 1, 3, vhc, hc, Wynn; 2 C. H. Cooper; c, Tysen. AMATEUR CRESTS (10): 1, 3, hc, c, Lazarus; 2, Slade; vhc, Shepherd. NOR. (5): 1, 2, vhc, Baker; 3, hc, Hart. YORKS. (7): 1, 2, 3, vhc, Hawes; hc, c, Baker. NOVICE CRESTS (7): 1, vhc, c, Franz; 2, 3, hc, Pooley. NOR. (6): 1, 3, vhc, hc, Neal; 2, c, Trussler. YORKS. (6): 1, 3, Lewis; 2, vhc, Trussler; hc, Adams. OPEN HYBRID (14): 1, c, Dewhurst; 2. 3, vhc, C. H. Cooper; hc, Curtis. SELL.: 1, Bennett; 2, vhc, Tyson; 3, Lethbridge; hc, c, Hart.

ENFIELD.

The Enfield F.A., which has got for its president the Rev. R. Howel Brown, held the Ninth Annual Open and Members' Show in Chase Side Council School, December 27th and 28th last. The Arctic weather, with which our shores were visited may have militated against the success of the show under notice, but whatever the cause, certain it is that the entry was anything but satisfactory, and very disheartening to the Secretary and Committee. There were 21 scheduled classes, only seven of which were allowed to stand, and in these seven classes, only 13 exhibits were staged. What could the cage bird men have been thinking about? There used to be quite a nice little collection of cage birds at this annual event, and the hon. secretary (Mr. W. J. Clark9), and his assistant (Mr. H. Shelfer) are as energetic and as courteous as ever, and as anxious for the success of the cage bird section. The Challenge Shield was won by Mr. J. Head, with a really fine yellow unflighted Norwich Plainhead, full of colour, grand shape and beautiful quality. Mr. W. Tichner won the Silver Medal with a bonny ticked yellow Norshape and beautiful quality. Mr. W. Titchner won NOR. A.V. (4): 1, spl. 3, Titchner, tick. yell., full of quality warm in colour, in nice feather, third Buff, fine shape and body, rather free in feather; 2, Head, trifle long in barrel, not quite so level in colour, nice silky feather. YORKS A.V. (3): 1, 2, 3, Head, the winner a lengthy yell., plenty of feather and a little wide in tail lovely silky feather, would make a good stock bird, second, Buff, tight as wax, bloomy, level in back, nice whip tail, and neat all through, third, ticked on head, not quite so full of quality and style as second. MULE A.V. (3): 1, Titchner, var buff Goldie-Canary, lacks colour, certainly the lightest in feathering, but very pale; 2, 3, Head, the former a slashing var. Goldie-Canary with nice flush face, and good colour, size and shape, third, very nice dark Linnet-Canary, that must have run winner a close race. UNFLI. A.V. (1): 1, Challenge Shield, Head, yell. Nor. Plainhead, deserved its place and distinction SELL. 10s. (1): 1, Titchner. GOLDFINCH (1): 1, Head, the Barnet winner, well shown.

SANDY LANE AND DIS. F.A.

Last members' show of the season, January 26th; thirty-five entries. Judge, Mr. James Thornton. YELL. COCK: 1, 2, Bailey; 3, Priestley Drake. BUFF: 1, Shaw Bros.; 2, Bailey; 3, Wood UNEVEN OR VARIEG., yell. or buff: 1, Shaw Bros. CINN. COCK: 1, 2, Drake; 3, Watmough. CINN. HEN: 1, Wilson; 2, Drake; 3, Shaw Bros. CL. OR TKD., ETC., YELL. HEN: 1, 3, Wilson; 2, Bailey. BUFF: 1, Wilson; 2, 3, Wood.

HAVE YOU SEEN OUR

Picture Post Cards of canaries?

MIDDLESBRO', TEESIDE, C.B.S.

Members' Show, January 12th, Crown Hotel. There was a good attendance of fanciers and friends. The Fancy is growing very much in this district. We had over 80 entries. Mr. Arthur Wake judged. YORKS. YELL.: 1, Wheatley; 2, vhc, Oliver; 3, c, Barnes; 4, hc, Hughes. BUFF: 1, 2, Barnes; 3, hc, Wheatley; 4, Hughes, vhc, Foster; c, Oliver. NOR. YELL.: 1, 3, Carr; 2, Wallace and Gardner. BUFF: 1, 4, Carr; 2, vhc, hc, Grey; 3, c, Wallace and Gardner. A.O.V. CAN.: 1, 2, 4, Wallace and Gardner; 3, vhc, Oliver. MULE OR HYB.: 1, Butterfield; 2, vhc, Wells; 3, 4, Oliver. LINNETS: 1, 4, Kilpatrick; 2, hc, Hughes; 3, Carr; he, c, Butterfield. GOLDFINCH OR BULLFINCH: 1, 3, Carr; 2, Wells; 4, Henderson and Weatherhead; vhc, Butterfield; hc, Kilpatrick; c, Shaw. A.O.V. SEEDEATER: 1, Shaw; 2, 3, Wheatley; 4, Henderson and Weatherhead; vhc, hc. Carr; c, Oliver. SOFTBILLED: 1, Carr. J. W. Oliver wins spl for most points gained by a novice. There was also a washing exhibition, which was given by Messrs. Wake and Marwood. This brought a very enjoyable evening to a close.

SOUTH WEST LONDON C.B.S.

Meeting Jan. 10th. Balance sheet for 1906 was laid before the members and accepted as being the best ever put before them; after deducting about 25 per cent. off assets, there are cash and assets to the value of £16 4s. 2½d.—W. LILLEY, Hon. Sec.

POTTERIES AND DIS. C.B.S.

The Annual Meeting was held at the Red Lion Hotel, Stoke-on-Trent, on January 12th, when the Secretary presented a very satisfactory report, showing that a deficit of over £4 in 1905 had been made into a balance of over £3. The special prizes for most points gained during the past season were presented to the winners: 1st, value one guinea, Mr. Pitchford; 2nd, value 10s. 6d., Mr. Evans; 3rd, value 5s., Mr. Hawley. The following officers were elected: Chairman, Mr. Hawley; Vice-Chairman, Mr. Ibbs; Secretary, Mr. J. Simcock; Treasurer, Mr. Yates.—J. SIMCOCK, Hon. Sec.

SUTTON-IN-ASHFIELD O.S.

The annual dinner was held at the Railway Inn, on Saturday evening, January 12th. A goodly number of fanciers sat down. After the removal of the cloth, Mr. Robert Rhodes (Nottingham), the district member of the Executive Council, was voted to the chair, and no better choice could have been made. Pianoforte solos and songs were rendered by Messrs. J. Smith (Secretary), Mr. Allen and others. Mr. Roslyn (Mansfield) proposed the toasts of "The Chairman," "The Society," and "The Host and Hostess," and Mr. Rhodes, Mr. Smith and Mr. Simms replied. Altogether a most enjoyable evening was spent. This annual fixture is well-known, and fanciers come from Mansfield, Hucknall, and other towns every year to make it a success.

ROCHDALE GOOD INTENT C.B.S.

The above Society held their annual party and social on the 15th inst. A capital high tea was provided by Mr. Lees (a member of the Society), for members' wives and friends. About 60 sat down. Afterwards a pleasing programme was gone through, the vocalists being Messrs. Leach, Royds, Warburton, and Bescoby, while Mr. Nuttall and Mrs. Whitehead were much appreciated as elocutionists. A feature of the evening was a racy speech by Mr. F. Horsman, our worthy Treasurer. During the proceedings we took occasion to present to our late Secretary, Mr. Thos. Holt, a silver mounted umbrella. Mr. Adams made the presentation in a neat little speech.—CLAYTON, Hon. Sec.

GARSTON B.B.A.

The members of the above Society held their Annual General Meeting in the Wellington Rooms, Duke Street, on the 15th inst., Mr. A. E. Crawley, Chairman, presiding. The balance sheet was placed before the members showing a cash balance of £3 12s. 3d. in hand, and proving clearly that the Secretary, Mr. Alf. Thompson, must have worked hard to produce such a financial standing, considering that the balance at the commencement of the year was on the wrong side of the ledger, there being only a membership of 25. The members present were not slow to recognise same, and thanked Mr. Thompson for his splendid achievement. The meeting night was altered from the third Tuesday to the third Wednesday in each month, so as to enable several of our members who are shopkeepers to put in an appearance at the meetings, Wednesday being a local half-holiday. The following were elected officers for 1907: President, A. H. Tate; Chairman, A. E. Crawley; Vice-Chairman, J. Carson; Treasurer, J. W. Lewis; Secretary, A. Wilkinson, 5, Gladstone Road, Garston; Committee, Messrs. Robert Kelly, Herbert Kelly, D. Chivers, J. Ireland, A. Christopher, J. Royden and T. K. Isaacs; Auditors, Messrs. James and Slater.

QUEEN'S PARK AND DIS. C.B.S.

At the last meeting, the following dates were fixed for this season's shows: Matched pairs, February 14th; Young birds, June 27th; Annual, November 14th. Several new members were proposed, making a good start for a successful season.—J. C. BIRCH, Hon. Sec.

CHELTENHAM C.B.S.

The usual fortnightly meeting, held January 23rd, was devoted to a washing competition, and proved very instructive. The President, Mr. T. J. King, washed one bird as an example, and acted as judge. Five competitors entered, and were allowed six minutes each in which to wash their birds. 1st, A. S. Treasure; 2nd, J. Hands; 3rd, W. Hailing.—A. S. TREASURE, Hon. Sec.

ROCHDALE O.C.

Washing Competition, January 19th, for novices. Mr. John Nadin gave an excellent demonstration, but only two novices competed. Mr. S. Entwistle, a young Lancashire breeder, won the first prize, and Mr. Charles Whitehead (another Lancashire fancier) the second prize. During the afternoon we were visited by three prominent Sunderland fanciers: Messrs. W. F. Swan, J. Risaborough, and R. Armstrong. Mr. Risaborough gave an exhibition of the Sunderland style of washing, which was much appreciated. It was decided to have another All England Show on 18th and 19th October next. Leeds fanciers have our hearty thanks for altering their date.—J. BUTTERWORTH, Sec.

DERBY C.B.C.

The Annual Meeting of the above was held on January 26th, at the Derwent Hotel, Mr. W. H. Eley presiding. Balance sheets for open and members' shows were duly passed, the only regrettable thing being that there was a loss of a few shillings on the open show. Votes of thanks to all donors to special prize fund, etc., comprised Messrs. J. C. Barnes and R. Theaker. The officers for the ensuing year were mostly re-elected. It was decided to have the members' show in connection with the open this year.

DERWENT VALLEY C.B.S.

Annual Meeting, January 12th, in Co-operative Hall, Low Westwood. The balance sheet was passed unanimously. Election of officers for current year resulted as follows: Chairman, Wm. Richardson; Vice-Chairman, J. Ripley; Treasurer, Wm. Routledge; Secretary, Rev. Wm. Rickaby; Committee, Messrs. Barkass, Jackson, Brown, Richardson, Garuner, G. Curry, Tomlinson and Wm. Curry. Radius for membership extended to 20 miles. Prospects of increased membership very cheering.—WM. RICKABY, Sec.

LANCASHIRE C.A.

Election of officers: President, Mr. Nadin; Vice-President, Messrs. Barrass, Green, Swallwell, Steeple, Oldham, and Garner; Treasurer, Mr. Hardy; Secretary, Mr. J. Law; Committee: Messrs. Donnelly, Mills (W.), Garner, Steeple, Walker, and Butterworth; Messrs. West, Collinge, Mills (J.), Oldham, Haworth, and Rowbotham have each received equal votes for the last three seats; Auditors, Messrs. Eckersby and Gaskell;; Judges, Messrs. Barrass, Garner, Nadin, and Swalwell; Messrs. Donnelly, Hardy, and Lowe tie for last two seats.; Judges, All England, Messrs. House, Bexson. Robson, Payne, Heath, and Compston.—A. ACKROYD, Scrutineer.

OLDHAM C.B.A.

Annual Social, January 26th, in the Textile Dining Rooms. A capital programme was gone through, which was heartily appreciated. Mrs. Woodward and Messrs. Kershaw and Hampshire rendered vocal selections, and Mr. Steeple gave several contributions on the concertina. Mr. J. K. Greenwood accompanied on the piano, Mr. Sharples presided, and gave also selections on the gramophone. Dancing at intervals was indulged in.

MANSFIELD C.B.C.

The Annual Dinner was held January 25th, at the Victoria Hotel. A goodly muster was present. Mr. W. Roslyn, President, occupied the chair and Alderman D. H. Maltby the Vice-Chair. The hostess, Mrs. Willoughby, ably assisted by Mr. Arthur Doncaster, put on a dinner fit for a king, and when the good things provided had been disposed of the usual loyal toasts were drunk, and the members settled themselves down for a musical evening. Amongst the good things, special mention must be made of Mr. Charles Gascoigne's song, "Live and let live," and "The oldest man at sea," by Mr. Barwise. The Chairman gave "Drinking," and Mr. Morris "Will o' the Wisp," "The Diver" and "The Wolf." Mr. Booth convulsed his hearers by his quaint rendering of "Eh, Daddy, don't you know?" Truly these Mansfield fanciers' are a jovial lot, for they are brimful of fun and frolics. Mr. Allen very ably presided at the piano.

BIDEFORD F.S.

Mr. H. I. Meredith presided at the annual meeting, those present including the Mayor (Mr. J. M. Metherell), Mr. F. A. Searle, and others. The balance sheet showed a balance in hand of £3 7s. 8d., in addition to staging, etc., valued at £35 10s., after allowing for depreciation. Mr. H. Stueley, J.P., was re-elected President, and Mr. S. R. Sing, Secretary, a hearty vote of thanks being passed to Mr. Sing for his valuable services in the past. The Society is also fortunate in retaining the services of its Treasurer, Mr. F. A. Searle, and its Chairman, Mr. Meredith. The Committee were elected as follows: Messrs. J. Moore, B. Davey, C. Dicker, W. Dark, W. W. Sing, A. Bishop, J. Slade, J. Gist, R. Cook, J. Adams, A. Symons, W. Shadwick, C. Davey, A. Harding, J. Priscott, S. Dimmond, F. Burrow, W. Matthews. The Assistant Secretary, Mr. W. B. Short, was also re-elected, and heartily thanked for his services.

EXTERMINATED BY DANYSZ VIRUS

Discovered and Prepared by
Dr. DANYSZ of the Pasteur Institute, Paris.

When affected with the Virus the Vermin leave their usual haunts and die in the open. The remedy is harmless to other animals and human beings and may be used everywhere with absolute safety.

For MICE only, 1/- per tube.
RATS & MICE, 2/6 ,,
Post free with full Particulars and Testimonials from

DANYSZ VIRUS Ltd. (Box 74)
52, Leadenhall St., London, E.C.

Mr. A. E. Pattrick writes:—I have removed from Bradford House, Boston Avenue, to 115, North Road, Southend-on-Sea.

Kindly thank on my behalf the gentlemen who replied to my advertisement; enquiries are too numerous to answer.—S. ENTWISTLE (Passmans).

We regret to hear that Mr. G. McAlpine, of Inverness, has undergone a few days' illness just lately. Happily he is fast throwing off its effects.

My Reed Bunting, exhibited at West London Show, in the hen class, and which your report says was thought by some present to be a young cock, is a hen, and was moulted out by me in 1906 having been in my possession about a year.—H. E. FOWELL (Thetford).

Bird-lovers should on no account miss the City and Suburban Society's Show of "Pairs Matched for Breeding" held to-day (Saturday) at the Church Institute, 60, Paddington Street, off High Street, Marylebone, W. Over 150 entries; a large and varied collection. A visit will well repay all fanciers.—ADVT.

Mr. W. A. Gore writes:—Owing to vast increase in amount of business (thanks very largely to CAGE BIRDS, as I now advertise in no other paper), I am compelled to take much larger premises at 131, Gooch Street, Birmingham; but, as this is only 50 yards from my old address, out of town customers who call will not be inconvenienced at all.

Great National Cagebird Show, Crystal Palace, 1907.—R. A. Newley begs to announce that he will have a fine exhibition of bird cages and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visiting is respectfully invited. Address all communications to R. A. Newley, 24, Stockwell Green, London, S.W.—(Advt.)

We intend to hold on Feb. 7th a Bohemian concert at the Bush Hotel, Shepherd's Bush. A large number of well-known artistes have promised to appear, and we hope to have a successful evening. Ladies and all fellow-fanciers are welcome, admission free. General meeting Feb. 21st; all members are asked to be present—some very important business to be discussed.—J. DEWHURST (Hon. Sec., West London F.A.).

"Bird Notes" for January reaches us from the publishers, Messrs. Moulton and Co., 4, Church Street, Brighton. It is a most interesting and readable issue. The coloured frontispiece of the Bronze Cuckoo is an excellent example of the work of Mr. J. G. Keulemans, who also writes the accompanying letterpress. A most fascinating article is the one "Concerning Rooks, both Wild and Tame," by Dr. Creswell. Other contributions are from the pens of the late Dr. Greene, Messrs. Suggitt and Castle-Sloane. A full-page photograph of the African black Hornbill accompanies some entertaining notes on the bird.

In enclosing the annual balance-sheet of the Manchester and Northern Counties O.S., the Hon. Sec., Mr. G. W. F. Lythgoe, writes:—I was able to give a good report of the year's working, the balance in hand (not including fixtures and other assets) being £60 4s. 4d.—28s. in excess of last year. The membership keeps up to the average, there being 134 on the books. Forty new members were added during the year. About the usual number were struck off through death or through declining the Fancy, and two resigned on account of the C.B. Union. The balance-sheet, which we have examined, is a thoroughly satisfactory one, a margin of profit being shown on the Annual Exhibition. On the other side of the ledger we notice an item of £2 1s., expenses incurred over the formation of the Cage Bird Union. The 1907 programme of the Society is a most attractive one, there being promise of several highly-interesting papers and lectures, washing and staging demonstrations, etc.; while a country ramble is down for a date in May. The Secretary's address is 25, Stamford Street, Old Trafford, Manchester.

Crystal Palace Show.

Entries for this Show close to-morrow, February 2nd. Intending exhibitors who have not had a schedule should send particulars of the birds they wish to exhibit, state if they are novices or champion exhibitors, and enclose 2s. for each entry. The Secretary will enter them up. All exhibitors should post their entries to-day if possible, but on Saturday at latest, to H. Lambert Brown, 64, Manor Park, Lee, London. No extension. No whip-up cards will be sent out.

Mr. J. H. Payne is now rapidly recovering from his recent indisposition.

The York Cage Bird Society has fixed its annual show for Nov. 5th and 6th, 1907.

Will Mr. A. Wells, whose "Illustrated Idea" we published on Jan. 5th, kindly forward address?

Mr. Llyfnwy Hughes, Penygroes, has been engaged to judge at Llandwrog, N. Wales, first annual show, Feb. 9th.

I have received lots of answers to my small advertisement, but have not been able to answer them all.—F. MELTON (Shadwell, E.).

Wallingford Show Report.—Please correct error: clear yellow 2nd, Lewin, clear buff 2nd, Lewin, not Lewis, as reported.—A. LEWIN.

I must say your paper is at the front. I sell five of it to every one of any of the fanciers' papers.—DAVID CARSTAIRS (Newsagent), Perth.

Please thank all applicants re my advertisement of Yorkshires. They are too numerous to answer individually.—H. SIDDALL (Sheffield).

I am leaving here shortly, I hope, writes Mr. J. Harrison (Greenock), for back to England, although I have made heaps of friends since I have been here.

The Scottish Metropolitan will have a proposal before them at their annual general meeting to introduce Borders, Norwich, and British birds into their classification.

Mr. J. Brown (Huddersfield) writes to say he had over thirty letters re his advertisement, exchange Norwich cock for Yorkshire hen. He is sorry that he cannot answer them all.

"At Netherton Show," writes Mr. T. Brown, "the medal for most points was won by Mr. E. Hinsley (Quarry Bank), who also exhibited three foreign birds which secured 1st, 2nd and 3rd prizes."

C. Wayte writes:—Report of Nottingham P.O.S. Show gives Maybe as winner of second and third yell. Crests, first yell. C.B., and first Selling Class 15s., whereas I was the winner of those awards.

OBITUARY.

Mr. S. SPERRY. (Leicester.)

I regret to have to inform you, writes Mr. Geo. Lander (Leicester), of the death of my old friend, Mr. Samuel Sperry, of Curzon Street, who succumbed after but a short illness. Mr. Sperry was a lover of Canaries, and also went in for Mule breeding. As an exhibitor and breeder of Crests he did very well, and won a considerable number of prizes.

Mr. W. H. Bamsey has again been unanimously elected Secretary of the Derby Cage-Bird Club, and will, therefore, be at the helm during the jubilee of that successful Society. Mr. Bamsey has an excellent assistant in Mr. T. Ratcliff.

Geo. Hill (Deptford C.B.S.) writes:—Kindly note that in future the above Society will be known as the Greenwich and Deptford C.B.S. This is not through any amalgamation, but as we meet in Greenwich and hold our ventures there we deem it advisable to make the alteration.

Mr. John Harvey (Measham, Atherstone) writes:—Kindly thank all applicants for the pair of large Crests advertised in CAGE BIRDS. I have sold them with the highest satisfaction, and had replies from all over England and Scotland. I find it impossible to reply to all personally. CAGE BIRDS is the best advertising paper one can get, and a splendid paper also for the novice.

With reference to correspondence regarding Coventry Show, Mr. G. Turrell, Hon. Sec., Coventry O.S., writes:—Kindly draw your readers' attention to the fact that our Society is not connected with the Coventry Fur and Feather Society. Our show was a splendid success; all prize-money was paid two days after the show, and everything passed off without a hitch. I hold dozens of testimonials.

New Society for Swansea.

There has been inaugurated a new society in Swansea, the title of which is "The Welsh National Cage-Bird Society," whose object is to offer inducements to breeders and exhibitors of cage birds by holding a two-days' annual show, on the most up-to-date lines. Very extensive classification will be given, and large prize-money offered. Our first meeting takes place on Monday next, to elect officers, etc., and a full report shall be duly sent you.—WM. A. TRESCOTT (Hon. Sec., pro tem.).

PARROT FOOD

Mr. F. H. JUDGE writes:

4, Fryent Cottages, Kingsbury,
London, N.W., July, 1906.

I thought you would feel interested to hear of the success I have achieved by using your excellent Parrot Food. I exhibited for the first time at Great Missenden, on July 12th, my green Amazon parrot, in an amalgamated class of English and Foreign birds, and was successful in carrying off first prize. Her excellent plumage was much commented upon, and I attribute this to having always fed her on your food, which sustains her through her moults and keeps her in good health.

SOLD IN PACKETS AND TINS.

Booklet on "Parrot Keeping and Feeding," post free for three penny stamps.

BREEDER OR EXHIBITOR?

Should Breeders get the Credit in Show Catalogues?

An animated discussion resulted at the Annual General Meeting of the London Cage Bird Association, last week. It arose out of a statement made by Mr. J. Tyson to the effect that it was likely that the Cage Bird Union would shortly consider the advisability of requiring exhibitors to state when making their entries at open shows, in the case of all bought birds, the breeders' names as well as their own, this important particular being included in the catalogue. Most of the speakers seemed to think that the question required careful consideration. Birds were frequently advertised as from a winning strain, while in reality they had been acquired here, there, and everywhere.

Mr. A. C. Burn thought it a just and requisite resolution. Such a rule prevailed at all cattle and other live stock shows, and the breeder deserved all the credit that could be accorded him.

Mr. Peverall thought upon the contrary the rule would simply open the door to more fraud. Men would then buy birds and exhibit them as of their own breeding. Someone asked how such a rule would affect the Yorkshiremen. They were, he believed, ticklish people to deal with.

Out of the arguments arose some interesting opinions upon closed rings, Mr. J. S. Clarke voicing the experience of a fancier friend of his, who had tried the British Roller Canary Club rings and pronounced them a failure. The rings, he said, had a habit of slipping off in the nest and were invariably pecked at by the hens. Mr. J. Tyson said, however, that the Hon. Secretary of the B.R.C.C. had assured him their scheme had been found to work in a perfectly satisfactory way.

Several of those present thought the rule as to breeders' names was inseparably bound up with the problem of closed rings for Canaries by which it would be possible to identify them.

Mr. Curtis said that so far as he personally was concerned, he was of the opinion that there were too many suggested rules, and the Cage Bird Union was more prone to suggestion than work. Such a question had two sides to it and he declined to commit himself upon it.

Mr. Knight thought the rule would tend to stop birds having so many relations.

Mr. Cooper also approved of it.

Eventually it was decided by a large majority to allow the Association delegate a free hand upon any rule to this effect that might be brought forward at Union meetings.

AMALGAMATED YORKSHIRE O.S.

ANNUAL MEETING: A SUCCESSFUL YEAR.

The Annual General Meeting was held Market Tavern, Bradford, January 25th, 1907. Mr. J. Townend, President, occupied the chair. Several circumstances combined to interfere somewhat with the attendance. Annual meetings of several of the affiliated societies, the Cinderella Club Canary Show, and other matters occupying the time available on Saturdays, the meeting was arranged for Friday. In addition, the business to be transacted was not of that vital importance to call forth the enthusiasm, and consequent attendance of the members being shorn of its "drawing" powers as a result of the revision of rules and the election of officers in forming part of the agenda. Nevertheless, the sixty or seventy persons present were thoroughly representative of the Fancy in this district. The reason for omitting the revision of rules and the election of officers from the business to be transacted is to be found in the negotiations which are proceeding for a re-union of the Amalgamation and the Yorkshire Union.

Report and Balance-Sheet.

The Secretary's report showed that the present membership of the Amalgamation stood at 479, an increase over the previous year of fifty-three. All things considered, the past show season could not be described as other than satisfactory. In the open competition, ninety-eight classes had been provided, bringing an entry of 1,411 birds, an average of 14.4 per class. Twenty-one selling classes accounted for an additional 457 entries, 21.76 per class. The novice exhibitors have given proof of their undiminished enthusiasm in supplying the thirty-four classes provided for them with 773 exhibits, giving the excellent average of 22.73, a pleasing feature being the sustained effort to the end of the season. It is satisfactory to know that there is every prospect of a more liberal classification being provided for them in the future. The foul-marked hen class, provided at each show and guaranteed by the Amalgamation, has not quite realised the expectations of its promoters, and, apart from the action of the Bradford (West) Society in presenting the whole amount of entry fees received for this class at their show, together with donations for the "specials" fund, the result would have been a loss of over £2. However, with 38 entries for the seven shows, it would almost appear as though, with some slight alteration in the classification, this class could be made a success from a financial point of view. From any other aspect, it has proved a success already, interest in and pleasure derived from it being expressed on all sides.

In August, permission was granted to the affiliated societies to alter the date of their winter shows to avoid clashing with neighbouring shows, provided they made the necessary arrangements with the appointed judge, and bore any additional expense incurred. Bradford (West) took advantage of this course and avoided a clash with Windhill, with, it is hoped, the happiest results to both. No doubt the beneficial effects of this re-arrangement were far greater than actually appear on the surface.

The twenty-five guinea challenge trophy has been won by Mr. W. H. Shackleton, the donor, who, although he cannot win the trophy outright, is quite within the terms of the agreement when he competes. His most sincere wish is to have the opportunity to congratulate some other person as winner on a future occasion. Messrs. Murgatroyd and Son proved worthy foemen in being only a few points behind the winner.

The uniform perches and show cage labels adopted by the Amalgamation, have proved a decided success, and many who at first condemned are now loud in their praise, and especially does this apply to the closing label.

As the result of an invitation to the Yorkshire Union, the delegates of both Unions met in the Market Tavern to discuss matters in relation to the newly formed Cage Bird Union, and after deciding to advise the Yorkshire societies not to join, a resolution was adopted unanimously asking for permission of the various societies to allow their delegates to form a joint meeting to discuss the advisability of reuniting the two bodies. This done, a sub-committee of six from each Union was appointed to draw up rules to be submitted to each Society. After many and lengthy sittings, the committee have submitted the result of their labours to the various societies, and a further meeting will shortly be held to receive their decisions. The sound commonsense and distinctly friendly spirit displayed by the two sections of the sub-committee augurs well for the ultimate success of the scheme.

The balance sheet for 1906 was read and adopted, a copy of which is presented herewith:

Auditors.

Mr. Townend then presented cup, medals, etc., to the respective winners, as reported in a recent issue.

It was resolved that in the event of a re-union with the Yorkshire Union, those members' of the Amalgamation who have won one or two first prizes under the "three firsts" system, and are registered as winners of such, shall, if they so desire, receive a medal value 7s. for one win, or 14s. for two, or, by paying the difference, an Amalgamation medal, value one guinea. In all such cases the recipients will be debarred from competing in the Novice Classes at future Union shows. As an alternative, said winners may cancel their claims and be allowed to compete in the Novice Classes.

On the proposition of Mr. Cowgill, seconded by Mr. W. Crabtree, it was decided to open a "Secretary's Testimonial Fund." The secretaries of the various societies, with Mr. S. Dean as convener, were elected a committee to manage the same.

Though not strictly Amalgamation business, it was a happy thought that prompted Mr. James Hartley to propose that the thanks of the meeting be tendered to the Cinderella Club Canary Show Committee for their efforts in making the show at Chellow Dean such a great success. He found a hearty seconder in Mr. T. Ogden. Mr. Brotherton, president of said committee, suitably responded. There can be no doubt that such efforts will do much to uplift the Fancy in the eyes of the general public, for which the thanks of the Amalgamation and all other Cage Bird Unions and societies are certainly due.

A proposal by Mr. Dean, seconded by Mr. Clegg, that the general meeting be adjourned indefinitely, was carried, and a vote of thanks to the Chairman concluded the evening's business.—Fred Hammond, Hon. Sec.

THE CAGE BIRD UNION.

The Penzance Fanciers' Association and the Metropolitan Association of Canary, etc., Breeders have affiliated to the Union.—Geo. W. F. Lytegoe, Sec.

SINGING CONTESTS.

PENTONVILLE.

At the Bee Hive, Cynthia Street, Pentonville Road, Saturday and Sunday, there were some good contests, Linnets and Chaffinches, C. Meacock again proving a winner.—Bill Morrison, Timekeeper.

CONTEST AT LEEDS.

The usual contest at Old Bird House, Leeds, took place last week-end. The judges were P. Hoban and J. Clark, who were unable to agree as to the awarding of the 3rd and 4th prizes. It was decided to have stricter rules as to the competitions for the future. Result: 1st prize, H. Allen; 2nd and 3rd, H. Allen; 4th, J. Whelan.—J. Melia, Sec.

A CONTEST AT YORK.

A contest was held at the Acorn Hotel, Micklegate, York, on January 26th, when 20 Linnets sung in pairs, and some wonderful singing was heard. The birds were in splendid condition and gave a grand display. Mr. G. Hopwood gave a good prize. Result: 1st, J. Evans; 2nd, J. Smith; 3rd, M. Smith; 4th, J. Limbert; 5th, Hopwood; 6th, Wilson.—G. Hopwood.

REVIEWS OF SCHEDULES.

Dulwich and Peckham C.B.S.—Members' show of pairs, Herne Tavern, Peckham Rye, February 7th. Judge, Mr. J. Robson. Ten classes. Prizes on sliding scale. Fee 1s. Entries close February 6th to W. Hodson, 209, Crystal Palace Road, East Dulwich.

Fleckney (Leicester).—Feb. 16th. Judge, Mr. J. N. Harrison. Two classes. Can. or Mule 1, Brit. 1. Prizes 10s., 5s., 2s. 6d. Fee 1s. 6d. Entries close February 8th to W. H. Lord, Fleckney.

CLUB NOTICES.

No charge is made for notices of forthcoming meetings, but they can only be inserted once. Should secretaries desire to secure immediate insertion of their announcements **exactly as written** they can do so by prepayment at the rate of three words a penny.

Barrow and Dis. C.B.A.—Jan. 23rd, at St. George's Hall, Grangate, 7.30 prompt. Members requested to make a special effort to attend.—E. E. Miller, hon. sec.

Battersea and Dis. C.B.A.—Feb. 6th, at Duchess of Devonshire, Lavender Road, Clapham Junction, S.W. Balance-sheet, etc., of last show; members all attend.—F. Easterling, hon. sec.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Norwich Plainheads.—**J. H. Payne.** Yorkshires.—**H. W. Battye.** Crests & Crestbreds—**W. E. Greeves.** Cinnamons & Miscellaneous Canary Queries—**J. North.** Border Fancies—**J. Wild Bird Life—**H. Norman.**

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Into Breeding Condition (Standerton).—To get your birds into good breeding condition, give them, about a month before pairing, three times a week, a little egg food; say a small teaspoonful for each bird. You may also give a pinch of maw seed twice a week. A little boiled carrot will also be beneficial to them at this time. When you see the dandelions coming up, procure some of the young leaves and give them some of these; but be careful there is no frost in them, as this would be almost as fatal as giving them poison. I should advise you to start about the second week in April. It is impossible for me to tell you which birds to pair together out of your stock, as your particulars are not explicit enough. Describe fully each of the birds you wish to pair up, giving sex of each, and I can then advise you.

Somewhat Weak (J. B. B.).—Give your bird 15 drops of tincture of catechu in its drinking water every other day for a fortnight. Then give 10 drops of syrup of iodide of iron for a week. Give also, twice a week, a little hard-boiled grated egg mixed with biscuit powder. You may also give twice a week a pinch of maw seed. Do not give him green food of any kind, or apple, until he gets well.

Pairing Questions (M. G. F.).—You will do quite right in keeping your birds in cages where they cannot see each other, until you wish to pair them up. About a week before you wish to start breeding, let them see each other through the wire partition. They will generally then go on and live a peaceful and harmonious wedded life. (2) I should advise you to ask a painter and decorator to answer this question. It will probably be necessary to strip off the wall paper. (3) Glad to hear the hen is so much better. Continue the syrup of tolu for another fortnight, and then you may give the tincture of quinine as advised. She should be all right and fit for breeding by the second week in April. Give her a little egg food occasionally and a little maw seed.

Slight Cold (New Reader).—Give your bird 15 drops of syrup of tolu in its water for a fortnight, to which add 10 drops of glycerine, and well mix. Discontinue the tincture of quinine, but if the cold is well at the end of the fortnight you may put him on it for a week or ten days.

A Lot of Eggs (Interested One).—You have a most remarkable hen. You say she has laid four and five eggs in a week, and sometimes two in a day, since last breeding season. Really, I have never heard of such a case before in all my experience, and I must say frankly that I cannot tell you the reason of such very wonderful laying powers. One would almost think you had a batch of eggs (addled, etc.) left over from last year, and that someone who is fond of practical joking has had access to them! Re your query:—Will she be all right to pair with a Goldfinch? I should say if she keeps on laying at the rate you mention until such time as the Goldfinch is fit to breed, that she will not, as she will have played herself right out. I should advise you to procure another hen for him.

Lump Forming near Beak (Novice).—I do not think you can do better than bathe the lump with warm water (but be sure you do not get it too hot), using a piece of soft sponge for the purpose. Do this twice a day for three or four days, then prick it with a clean needle. I advised this treatment for a bird affected like yours the other week, and I was told that it brought matter away, and that the bird is now quite well. I hope it will prove as successful in your case. Ten drops of tincture of quinine in his drinking water afterwards for a week or ten days should be beneficial.

A Weak Condition (J. Ball).—Your bird, I should imagine, has a debilitated stomach. Give in the drinking water for a week 20 drops of tincture of catechu and a pinch of powdered chalk, fresh daily. Do not give any more rape seed. When the week is up, give a little egg food three times weekly, to which add 5 drops of Parrish's chemical food. You may cut away the dirty feathers with a pair of scissors. Do not on any account attempt to wash it off.

Getting Quality into a Strain (Novice).—Yes, you would improve the quality of feather in your Norwich by introducing Cinnamon blood. But I think you would also get several faults into them at the same time, such as excess of feather, long tails and flights, and most probably a little browing, so that you will see you would be, paradoxically speaking, a loser by the gain. I should advise you to get a few high quality Norwich and introduce them into your stock. These would probably be a bit on the small side, but I have no doubt your birds, which you say are so deficient in quality, are a trifle on the big side, so that would balance matters. There are many good breeders who would be only too glad to supply you with birds that would be most suitable for your purpose if you told them your requirements.

YORKSHIRES.

Answered by H. W. BATTYE.

Bowel Trouble (G. Robertson).—From what you say in your letter I have come to the conclusion that your bird is suffering from inflammation of the bowels. Treat it as follows:—Get a little turpentine, warm it, then catch your bird, pull out one of its tail feathers, dip it in the turpentine, and lightly daub it on the bird's belly. It will make the bird squirm for about ten minutes, but you need not trouble. It will greatly relieve the pain. Warm a knitting or darning needle, and dip it into a little salad or olive oil. Open the bird's beak and drop 3 drops into its mouth. This will be the means of gently purging its bowels. When it has had a free motion, give it a little milk sop, made as follows:—Take a little home-made bread or good biscuit and boil it in milk, squeeze as much of the milk out as possible, mix a little moist sugar among the sop, and sprinkle a pinch of maw seed over it; give fresh daily for a week, and let it have white canary seed in addition. If your bird is not too far gone, the above treatment will, I think, put it right. Should he pleased to hear how your bird progresses.

What Results (Retlaw).—(1) From a self yellow cinnamon cock and a buff green Yorkshire hen of Cinnamon blood, I should expect you to get a majority of self or heavily variegated Cinnamon youngsters, with an occasional self or variegated green bird, but should not expect you to get any clear or lightly marked birds of either variety where the Cinnamon blood predominates in a pair, and especially when the cock is a full-blooded Cinnamon the tendency will be to throw nearly all Cinnamon youngsters. (2) From green Yorkshire cock of Cinnamon blood and cinnamon Yorkshire hen should expect similar results to the other pair, with perhaps about an equal number of green and cinnamon, self, or variegated youngsters, but this will greatly depend on the percentage of Cinnamon or Green blood in the veins of the parent birds.

Pairing Problem (Welshman).—You need not hesitate to pair your two Yorkshires together when the time comes, say last week in March or first week in April, that is supposing they are not very closely related. Birds hatched in April are quite as good, and in many cases far better to breed with the following season than birds two or three years old. To say you should not breed with a bird the first season sounds all right in theory, but is of little value in practice, as when a Canary is twelve months' old it as vigorous and fit for breeding with as ever it will be, unless it is a hird bred late in the season. (2) From the description you give of your pair of birds, I should expect you to breed clear and ticked or lightly marked birds, and it will depend on how your clear cock is bred whether they are green marked or cinnamon marked.

Exchanging Cocks (J.D.).—You ask if it would be advisable with your two pairs of Yorkshires, both cocks being of one colour and both hens of the opposite colour and unrelated, to change the cocks after the first round. In reply, I may say that if the youngster did not suit me from the first round, and I thought I could improve on them in the second round by changing the cocks, I should not hesitate to do so, but to do this you would require to take the cocks away from the hens when you set them with their first clutch of eggs, letting the hens rear the young ones themselves. This is one of the advantages the breeder has who does not allow the cock to assist in rearing young. (2) Yes. I don't advise the use of hemp seed generally, and especially among Yorkshires, as it has a tendency to cause them to be a bit soft and loose in feather, and get them too fat. I seldom use any, only when the birds are feeding young ones, when I give them as much as they will eat along with their ordinary white canary seed and egg food, just cracking the shell by passing it through a machine before giving it to them.

Disinfectant Paint (Yorkshire Cage).—I do not know where you can get the paint or disinfectant wash you name. Have never seen or used any of it. My cages are done with three coats of Aspinall's enamel, this I prefer to paint; or you might get some local painter to mix you a paint that will dry hard, telling him what you want it for, and give your cage a coat of this, and then two thin coats of enamel. (2) I generally put all the eggs a hen happens to lay up to six, and very few lay more than five; the number I like best is four.

[Will insert enquiry re disinfectant next week in Twitterings.—Ed. "C.B."]

Ringing Young Birds (W. R.).—Young birds should be rung at from six to eight weeks old. I do not know of any rings on the market that would be a guarantee of a certain bird being bred by a certain exhibitor, as the rings could be taken from one bird's leg and put on another bird that this certain exhibitor may have bought from some other breeder, and this is what you are intending to try and prevent. The rings I have used for the purpose of identification in young birds have been made of soft metal, and can be easily opened wide enough to place the bird's leg inside the ring, and then gently press the sides of the ring together again, when the bird will be all right so long as the ring will slide loosely up and down the bird's leg. When you want to remove the ring you will have to be very careful or you will run the risk of laming the bird's leg; the best way to remove is to catch the bird, and get its leg between the fingers of the same hand as you are holding the bird with, and insert the point of a small pen-knife blade into where the sides of the ring meet, and by twisting the knife blade a little you will be able to open the ring far enough to get your finger nail in, and thus open it wide enough for the ring to drop off the bird's leg. This is, I think the only danger there is in connection with ringing young birds.

CRESTS AND CREST-BREDS.

Answered by W. E. GREEVES.

Cock not Singing (H. N.)—You do not say how old your Crest cock is; on this depends in a great measure the treatment required. You say he is kept in a wire cage. Until he gets well and strong keep him in a box cage, with only a wire front, and this cover over at night. I gather that he is not in any way suffering from a cold, but is in a weak state of health. Continue to give canary seed daily, rape twice a week, hemp once, a few groats once, maw seed once, and egg food twice, mixing well with the egg food four drops of Parrish's Chemical Food. Every other day put six to eight drops of whiskey in the drinking water. If watercress is procurable, give twice a week a small sprig; mind that it is not frosted, and the wet well drained from it; occasionally a piece of apple will do good. Mind and supply good grit.

Mating Crested Hen (W. Parker).—With your green Crestbred cock mate a Crested hen with a clear or grey crest; it would not matter if the Crest were dark, provided the body was clear.

BORDERS.

Answered by J. PATTERSON.

Various (Novice).—Personally, I do not like large flight cages, as I find it very difficult to keep a large number of birds therein in perfect health. Some will gorge themselves with any tit-bit, and will not allow another bird near until they are satisfied. The size I find best adapted to the Border Fancies is: length 22 in., height 14 in., width 10 in. They are a handy size as breeders, and you can comfortably moult out four birds in each, providing they do not pluck one another. During the winter months the same number of birds may be kept, and by spreading any tit-bit well over their seed, in separate vessels, they all get their share. (2) Separate all cocks and hens into single cages; keep them at opposite sides of room until the breeding season. Let the hens run three or four together, according to the size of cages; you will have a good idea from the above measurements. Give a good hop between spars. Feed the cocks on canary seed, giving every other day a pinch of rape; give a little egg food twice a week with a pinch of maw over it. Feed hens in the same manner, but add a little inga to the seed diet. Give plenty of good grit, cuttlefish bone, and eggshells, and they should be in grand form. (3) I do not like apple for my birds, and would not advise you to use it during the cold months; it is very relaxing to the bowels. A small piece of boiled carrot once a week is quite sufficient, along with the seed diet, and keeps them in perfect condition.

Cock not in Song (J. Ramsay).—You do not state age of birds; if young, they should be in full song now, but perhaps they may be old ones, and are therefore not so vigorous and more inclined to take things a little easily. If they are young I am afraid something must be wrong with your diet, room, or management; follow advice to "Novice." You might safely add 3 drops of chemical food to half-a-teaspoonful of egg food. Give in water 10 drops of sherry, and 5 of syrup of buckthorn; use this fresh every other day for the next two weeks, and by that time you ought to see some improvement, unless they are old. Some old cock birds breed until they are seven or eight years old, others will not fertilise an egg after their third year. If your birds are unhealthy and old, I advise you to get others in their place.

SCOTCH FANCIES.

Answered by R. WRIGHT.

Hen Ailing; Double Buffing; Belgian Breeding.

Did your yellow hen get a good clean moult last season, or did you show her when in the moult? If so, you have given her asthma, that's why the voice is so weak. Give her boiled bread and milk every morning, boiled rape seed three times a week, every morning a bit of apple dipped in glycerine in the wires. (2) You are safe to double buff. You will get strong, healthy, tight feathered birds, and next season put to a yellow again and you will get more yellow than buffs. Double yellowing will produce yellows and buffs, thin in feather, and not so strong as double buff. (3) Don't Sih breed. I think that has been the ruin of the Belgian Fancy I think that has been the ruin of the Belgian Fancy size in Scotch Fancy. To-day it would be a great treat to see a large Belgian.

LIZARDS.

Answered by BARKER CLEGG.

Breeding Lizards, etc. (Westgate).—You need not be puzzled long on birdy matters. Write to CAGE BIRDS. In reply to you inquiry, (a) Yes. The Lizard is only a one season show bird. That is as long as they carry the nest wing and tail. After this thorough moult, the fringing of the feathers is tipped with white. (b) The cocks are good songsters, and would make nice drawing room pets. (c) Pair Gold cocks to Silver hens and vice versa. You would get both colours from the same nest, just the same as other varieties through yellows and buffs.

ROLLERS.

Answered by F. A. LESTER.

Imported Germans (Dock).—Will newly imported German Canaries breed as readily as English-bred Germans?—Yes, they will if in good health and condition. The principal condition in successful breeding is to get your birds into robust health; the other part is easy afterwards. There is no doubt that English-bred Germans would be the best to use, as they are thoroughly used to the climate, and would yield best results.

Breeding Rollers (Ignoramus).—A beginner wants advice re breeding rollers.—You would get mostly clear birds from your clear cock and clear hen. The B.R.C.C. rings are rings put on the birds at seven to eight days old, and are issued by the Secretary of the British Roller Canary Club. Birds bearing this ring are bred in England, and, having a number and the year on them, you can tell the age of the bird and by whom it was bred, by writing to the secretary. There is a book on Rollers, written by Albert Rettich, and it could be procured through this paper for about 1s. 2d.

Canary Cock Moping (Novice, B.).—Yes, your bird has doubtless felt the effect of the severe weather, has developed lung trouble, and will be very difficult to cure. However, try arsenicum and aconite, giving alternately ten drops each day in drinker. Keep, if possible, in a room that is not used to such sudden changes in temperature. The Sciferts are the best hollow roll songsters. The St. Andreasbergs are the higher scale songsters, and have been trained to some extent. The Hartz are the ordinary common German Canaries, free loud songsters. But these names do not imply much, each dealer using the name that suits him best. Try a British bred hen, rung with a B.R.C.C. ring, as explained to "Ignoramus," in this issue. Your cock bird would not be much use this season, if he recovers.

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Niger or Inga Seed.—Please state if the enclosed sample of Niga seed is also known as Inga and Niger?—W. OLSEN.

These are variations of the same word. I take it that the original designation was "Niger" (which means black), which got corrupted into 'Niga," and then some fanciful merchant transposed the first two letters when asking a higher price for it. Your sample has a brown tinge, but the best is quite black. It is the seed of one of the composite order of plants, shaped and coloured like a sunflower, and about the size of a halfpenny. It is a great favourite with all the Finch tribe, and when fresh is a very valuable food.

Seed Samples.—Please tell me the qualities of the enclosed seeds. No. 1 I get as best Spanish canary seed at 2d. per pint; No. 2, Spanish at 3d. per pint; and No. 3 is rape at 2d. per pint.—A YOUNG BEGINNER.

The No. 1 canary seed is an excellent sample, bright and plump, economical, and quite good enough for any bird, but I do not think it was grown in Spain. No. 2 distinctly Spanish, bold, clean seed, but it is expensive. The rape seed is genuine German summer rape, sweet and clean, and worth the money.

Loudest Songster.—Which is the better songster (meaning loudest and longest), the Yorkshire or Norwich?—BOBBIN.

Norwich Canaries differ from the Yorkshires in size, shape and colour, but their voices and capacities for whistling are about the same as a class. There are birds that sing loudly, and some draw out their score to a much greater length than others in both varieties. It is a matter of selection and individual taste, for what one person might accept as music another would say was mere noise.

Off Song.—Cock Canary, two years old, off song four months. Eats well, but I think has a cold, as he is very hoarse. Usual seed diet, with egg food three times a week, and three drops of Parrish's chemical food twice a week. Kept in box cage, 22 in. by 14 in. by 9 in.—BEGINNER.

Your bird is well dieted, but a cage the size of an ordinary "breeder" is not the most conducive to profuse whistling. It is suggested that you run him into a smaller cage, or that, for a time at least, he should only be allowed the run of half the cage he at present occupies. Probably he has got catarrh, or, as you say, "a cold," and for this there is nothing better than the bronchial syrup, made of equal proportions of glycerine, ipecacuanha wine, and oxymel of squills; half a teaspoonful should be blended with two tablespoonfuls of drinking water. One chlorate of potash lozenge dissolved in this mixture would have a good effect.

Constantly Moulting.—Cock Canary, 18 months, has been moulting heavily since September. Kept in large box cage in kitchen, but thinking that too warm I moved him into another room, where there was no fire. He appeared to have finished moulting, but is now dropping his feathers again. —L.L.S.

Your bird seems too readily inclined to go into moult. There must be some special reason for this; but, apart from seeing the bird, I can only assume that it is one of the very common cases of liver trouble. They do not seem able to resist the vice of overfeeding, and they neglect exercising themselves sufficiently. This leads to irregularities in the action of the liver and to feverishness at one time and shiverings soon after. It was an unwise move to put this bird from a warm into a cold room, for, as a rule, a bird that is in moult cannot be kept too warm, or fed too well. Return him to kitchen, feed on bread and milk sop sprinkled with seed, also sweet apple and boiled carrot, until you can get fresh young salad; then give it every day. You might sow some rape and lettuce seed in flower pots or saucers indoors.

Hen Canary Not Moulting.—Hen canary did not moult at the proper time; in fact, it has not moulted yet. It is quite bare at back of neck and down its back. At times during the day it sits with head under its wing, and when it wakes up it eats ravenously. Usual seed diet with sweet apple and boiled carrot. Is it soft moult, and how can I treat it?—S.P.

Such a bird is a great deal more likely to be a source of trouble and worry than of pleasure or profit, and the opinion of most breeders would be that it would be better to discard it. It is quite likely that it may have gone through an abnormal moult before you had it, and as it is not now moulting at all it is quite certain it is not in the so-called "soft moult," which consists in excessive shedding of feathers. You would do well to keep it in a warm room, and in a snug box cage. Examine it by candlelight for redmite, and if discovered proceed to their extermination in the manner so often advised in these columns. In addition to seed and sweet apple give soaked rape and mustard seed, also salads, and into the bare places on back and neck rub in with the finger a little dry precipitated sulphur.

One or Two Hens?—Which is the better plan, to run one cock with two hens or to keep one pair always together? Would the young from two hens and one cock be as robust and large as from a pair always kept together; does the cock take his share in feeding the young?—H. S.

In my opinion nothing is gained by running one cock with more than one hen, that is, if one's stock has any pretentions to exhibition form. Ordinary Canaries breed with so much readiness, and are so free from the faults and weaknesses of show birds, that the rules which govern one set do not necessarily govern the other. When a cock Canary has got a hen to nest he should be left in the cage to feed her and amuse her, and, for the rest, to behave himself quietly. Sometimes his nature does not admit of this, and then he should be shut off, but, as a rule, he is quite as willing to assist in rearing duties as the hen. When run with a second hen it often happens that he is wanted in both cages at once, and then accidents happen.

Canary Cake, etc.—(1) Should be glad to have a good recipe for a baked cake for Canaries. (2) Regarding tasteless pepper, I find that by keeping it is permeated by spider-web-like fungi which binds it in a solid mass, although kept in perfectly airtight jars. A method to keep it pure and sweet would be very welcome. (3) Will you give a list of symptoms that Canaries show, which indicate sickness; also the remedies to be tried? —GEO STOCKS.

The following makes a suitable cake or biscuit; a daily portion may be crumbled up and moistened with a few drops of milk: Take 6 oz. of flour, and rub in 2 oz of dripping, or finely chopped suet, also 4 oz. sugar, and 6 oz. bread crumbs, four eggs well beaten, and a little milk if necessary. Roll out thin, cut out in form of biscuits, or bake as a cake in slow oven. Keep it in airtight tins. (2) It is only natural that tasteless pepper, which is a dried fruit containing moisture and fermentable properties, should spoil in the way you mention. It

is a mistake to try to keep it from one season to another; much better buy each year a supply of freshly imported "pepper." Tons of it have been spoiled within a few months of its being gathered. (3) It would be almost impossible to give the list you ask for. Whenever a reader has a Canary that is out of health these columns are at his disposal for a statement of the symptoms and suggestions for remedial treatment. The recapitulation of hypothetical sets of symptoms in these columns would be distasteful to the bulk of our readers, and unnecessary, because all the ordinary complaints are treated of in the elementary text books, and in CAGE BIRDS ANNUAL.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Management of Jackdaw.—Kindly tell me how to feed a freshly-caught Jackdaw. Must I clip his wings? Would he hurt in my bird room (Canaries flying about)? I shall cage him till tame.—G. M. S. PARKER.

Jackdaws, Jays, Magpies, and birds of this class need to be fed on very similar lines. The best and cheapest way to feed is to utilise table scraps largely. As a stock food you could use broken-up dog biscuits (or puppy cakes or game meal) with coarse crissel—say two parts of either of the former to one part of the latter (by measure). Moisten with hot water, giving it crumbly moist, and mixing with it table scraps, cooked meat, and potatoes, greens, gravy, etc. Give a few trapped mice, young Sparrows, and the like, but not over much raw meat, for mueb raw meat and offal makes their excreta more than ordinarily offensive; always keep them scrupulously clean. Eggs (raw or cooked), acorns, peas, berries, fruit, worms, beetles, gruhs, and butter are other things they will eat ,not forgetting little frogs and the little mice. Spratt's "Game Meal' (without grit), or Clarke's "Melox," or any foods such as these make excellent stock foods for tbese birds—with a little crissel and the other things mentioned. Jackdaws and their relations have very varied tastes. It is quite correct that "Jack" will talk—I have heard two or three speak quite plainly. One requires patience to teach them. You will he very ill-advised if you keep your Jackdaw loose in your bird-room, amongst Canaries. He would "play old Harry," as the saying goes. If you let him run loose around the house, I think you will find it necessary, seeing be is not a hand-reared bird, to cut off three or four of the outer flights of each wing, severing them about two-thirds of the way up.

Shrubs in Pots (L. G. S.).—To keep in tubs in your aviary you will find privet and box shrubs hard to beat; they are in every way suitable. You could add a furze or a holly bush, or a good-sized "Christmas tree," or train bramble-hushes to grow over a V-shaped piece of fencing. A thick growth of ivy on the back wall also looks and answers very well indeed.

Linnet for Muling (Midlothian).—There can be no question about a house moulted Linnet being best of all for tbe beginner to try muling with. Still, as I have frequently said, there is no reason why a steady, well-caged black-legged Linnet should not he equally successful at filling eggs. Everything depends on the disposition of the bird tried. Red-breasted Linnets are usually the worst one could select for muling purposes. Tbey are old males, and as a rule are not readily reconciled to existeuce behind wire bars.

Linnets Not Quite Well (New Beginner).—Give your Linnet, which is at times a "little hit puffed," a dose of sulphate of soda—as much as will lie on a shilling—dissolved in two tablespoonfuls of drinking water. Take his water away over night, and hang on the saline first thing next morning, taking it off again just after midday, and replacing with plain water. Let him have plenty of maw and teazle to eat. The one with watery excreta sbould also have plenty of the two latter seeds. Mix in its drinking water—quantity as above—a tiny pinch of eitrate of iron daily—say as much as will just lie on a threepenny-piece. Watch the effect of this on the bowels, and discontinue it as soon as the excreta is of normal consistency.

What Birds are They? (Bird-lover).—The "lively little birds wbich come and hang on pieces of fat hung in one's garden," with a lot of blue and yellow in their plumage and a "dark collar round their necks," are Blue Tits (*Parus cæruleus*). The other birds, which come and walk about during hard weather, with reddish breasts and yellow and white wings, are Chaffinches (*Fringilla cœlebs*).

Food of Goldfinches in Winter (F. M.).—When snow is on the ground, and the countryside is in the icy grip of King Frost, Goldfinches have to feed on whatever they can manage to discover in the way of weeds and seeds. They may then be seen in quite small parties, hunting along hedge-rows, over old patches of thistles, etc. In the beads of the latter, and especially the "mouldy" ones, some few seeds are usually to be found, and a few grubs as well. The teazle heads, too, are generally attacked freely only in severe weather, the difficulty of opening them no doubt accounting for tbese being left to the last. A friend and I bad a few days out in the country last week-end, when the conditions were simply terrible, as you can imagine, for bird life. Yet we found not a little food here and there available for Finches, in the shape of plantain, teazle, and other weed seeds, groundsel, etc. No douht where firs abound the Goldies, as you say, frequent these trees. They undoubtedly hunt in smaller parties, however, when very hard pressed for food. It is difficult to say what many birds do find to eat during periods of hard frost. We saw and watched, for instance, quite a number of beautiful Tree Creepers, apparently so fragile and delicate, diligently hunting the hark of the trees, and finding food there. It puzzles the unaided human eye to see that food, however,

Bullfinch Bald (No name).—I can only suggest that your Bullfinch is troubled with red-mite. If he is restless (especially at night), and frequently pecking and scratching amongst his feathers, you may rest assured that this is the case. You should then treat the bird and its cage on the lines recommended in CAGE BIRDS ANNUAL. Most birds rest on one leg; it is quite natural. Hints on feeding are given in another reply this week.

Concerning Goldfinch Mules (H. Deacon).—Your cock Goldfinch, which is so very tame, ought to make you a good Mule breeder this coming spring. As he is not house moulted, I do not advise you to pair him up (that is, run him with the hen expecting him to fertilise the eggs) before the beginning of April. Goldfinches are not naturally early breeders. He will he much more likely to produce you some youngsters when paired to a hen Canary than if paired to a hen Goldie. If you want a free-breeding hen, and aim at nothing higher than some pretty singing Mules, you cannot better a yellow Norwich hen, either clear or marked, as a partner for him. Get one as stoutly built as you can. If you want a hen which may possibly throw a light Mule, try a clear or ticked pink-eyed yellow Yorkshire, or a yellow Lancashire Plainhead. The latter would be the more expensive, but would be likely to throw the largest Mules. For the feeding see other replies this week. A living room (with, I suppose, people frequently moving about in it) is not so suitable for breeding purposes as a room where the birds can have thorough quiet. A cage 16 by 11 by 8, wired at front only, would be a very good one to keep a Chaffinch in. Many of these birds are in full song now (as the reports of the Chaffinch singing contests in our columns prove), but these are cage moulted examples. A newly-caught bird may not sing until the spring is well advanced, and not even then if he takes unkindly to cage life.

A Mixture (J. G.).—You could certainly keep a Siberian cock Goldfinch and Bullfinch, and a British cock Bullfinch and Linnet together in a good-sized flight cage. But half of a 46in. by 9½in. cage is not nearly sufficient room. Give them the entire use of the cage, and put your breeding pair of Budgerigars into another cage of equal size. Hints on feeding will be found in other answers this week.

Feeding a Chaffinch.—I have a young cock Chaffinch, and should like to know how to feed same. Does it possess a song? If so, when will it commence to sing?—REGULAR READER.

As a staple seed mixture give the following: Canary and teazle four parts, summer rape two parts, linseed one part, maw a quarter part. In addition, give plenty of white sunflower seed daily. Smashed walnuts (and other nuts) are greatly relished also, and should be given occasionally in the light of a special treat. Keep the proportion of linseed down during the hot weather, but give it more freely during and towards the end of the moult. Give a mealworm or two every day or so, varying same with flies, smooth caterpillars, grubs, earwigs, spiders, aphides, gentles, wasp grubs, etc., as obtainable. These birds are not particularly keen on green-food, but will nibble with appreciation a sprig of shepherd's purse, chickweed, groundsel, dandelion, etc.; radish, turnip, and summer rape seedlings are eagerly devoured, however, given when just sprouting. The constant use of the bath—pure cold water—is a great factor in producing that gloss or bloom so much admired. Let your bird, then, bathe freely. The peculiar "pink-pink" is the call note of this bird. Chaffinches in captivity sing all through the winter practically, and sing freely in a wild state as the breeding season approaches. I have heard them frequently in February. The beak goes blue at the approach of the breeding season, as the bird comes into breeding condition, and a bird with a blue beak can generally be depended upon as "in song," unless, of course, but newly caught. They have a nice song, though not very varied in character.

Breeding Mealworms.—(1) On what food must a Lark be fed? (2) How can I breed mealworms, and how many do they require per week? (3) When do they begin singing?—M. A. K.

Most of your incidental questions concerning the Lark and its feeding are answered in another reply this week. The Skylark sings practically all the year round. I was in the country last Monday when a thaw put in an appearance, and I heard and saw one singing, perched on top of a still frost-bound cabbage on an allotment garden. Yet only the previous day all the Larks thereabouts looked like to die through cold and privation. Your bird should sing, if a male, once he settles down to cage life. The method of starting a mealworm box I have often given in this column:—Get a Huntley and Palmer (or other) biscuit tin from a confectioner (about 2lb. size). Bore with a bradawl two rows of holes right round the sides at the top, within an inch of the lid. Cut four pieces of coarse sacking so that they will, when folded once over, drop flat into the tin, leaving about three-quarters of an inch space between each edge and the sides of the tin. Dry these thoroughly before the fire. Get a supply (pennyworth or so) of bran. Put a layer on the bottom of the tin, about an inch and a half thick. Put a folded piece of sacking on this. Then put another layer of bran; then another piece of sacking—and so on, arranging to fill the tin not more than three-parts full, and to have a piece of sacking at the top. Then turn a pint of mealworms (or as many as you feel disposed to invest in) into the tin. Put in a handful of fresh bran, occasionally, under the top layer of sacking. It takes about 12 months to get into full breeding swing—i.e., for the mealworms to turn into beetles, beetles to lay eggs in the folds of the sacking, eggs to batch, and young mealworms to mature. In the summer time it is often possible to buy a quantity of beetles from advertisers along with the worms, and one would save time by so doing. Many put beer-soaked rags (hung rags), dead birds, dog biscuits, bones, etc., in their mealworm boxes; but I never do so myself. Disturb the breeding box as little as possible, and always keep it in a fairly warm, dry place, such as a cupboard at the side of the fireplace. A Lark should have three or four mealworms daily (more if you feel inclined to give them), in addition to other live-foods as may he obtainable.

Concerning a Skylark.—What food shall I buy a Skylark? It has been fed on hemp seed and bread crumbs. What is a suitable cage? How long ought the bird to be before he sings? It has been caught four weeks.—J. SAUNDERS.

What is known as a "how-fronted Lark cage" is the most suitable for housing a Skylark. It is difficult to describe in words, but any cage-maker will know what you want by asking for the above. Buy the largest size he makes. If a male bird, your Lark should sing once he becomes well settled down to cage life; maybe he will open out at the first sign of spring-like weather. A simple stock food for Larks, which will keep for ever and a day (almost) when sealed in tins, and which any good corn-dealer or seller of birds' foods will mix for you, is:—Game (or pheasant) meal, four parts; meat meal, good ants' eggs and dried flies, one part each, by measure. Get the game meal without grit. If you have any difficulty in doing so, finely crushed puppy cakes make an excellent substitute. Damp quantity required for daily use with a little grated raw carrot or cold boiled potato, or finely chopped lettuce, chickweed, watercress, or other green-food in season, and add a teaspoonful of preserved egg-flake or half a hard-boiled egg twice or so a week. Give three or four mealworms daily, and any other insects you can lay hands on, especially spiders. Give seed in a separate vessel (not along with the soft food), about a teaspoonful of canary seed daily, with, for a change, crushed hemp, groats, maw, or rape. Let the bird have a fresh clover turf as often as possible. Cover the floor of cage with (or give in a deep pan) a mixture of fine road dust and sand, in which a teaspoonful of insect powder, or powdered sulphur, has been mixed. The bird will dust itself in this, which is a natural action, and necessary. It is a very excellent plan, too, to have a second drawer bottom to the cage, made of tin or zinc, which is run in occasionally filled with water, in which the bird will paddle, and so keep its feet in order. Or, and even better, it may be filled with very wet chickweed, over which the Lark will run. Hemp seed and bread crumbs form a wretchedly poor fare, which cannot be expected to keep any bird in health and song.

Hybrid or Mule (I. M.).—You appear to be unaware that Hybrid is the correct term to apply to any specimen bred as a result of the mating of two distinct species of birds. It does not matter in the least whether a Canary was or was not one of the said two distinct species; the progeny are Hybrids just the same. The word "Mule" is purely a fanciers' term—rightly only applicable to the animal resulting from the mating of a horse to a donkey. Still, it is certainly useful in the sense that it enables one to distinguish between young having a Canary for one parent and young bred between two British birds. Unfortunately, however, fanciers just as often term the latter "Mules" as the former. I think this will explain the matter.

What Bird (L.O.W.B.)—The bird you have observed frequenting the buru-side, which flies low when disturbed, and bears some resemblance to the Blackbird, is the Dipper. Goldsmith's Ring Ousel, a bird with a white ring round the neck, is really a Ring Ousel—that is to say, there is a British bird that rejoices in that name, and which is quite distinct from the Dipper. I understand a reasonably-priced work dealing with British birds in a state of nature is in course of preparation, which is likely to fill your needs. Keep your eye on our advertisement columns.

Linnet's Broken Claw (Novice).—If any of the broken claw is hanging on the toe it should be at once cut off with a pair of sharp scissors. Bathe the foot in fairly warm water, then, if there appears to be any gathering (collection of matter), prick the place with a needle and gently squeeze the matter out. Afterwards, again bathe the foot in warm water, then paint the place over with a little Friar's Balsam, using a small camel-hair pencil brush to do it with. It will quickly heal. I have no doubt the hurt claw is the cause of the bird keeping so much on the cage floor; that is only what one might expect. Still, the bird cannot be really seriously hurt, or he would not keep singing nearly all day long, as you say he does.

Enamelling Cages (Inquirer).—Any good brand of enamel, such as is sold by oil and colourmen, is suitable for use in cages. You cannot heat a very light (sky) blue shade of colour for both breeding and stock cages. Some fanciers size the insides of their cages before putting on the enamel. This may save one coat, but personally I prefer to let the enamel sink well into the wood, even if an extra coat (or even two) of enamel is necessitated. It makes a much better and more enduring job of it in the end. If the enamel is too thick, thin it out with a little turps, or whatever is recommended on the tin to be used for the purpose. It is advisable to use the enamel just a little thin for the first two coats. See that you lay it on evenly (not in "waves"), and let one coat dry before applying another. I always use a fair-sized flat camel-hair brush to apply it with.

Linnet now Moulting (Oblige).—There must have been something radically wrong with your housing or feeding of the Linnets to send them into moult at this unseasonable period of the year. You do not give me a single particular on the above points, however, so I have nothing to work on in trying to advise you. I can only tell you to keep them out of draughts, in an equable temperature, and wait patiently until the cross moult has run its course; it has been going on too long for you to hope to check it. Feed them as advised another querist this week. Add a half-teaspoonful of Parrish's Chemical Food to their drinking water daily for a fortnight. For food of Lark refer to another reply in this issue. You should try to gain the bird's confidence by talking to it whenever you go near its cage, and by offering it mealworms and similar dainties from your fingers, doing it very quietly.

Sex of Reed Buntings (Good Luck).—Reed Buntings are very easy to sex. The adult male has a most conspicuous black gorget, or large black patch on the throat; in the female this is absent. I have never seen a Bunting Hybrid personally, and cannot call to mind any well-authenticated case of such having been bred, though Yellowhammer-Canary and Yellowhammer-Linnet crosses have been claimed as bred. I should advise you to try the Reed Bunting and Yellowhammer mating; any progeny would be valuable, and pretty, too, I should imagine. Reed Buntings make acceptable aviary birds. An aviary 7ft. 6in. long by 4ft. wide will not hold many pairs of birds if you want them to breed—five or six couples, at the outside. A hen Bramble is all right to mate to a cock Chaffinch, though personally I prefer the sexes the other way about.

Red-breasted Linnet for Breeding (G. Clayton).—You will find the matter of breeding with non-house moulted birds fully dealt with in other replies this week. It is very easy to tell when a Linnet is in ripe breeding condition, for he then sings stoutly, and his beak turns a deep slatey-blue shade of colour.

Strange Notion Concerning a Song Thrush. (Huggy No. 2).—The tale your friend told you is, to put it bluntly, a ridiculous one. To say that you will lose at the next breeding season the Song Thrush you have bought, simply because he is not a hand-reared bird, is to talk nonsense. If the tale be true, a good many of us will need mourning clothes. If you feed him well on the lines advised by me, and give him a fair daily allowance of mealworms and other suitable live food, he should come into song as soon as we get some spring-like weather.

Lump at Side of Beak (Madge).—You do not describe the nature of the lump. If soft and filled with matter, prick it with a needle, gently squeeze out the matter, bathe it with warm water, then anoint with a little healing ointment—say, bazeline. If the lump is hard (solid) to the touch, apply a tiny smear of tincture of iodine daily with a small camel-hair pencil brush. Remember, just a touch only, and be careful it does not get in the bird's eyes, mouth, etc.

Squeaky Notes (C. P.).—"Squeaky and discordant" notes are part of the natural "music" of the Bullfinch, and, of course, you cannot do anything to "correct" them, as you put it. Complete separation alone will prevent your Canaries from acquiring the said notes, should they, that is, exhibit any tendency to do so. If they have already begun to copy them, they may quite likely forget the obnoxious notes once the Bullie is removed out of hearing. If not, I can only suggest that you introduce a Roller, when, in the endeavour to acquire his tours they may quite likely drop the other "accomplishment."

Zinc Bottoms for Sand Trays (Sanitary).—I can heartily recommend zinc bottoms for sand trays in the cages of insectivorous birds. But not without a covering of some kind or other. I use such myself, and have never had any fault to find with them, unless it be on the score of increase of weight, which, however, is really very trifling. I always give mine a coat of enamel. As a covering I do not object to either cocoanut-fibre, finely-teased-out peat moss litter, or very coarse-cut pine sawdust, having used all three with excellent results. Lay them down thickly. Zinc strikes one as likely to be cold without some sort of covering; besides, it would become very slimy owing to the excreta. Put sand and grit on for seed-eating birds. It is quite easy to tack the wood sides on to the zinc, holes being bored with a sharpened bradawl through the latter.

Bramblefinches, Chaffinches, and Greenfinches (Pink).—The correct stock seed mixture for Bramblefinches may be found in the reply to an enquirer re Chaffinches this week. The same diet suits both birds admirably. Mealworms are relished by them, and they may have two or three daily, or on alternate days, just as you like. Other live-foods, of course, in addition, according to season. With the addition of one part of hemp seed the mixture above-mentioned will be correct for a Greenfinch. But the latter bird must have about a dessertspoonful of sunflower seed daily, in a separate vessel, if possible.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Show Cage for Cordon Bleus.—The wire front of my cage has a water hole, and I am afraid the birds will get out, though they have not done so yet. Can you say from particulars here with if it is safe to use?—W.L.

Unless I saw the cage it is impossible to give a definite reply but taking into consideration the maker of the cage (if he knew you required it for Cordon Bleus), I should say it was safe to use. However, on more than one occasion I have known small birds to escape through the water holes at shows. But you have a very simple remedy. Get a tin drinking-vessel with a sloping top which will cover up the water hole; these are made in the ordinary half-round type and in all sizes. The size of cage is very suitable.

Blue-Crowned Conures.—Thanks for reply. The birds are, approximately, 5in. over all, tail about 2in.; this is worn a little, it appears to have been pointed. Is it any use to advertise them at the figure named?—"SHEFFIELD."

I think you must have altogether under-estimated the size of your birds; there are three species to which your description as to colour might apply, as under:—The Sharp-tailed Conure (*Conuropsis acuticaudatus*). Its prevailing colour is green, slightly bluish on the breast; crown, lores, cheeks, and ear coverts blue; upper mandible whitish, lower dark horn; total length about 14in. The Blue-crowned Conure (*C. hæmorrhous*), prevailing body colour brightish green; forehead and crown blue; upper and lower mandibles whitish; total length about 13in. The Blue-crowned Parrakeet (*Tanygnathus luzonensis*). Body mostly green, washed yellowish on the under parts; crown, nape, and sides of face (this last variable), blue; some of the larger wing feathers and lower back, bluish; upper mandible red, lower orange; total length about 13in. I still believe your bird to be *C. hæmorrhous*, but I am wrong if your size is given correctly; if so, I am at a loss to name it. The size you give is only that of the Passerine Parrakeet, commonly known as the Blue-winged Lovebird. If you cannot fit your bird to one of the descriptions above, repeat query in full with as minute a description as possible. If it is the Blue-crowned it is worth the price I named in my previous reply. Is it smaller than the Cockatiel? I have not your previous query by me.

Pintail Nonpareils.—(1) Do these birds moult twice a year? I got mine August, 1905; it moulted completely April, and again in August, 1906. It is, however, in grand condition. Is this their breeding time? (2) What time do Zebra Finches moult? One of mine got plucked by a Weaver in October, and so far feathers are not renewed.—"RADIUM."

(1) The moult with these birds is a double one, but usually with a little longer period between than in your case. But little is known of the wild life of these birds, and their attitude when in this country (to them foreign climes) is very erratic as regards breeding arrangements; but so far (that is, as regards Europe, where they have successfully reared young on several occasions) they have chosen our summer. The fine and robust condition is responsible for the demeanour of your birds. (2) Autumn is the usual time, though with newly imported birds it is variable. I should say your bird has had his scalp damaged, and that, at any rate, on a portion of his head, the feathers will not grow again. I have had many similar cases in my aviary, but I have mostly found Weavers attack their own kind rather than other species. I have a Weaver in my aviary now that is always in perfect feather save for a bald patch on the back of the crown, where he was plucked by his fellows during importation.

Dealers and Popular Names.—(1) Are Pekin Nightingales and Robins the same bird under two names? (2) What is the size and colour of the Virginian Nightingale, and are they good songsters?—W.P.H.

(1) Pekin Robin, Pekin Nightingale, and Red-billed and Yellow-bellied Liotbrix, also Chinese and Japanese Nightingale and Robin, are all names referring to the same bird. (2) The Virginian Nightingale is a beautiful bird, fully as large as the English Starling. The general plumage of the adult male is a rich crimson; there is a narrow band of black above the upper mandible, and the throat is also of that colour. The female is much duller than her mate, and is mostly red-brown. Both sexes have crests, which they have power to raise and depress at will. As regards song, opinions vary, and while not classing it as a good songster, it is not to be despised in this respect; it has about six flute-like notes of good compass, which are rapidly uttered and repeated again and again; so that, take him altogether, he is a fine and handsome fellow, and altogether a desirable cage bird when he has once become tame. In a roomy outdoor aviary he is an object of great beauty, and being quite hardy can be left out of doors all the year round.

Rosella Parrakeets.—(1) What is their value? (2) What diet? (3) I keep it in a large Parrot cage, is that suitable?—"ROSELLA."

(1) 32s. to 35s. a pair. (2) Canary, millet, oats, hemp and sunflower, two parts each of the first three items and one part each of the two latter; well mix and let this be your staple food; ripe fruit, banana, apple grapes, etc.; greenfood, grit, cuttlefish, and water for drinking and bathing. (3) Yes, it should do well in your cage, especially if you can occasionally let it have a fly round your room. It is a hardy species, and lives out of doors all the year round in my aviary. The temperature of any ordinary living-room will he ample, but the bird must be protected from draught.

Breeding Budgerigars Outdoors.—I have put up an aviary 10 by 3 by 7 high. I intend keeping Budgerigars. What others can I keep with them, and how many? What is the right time to procure stock.—"BEGINNER."

Your aviary is rather narrow, but you will have no difficulty in breeding Budgerigars therein. You could put in the following: One pair each Green and Yel-

low Budgerigars, Cockatcels and Rosella Parrakeets, Grey Java Sparrows and Red Crested Cardinals. They would all settle down and breed ultimately, except tho Cardinals, which are very uncertain in this respect. As regards diet, supply them with a hopper of Canary and white millet in equal parts, and another of oats, hemp and sunflower seed; two parts each of oats, and one part each of the other kinds. Keep several pieces of cuttlefish hanging in the aviary, and regular supplies of greenfood, grit, and water for drinking and bathing. A little ripe fruit, apple, orange, etc., is also wholesome and appreciated. The above would suffice for all but the Cardinals; these must have, say, three mealworms per bird daily, also such spiders, beetles, etc., as you can capture. Birds from outdoor aviaries are regularly advertised in our columns, and such could be purchased and put in at once; but if you get newly-imported birds these must not be put out till May. Dry and crush what eggshells you have left from table and scatter same on aviary floor.

Another Feather Plucker.—Please adviso me how to treat this bird. I encloso full particulars of diet and treatment, but have not tried a collar yet.—A.L.

This matter is fully dealt with in another reply, to which I will refer you. I do not seo how you can improve your diet. See that it gets plenty of cuttlefish, also rotten wood, cotton reels, etc., to chew up; by all means try a collar and chain as already described; rub a little spermaceti ointment on all sore parts, and keep the bird warm and out nf draught. One or two of our large advertisers have recently put remedies for this trnuble on the market, and although I have not tried them myself, and so cannot speak from experience, it would be probably worth your while to give them a trial. This annoying habit is almost incurable once a bird becomes confirmed in it; however, with patienco and perseveranee it may be mitigated at any ratc

Budgerigars.—Is bread, soaked in boiling milk and then squeezed partially dry, harmful? So far, it appears to have acted beneficially, both with old and young, and tbey appear to cnjoy it more than seed —" STAR."

I shou'd not think of giving this to my birds, for one reason, that in hot weatber it is liable to go sour, and for another, these birds are better without slops at all. Budgerigara, in a state of nature, undoubtedly eat a good many insects, as well as the seeds of indigenous grain, etc., and milk would not be as harmful to them as to some species of Parrots. But this I do know, one of the finest strains of Budgerigars I have ever seen, better coloured, and fully as large as imported birds, were reared on Canary millet, oats, flowering grains, and other greenfood. It is quite orthodox treatment to give them bread soaked in water and then squeezed almost dry, but I believe them to be better without it.

King Parrakeets, etc.—(1) From your description my bird is a female. If I procure a male would they breed in a roomy garden aviary? Is it a fact that the young have the markings of a butterfly on the wing till two years old? What is the diet for a Solomon's Island Cockatoo?—D.B.V.

Therc is a very good prospect of these birds breeding in a roomy garden aviary, especially if you can let them have the enclosure to themselves; a brood of Kings would be worth rearing. They have been bred in captivity on one or two occasions in this country. They may make no attempt to do so the first year, but will most probably the following season, if they are left pretty well to their own devices. It is several years since I saw an immature bird of this species, and unfortunately I made no notes, and my memory only serves me that it resembled the female, and this is practically all the various ornithological works tell us on the subject. Diet your Cockatoo on a seed mixture of two parts oats and canary seed, and one part each of hemp, wheat, dari, and small Indian corn. Also plain biscuit, green food, ripe fruit, nuts, boiled potato and raw carrot. Keep up a regular supply of clear water, cuttlefish, and grit. A little boiled maize twice a week (it only keeps fresh one day); if your bird has been accustomed to this regularly the change to a drier diet must be made gradually, but a continuous supply of the seed mixture should be kept in the cage as its staple food. Do not give slops, messes, or table scraps.

Tiger Finches.—What is the correct diet and treatment? Will they breed in confinement? What nest do they reqnire? What extras are needed when they have young to feed?—J.H.

These beautiful little birds (really common Avadavats) are shy breeders in captivity; but they have bred in this country, and more frequently on the Continent. Put up a cocoa-nut shell nest at one end of the cage, and a flask-shaped rush nest at the other; supply a little moss, loose hay, and half-dried grass as nesting material. Diet:—Canary, white and spray millet, cuttlefish, green food, grit, and water. Grass in flower is greedily eaten and is very wholesome, also rose sprays, etc., that are covered with green fly or blight of any kind. When they have young in the nest they should also have a little crumbled and slightly damped sponge cake, also a few moistened ants' eggs. If your cage is a roomy one (say two feet long, and of the box type), there should be a reasonable chance of success if the nests are screened with heather sprays, etc., and not too much curiosity is evinced when you notice them nesting. The male in nuptial plumage is almost entirely fiery or coppery red, with a number of pure white spots.

Saffron Finches.—What is their food and treatment? Will they breed in captivity, and what do they require at this period?—J.H.

Saffron Finches are fairly ready breeders in captivity, and the present time is their natural breeding season; but in this country they mostly conform to our seasons. Being quite hardy, they may be kept out of doors all the year round. Diet:—Canary, white and spray millet, with a little rape, rice in the husk, and a pinch of maw seed occasionally. They are the better for getting two or three mealworms per bird daily, or such other insects as you can capture for them, or blighty foliage. When rearing young they reqnire a little of some good soft food mixture (several good ones are advertised in nur columns), and a little of this may be given once or twice a week all the year round. A pair in a roomy cage, kept in a room from which frost is excluded at night, will probably breed during the winter months.

Garden Aviary.—I am putting up a small aviary, 5 ft. by 2½ ft. by 5½ ft. high. Two-thirds of the front would be wire netting, the other portion, ends and roof, boarded. Would it be better to get the bird now and keep indoors till May? I want a pair of grey singing Finches. Would British Bullfinches agree with the foreigners?—NORMAN.

Your aviary is very narrow, and I can only advise some of the hardier species. Put up as many nest boxes and husks as the roof and walls will permit, seeing that they are a foot apart; also put up plenty of branches, but leave the portion opposite wire netting free from same, save against back wall. I should also recommend you to have a blind that could be put up in rainy weather (similar to a shopkeeper's sun blind); otherwise narrow aviaries like yours keep wet and damp for long periods at a time. If you keep it strictly clean you could put in half a dozen pairs. All the following would live out of doors all the year round:—Zebra and Ribbon Finches, Silverbills, and Grey Java Sparrows, with a pair of Bullfinches. This would about fill your space. If the Bullfinches build and hatch they must have a supply of chickweed, groundsel, lettuce, etc., fresh at least twice daily, or young will not be reared. Get the birds now, keep indoors in box-type cages, and put out in May; the forwardness or lateness of the season must be your guido in this respect.

Avadavats.—Have got a freshly imported pair of birds. Am keeping them warm in a large flight cage. Will they breed in such a cage? Is red millet good for them?—W. C. FREEMAN.

Note reply on Tiger Finches; it mostly covers the ground of your query. You are treating them rightly; a leaf of tender lettuce is very good for them at this season. Red millet I do not favour much, mostly pinning my faith to canary, white and spray millet. At times I give some of the small Indian millet, which is a brownish straw colour, and very similar to that in the sprays. On the treatment regularly advised in this column I have had these lovely little birds live eight years and longer.

Budgerigar Without Tail.—I bought a pair of these birds, and when I got home I found the hen had no tail. Do you think they are a true pair? I am thinking of getting two more pairs; please give me your advice.—CONSTANT READER.

I think the bird's tail was pulled out in catching, an easy mishap; if so it will soon grow again. It is always best, when starting, to get pairs from different sources; then their progeny are unrelated, and stock is not weakened by in-breeding. I should advise you to have one pair each, greens and yellows; it will give variety, and the young of the yellow variety would command a higher figure than the greens. I cannot gather how you are going to keep these birds—if in cages they must be roomy. In the aviary and also in the cage you must hang up at least double the number of cocoa-nut husks you have pairs of birds. Keep up a supply of grit, cuttlefish, and crushed egg shells. They will require little else than canary, white and spray millet, and green food. When they have young to feed, oats must be reguarly supplied, and a few of these once a week as a change at other times are very wholesome, but unless the birds have space to disport themselves only a few must be given or they will become too fat. The cere of the female is reddish buff; that of the male bright blue.

Amazon Parrot.—(1) My bird is very healthy, but has an overgrown beak. Shall I cut or file it? (2) Are Pekin Nightingales safe with small Finches, and what is their diet? (3) I have some young Diamond Sparrows. How can I tell the sex?—M. GIBBONS.

(1) The bird's beak will have to be either cut or filed to the normal size, but you must exercise care and not cut back too far. The remedy is plenty of wood, cotton reels, etc., for it to chew up, and a piece of cuttlefish continuously in the cage; sooner or later it will make use of same. (2) It all depends on the space; at the same time, I have never had one of these birds harm even the smallest Waxbill in their enclosure; their only drawback being that if nests are left unguarded at all they are fond of appropriating the eggs for their own sustenance. Diet:—Some good soft food mixture, ripe fruit, green food, and, say, three mealworms or other insects per bird, twice daily. (3) I am not aware of any outward sexual distinctions in immature birds. The adult female has a slightly narrower head than the male, and the base of her upper maudible is rose pink, remaindcr of same crimson; beak of the male is wholly crimsou.

Cockatoo.—Is salt in cooked vegetables (potatoes and carrots) likely to be harmful.—LOO.

I have never found the normal quantity of salt that is boiled with these vegetables harmful; in fact, I should say it was decidedly helpful, always supposing the quantity used was the normal one. Neither potatn nor carrot should be given in quantity; a couple of pieces, say an inch cube each, daily, should be ample, the idea being to give a varied and wholesome diet. The seed mixture advised in this column is the staple diet, the other items being supplementary.

Grey Parrot.—My bird is much better, and beginning to talk again. It still throws out much of the seed, and will not take the trouble to eat so much small seed; however, I am still giving it. —L. FOOT.

Glad to note your Parrot is recovering, and it should now do well if you carry out the treatment advised. As your bird objects to the small seed, try the following:—Oats and sunflower seeds one part each, and half a part each of hemp, dari, small Indian corn, and canary seed. My objection to packet foods is that there cannot be a general mixture for all species, and that some contain seeds which the birds are better without. At the same time you must not let your birds want for food.

What Parrot?—Herewith description of my bird; please name it for me. It is very tame, in good health, and speaks a few words. Are they good talkers? How must I feed? Should it have a bath?—J. T. JONES.

Your bird is the Rose-breasted Cockatoo (*cacatua roseicapilla*), a freely imported bird, and a very robust species, which in its own country (Australia) bears a good reputation for talking. An account was recently given in this paper of a bird with quite a large vocabulary, and you appear to have one which promises well in this direction. In this country, however, the majority of them do more screaming than talking; at the same time, they are droll and companionable birds. I cannot give you the plumage of the young from memory, and the books I have in my library do not state the same; will try and supply it in a later issue. These birds will do well on the diet regularly recommended for the Grey Parrot (see other replies in this and recent issues). Do not give sops, slops, or table scraps of any kind. A bath should be offered on genial days, at this season of the year, once a week; if it will not bathe it should be sprayed (use a fine sprayer) with chilled water. It must be kept in a warmish corner, and out of draught till dry.

Blue-fronted Amazon.—I got my bird three weeks ago; it is a big fine bird. How can I tell its sex, and whether it is old or young?—NO NAME.

I shnuld say you have a male. The sexual characteristic and distinctions of this freely imported species are none too well known, though most naturalists and anthorities are agreed that the male has a longer beak, which is broader at its base than that of the female; but this is a distinction which can only be told by comparison, and will not, I fear, help you much. The cere of the adult male is black, and the iris of the eye varies from orange-red to yellow; the undoubted immature birds that I have had the opportunity of examining have all had the cere yellowish, slightly tinted with black, and the iris quite palish yellow. Being a hardy and robust species, once they are acclimatised they will thrive in the temperature of any living room, and only need protecting from draught. Diet the bird as regularly advised in this column.

Grey Parrot Dying.—The bird seemed all right at first, save for gaping, grinding its mandibles together, and appearing to have something wrong with its throat; just after the fourth week it lost the use of legs, and though I treated it according to dealer's directions it died. I returned to dealer and decided to have a post-mortem, but dealer had burnt the body.—G. PEACOCK.

Your bird died from Septicœmia, a prevalent and contagious disease among newly imported greys. They become contaminated during the insanitary conditions of the voyage to this country. Almost the only treatment is warmth and quiet, and a soothing aperient to clear the bowels, with as simple a diet as possible. You must well clean your cage before using it for another bird. Paint it over with neat paraffin, see that all crevices are searched by same; let it stand for a couple of days, then thoroughly swill out with boiling water and finally with cold; dry in the open air, and it should then be safe for use.

Parrot with Diarrhœa.—My bird seems to suffer from chronic diarrhœa, though fed as advised in CAGE BIRDS. It has never moulted, though I have had it two years. It is now very mopy, dull, and seems always thirsty.—F.M.W.

Give it three drops of tasteless castor oil on a piece of sponge cake or sweet biscuit, and every other day (for a month at least) colour its drinking water with Parrish's chemical food. Keep warm and quiet, and its cage strictly clean. Do not leave the drinking water in cage, but let it satisfy its thirst three times a day. Any time the bird appears weak two or three drops of either brandy or whisky will be helpful, but should not be given regularly. Keep it in your warmest room and in the snuggest corner, at the same time not where the air is stagnant. Take the opportunity of the first genial and warmish day to lightly spray it with chilled water, say about midday, and then place it near (but not too near) the fire to dry. Chronic cases such as yours do not always yield quickly, but there should soon be a change for the better, unless it is a case of the bird's liver being hopelessly diseased.

GENERAL.

Answered by the EDITOR.

Photo of Bird Room (E. R.).—Will endeavour to hunt this out.

Wild Bird Note (W. C. Freeman).—Thanks. Always pleased to hear from you.

Plate of Chat, Redstart, etc. (Bobbin).—This can he sent you on receipt of a sixpenny postal order.

Photo of Aviary (W. F. Buzza).—We fear you cannot scan your "C.B." carefully This was acknowledged before,

Egremont Show (R. Moffat, Jun.).—Sorry letter was overlooked last week.

What to do (John Hendry).—Read our rules and follow our advice for the future, to only buy birds through the deposit system.

Name of Town Misspelt (J. E. Watts).—The Post Office people deserve credit. Glad the paper reached you safely, and that you liked it so well.

Chester Experience (S. Wootton).—Write out a plain unvarnished statement of your grievances and send it to tho secretary of the Cage Bird Union.

Suggestions and Approval (John Kay).—Your several remarks have been noted with pleasure and your suggestions will be adopted as far as possible.

Soldiers' Clothes (Salmon).—If you apply to the Stores Department, War Office, Pall Mall, London, S.W., you will be supplied with the desired information.

Societies Affiliated (A. S. Treasure).—Your idea is a very good one. It had not occurred to us, but we will get into touch with the hon. secretary on the point.

Pedigree Book (Wearsider).—A breeding register is issued every year with our Annual. We believe Mr. W. Rudd, of Norwich, can supply a pedigree book such as you seem to require.

"Prose" Competition (Constant Reader).—We presume you mean "verse" competition. We do not mind the post-card being enclosed in an envelope, but there must not be more than one post-card.

Photo and Letter (Mrs. Alice Bleach).—Your extremely kind letter greatly interested us. We hope to continue to deserve your approbation, and wish you and your husband every success during the coming season.

Answer to Querist (John F. Morrison).—It is against our rules to allow our experts to receive "private" letters through our columns. The bird you offer our querist should be advertised. Sorry we cannot oblige you.

Complete List of Shows (J. G. Kennedy-Megaw).—There is no complete list published, nor would it be possible to give an absolutely complete list, but our show dates fixed column comprises all the most important open fixtures.

Pair Show (Londoner).—We do not send special representatives to provincial pair shows, and we quite fail to see that London deserves preferential treatment in this matter. Any report sent to us by headquarters will be published with pleasure.

Surplus Birds (R. Middleton).—This man has been stopped from advertising in CAGE BIRDS, but we cannot prevent him from writing to advertisers on the lines you indicate, and unless amounts are deposited with us, there is no safeguard against such a proceeding.

Dead Bird (J. Mack).—If you will kindly read our Post Mortem rules, at the end of the Query columns, you will see it plainly stated that dead birds must not be sent to this office, but direct to Mr. J. North, accompanied by the necessary fee. Your bird had to be relegated to Thomas, the cat.

Claimed, though Absent (A. W.).—It is a most extraordinary—probably unique—case. We think, however, that if you entered a bird at a certain price at a show, this bird could be claimed at catalogue price, even though, owing to certain circumstances, it were absent from the said show. In that case, of course, the buyer would be entitled to his bird.

Plain Seed (J. T.).—Your interpretation of the rule is quite correct. Where the Palace Show Schedule states "Exhibitors in the Canary and Mule classes must only put plain seed in the bottom of their cages," it refers to plain Canary seed. This certainly does not mean, however, that after judging is over only plain Canary seed will then be given the birds to eat. All birds will have the attentions of expert fanciers.

REIGATE.

Held in the Public Hall, Reigate (Surrey), on January 23rd and 24th. Not at all a bad room for a show, being nicely lighted and comfortable. Our section mustered very well, considering competition was confined to four counties, being about the best seen in Reigate, and it attracted and pleased the visitors, who attended in good numbers. The Norwich were a nice lot, and well worth looking over, Messrs. Allen, Morris, Spinner, Ellis and Cozier putting down a few beauties. The Yorkies were a good lot, too, and the winning buff secured the Members' Challenge Cup for its owner, Mr. Green. Other fanciers who had down some grand, typical specimens were Messrs. Parrott, Southgate, Greenfield, Hall and Jupe. Mr. Green made the show more than usually attractive with a fine team of Lancashires and Lizards. The British were an eye-opener—36 Goldfinches and 24 Bullfinches, besides a lot more beautiful specimens. We never before saw so many birds of high merit here. The exhibits had suitable attention paid them by a band of good fanciers, at their head being Mr. W. R. Eames, a very able and courteous gentleman, who makes them a good Secretary. Mr. Kingswell, the assistant Secretary, is likewise a hard-working and capable official. Mr. J. Robson judged.

NOR. P'HEAD, YELL. (10): 1, spl, Allen; 2, vhc, Morris; 3, Spinner; 4, Burton; hc, Collins; c, Kilby. BUFF (12): 1, Ellis; 2, Morris; 3, Cozier; 4, Allen; vhc, Kilby; hc, Jupe; c, Spinner. YORKS. YELL. (7): 1, vhc, Parrott; 2, Southgate; 3, Arnold; 4, Greenfield; hc, Green; c, Stanford. BUFF (9): 1, challenge cup, 2 spls, Green; 2, Greenfield; 3, 4, vhc, Parrott; hc, Arnold; c Southgate. BRED 1906 (10): 1, 3, Hall; 2, Jupe; 4, hc, Parrott; vhc, c, Green. CREST (6): 1, spl, Miss Gordon; 2, 3, Johnson; 4, Mrs. Haysom; vhc, Gale; hc, Jenner. C.B. SELL. 20s. (17): 1, spl, 3, vhc, hc, Green; 2, Jupe; 4, vhc, Philpot; vhc, Collins; hc, Kilby; c, Parrott, Jenner. BRIT. GOLDFINCH (36): 1, spl, Vincent; 2, vhc, Carrier; 3, Herbert; ex. 3, Hicks; 4, Spinner; ex. 4, Wickham; vhc, Sandy; hc, Arnold, Jupe; c, spl, Mrs. Wilcox. BULLFINCH (24): 1, spl, Hicks; 2, 3, vhc, Jupe; 4, Higgins; vhc, Penncils; hc, Johnson, Powell; c, Mitchell. LINNET OR REDPOLL (14): 1, spl, Skinner and Pankhurst; 2, 3, Franeis; 4, Wickham; vhc, Gallard; hc, Johnson; c, Arnold. A.O.V. HARD (21): 1, 3, Francis; 2, Sandy; 4, Ellis; vhc, Penncils; hc, Cocq, Lean and Son; c, Durrant. SOFT (7): 1, spl, 3, Lean and Son; 2, vhc, Francis; 4, Carter; hc, Ledbitter; c, Moores. FOR. SMALL (7): 1, Grimshaw; 2, 4, Botting; 3, Miss Hyett. LARGE (3): 1, spl, Miss Gordon; 4, Mrs. Whitmore; vhc Coussens.

At a meeting of the Bradford East O.S., on January 22nd, the President of the Society, Mr. E. Suddards, kindly promised to give two gold medals to be competed for by the members. These and another gold medal promised by a friend, along with about £4 in money specials, will be competed for at the five members' shows to be held during the year 1907, for most points in the champion and novice sections. This society is making splendid headway, for it has already reached the respectable total of 30 members. All fanciers heartily invited to join us. Subscriptions 3s. per annum, entitling them to compete for all the society's specials.—H. HILL (Hon. Sec.)

Treat for Manchester Fanciers.

I would like to call the attention of Manchester and neighbouring fanciers, writes Mr. Lythgoe, to the visit of the M. and N. C.O.S. to the Owen's College Museum, when part of the Dresser collection of birds will be shown. This collection, I understand, is one of the finest in existence, having something like 10,000 examples, and containing a specimen of the male and female, young, nest and eggs of almost every European bird. The museum and demonstration is open to the public, and we have induced the director to undertake a demonstration on the smaller British birds. We hope as many fanciers as possible will attend, with their wives and friends. The museum is open at 7 p.m., the lecture commencing at 8 p.m.; date, Feb. 6th.

Interesting Softbills Britishers.

At Reading Show, on January 30th, writes P. F. M. Galloway (Caversham), I am showing some very uncommon Softbills, which I think will be very interesting to the general public. One of these Softbills is a species that has never been shown—viz., a grand Nightjar, reared from the nest at four days old. It is in perfect condition, and is probably the only one of its species in captivity. I am also showing the rare Great Grey Shrike, which was caught in Scotland; also a grand bearded Tit, a Swallow, Treecreeper, two golden-crested Wrens, Black-cap Warbler, Jenny Wren, Long-tailed Tit, Meadow Pipits, Reed Bunting, and others, all picked specimens, kept expressly for Reading Show; and I am showing also a handsome pied Linnet. The Nightjar will be fed several times during the show, so as to afford the public a chance of seeing the enormous mouth of this bird, the bill being ridiculously small for the large size of the bird, and the mouth enormous. When being fed the mouth opens right beyond the huge eyes—in fact, the head would appear to open in half.

EXHIBITOR'S DISASTER.

MR. MAXWELL SUFFERS A SAD MISFORTUNE.

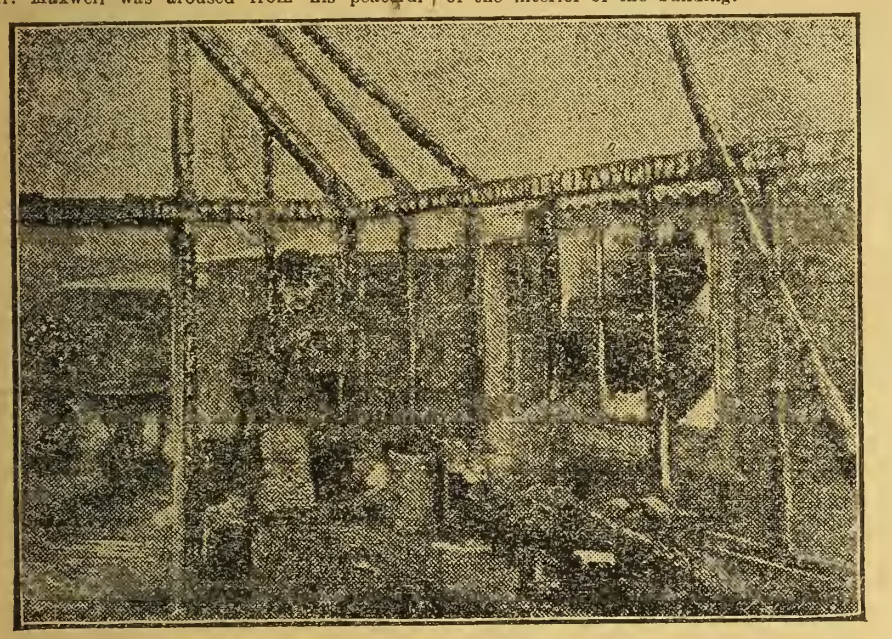
Midnight Blaze at Brixton causes the Loss of Bird-room and close on a Hundred Birds Valued at over £250.

A shocking misfortune has befallen that well-known British bird fancier and champion exhibitor, Mr. C. T. Maxwell, of Brixton. The whole of his valuable avicultural collection, and most of his extensive and elaborate aviaries were destroyed by fire just after midnight on the evening of Wednesday, January 23rd. Mr. Maxwell underwent the harrowing experience of witnessing his pets suffer a terrible death without being able to do anything to save them.

WHOLESALE DESTRUCTION.

Mr. Maxwell's extensive aviaries, photographs of which are shown in No. 2 of "The Bird World," were heated to a congenial temperature by hot-water pipes of the pattern used for heating an ordinary conservatory, there being a small stove and flue pipe outside the building. Owing to the severity of the weather the fire had been stoked up at 11 p.m., prior to Mr. Maxwell retiring for the night, and everything was then in perfect working order, as it had been for the past ten years, our friend feeling that he had done all in his power to protect his pets from the cold and for their comfort. A few minutes after midnight Mr. Maxwell was aroused from his peaceful slumbers by a neighbour, who gave him the unwelcome news that his birdhouse was ablaze. Hurriedly putting on a few clothes he hastened to the building where he had spent many happy hours, only to find it well alight. The alarm was given, and pending the arrival of the fire-engines—five of which were soon on the scene—he attempted to enter the aviary and rescue some of his treasures, but the high wind, however, had fanned the flames to such an extent that in a few moments after the fire was first discovered, 12.15, it became evident that any attempt to enter the building would be attended by great personal risk, as everything seemed to be blazing furiously, the glass cracking and falling in all directions. That everything was doomed quickly became apparent, and what was most painful to Mr. Maxwell was the knowledge that the birds he had cared for so well were being roasted alive. On their arrival the firemen soon got to work with the hose, and directed their efforts to the back of the aviary, in the hope of saving some part of it, but this was found impossible, the flames having too great a hold; even, aided by the strong wind, were threatening the adjoining premises. The tall trees, which had for so many summers protected the ill-fated birdhouse from the rays of the sun, were well alight, and to give an idea of the ferocity of the blaze the upper branches of a large poplar tree two gardens off caught fire, and the hose had to be directed upon it. The charred branches can now be plainly seen. In about an hour from the discovery all that remained of the birdhouse containing close upon a hundred birds, many expensive cages, indoor aviary, etc., was a heap of blackened timbers, twisted cage wires, and broken glass. A glance at the accompanying photograph, taken from the inside, will convey to the reader some idea of the extent of the calamity. Here and there are the remains of breeding-cages, burned and charred almost beyond recognition, although in some cases the porcelain feeders remain intact. In one cage (or perhaps it would be more correct to say the "remains," for there is just a part of the back of a cage, with a couple of well-burned perches and part of the bottom remaining) I noticed a blackened heap—on closer inspection I saw by the yellow beak that it was the poor charred body of what was once a very fine Blackbird, and the proud winner of more than one prize. In another spot I saw the head and part of the body of a cock Cirlbunting, the yellow head feathers and a few brown back feathers being still distinguishable. What struck me as a curious incident was that a cage label, which had done duty on the front of a Fineb show cage at the late South Metropolitan Show, held at Camberwell, should have escaped and the class number be still readable, while the back of the cage was badly burnt. At the back of the main building, where there was a fairly large flight aviary which had housed many notable winners, I noticed on the floor what I fancied was a bird, and, on picking it out from the twisted wire of the front of the flight, I found it to be the body of a Linnet-Bullie, which was intended to do battle at the forthcoming Crystal Palace Show.

Owing to the direction of the wind the two outdoor aviaries escaped, the Chough aviary on the left without a burn, and the one on the right with a slight scorching. The latter only contained a few birds of little value, and the occupants of the former were the Chough and the Magpie, which will be seen perched on its owner's hand to the left of the photograph of the interior of the building.



[*Photo by Davies and Thornton, Balham.*

The ruins of Mr. Maxwell's splendid aviaries at Brixton, destroyed by fire last week. The disconsolate owner with one of the solitary survivors, a Magpie, in the background.

So far as he can gather the fire seems to have been caused by the stove pipe that enters the house becoming very heated, and so firing the woodwork, the overheating being caused chiefly by the force of the wind.

A LOSS KEENLY FELT.

Asked how he felt his loss, Mr. Maxwell said he had been in the habit of spending many hours daily with his birds, and their loss to him was indescribable, and he felt the loss of his daily duties in his aviary very keenly; to use his own expression—he felt like a fish out of water, as it were. The pecuniary loss amounted to close upon £250, which, in itself, would be enough to damp the ardour of many fanciers, but the loss of the birds was what he felt most, as it had taken him many years to get his grand collection together, apart from the great expense he had gone to in purchasing them; for before he made up his mind to buy a bird it had to be very much above the average specimen of its species or it was politely, but firmly, declined, and once it was declined the would-be seller would find it very difficult to persuade Mr. Maxwell into purchasing. Asked as to his future career as an exhibitor, Mr. Maxwell said he certainly did not intend to give up the Fancy, but it would necessarily take him a long time to get together a collection equal in quality to the one he had just lost. Almost every bird he had was in the pink of condition, and fit to win in the keenest competition. The two Blue-headed Wagtails were simply perfection, and were as tame as one could possibly wish—one of them was shown on the front page of CAGE BIRDS a few months ago, after having taken 1st at Dulwich Show. Another bird he much regretted losing was the charming little Golden-crested Wren, which was in all probability the only cage-moulted specimen living. In spite of the severe weather of late it was in perfect health, and quite content with its quarters, which were a large flight cage. It would feed from hand, and owing to its confiding ways was not only a great favourite with Mr. Maxwell, but also with his mother, who also felt the loss very keenly. Another bird he could not replace was the Yellow-bunting, which had secured a first prize every time shown by its former owner; had secured 1st at the Horticultural Hall, and several 2nds for himself. It was about the tamest specimen of the Yellow Bunting he had ever had, and was a splendid exhibition bird, being well marked, and having plenty of size and colour. His Bullfinch was also a big winner, and for a cage-moulted bird possessed a lot of colour. Among the first to perish were a sweet pair of the beautiful yellow-winged blue Sugar Birds. These were out of colour when purchased some months ago, but were at the date of the fire almost in full colour and looked very charming, and their owner held a very favourable opinion of their chance at the "Big Glass-house." Then, again, there were the pair of rare Violet-eared Waxbills, winners of 1st at Dulwich, 3rd L.C.B.A., etc. The Quail Finches were also looking very fine, the cock taking 1st at Camberwell only a short time ago. Another rare specimen was the Racquet-tailed Whydah. Great difficulty was experienced in obtaining a specimen of this rarely-imported bird. Amongst the Hybrids a sweet little Siskin-Goldfinch perished.

MR. MAXWELL'S FUTURE PLANS.

As to how he proposes to replenish his stock Mr. Maxwell said it was a little premature to say exactly what he intended doing, but he should exercise just as much care in selecting the best specimens in the future as he had done hitherto, and simply have to wait until the opportunity arises for buying a prospective winner. The insectivorous birds he would have to wait for until the spring was more advanced and the migrants reappeared. He would then possibly be able to secure a few choice specimens.

Asked as to his intentions on the question of rebuilding, he said the aviary that had just been destroyed had cost him something like £60 to build, and for various reasons he did not propose putting up such a substantial structure again, but would, as soon as possible, have another aviary erected, probably on the old site. Still, whatever he did, he would take ample precautions against a repetition of what had just occurred.

In answer to my query concerning the forthcoming Crystal Palace Show, he said he hoped to make a few entries, but, of course, the time was so short that they would be very limited, but doubtless would include the two survivors, who do not at present appear in the least depressed by the fate of their companions.

The number of victims is close upon 100, and their value at a very low estimate would be at least £150. The following is, we believe, a complete list of the birds destroyed.

Eleven Goldfinches, some of which had been in Mr. Maxwell's possession several years, and were mule breeders as well as winners. Amongst them is the 4th prize bird at the last February Palace Show, and 2nd West London, and 2nd at South Metropolitan Shows this season. Many of them were winners either in their present or former owner's hands.

Bullfinch, 1st L.C.B.A., 2nd Dulwich, 2nd L. and P.O.S., 1st South Metropolitan this season.

Two Hen Bullies, one the Watford winner—a splendid bird—the other laid in a cage last breeding season.

Five Linnets, including 2nd L.C.B.A. in October last.

Three Twites, including the winner 1st South Metropolitan, 1st West London, 2nd Dulwich, 2nd L.C.B.A.

Four Chaffinches, including the L. and P.O.S. winner, 1st Crystal Palace, etc.

One Grand Siskin, 1st Camberwell.

Three Redpolls; all good specimens and in finest possible condition.

Two Yellowbuntings, winners 1st L.C.B.A., Earl's Court, 1905, 1st L.C.B.A. 1906, both in open and members' classes, 3rd West London, etc.

One very fine Reedbunting, 2nd L.C.B.A.

Two Greenfinches, both big winners, and one bred a very promising light mule last season.

One Snowbunting, two Brambles, two Hawfinches, one of which was a big winner in other hands, and had been purchased at a large figure.

Two Cirlbuntings, one 1st at Palace, 1904; the other a very fine bird.

One Linnet-Bullie; winner, but unshown this season.

One Siskin-Goldie. Light Greenfinch-Canary, bred by its owner and very light. Mr. M. had great hopes of this bird.

One Goldcrested Wren, 1st L.C.B.A.

Two of the finest Blue-headed Wagtails in the possession of any exhibitor. In saying this I know I am making a bold statement, but when one considers that these birds are scarce, and these were the finest specimens for colour and size, I don't think I am far wrong. One was 1st Dulwich and 1st Camberwell, only times shown.

One Yellow Wagtail, one Grey, an old champion.

One sweet little handreared Treecreeper—the pick of a large number.

One Lesser Whitethroat.

One Treepipit, 1st L.C.B.A., besides other awards. Those who saw it will, I think, agree with me it will be a difficult matter to replace it with one as good.

One Redbacked Shrike, perfect feather and very tame; one pair of Bearded Tits, the pick of a large number; one Long-tailed Tit; one Reed Warbler, the bird that was shown on the front page of CAGE BIRDS in 1906; one Redstart, of exceptional size and colour; two Blackbirds, one the old champion; one Thrush; one Skylark.

The Foreign birds I have already mentioned, and these, with close upon a dozen Canary hens, all well-bred birds, about completes the list of deaths. Another big item in the loss account is a very large and valuable stock of cages, estimated in the aggregate to be worth, at least, £50.

Mr. Maxwell is not at all superstitious, but in view of what has occurred a remark made by his brother a few days before the fire has set him wondering whether there is any truth in the superstition that 13 is an unlucky number. He had 13 birds in the flight aviary in his birdhouse, and this number remained and were burned to death.

I am sure all his many fancier friends will join me in expressing sincere sympathy with Mr. Maxwell in the calamity that has befallen him so unexpectedly, and hope that he may not find the task too difficult to get together another collection as good, if not better, than that which has met such an untimely end—for we must remember the old, but true, saying—"there are as good fish in the sea as have ever been caught."—S. A. SANDY.

BATH.

Second Annual Members' Show of the Bath and Dis. F.A., January 24th. Cage birds were staged in a room by themselves, but the weather being so cold the birds looked scarcely at their best, which made it very difficult to judge them. The President, Mr. Tom Stone, is an enthusiastic fancier, and looked well after the wants of the judges. Mr. H. Turtle, the hon. sec., is also most capable and obliging, and great credit is due to him for the manner in which the arrangements were carried out. Entries numbered 100. Cup for the best British Hardbill (to be won twice) was won for the first time by Mr. S. Jones, sen., with his Hawfinch. Mr. S. E. Jones, jun.'s Bullfinch pressed hard and took special for second best British. Special for best Canary was carried off by a lady novice member, with a nice Yorkshire. Mr. W. G. Bull (Bristol) judged, and his awards met with general approval.

NOR. PLAIN. YELL.: 1, 2, 3. Taylor, first nice quality, good sound colour, short wings and tail, second larger bird, fails quality and shortness of tail and wings, third could have been higher, only had broken tail feathers; vhc, Follwell. BUFF: 1, 2, 3, vhc, Taylor, first nice type and colour, well frosted, second not so cobby, flatter head, third good size, not the quality of former. YORKS. YELL.: 1, 2, vhc, Andrews and Biss, first typical Yorkie, good wings and tail, second longer, crosses wings a bit and pinched on neck; 3, hc, c, Mardling, nat. col., nicely drawn, wide in tail. BUFF: 1, spl, 2, 3, vhc, Andrews and Biss, first long wing-marked buff, grand quality, neat waist, second not so stout as first, third gone in neck, soap not got out; hc, c, Mardling. A.V. HEN: 1, Follwell, buff Nor., good feather and colour, nice head; 2, vhc, c, Andrews and Biss, yell. Yorks., long and racy; 3, hc, Taylor, third fair quality buff Nor. A.O.V.: 1, 2, Fenwick, Bor., first good quality and colour, second better bird, only wanted to be introduced to "Sunlight." A.V. CAN., NOVICE: 1, 2, Follwell, first and spl, and spl best Can., yell. Yorks., marked wings and head, grand quality, nice waist and back, stands well, third yell. Nor., good even colour, short wings and tail; 2, vhc, Brain, second yell. Nor., grand quality, good wings and tail, nice type, deserves his place. BRIT. GOLDFINCH: 1, vhc, S. E. Jones, first square-cut blaze, good bright colour, nice wing bars and buttons, grand polish; 2, hc, S. Jones, nice shape, beautiful tanning; 3, Follwell, not equal in size of blaze or tanning, not house moulted; c, Mead. BULLFINCH: 1, 2, spl, 2nd spl best Brit., S. E. Jones, first grand size, Bristol and Cheltenham winner, enough said, second hardly so bright in colour or such good wing bars; 3, Andrews and Biss, not so much size or so steady, field moulted; vhc, Gibbous; hc, Mead; c, Russell. Bath people seem to know where to find Bullfinches. There were grand birds in this class. LINNET: 1, S. E. Jones, well staged and polished, nicely pencilled, stands well away; 2, Sumsion, good type, not quite the finish nor so well pencilled as winner; 3, S. Jones, fails somewhat in colour and marking; vhc, c, Russell; hc, S. Jones. SISKIN: 1, 2, S. E. Jones, first colour-fed, good laced cap, colour and wing bars, second good colour, close up; 3, S. Jones, grandly laced cap, good wing markings, has flights out or could have been higher; vhc, hc, Langley and Son. REDPOLL, ETC.: 1, S. Jones, grandly marked and coloured Redpoll, well staged; 2, vhc, Russell, second large Twite, rather dark, nicely pencilled, not so close in feather; 3, Mead, beaten in colour by winner, nicely staged; hc, c, Mardling. MULE: 1, Gibbons, fair size buff Linnet Mule, nice condition; 2, 3, Francis, second buff Goldie Mule, third yell. Linnet Mule, good colour, rather wild; vhc Sheppard. BRIT. A.O.V.: 1, spl, cup, S. Jones, grand Hawfinch, feathered like wax and shines like glass, wins hands down, well staged, deserves all he gets; 2, Owen, good size Greenfinch, nice shape and colour; 3, S. E. Jones, Bramble, rather dark on head, fair spangling on back; vhc, c, S. Jones; hc, Gibbons. SELL., 10s. 6d.: 1, 2,, vhc, Taylor; 3, hc, c, Andrews and Biss. FOR., A.V.: 1, Gillen, Blue-fronted Amazon, grand colour, perfect plumage, wins; 2, Mrs. Fishlock, Alexandrian Parrakeet, good colour, sound tail and wings, caused much amusement by his vocabulary; 3, Mrs. Mason, Grey Parrot, nice silver shade of colour; vhc, Mrs. Mason; c, Andrews.

HOYLAND AND DIS. O.S.

The above Society held its 7th annual Members' Show at the Queen's Head Hotel, on January 5th, when some birds of great merit were staged. Mr. A. H. Waters won the Kelly Cup for the best unflighted bird with his clear yellow. Mr. W. Evans' ticked yellow Yorkshire being the runner-up. Mr. F. Taylor (Skelmanthorpe) judged, and gave every satisfaction. J. Warrender secretary. YELL. YORKS.: 1, 2, Oakley; 3, Robinson; vhc, A. Taylor; hc, Dewhurst and Thompson. BUFF: 1, Whitingham; 2, vhc, Oakley; 3, T. Taylor; hc, Dewhurst and Thompson. YELL. HEN: 1, Oakley; 2, Evans; 3, c, Dewhurst and Thompson; vhc, hc, T. Taylor. BUFF: 1, 3, Whitingham; 2, hc, Dewhurst and Thompson; vhc, A. Taylor; c, F. Ottley. UNFLI. YELL.: 1, W. Evans; 2, F. Ottley. BUFF: 1, 3, Oakley; 2, Dewhurst and Thompson; vhc, hc, Ottley. CINN.: 1, 2, Dewhurst and Thompson. NOR. YELL.: 1, Robinson; 2, 3, Waters; vhc, Evans. BUFF: 1, 2, Waters; 3, vhc, Robinson. YELL. HEN: 1, 3, Waters; 2, Robinson. BUFF: 1, 2, Waters; 3, Robinson. UNFLI. YELL.: 1, cup, 2, Waters. BUFF: 1, Waters; 2, 3, Robinson. MULES OR HYB.: 1, J. Watkin. LINNET: 1, 2, Robinson; 3, vhc, c, Watkin and Vaines; hc, J. Watkin. GOLDFINCH, ETC.: 1, W. Evans; 2, Robinson; 3, B. Key. A.O.V. BRIT.: 1, Watkin and Vaines; 2, W. Evans. NOVICE YORKS.: 1, 2, 3, A. Taylor; vhc, hc, Finchim. NOR.: 1, 2, 3, vhc, hc, Guest. NON-FED YORKS.: 1, 2, 3, Dewhurst and Thompson. NOR.: 1, Johnson; 2, Robinson.

LUTON.

The Third Exhibition of the Luton and District Fur and Feather Society, January 24th. The Plait Hall is very suitable for a large show, being spacious, with a capital top light. It was excellently warmed, and in every way the comforts of exhibits were well catered for. The show was well patronised, large numbers being present during the afternoon and evening. Cage birds were under the capable management of such well-known fanciers as E. Bloomfield, W. Sapwell, F. Webb, J. Ward, and others. Messrs. Sell and Bent acted as Hon. Secretaries, and came through their task with every credit. Mr. J. Robson judged. Many well-known champions were on view, the quality throughout being A1. Especial mention must be made of the Goldfinch, Bullfinch and Mule classes.

NOR. CL. OR TICK. YELL. (10): 1, Brooks, clear, very warm in colour, rare size, lovely quality; 2, Battison, has very nice head, short flights and tail; 3, Miss Thomas, smart appearance, not quite equal in colour to first and second; 4, Markham, one of the biggest and best only needed a wash to have been higher; vhc, Thomas; hc, Wilmot; c, Thomas. BUFF (12): 1, Battison, rare bloom, full of quality, excels in head, wings and tail; 2, Ward, beaten only in head, nicely rounded chest, short flights and tail, grand type; 3, Ling, paler, grand head and body; 4, 5, Brooks, fourth marked on head, nice quality, well worth its position, with tight as wax, a real Nor. throughout, nicely marked on wings, good colour; vhc, Horwood; hc, Miss Thomas; c, Markham. BRED 1906 (9): 1, Midgley, wing mark. yell., excellent type, lovely quality; 2, Battison, orange buff, excellent colour, short flights and tail; 3, vhc, Cooper, stouter than second, nice type and quality; 4, Gentle, fine buff, well made throughout; 5, Battison, good quality of feather, excellent type, we liked; hc, Bassett; c, Thomas. YELL YORKS. (13): 1, 3, Wilcock, couple of very fine birds, not much between them, nice length, straight, stands well on legs, and excellent colour; 2, Hudspeth, put up in rare bloom, barely the length of winner; 4, Linsey, nice slim bird, of beautiful quality, close up; 5, Broome, nice bird, bit stouter than winners; vhc, Collyer; hc, Wells; c, Macpherson. BUFF (19): 1, 2, Wilcock, lovely pair, straight as a rule, stands well on perch, and shown in rare bloom; 3, Linsey, in prime condition, well drawn throughout; 4, Hudspeth, well made bird, has a bit more chest than winners, otherwise good; 5, Macpherson, nice position; vhc, Watson; hc, Wells; c, Linsey. CREST (11): 1, Mills, clear body, dark crest, rare quality, lovely soft, silky feather, well formed crest, good centre, nicely radiated; 2, Hayson, heavily feathered green, nicely formed crest; 3, Bloomfield, larger crest than second, fine quality of feather, hardly so good in centre as winners; vhc, Bloomfield; hc, Gibson and Winstone. C.B. (10): 1, 3, Brooks, first massive bird, rare skull, feathered well over eyes, third rare brow, hardly so wide in front as winners; 2, Mills, green, rare wide skull and well browed; 4, Mills, excellent type, plenty of feather, choice quality; 5, Gibson and Winstone, nice dark cap; vhc, Dr. Rose; hc, c, Smith. A.O.V. CAN. (10): 1, 3, Ingram, couple of very fine cinns., rare colour and size, rich quality, shown in fine condition; 2, Webb, nice evenly marked bird; 4, Ingram, lovely yell. cinn., hardly so large as winners; 5, Cooper, excellent cinn.; vhc, Gentle; hc, c, Wilmot. GOLDFINCH (33): Biggest class in the show, a grand lot, many first prize winners here, several running the winner very close; 1, vhc, Howe, winner sweetly pretty Finch, rare blaze, rich body colour, perfect condition; 2, Hunt, has deep coloured blaze, but does not go back far enough, rather small; 3, Welch, grandly finished, square blaze of rich colour, shown in rare bloom; 4, Cross, nice quality, good condition, well tanned, a wee bit weak in head; 5, Wilmot, smart looking Finch, with good blaze; vhc, Andrews; vhc, Temple and Dennis; hc, Tonks. BULLFINCH: Another wonderful class of twenty-five, several birds honestly deserving of a first prize; 1, Howe, about as good as they make 'em, rare size for a Britisher, brilliant colour, perfect cap and wings, in prime fettle; 2, Lovell, similar to first, must have run winner close; 3, Underwood, good one in splendid condition; 4, Carter, a shade smaller than winners, beaten but not disgraced; 5, Andrews, good enough for first at many shows; vhc, R. J. Howe; hc, Howe; c, Spinch. LINNET, ETC. (20): 1, Howe, rare colour, beautifully pencilled, in prime condition; 2, Lovell, lovely bird in rich plumage and very steady; 3, Marley, hardly the polish of winner, but a good one; 4, Bye, well made bird, of rich plumage, not quite so steady; vhc, Reeves, bonnie little Redpoll; hc, Pool; c, Hunt. HARDBILL (13): 1, 2, Howe, first the well-known Hawfinch, with rare bib and prime condition, steady as a horse guard, second lovely Meadow Bunting in excellent trim; 3, Hunt, charming Yellowhammer, with plenty of yellow on head and neck, nicely marked; 4, Smith, brilliant coloured Bramblefinch, in good condition; vhc, Reeves, Hakes; hc, Pool; c, Hunt; the fifth prize was a very nice coloured Chaffinch, but we missed the name of owner. MULES (17): Rare class, many of them having previously taken premier honours; 1, 2, Lamb, with a couple of his champions, first Redpoll-Goldfinch, perfect picture, brilliant colours, polished like ivory, second excellent Linnet-Bullie; 3, Lees, lovely yellow Goldfinch Mule; 4, Jupe, a choice Goldfinch-Bullie, in rare form; 5, Mills, similar to fourth; vhc (no name); hc, Andrews, Wyse. SMALL FOR. (17): 1, Mrs. Vernon, Troupial, very rare, shown in excellent condition; 2, 4, Timæus, two pair of charming Pekin Nightingales, in perfect plumage, four pair of excellent Diamond Sparrows, staged in Mr. T's usual condition; 3, Cooper, pair of superb Grassfinches, in perfect condition; 5, vhc, Mrs. Vernon; hc, Parsons. LARGE (10): 1, Cooper, excellent Blue-bonnet Parrakeet, very choice, shown in tip-top condition, takes special for best Foreigner; 2, Howe, King Parrot, an old champion, winner of many first prizes, looking his best; 3, Bailey, very good Grey Parrot; 4, Cooper, pair of Red Rumps; 5, vhc, Mrs. Vernon. SELL. (15): 1, 2, H. Gentle, first a pair of well-known Nor., second a single ditto, both cheap at catalogue price; 3, Midgley, another good and cheap pair of Nor.; 4, Cooper, pair of small Foreigners; 5, Linsey; vhc, Mills, Fern; hc, Mrs. Vernon. LOCAL CLASSES: YELL. NOR.: 1, spl, (no name), nice stamp, full of quality; 2, 3, F. Webb, second good body properties and nice head, third good, but hardly so cobby as winners; 4, Eling, biggest in class, but a trifle long. BUFF: 1, spl, Pedder, well made, nice quality; 2, hc, F. Webb, good quality, just a shade too long; 3, Litchfield, well made bird, cobby and short in flights; vhc, Ward. VARIEG.: 1, (cup winner), 3, Webb, first real Nor., mar. eye, cheek and tail, full of quality; 2, Ward, another well made bird, with dark cap, third good ticked buff. HEN: 1, spl, Ward, bird teeming with quality, lightly marked on head; 2, Sapwell, nice cobby, useful hen; 3, Webb, good yell.; vhc, Horwood. YELL. YORKS.: 1, 2, 3, spl, Webb, fine team of clear and cinn. birds; hc, Bloomfield. BUFF: 1, 2, spl, Sapwell, couple of well made birds of the right type; 3, vhc, hc, Webb. CREST (2): One absent; 1, Smith, very fair crest. MULE: 1, spl, Ward, excellent coloured Linnet-Bullie, good enough for open class; 2, Webb, dark Goldfinch Mule; 3, Bloomfield, lightly-marked Goldfinch Mule; vhc, hc, Cullam. CHILDREN'S PETS: 1, c, Shepherd, nice Goldfinch; 2, c, Foster, pretty Siskin; 3, C. Smith, Goldfinch; vhc, M. Fensome; hc, K. Cookson; c, H. Smith.

CHELTENHAM.

The Cheltenham C. B. S. held a pair show on Jan. 26th in the Victoria Rooms. We cannot congratulate them upon a good entry; quite a contrast to previous years. Such lethargy on the part of the members is calculated to somewhat cool the Hon. Sec's. ardour. We trust another year to have the pleasure of chronicling a huge success. The quality of the exhibits was first-class, several birds putting in an appearance that have done well at good open shows. Mr. W. H. Kilmister made the awards, and we were pleased to see this well-known old-time successful fancier once more amongst the birds.

CREST CK. and C.-B. HEN (8): 1, hc, c, Treasure, heavily varieg. crest, nice fro tal, good length and droop, grand back, well radiated, good body, hen has good length of head feather, nice body; 2, Hands, wing mkd. dark crest, nice droop and back, hen has a rare cushion-shaped skull, plenty of feather and nice entrance, a hen we liked much; 3, Roylance, cl. body, dk. crest, not so full in frontal, and varieg. hen, well feathered-skull, good body and nice quality of feather; 4, vhc, Hands, wing mkd., dk crest, fair frontal, hen has nice rise of skull, and good width at back, nicely feathered. C. B. CK. and CREST HEN (7): 1, Hands, heavily mkd ck., grand body, nice quality of feather, hen even wing, dk. crest, dense and wide frontal, well filled in at sides; 2, 3, Hands, cock mkd. wings, left eye and cheek, good back skull, nice feather, true narrow in entrance, but has a good back skull, hen pied tail green, nice droop and density, good body, third, pied tail green ck., good skull, nice rise over beak, good length of head feather, hen, even wing mkd., rare frontal, long and dense, comes well to beak end bit on the small side in body, yet we thought this pair could have been higher; 4, vhc, Treasure, eye tkd. ck., good length of head feather, fair skull, hen, fair frontal; hc, c, Roylance. NOR. YELL. CK. and BUFF HEN (4): 1, Merchant, cl ck., good shape, colour, and quality, shade heavy in head, grizzle capped buff hen, nice shape, size, and feather; 2, 3, Stephenson, cl ck., good shape, full of quality, nice head good back and flights, hen mkd. right wing and back of skull, nice shaped body, short flights and tail, the Llanelly winner, third, varieg. cock, rare colour, size, and shape, unflig cl hen, nice shaped body, short flights and tail, well mealed, Malvern winner, well matched pair; 4, Merchant, cl ck., good shape and size, nice back, not so deep in colour, cl hen, good shape, neat round head, well mealed BUFF CK. and YELL. HEN (4): 1, 2, Stephenson, cl cock, rare size and shape, deep chest, good head, wide across shoulders, good colour and mealing, hen tkd. head and left wing, short feather, good quality, second, well-known unflig. ck., grand shape and feather, nice flights and tail, well mealed, shade down in colour, hen tkd. head, good shape and feather, nice chest, neck, and back, pressed hard for top honours; 3, 4, Merchant, ck grizzled head, good shape and feather, nice head, well up in quality, hen cl, nice head, fair colour, trifle harsh in feather, fourth, cl cock, grand colour, nice back, full neck, neat head, heavily varieg. hen, rare head, good shape and feather. A. O. V. (2): 1, 2, Lewis, Bordera, yell. mkd. cock, nice feather and carriage, hen, nice shape and feather, second, contains nice even mkd. buff ck., good shape and feather. FINCH and CAN. (8): 1, 2, 3, Pouncett, Goldfinch cock, nice blaze, size, and colour, yell. Nor. hen, fair shape and size, second, Siskin cock, good size and feather, fair colour and markings, hen, yell. Nor., good shape and fine feather, third, Greenfinch ck., good size and shape, buff Nor. hen nice shape, colour, and feather; 4, vhc, hc, c, Stevens nice Goldfinch ck. and varieg. C. B. hen. TWO BRIT. (only one entry): 1, Stevens, Goldfinch cock and Siskin hen, latter nice size and well marked.

MALVERN.

Held Jan. 23rd and 24th in the Assembly Rooms. The cage birds this year were located in a room to themselves, and a better one for the purpose could not be wished, for as it was quite free from draughts, had both top and side lights, and plenty of room. We feel sure had it been known that the cage birds would have been so well provided for in this respect, the entries would have been considerably augmented. The exhibits were nicely staged, and were thoroughly well looked after by a few good fanciers. The quality throughout was very good. Mr. Griffiths makes a most efficient Secretary, handling the reins of office with tact and courtesy. Mr. J. H. Payne made the awards.

YORKS. CL., TKD., ETC., (Amalg.) (17): 1, Graham, clear yell., lovely colour and quality, stands well on a pair of good legs, nice back, neat head, tail, and wings; 2, vhc, Pugh, buff, ticked wing and neck, lovely feather and quality, good position, nice tail and back; 3, r, Riley, wing and neck ticked, yellow, grand colour, nice length and style, well on leg, not quite so close in feather at sides; hc, Underhill; c, Portman. HENS (Amalg.) (11): 1, hc, Graham, clear buff, slim built, stands well on a good pair of legs, neat head and tail, nice feather and quality; 2, vhc, Riley, wing ticked yellow, beautiful quality of feather, nice stand and style, well on leg, nice back; 3, Pugh, marked eyes and wings, buff, plenty of length, good back and neat tail, not quite so slim built; r, Johnson; c, Edmondson. NOR. CL. or TKD. (14): 1, Wasley, cl. yell., beautiful quality, rich level colour, good shape, well-packed flights and tail, nice carriage; 2, Houghton, buff, marked wings, neck, and eyes, splendid colour, well mealed, good-shaped body, good neck and back; 3, Merchant, yell., nice colour and quality, good shape, shade strong in head; r, vhc, Hodder; hc, Underhill; c, Waller. HEN (11): 1, sp, Hulse, tkd. head yell., grand quality of feather, nice shape and rich, level colour, neat head and full neck, in grand fettle; 2, Houghton, buff, good shape, rich colour and well mealed, good back and chest, nice flights and tail, not in such bloom as the leader; 3, Stephenson, wing and neck ticked buff, short cobby body, nice colour, not so full in head and neck; r, Pegg; vhc, hc Johnson; c, Blagg. UNFLIG. CK. (6): 1, Hulse, yellow, magnificent colour, nice-shaped body, good quality, nice head, short flights and tail; 3, Hodder, buff, splendid under colour, well frosted, good shape, short, well-packed flights and neat tail, gets well across perch; r, Stephenson; vhc, Lees; hc, Pegg; c, Houghton. HEN (7): 1, Stephenson, buff, short, thick-set body, good feather, nice wings and tail; 3, Pegg, good-coloured yell., nice shape, bit slack in feather; r, Hodder; vhc, Merchant; hc, c, Johnson. MULE (6): 1, sp, Shellam, Greenfinch-Bullfinch, rare size, shape, and colour, one of the best out, takes sp for best in show; 3, r, Wasley, six-pointed buff Goldfinch-Canary, good colour and shape, well marked; vhc Portman; hc, Styles; c, Hickling. GOLDFINCH, ETC. (13): 1, Edmondson, Bullfinch, beauty for breast colour, shape, cap, and bars, very steady and well shown, wins well; 2, Bailey, Goldfinch, nice blaze, bars, and buttons, well tanned chest; 3, Portman, Goldfinch, nice back and buttons, bright blaze, not so expansive as the second; r, Poulton; vhc, Dakeyne; hc, Hickling; c, Hingley. A. O. V. BRIT. (7): 1, sp, Bailey, Waxwing, splendid colour, beautiful feather, clean cut bib, very steady, and well shown; 3, Portman, yellow Bunting, good size and feather, well marked, nice colour; r, Pearson; all Mr. Birchley's entries absent. FOR. (8): 1, 2, 3, Moerschell, Indian Shama, Green Cardinal, and Aurora Finch in the order named, all in good feather and colour; r, Melvin; vhc, Poole; hc, Hingley. SELL., 20s. (6): 2, vhc, Johnson, smart yellow Yorkshire; 3, Pegg, buff Norwich; r, Poole; hc, Lewis; c, Underhill. SELL., 10s. (5): 2, hc, Johnson, good coloured wing mrk. yell. York.; 3, vhc, Merchant; r, Shellam. LOCAL CANARY (9): 1, Johnson, yell. Yorks., mrk. wings and eye, nice length and style, bit patchy in colour, yet wins easy; 2, McCann, good shaped vgtd. buff Norwich; 3, r, Graham, neat yell. Border; hc, Hickling; c, Potter-Carter. FOR. (2): 3, Probert, Sulphur-Crested Cockatoo; r, Melvin.

BAILDON C.B.F.A.

Members' Show, Mechanics' Institute, January 26th. Mr. Hy. Dobson judged. This was the first of three shows competing for the President's Cup and Gold Medal, also for point specials. The membership is steadily increasing, Yorkshires being the leading variety here. CL. YELL. YORKS: 1, Horsfield; 2, Walsh; 3, W. Hodgson; vhc, Mountain; hc, Ellis. BUFFS: 1, J. Hodgson; 2, Dobson; 3, Walsh; vhc, J. Hodgson; hc, Horsfield; c, Ickeringhill. TICK YELL.: 1, W. Hodgson; 2, J. Hodgson; 3, Walsh; vhc, Horsfield; hc, Ickeringhill; c, Dobson. BUFFS: 1, Horsfield; 2, Walsh; 3, Mountain; vhc, Mann; hc, c, Ellis. YELL. HENS: 1, Walsh; 2, Mann; 3, vhc, W. Hodgson; hc, Halliday; c, Horsfield. BUFF: 1, W. Hodgson; 2, Mountain; 3, Halliday; vhc, Ellis, hc, Walsh; c, Mann. SELL., 12s. 6d.: 1, Mountain; 2, Horsfield; 3, Ickeringhill; vhc, W. Hodgson; hc, Walsh; c, Halliday. HEN, 10s.: 1, Walsh; 2, J. Hodgson; 3, Horsfield; vhc Mountain; hc, Ickeringhill; c, Halliday.

WESTERN COUNTIES O.S.

Annual Fair Show, at the Borough Arms, January 21st. Nearly thirty exhibits were entered. The quality in the Norwich class was above the average, whilst Crests and Yorkshires contained specimens that had won in many large shows. W. R. B. Tope judged, and his awards were very well received. YORKS.: 1, 3, 4, spl, Dyer; 2, Tremlett. NOR.: 1, 2, spls, Garland, 3, Snell; 4, Parish. CREST: 1, 3, 4, spl, Ryder; 2, French. HYB.: 1, Tremlett.

BUCKINGHAM.

Buckingham F.S. Sixth Annual Exhibition was held in the Town Hall, January 17th. This being the first time of open classes, we must congratulate the Committee, not only upon the number of exhibits, but upon their quality. Many of the exhibits in the Hybrid class were worthy of a first prize. Mr. C. H. Richards makes an ideal Secretary, and Mr. G. Simonds, the cage bird steward, was very attentive to his department. Everything passed off satisfactorily. The awards were made by Mr. Billett (Reading). NOR. PLAINHEAD (9): 1, Lewin, very nice rich coloured yell.; 2, Lees, another good coloured yellow, on the large size; 3, 4, Wilmot, cobby clear buff, short flights and tail, fourth good coloured yell.; ex. 4, vhc, Butler, ticked yellow, scarcely so hot in colour; vhc, Ward; vhc, hc, Mullis. A.O.V. CAN. (10): 1, Andrews, charming little Border Fancy, tight as wax, in lovely condition; 2, vhc, Kilpin, very nice Crested Norwich, well-formed Crest, nicely radiated, just a wee bit narrow in front or would be a champion; 3, vhc, Griffin, another fair Crest; 4, Wilmot, broken capped Golden Lizard, well spangled, and good colour; vhc, Grant; hc, Rickard, moderate Crest. MULE OR HYBRID (11): 1, spl, Lewin, four-pointed buff Goldfinch Mule, put up in rare fettle, sweet exhibit; 2, Swingler and Blackwell, very fine Goldfinch-Bullfinch, in excellent condition, rare colour; 4, ex. 4, vhc, Andrews, trio of charming Hybrids, viz., Goldie-Bullie, noted winner, not looking his best today, Greenfinch-Bullie, in rare trim, and nice Linnet Hybrid; 3, Lees, Greenfinch Mule, appears to have been bred from a Cinnamon hen; vhc, Rickard, Harris; hc, Grant. LOCAL: NOR. P'H. (8): 1, spl, Simonds, natural coloured buff, nice quality; 2, 3, Mullis, rare big marked buff, good head and neck, nice cobby body, real Norwich, third nice orange colour, good head; 4, vhc, North, very fair ticked yellow, and good headed buff; vhc, Eales, Simonds. A.O.V. CAN. OR MULE (10): 1, spl, 3, 4, vhc, Simonds, first really very fine yellow Yorkshire, rich in colour, excellent head, wings, and tail, and shown in the pink, third buff Yorkshire, fourth small Goldie-Bullie, looks like a hen; 2 Griffin, large, well-formed Crested Norwich; vhc, Griffin, Eales; hc, French (2), Basford. SMALL BRIT. (11): 1, spl, 3, 4, vhc, Simonds, first Bullfinch, rich colour, well formed cap, rather small, genuine Britisher; 2, Mullis, excellent Goldfinch, rare blaze and rich body colour; 3, Simonds, nice coloured Greenfinch, fourth fair Linnet; vhc, Simonds, Osborn, Maris; hc, Jeffery, Osborn.

WINDHILL, SHIPLEY & DIS. O.S.

Members' Show, January 12th, at the Blue Bell Hotel. Mr. J. Wilman placed the cards. CL. YELL. YORKS.: 1, spl for best bird in show, J. Lunn; 2, Denton; 3, Broadley and Son; vhc, Hardaker; hc, Drake; c, Ferguson and Son. BUFF: 1, Ferguson and Son; 2, Denton; 3, hc, Drake; vhc, Hartley; c, Hawkes. TKD., ETC., YELL.: 1, Broadley and Son; 2, Drake; 3, Slater; vhc, Lunn; hc, Smith; c, Cook. BUFF: 1, Broadley and Son; 2, Denton; 3, vhc, Drake; hc, Verity; c, Lunn. FOUL MKD.: 1, Slater; 2, Walton. YELL. HENS: 1, c, Drake; 2, Ferguson and Son; 3, hc, Exley; vhc, Hillas. BUFF: 1, Ferguson and Son; 2, Verity; 3, Smith; vhc, hc, Drake; c, Exley. CINN. MKD. YELL.: 1, Alderson; 2, Hardaker. BUFF: 1, Hillas; 2, Hawkes. HENS: 1, Denton; 2, Ferguson and Son; 3, Exley; vhc, Armstead. SELL., YELL., 12s. 6d.: 1, Broadley and Son; 2, Slater; 3, Denton; vhc, Hardaker; hc, Ferguson and Son; c, Slater. BUFF, 12s. 6d.: 1, Denton; 2, Cook; 3, Lunn; vhc, Hardaker; hc, Slater; c, Hartley. HENS, 10s. 6d.: 1, Denton; 2, Cook; 3, Alderson; vhc, Smith; hc, Drake; c, Walton.

HARROGATE C.B.S.

The above Society held their First Annual Members' Show on January 19th, 1907, when over 100 birds appeared in eight classes, which was considered very satisfactory. Special for best bird in show was won by Mr. Veitch; the same exhibitor also won special for best Yorkshire shown by a novice, Mr. T. Head coming second. Special for best hen shown by a novice, also special for best young hen, bred 1906, was won by Rev. B. Wilton; special for best bird bred by a novice, 1906, Mr. J. Robinson; special for most points in show gained by a novice, Mr. H. Gregg. Mr. H. W. Battye judged, and gave every satisfaction. CL. TK., etc., YELL. YORKS.: 1, spl, Head; 2, Barnwell; 3, 4, Brown; vhc, Walker; hc, Veitch; c, Hewson. BUFF: 1, 3 spl, Veitch; 2, 3, 4, Barnwell; vhc, Walker; hc, Barfe; c, Hewson. HENS, A.V.: 1, spl, 2, 3, Barnwell; 4, hc, Brown; vhc, Wilton; c, Barfe. UNFLI. YORKS.: 1, 2 spls, Robinson; 2, Barnwell; 3, Barfe; 4, vhc, Brown; hc, Hewson; c, Head. CINN. MK.: 1, spl, vhc, hc, Barnwell; 2, Barrett; 3, Robinson; 4, Head; c, Brown. SELL., 12. 6d.: 1, spl, Head; 2, Brown; 3, Hollins and Son; 4, Barfe; vhc, Robinson; hc and c, Dennison. A.V. NOR.: 1, spl, Gregg; 2, vhc, hc, c, Barnwell; 3, Wilton; 4, Gregg. BRIT., A.V.: 1, spl, hc, Gregg; 2, vhc, Bousfield; 3, c, Wilton; 4, Hollins and Son.

STOCKPORT O.S.

Members' Show, January 12th, in the Albert Hall. Entries were fewer than was expected, owing to lateness of the season, but many good birds were staged. Mr. W. Booth (Hyde) judged. Special for best bird was won by Mr. Nelson, with a clinking yellow Yorks. Point specials: 1, Nelson; 2, Hill; 3, Stafford; 4, Morley; 5, Potts; 6, Brooks.

LANCS. COPPY (3): 1, Ormisher; 2, 3, Nelson. DO. PLAIN. (4): 1, Brooks; 2, 3, Nelson; 4, Ormisher. LIZ., GOLD: 1, Hill. SILVER (2): 1, Brooks; 2, Hill. YORKS. YELL. (6): 1, 2, Nelson; 3, Hill; 4, vhc, Potts; hc, Goldthorpe. BUFF (6): 1, vhc, Nelson; 2, 3, Potts; 4, Goldthorpe; hc, Hill. HENS (6): 1, 2, Nelson; 3, Goldthorpe; 4, Potts; vhc, Hill. UNFLI. (6): 1, 2, Nelson; 3, 4, Potts; vhc, Goldthorpe; hc, Hill. NOR. YELL. (5): 1, 4, Stafford; 2, Brooks; 3, Hill; vhc, Ormisher. BUFF (6): 1, Hill; 2, Nelson; 3, 4, Stafford; vhc, Brooks; hc, Ormisher. HENS (7): 1, vhc, Nelson; 2, 3, Stafford; 4, Goldthorpe; hc, Brooks; c, Ormisher. UNFLI. (5): 1, Hill; 2, Brooks; 3, 4, Stafford; vhc, Ormisher. CRESTS: 1, Stafford. C.B.: 1, Stafford. CINN. YELL. SOFT A.V.: 1, Hill. FOR. LARGE (4): 1, 2, 3, 4, Morley. SMALL (5): 1, 2, 3, 4, 5, Morley.

—W. Stafford, Hon. Sec.

Hybrid Breeding: Preparations for the Coming Season.

By T. H. KINCH.

As the season is now coming on, it will be as well for those who propose to go into this hobby to be on the look out for suitable birds. It is not wise to drive it off until the time comes for them to pair up. This paper, I should say, is only intended for young fanciers; the old hands can take care of themselves. Now most British birds can be had cheap, that is, if they have been recently caught. I will own, of course, that you will have to pay more for a cage-moulted Goldfinch, or even Bullfinch, but it is quite possible for anyone to get as good results from fresh caught ones as from cage moulted ones. I should advise anyone to get, say, a hen Bullie and cock Greenfinch, or cock Goldfinch and hen Bullie, or, if the pocket will allow, a similar cross to the latter with Siberians, as these are much finer birds. I don't advise anyone to use the cock Bullie and hen Goldie, for the cock Bullie has yet to make his name as a breeder, although an instance was related to me a few nights ago where he and a hen Bullie bred and had a nest of young in a small cage. But, still, it is very rarely that he will even pair with a hen Bullie in a cage.

SOME GOOD CROSSES.

Another good cross which is likely to be got is the Linnet cock and hen Bullie. Then you can have the Linnet-Greenfinch pair, as both of these will build in a cage and go on well, even if they are only fresh caught ones. Another cross which might be tried is the Goldfinch, Greenfinch, or Goldfinch Linnet. These crosses I have mentioned are more likely to be successful than others. I should recommend any of these for a novice to start with, and if he does get any of these birds, I advise him to put them together at once, and if they are very wild to put them in a small cage until they settle down. If they are put into a large cage or flight with several others, it will be better for their health and stamina, but it keeps them wild for so long, and the sooner they get used to the cage and to one another the better chance they will have.

If you should have any Bullies, try and let them have some natural food in the shape of buds of gooseberries, currants, plums, or some taken from the hedgerow. I know it is a difficult matter to get buds in town if you have no gardens; but it is quite advisable to give them some, as Bullies are liable to get overfat inside, as they generally feed greedily in cages. For the Goldfinches, of course, you can always get them some of the wild seeds now advertised.

MATERIALS FOR NESTS.

For nesting materials give them pieces of cocoa matting cut in small lengths and pulled to pieces, also bits of rope, and some moss, etc., but never use horse-hair (unless it is cut in small pieces) or wool, as both are likely to get entangled round the hen's feet, and out come the eggs. I much prefer the old wooden box for nests, about 4 inches square and 2 inches deep, with holes at bottom and sides for ventilation. They will, as a rule, build a good nest, and I have always found that they prefer the box to a pan. It is always as well, when you have placed them together in the breeding cage, to have a good, thick covering over the bottom of sawdust, in case the eggs are thrown out or laid at the bottom. The nest boxes should not be up too high in the cages, and should be close to the wires, so that you can see into them without taking them down. They should also have something over the wires to hide the nest and keep them quiet. I used to put a piece of yew tree in the wires. Grit must always be well supplied in some box or pan.

THE BRAMBLEFINCH CROSS.

There are a great many other crosses which might be tried with success; one of these is the Bramble-Chaffinch cross—the hen Chaffinch is the one which is more likely to do the trick than the cock Chaffinch, although I had fertile eggs from a cock Chaffinch last year. Another cross which would be worth trying is the Hawfinch-Bramblefinch, which has yet to make its appearance. The Bramble and Bullie cross might also be got, as a pair last year, in this district, had fertile eggs, but did not hatch out. The hen Bullie, which was up with it, has laid over 40 eggs in two years, and is so tame that she jumps upon her master's finger when he puts his hand in the cage.

Those who have not got these birds should procure them at once, even if they intend to try with only one or two pairs. Have patience with them, and don't disturb them unnecessarily. Let them go on in their own sweet way, but always supply them with as much natural food as you can get when they are nesting. The eggs, if possible, should always be put under Canaries, to make sure, and dummy eggs given in their place.

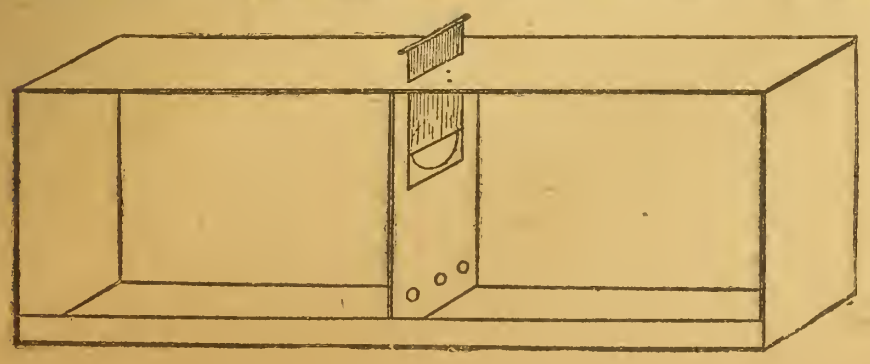
BREEDING CAGES.

READERS DESCRIBE THE BREEDING CAGES THEY USE, AND EXPLAIN HOW TO MAKE THEM.

Mr. Perrott's Cage.

To make the Canary Breeding Cage shown in the accompanying sketches, saw three pieces of wood, 20 inches in length, 10 inches in breadth, and 1-6 of an inch in thickness; also two pieces of wood 10 inches in length, 10 ins. in breadth, and of the same thickness. Put these together in the form of a box, the longer pieco forming the bottom, back, and top, while the smaller pieces form the ends. Having done this, saw another piece of wood, 9 5-6 inches in breadth, 9 1-8 inches in height (still 1-6 of an inch in thickness). In tho centre of this cut, with a key-hole saw, a round hole 3 inches in diameter; one inch from the bottom bore four holes, each about ¾ of an inch in diameter. Fix this piece of wood as a partition in the centre of the cage, letting it touch the top, as the space at the bottom will be utilised for the sand-tray. Just below the centre hole fix a small shelf about ½ an inch wide, and at the top out a slit through which a piece of wood will be able to slide up and down as a door.

The next thing is to make a sand-tray. Saw a piece of wood 19 2-3 inches long and 9 5-6 inches wido, of 1-6 inch thickness. Now cut one piece of wood 19 2-3 inches long, and ½ inch wide, and two pieces of wood 9 5-6 inches long, and of the same width, and one piece of wood 19 2-3 inches long, and ¾ inch high. Fasten these first three pieces on the top of the tray at the edges, and the last pieco on the front; on the latter put two rings as handles. Now the rough work is done.



In the left hand partition, at 9½ inches from the top, and at the front edge, fasten a piece of wood firmly. In this also, at the top of the partition and sides, make holes for wires; if you prefer wire netting it will do almost as well. For the front of the right hand partition cut two pieces of wood 9½ inches long, 1-6 in. breadth, 1-6 in. height, and two pieces of wood 9 2-3 inches in length and of the same breadth and thickness as the previous ones. Arrange theso in the form of a rectangle, and fasten wires (or wire netting) on this, in the same manner as described above. Bore two small holes in the top and bottom of this. Put two nails in the bottom of the box, and two screws at the top. Wheu the front is put in fix the nails in the holes provided for them, and fix the screws also into their holes.

To make the seed pan, saw three pieces of wood, 6 inches by 2 inches, and 1-6 of an inch in thickness. For the ends saw two pieces of wood 5 inches long by 2 inches wide, with a 2-inch sloping piece cut off. Fasten these together, the first three pieces forming the bottom, top, and back, and the other two the ends. For the front, saw a piece of wood 6 inches long, ¾ of an inch in breadth, and 1-6 of an inch in thickness, and fasten this in front at the lower part. Bend two pieces of wire in the form of a right angle, one arm of each being 1¼ inches long, the other 1 inch. Drive the longer end of each ½ iuch into the wood at a point 1 inch from the bottom. These will serve to hold the seed pan on the side of the cage, one half being each side of the partition. The birds feed through two holes, one each side of the partition. There are also two holes for the waterpots. Buy the latter at a shop, as they cannot well be made.

Inside the right-haud part of the cage fasten a shelf (in the back right-hand coruer) for the nest, 3½ inches by 3½ inches, of 1-6 of an inch thick wood. Have this 4 inches from tho floor, and 1½ inches above it fix up a piece of wire to keep the nest from falling off the shelf.

Now the cage will be made, excepting the holder for the nesting material. To make this cut two triangular pieces of wood, 3 ins. by ½ inch along the edges. Unite these by wires 2 inches long, and fasten the rack on to the cage by the same means as the seed pan. Put three perches in the left-hand part, two from back to front, and oue in front of the food pans. In the right part place only one from back to front. Let the birds while breeding be kept as quiet as possible, and do not allow admiring crowds of relations to be continually watching the birds, for it will only cause trouble. Take the cock away directly all the eggs are laid if he shows any wish to intercfere with the nest and eggs, by removing him into the left-hand part, and shutting the door. The small holes in the partition are for the cock to feed the hen through, if removed. Put the nesting material in the holder intended for it, and keep it full until the nest is made.—A. F. Perrott (Bromley).

We regret to learn that Mr. A. Wellings, of Prescott, has been laid up for several days past, and unable to give his attention to business. He hopes, however, to leave his room in a few days, when correspondence will receive his attention.

The Dulwich and Peckham C. B. S. have fixed their first Feather Show for July 4th, Mr. J. Robson judging. The annual open show is fixed for October 17th and 18th. Judges engaged are Messrs. J. Robson, G. E. Weston and W. Vardy. Will secretaries please note and avoid clashing?—W. Hodson. Hon. Sec.

I noticed under the General Answers an enquiry for lantern slides of British and Foreign birds. I may say I have some excellent slides of several British birds, nests, and young, and shall be glad to send a list to "British and Foreign" if he will let me know his address.—S. Crook, 51, Garfield Road, Scarboro'.

A sample of "Noeggusei," the neatly-named mixture put on the market as a perfect food for Softbills, reaches us from E. Warren Vernon, Toddington, Beds., the sole agent. The ingredients of which this insectile food is composed are of a high quality, and it is well calculated to fulfil all that is claimed for it, and make an admirable diet for the insectivorous birds of all bird-lovers who prefer not to include egg in their dietary. It is sold in 1s. and 6d. packets, and only requires moistening for use.

RANDOM NOTES.

Already we have been favoured with one of those elusive spells of fine mild weather which are so apt to tempt a fancier to act against his better judgment. A few days ago even the wild birds seemed to think that Spring had come. The singing of the Thrushes especially was continuous. But now things are changed; the birds have fallen back into the silent mood, and the outlook appears very un-springlike. Our birds, caged and sheltered indoor, will go on singing; but the effect of the atmospheric changes will, slowly but surely, penetrate to them. Such lessons are useful, if acted upon.

Let a diet of good, sound canary seed form the staple for the breeding stock of Canaries. A scrap of bread-and-milk or a spoonful of egg-food, once or twice a week, with a pinch of hemp for the cocks and ditto of inga for the hens about as often, and a scrap of green food when available and safe to use, and apple or banaua at other times, is all that is required to keep the birds in good hard condition from now until the breeding season is about to commence. On such a regimen as this, it is rarely that one finds the birds drop into soft moult in early spring, or are troubled with that troublesome "swollen abdomen" one so often hears about.

Baths are a great aid to keeping the birds in a good healthy condition, but there is one point that must not be overlooked—they must be given regularly. A cold water douche at irregular intervals is anything but an exhilarating pastime, and during these changeable spring months the effect under these circumstances is frequently seen in colds, sneezing, and wheeziness on the part of the birds. Better withhold the bath altogether than give it irregularly.

The foregoing remarks about bathing will be found to apply with much greater force to newly-acquired Foreign birds, particularly if they appear in a low condition. In such cases a cold bath on a raw, chilly day will very often act as the last straw to despatch them whither no man or bird returneth; but a daily bath, to which just enough warm water is added to remove the icy chill, will help to bring them into good condition.

As a final tip, when you have a bird that bathes freely and then goes and sits still on its perch, apparently waiting for time to dry its feathers, withhold the bath if you value the bird. It is simply courting the dim hereafter. The bath should always be followed on the bird's part by a kind of restless activity and preening of feathers until they are sleek and dry, then there is little fear of any ill-effect.

How many fail to keep the family of Tits in cages or aviaries! The Great Tit and Blue Tit are among the most charming of pets, and become delightfully tame; so that with their beautiful plumage one would expect to find them quite a common cage bird. Doubtless the cause lies in not fully estimating their pugnacity. They must be caged alone, or in a very large or thinly-populated aviary. Wherever they have to rub elbows with companions their one idea is to "brain" the intruder. Another point that is apt to be overlooked is their roosting habit. Covered boxes, or nesting husks, such as are supplied to Budgerigars and other Foreign birds, must be provided for them to sleep in. To prevent squabbles see that there is an excess of sleeping boxes over birds, as Tits positively refuse to sleep "two in a bed."

The most serviceable, striking, yet tasteful and economical

LIVE BIRD LABELS

are those obtainable from "Cage Birds."

For the convenience of readers we have had printed a quantity of address labels suitable for use when despatching live birds on journeys by rail, etc. These are printed in red ink, on paper gummed at back, and

KING'S HEATH (Birmingham).

Third Annual Open Show held at Birmingham, Jan. 25th and 26th, as there was not a place in King's Heath large enough for this enterprising society's venture. Entries came up well; quality was good, and competition in the various classes very keen. Norwich and Yorkshires made a nice display, and British birds were excellent. In Mr. Forsyth the society has a most hard-working Secretary, who was backed up by a capable lot of stewards, and right well did they look after the welfare of the exhibits. As the day was bitterly cold, they went to the trouble of covering up all the cage birds at night, which was a great kindness on their part, and they well deserve the thanks of exhibitors. Mr. and Mrs. Austen Chamberlain graced the opening ceremony with their presence, which brought together a large assembly. Mr. A. Chamberlain, in declaring the show open, said he was very glad to know that in a short career the society had held already some of the most successful shows in the Midlands, and he felt he was right in saying that on this occasion the society had beaten all previous records. He hoped it would excel its past achievements, and maintain its high standard of excellence. Councillor Davison moved a vote of thanks to the distinguished visitors. A pretty ceremony followed, when Miss Forsyth, the four-year-old niece of the Secretary, presented Mrs. Chamberlain with a lovely yellow Yorkshire Canary in a handsome artistic brass cage. Mr. G. E. Russell judged.

NOR. (8): 1, 2, sp, Shaw, yell. and buff in order named, hot, level colour, rare size and shape, wins well, second, nice head and chest, good back and wing carriage, two grand exhibits; 3, Lees, very nice yell., good colour and carriage, rather on small side; r, Miss Hopton, yell., nice head and neck, longer in wings and tail; vhc, hc, Athersuch and Son, two good birds. YORKS. TKD. or UNEVEN (12): 1, Richardson, clear yell., grand length and position, well up on leg, straight as a gun-barrel; 2, Burke, very fine Cinn. tkd., good length, nice back and wing carriage, little open in tail; 3, Churchill, buff, of good stylo and position, nice feather, deserves its place; r, Allen; vhc, Paddock; hc, Mole; c, Collier. BUFF (9): 1, 3, challenge cup best Canary in show, Paddock, grand clear buff leading, good stand and style, feathered like boxwood, third, grand Cinn. tick, of good length, style, and position, nice colour, grand feather, both shown to perfection; 3, Churchill, clear buff, of good shape, nice wings and tail, well up on leg; r, Burke; vhc, Mole; hc, Wells; c, Richardson. HENS (7): 1, sp, Churchill, grand hen, good colour, neat head, fair length, nice stylo, well shown; 2, 3, Paddock, leader clear buff, rare length and stand, well up on leg, good colour and condition, third, grizzle cap buff, nice size and feather, carries tail badly; vhc, Burke; hc, Wells; c, Edmundson. A. V. CAN. or MULE (8): 1, sp, Smith, var., dark, very large crest, neat centre and droop, plenty of feather, wins; 2, r, Hall, two very nice var. Goldie-Mules; 3, Wells, grand Linnet-Mule, good colour, nice sizo, well put down; vhc, Lees, the well-known lightly-marked Linnet-Mule, could have been third easily without a doubt; c, Miss Hopton. NOVICE A. V. (12). Very nice class: 1, Smith, var., dark, very large crest, good droop, nice feather; 2, Miss Hopton, very deccut Nor. Plainhead; 3, Garfield, yell. Nor.; r, Miss Blagg; hc, Garfield; vhc, Donkin; c, Wells. BRIT. HARD (13): 1, Hingley, grand Hawfinch, nice bib. good condition, wins well; 2, Edmundson, Bullfinch, good cap and wing bars, grand breast colour, good size, shown to perfection; 3, Wells. Goldfinch, grand square cut blaze, good buttons and bars, nicely shown; r, Lissiman; vhc, hc, Raven; c, Burrows. SOFT (8): 1, sp, Burrows, very good Ring Ousel, in good feather and condition, well shown, plenty of polish; 2, Hingley, grand Tree Creeper, nice tail, which is a rarity with these birds; 3, r, Raven, noted Blackbird and Waxwing in order named; vhc, hc, Jones and Bradley; c, Machin. SELL., 10s. (10): 1, 2, Paddock; 3, Wells; r, Jones and Bradley; vhc, Smith; hc, Shaw; c, Athersuch and Son.

SHIPLEY O.S.

A Members' Show and Cinnamon Mark Club Show was held January 12th, at Victoria Hotel. Judge, Mr. J. Greaves. YELL. CINN. MARK COCKS (13): 1, c, Wilcock; 2, Sutcliffe and Son; 3, hc, Ogden Bros.; 4, special for best, Wharton; vhc, Alderson. BUFF (11): 1, 2, Denton; 3, Wilcock; 4, c, Dobson; vhc, Hirst; hc, J. and A. Halmshaw. YELLOW HENS (11): 1 Sutcliffe and Son; 2, Hartley; 3, Ogden Bros.; 4, vhc, Cook and Son; hc, Dobson; c, Wharton. BUFF HENS (8): 1, 3, Sutcliffe and Son; 2, Hartley; 4, spl, Ogden Bros.; vhc, Hirst; hc, Cook and Son; c, Battershy. SPECIAL WINNERS: Sutcliffe and Son, Ogden Bros., Denton, Wharton, Wilcock. MEMBERS, CL. YELL. YORKS: 1, Sowden; 2, Marsden; 3, Long. BUFF: 1, Marsden; 2, Bradshaw; 3, Sowden; vhc, Stubbs. TICK, ETC., YELL.: 1, Marsden; 2, Towers; 3, Sowden; vhc, Bradshaw. BUFF: 1, Dobson; 2, Marsden; 3, Mason; vhc, Batty. YELL.: 1, Bradshaw; 2, Sowden; 3, Long; vhc, Mason; hc, Batty; c, Towers. BUFF: 1, spl, Marsden; 2, Mason; 3, Stubbs; vhc, Whitaker; hc, Crossland; c, Marsden. CINN. MARK COCKS: 1, 2, vhc, Dobson; 3, hc, c, Sowden. HENS: 1, Marsden, 2, 3, Dobson. YORKS., STOCK BIRDS: 1, Marsden; 2, Long; 3, Sowden; vhc, Dobson. YELL. UNFLI. YORKS.: 1, spl, Towers; 2, Hudson; 3, Mason; vhc, Dobson; hc, Long; c, Crossland. BUFF: 1, Dobson; 2, 3, Mason; vhc, Bradshaw; hc, Marsden; c, Long. SELL., COCKS: 1, Mason; 2, Sowden; 3, Bradshaw; vhc, Batty; hc, Dobson; c, Marsden. HENS: 1, Long; 2, Batty; 3, Sowden. Special winners for members:—Cup, Dobson; 2, Marsden; 3, Towers; 4, Hudson; 5, Mason; 6, first for Novico special, Bradshaw; 7, Sowden; 8, second for Novice special, Stubbs.

YORKSHIRE GREEN.

Round or Square, Which?

SIR,—In the report of the Liverpool B.B.A., published in your magnificent Birthday number, it is stated that the Association decided to "exonerate all members who were disqualified at the old show by Mr. Mundell, for having trimmed or cut the feathers on Green Birds, such feathers known as square feathers. The members are satisfied the birds were honestly shown, and that the square feathers are a natural growth on Green Birds."

In your issue of December 1st, there appeared the report of the show at which these birds were disqualified. The same issue also contained letters from Messrs. V. H. Deacon and C. Houlton. The former gentleman was one of those who suffered disqualification. He denies his bird was trimmed, and, further, says he does not know what square feather means. He also speaks of Mr. Houlton as a specialist in Greens. I know nothing about Mr. Deacon's own experience, but this is the first occasion I have known Mr. Houlton, whose abilities in other directions are indisputable, and generally acknowledged, put forward as an authority on Greens.

Mr. Houlton, in his letter, speaks of Mr. Mundell being persuaded that these birds were clipped. Mr. Houlton, although insinuating by his letter that Mr. Mundell was wrong, does not actually say so. He, however, does speak of "supposed clipped feathers" being put under "a very powerful magnifying glass." Yet, strange to say, he does not give us the result of his examination. As an old lover of Greens, I would like to put a few facts before your readers in connection with the breed, and you, Sir, from my card, will see that my acquaintance with Greens is not that of a day, or a year, but goes back into the old Rooney days, when Greens were as big and clumsy as Lancashires, and were bred and judged for colour only.

Before doing so, I should like, first of all, to say a word about Mr. Mundell. He is no stranger to me. I have known him many years as an exhibitor and judge; and others who know him well will, I am sure, agree with me that Mr. Mundell was absolutely certain in his own mind that these birds were clipped. Mr. Mundell is by no means a sensationalist. He is too fond of peace and quietness to disqualify birds, except upon the most clear and palpable evidence. The very fact that Mr. Mundell disqualified these birds is full proof to me that the disqualification was, in his opinion, honest and just, and it is hard to believe such a great expert does not know the difference between a cut feather and a natural one. Further, as an expert upon Greens, I think ninety-nine men out of a hundred would prefer his views to those of Mr. Houlton, who, however, is an undoubted authority on British Birds and Mules.

In the old days of what were known as Liverpool Greens, we never heard of any disqualifications for clipped backs. The first occasion upon which Greens were disqualified on account of these square feathers on the back was, I believe, at a show held in the Wellington Hotel, Liverpool, and which was organised by the old Liverpool society, of which Mr. Galloway, the late secretary of the Crest Club, was secretary. It was the year after the Green Club was formed, and speaking from memory, about fourteen or fifteen years ago. Mr. C. A. House was the judge, and something like a sensation was caused when it was found he had disqualified a number of young birds for having clipped backs. Mr. J. Bexson was the other judge at the show, and he agreed with Mr. House as to the cutting. Mr. House subsequently disqualified Greens at several shows, one very notable occasion being the Club Show of the Green Canary Club, held at the Prince of Wales' Hotel. Mr. Bexson also, afterwards, disqualified some of these square-feathered birds; then, at Pendleton, on one occasion Mr. A. Wellings disqualified some more. Now is it likely that such men would disqualify birds for having feathers cut unless those feathers were cut? These square-feathered Greens are no new thing.

In connection with this particular incident, I would draw your readers' attention to the fact that the birds disqualified by Mr. Mundell were young birds. It is well-known to all who have ever bred Greens that in the first moult many of the birds come with the tip of the feather bronzed; especially is this so when the blood of the Cinnamon is strong in their veins. This bronze disappears with the first adult moult, and such birds are then the most vivid green. This bronze is a detriment to many a good bird, and when these bronze edges are taken off, the feathers look a totally different colour. I have bred Greens, but I never bred a square-feathered one yet. I have bred nearly every variety of Canary known to the show bench, and never yet have I bred a square-feathered bird. I have kept many kinds of British and Foreign Birds, and have handled thousands of others, but never once have I seen a natural square feather.

In connection with this matter, there are two or three questions which present themselves to my mind:—

1. Is it not strange that these square-feathered Greens are usually young birds?
2. Is it not strange that Green (Yorkshire Greens only) Canaries should be the only members of the feathered tribe to have square feathers?
3. Is it not strange that these square feathers come on just that part of the Green Canary where it is most desirable the depth of colour should be intense?
4. Is it not strange that they come where others are often found with the bronze edge?
5. Is it not strange that these disqualified Greens all come from the Liverpool district?—LANCASHIRE LAD.

DISQUALIFIED GREENS AT LIVERPOOL B.B.A. LATE SHOW.

SIR,—I notice a resolution passed by the Liverpool B.B.A. at a meeting held on January 10th, exonerating all members who were disqualified at the old show for having "trimmed" or "cut" the feathers on Green birds, such feathers known as square feathers. It appears to be a well-established fact that these greens have running through most, if not all, of the breeders' stocks of green Canaries these so-called green feathers. In answer to a sufferer smarting under the disqualification, I apologise for not having had time to answer him sooner. I found the feathers taken home out of some of the disqualified birds by me, by request of the exhibitors and others, that these feathers—most of them, but not all—have a square tendency, but the fibre at the extreme tips appears to terminate gradually, and not abruptly, or thick and bluntly. I should think most of the Yorks greens on view at this Show possessed these characteristic feathers, and I am of opinion that they are quite natural to them. I thought this theory on Yorks greens was exploded and threshed out long ago. What does our Green expert say?—CHAS. HOULTON.

INTERNATIONAL BORDER FANCY CONTEST.

SIR,—Mr. Brownlie's letter opens up a subject well worthy of discussion and arrangement between the E. and W.B.C. and the B.F.C., with a view to coming to some modus operandi in the future as to meeting the general convenience for these, I hope, annual contests. Several things have, however, to be considered, the first and most important being the incidence of the Christmas holiday, which practically extends in England from Dec. 25th to Jan. 1st. For nearly all that period railway traffic is dislocated. Add to this, terrifically arctic conditions of weather, such as obtained this year, and I think a very good explanation is to be found for the paucity of entries made by E. and W.B.C. members at Edinburgh. The conditions in Scotland are almost the reverse, as a rule, for only in recent years has the Christmas festival been observed at all, and railway traffic is seldom interfered with, except in its relation to English connections; so that what answers very well in Scotland (in fact, fits in admirably with local conditions) makes for the very reverse when applied to England. The moral of all this is that the risks are too great, all things considered, for Southern fanciers to send their specimens on a journey of hundreds of miles, necessitating an absence from home for quite a week, at the most inclement season of the year. Even in Scotland, this year, numerous non-deliveries of birds sent away in good time are reported, Fife, Forfar, and Aberdeen, and places further north being cut off from Edinburgh for days together in some instances. This brings me to the reason of my letter. Cannot a more suitable date be fixed? I mean one more convenient to Southern exhibitors; and in return, the convenience of Scottish fanciers should be met when fixing the venue and date of the contest when it takes place in England. Personally I intended making four entries, but knowing something of the conditions of weather, of which premonitory symptoms were apparent in Lancashire, I came to the conclusion that wisdom lay in missing the show altogether, as I should on no account risk my best birds, and anything short of the very best would have little chance of getting even a ticket when competing on their own ground with the Scottish Border Fancies. Probably my view may have been that of many others; at any rate, I give it for what it is worth, and if my screed helps to a better arrangement in the future, I am of opinion that our Scottish friends will not have the virtual "walk-over" they enjoyed at the great National this year.—J. S. CLINOH.

MOVEABLE PERCHES.

SIR,—If J.E.D. will send me his address I will make and send him one that he can take out with ease—also from same he could make more for himself.—JOHN KAY, 18, Elliscombe Road, Charlton, Kent.

CLAIMED, THOUGH ABSENT!

An Extraordinary Case.

SIR,—I entered a bird at a certain show away, but owing to the rough weather setting in, I did not send it. The next day after the show, I received a post-card to say that my bird had been claimed at catalogue price. Can you, or any reader, tell me whether it is compulsory for me to send the bird?—A.W. (Norwich).

PROPOSED TESTIMONIAL TO Mr. LECLAIR, HON. SEC. S.N.C.C.

SIR,—Having received several letters from members, asking if I would undertake to collect subscriptions, I shall be most pleased to do so. Mr. Baker, of Cowes, has started the list (which is now open) with 10s. 6d., and I shall be pleased to follow with the same amount. Donations, however small, will be gratefully received, and, with your kind permission, Mr. Editor, acknowledged weekly. The list will be closed on Feb. 12th.—W. R. MILES, Aviaries, Chichester.

COVENTRY F. & F. S. SHOW.

SIR,—I was surprised on opening CAGE BIRDS this week to find that you had published my letter re Coventry Show. I wired you on January 1st, 1907, not to publish same, as I had received the catalogue and fees back. Kindly publish this in your next issue, as undoubtedly the letter will be detrimental to the above show next season.—J. H. JONES.

[The wire referred to by Mr. J. H. Jones cannot now be traced, but we would remind him and other correspondents that letters once set up in type by us can only be destroyed at the correspondent's expense. A fee of sixpence for each inch of matter so distributed is chargeable.—ED. "C. B"]

EXCURSIONS TO PALACE SHOW.

SIR,—Up to date I have particulars of the following. I hope to be able to announce others next week:—South-Eastern and Chatham: Usual week-end trips. South Coast Railway: Usual week-end trips and a special cheap excursion from Portsmouth district on Monday, Feb. 18th. Great Central: Day trip, 2, 3, 4, 5, 6-day trips from Liverpool, Southport, Wigan, Chester and Stockport districts on Saturday, Feb. 16th; half-day, day, and 2 or 3-day trips from Rugby on Saturday, Feb. 16th; half-day, day, or 2, 3, 5, 6 or 8-day trips from Nottingham and Leicester districts on Saturday, Feb. 16th. London and South-Western Railway: Half-day trip from Reading, Saturday, 16th; week-end trip from Weymouth, Dorchester and Salisbury on Friday, 15th, and Saturday, 16th; day trip from Aldershot, Monday, 18th; day trips from Bagshot, Camberley and Frimley, Monday, 18th; trips from Southampton, Eastleigh and Winchester on Friday and Saturday, 15th and 16th. Great Northern Railway: One to eight-day trip from Sheffield, Worksop, Melton Mowbray and Leicester districts on Saturday, 16th; One to eight-day trips, Grantham to Peterboro' Stations, on Saturday, 16th; half and one-day trips, Huntingdon, St. Neots and Biggleswade districts, Saturday, 16th; half and one-day trips, Hitchin to Harpenden districts, Saturday, 16th; half, 1, 2, or 3-day trips, Royston, Hertford, Dunstable, St. Albans and Hatfield districts, Saturday, 16th; half, 1, 2, 3, 5, or 8-day trips from Derby, Ilkeston and Nottingham districts on Saturday, 16th. For times, see small bills at stations.—J. W. RAMSDEN.

SIR,—A movement is on foot in Liverpool and District to get up a saloon party for the great National Show at the Crystal Palace in February, 1907. Will all fanciers who intend going please communicate with the Secretary of the Green Canary Association at once, so that complete arrangements can be made? The party will leave Liverpool Central on Friday night, Feb. 15th, and leave London (St. Pancras) on Saturday night, the 16th. It is hoped a good number will send in their names, so that a comfortable saloon can be engaged. Fare, 11s. or 12s. from Liverpool.—S. HADWIN, 23, Pembroke Place, Liverpool.

LANCASHIRES AT THE CRYSTAL PALACE SHOW.

SIR,—I was indeed very pleased to see the earnest appeal from the Secretaries of both the L. and L.F.A., also Lancashire Canary Association, asking their members to support the Palace Show with their entries. As Mr. Oliver says, we have a splendid judge in Mr. S. R. Compston. Find him plenty to do, and let the Palace Show of 1907 be a record one for both Lancashires and Lizards, and give fanciers down South a treat. I hope to be at the Palace Show all four days, and will pay special and personal attention to the Lancashire classes.—F. J. GREEN.

P.S.—I find the novice members of the Lancashire Canary Association are without a special. I will, therefore, give an L. and P.O.S. silver medal to the novice member of the L.C.A. gaining most points in Lancashire classes at the Palace.—F.J.G.

AN EXTRAORDINARY EPIDEMIC.

Border with Broken Mandible.

SIR,—I have had a young Border cock in my possession, as W. F. H.'s friend had, with half of upper mandible broken off, leaving yellow mark where breakage took place. This happened a month ago, and the beak is now almost grown full length again. Bird has been in full song during the time, and has been dieted same as other birds, and no remedies applied.—G. MEEKLEY.

FORRES SHOW.

SIR,—Mr. McAlpine admits he made a silly arrangement of his views, and I quite agree with him. His explanation was equally silly. The bait he alludes to must have been a complicated affair, as I utterly failed to understand it, which no doubt I must attribute to my utter lack of wisdom, seeing that it has all departed from the East, no doubt to settle firmly in the West, though, somehow, your correspondent seems to have missed his share. I will not try to explain further. I find I am totally inadequate to respond to Mr. McAlpine's learned remarks. I will conclude by wishing him luck with his Norwich-cum-Yorks.—DAVID ROSS.

GREENFINCHES AT BATHGATE.

SIR,—In your report of Bathgate, re Greenfinch class, No. 28, 1st and 2nd Bald, your report says:—3rd, Howe, the Old Bathgate champion, winner of more honours than any Greenie living. I am willing to challenge this statement. My old Greenie, which has been on the carpet since 1901—the time of the great Roberts and Laing's (Whitburn) two champions—has won more honours than the bird referred to up till that date, and is still alive and kicking, and is likely to win more if he lasts to next show season. He is always improving every year (for example, 2nd Glasgow in 1905 and 1st at Glasgow in 1906). Thanking you for the grand report of the remainder of our Show.—R. BALD, Secretary, Bathgate C.B.S.

CANARY WITH AN EYE FOR GOLD.

SIR,—A certain working man, who resides at Woodland, in the County of Durham, is the owner of a cock Canary which seems to have a good eye for gold. The other week its owner had three sovereigns, which he desired to hide, in case anyone else in the household should happen to run short during the past holidays and should take a fancy to them. He scarcely knew where to put them for safety while he was at his work, until he thought he could trust the Canary; so he forthwith took down the hanging cage and, unknown to anyone, he put the three sovereigns on the cage bottom and covered them well over with sand and seed. This done, he went to work with an easy mind. He little knew what an inquisitive Canary he had, as, during his absence, when several members of his family were in the kitchen, they heard several jinks coming from the direction of "Dicky's" cage, and they commenced to watch its antics. Dicky rose from the cage bottom on to a perch with a sovereign in its beak, and then dropped it on to another on the cage bottom. Then down it hopped again, and repeated the performance several times. The cage was then taken down and the three sovereigns exposed to view. Needless to say, when the master returned from work he was very much surprised, and said it was a strange thing that he couldn't even trust the Canary with a secret. (P.S.—I expect to hear of it playing pitch and toss next.).—LUCKY DURHAM.

A BIRDY ART GALLERY.
Mrs. Alice Beach (Chorlton-cum-Hardy) had our Coloured Plate, "Stars of the Season," framed the same day as received and hung up in her husband's bird room.

LINNET SINGING CHALLENGE.

SIR,—The Linnet fanciers will leave it to you, Mr. Allen, whether it is fair or unfair, for you to refer to the paper for your judges, as on quality singing there are as good judges in Leeds as in any other town in England. Why should any man enter his bird in a contest if he thinks there are no fair judges in Leeds? I am willing to match myself to judge 10 to 15 proud birds and to name the notes that each bird does after the contest, either in Leeds or out of Leeds, and nobody barred. Mr. Whittaker is willing to sing any bird in Yorkshire from £1 up to £50, for to pick a judge each in Leeds, and is willing to sing in any house in Leeds, 10 minutes' sing, and nobody barred. I hope that Mr. Whittaker and Mr. Allen will come to terms and have a sing, and then it will stop all the paper talk.—J. CLARK ("The original Linnet king").

A challenge has been sent up to CAGE BIRDS for my bird to sing any Linnet in Leeds, but a little mistake has crept into the challenge. It should be any Linnet in Leeds bar Harry Allen's.—C. WHITTAKER, 33, Bank Farm Street, Cross Lane, Leeds.

SIR,—I am asked by our members to reply to Mr. Allen's challenge in your last week's CAGE BIRDS. We should like to know why Mr. Allen asks the Editor of CAGE BIRDS to select judges for the match, when he knows as well as I do that the best place to find judges is his native city, Leeds, which I think is the depot of England for quality, Linnet-singing judges? I may point out to all whom it may concern that when Mr. Allen was awarded three prizes at the King's Head, with qualified judges, anyone would think it would be a likely place for the match to take place. I am asked to state that Mr. Allen has not frightened Mr. Whittaker, nor yet his friends, who are willing to match Whittaker's bird, on any reasonable terms, for as much money as Mr. Allen can find—each man pick his own judge; match to take place in Leeds at the likeliest house, which is the old King's Head, Shannon Street, the best window in Leeds for the purpose.—J. MELIA.

ABOUT A SPECIAL PRIZE AT CHELTENHAM SHOW.

SIR,—My attention has been called to a letter to your paper signed Summerhill and Dawes, which doubtless has been read by your subscribers. There are a large number of tradespeople who offer special prizes at our Cage Bird Show. The special in question—"a knife"—was offered by a tradesman who has since gone abroad, and his wife declines to give the special, pleading "that she cannot afford it." That Messrs. Summerhill and Dawes should lose the special we all deplore, but that there is a cause of complaint against the society, who have fulfilled all their obligations, we deny. We have done all we can, although outside our province, to obtain the special, and contend that the remedy is against the donor, and that the complaint against the society is not justified. If Messrs. Summerhill and Dawes shirk the trouble of taking the necessary steps to recover the special from the donor, the fault is theirs, and no blame can attach to the society. Although we had a loss of £7 on our last show, every prize was paid, every bird reached its owner without a single mistake that we have heard of, and scores of congratulatory letters have been received by the Hon. Secretary, Mr. Treasure, on the good management—a fact that can be endorsed by the large number of influential fanciers who attended the show. I may add that our society possesses one of the best bodies of working fanciers in England, and that at the show every care and attention ar bestowed on the exhibits.—T. J. KING, President of the Cheltenham Cage Bird Society.

[The Courts have ruled that committees are responsible for all special prizes offered in their schedules, whether purporting to come from private donors or the society. We fear, therefore, that the onus of recovering the prize in question from the donor does not fall upon the successful exhibitors, but upon the executive. This should be of interest to other committees.—ED. "C. B."]

SIR,—With respect to Messrs. Summerhill and Dawes' letter, to suggest that they (Messrs. S. and D.) were "decoyed by such specious advertisements" is mere childish prattle, as their entries would have been made in any case, irrespective of the matter of the knife, and I hope that Mr. Treasure and the Cheltenham Cage Bird Society will not look upon these people as being a fair sample of the members constituting the City of Birmingham Cage Bird Society. I suggest to Messrs. Summerhill and Dawes, and particularly Mr. Dawes, that the loss of the Scotch Fancy cup at the late Birmingham Show has somewhat upset their mental equilibrium, which has not been restored even by winning the cuff links. Come, come, Mr. Dawes.—HONI SOIT, etc., etc.

[A certain sentence in the above letter, reflecting upon our Editorial judgment for inserting Messrs. Summerhill and Dawes' letter, has been blue pencilled. The columns of CAGE BIRDS, we may remind "HONI SOIT, etc.," are open to anyone with a legitimate grievance, and even the very high esteem in which we hold the Cheltenham C.B.S. and its officials will not lead us into stifling criticism on their behalf, nor would they, we feel sure, desire us to do so.—ED. "C. B."]

WHY SHOWS ARE FAILURES.

SIR,—At the late Coventry Show, held December 27th, I made an entry in class 66 with four entries in class; but I presume, owing to the rough weather, only my exhibit turned up, and the judge awarded it second prize, which well satisfied me until I got my prize-money, and found they had actually sent half prize-money, 2s. 6d. Now this is where the shoe pinches. They receive 6s. in entry fees; I pay 1s. 6d. entry and pay 1s. 2d. carriage. Result: I am 3d. out of pocket, and Coventry Society 3s. 6d. in pocket on the class. Now for another experience of mine this show season. I sent two entries to St. Albans, in Norwich—one entry in buff cocks, one entry yellow hens. Judge of my surprise on reading report in CAGE BIRDS when I saw they had the conscience to jumble them all 27 in one class, and, further, my birds arrived home two days after close of show, after me having three journeys to station, of a mile and a half each way, and waiting till midnight on the first day after show. Both of these shows were held under C. B. Union rules, which promise us poor exhibitors so much in the shape of prompt dispatch of exhibits from shows, etc.; and I would like to know from some one on the Committee, or the Secretary, if they can do anything for me to get the balance of my prize-money from Coventry. In conclusion, I may say I have been an exhibitor for the last 10 years, but have never had such treatment from show committees as this season, and could write you a few more approaching above; but enough at present.—S. WOOTTON.

"OWD BRIDY."

SIR,—With the advent of a Cage Bird Press, and the enormous strides that have been made for the exhibition of our feathered pets, the old time type of bird fancier is fast disappearing. Conservative he was to a degree, and any feeding or moulting secret that he knew, wild horses would not have dragged it from him. How different is the state of things in the Fancy now, and I wonder what some of the bygone fanciers would think if they could see their cherished methods discovered by experience, improved upon, and imparted, through the columns of CAGE BIRDS, for the benefit of all and sundry. However, we have means to hand which they never enjoyed, and we must not forget that, placed in their position, and with their lack of facilities, we should have been exactly the same, neither better nor worse. One of the old stamp that I knew was just a little bit freer than the general run of the old bird men, although I had very often to try his advice before I knew if he was joking or not. "Owd Bridy" (Old Birdy) was the name he went by, for even now the North Staffordshire dialect name for bird is "brid." No man now ever deserved a birdy name more than he did, for no man liked to have them about him better than Bridy. Although all and any sort he would keep, Linnets and Goldfinches were his special favourites. Not that the old chap ever knew that he kept Goldfinches; it was an unheard-of name in those days, and there are still many fanciers who do not recognise their favourite "Red Linnet" under the name of Goldfinch. Consequently, Bridy's birds were described as Brown-'uns and Red-'uns, and he always kept the best. He did his own recruiting, and you might have met him on a Sunday morning with a favourite call bird, in a small cage, under his arm. He never took a net, to my knowledge, but always relied upon bird-lime. He must have had rare luck, for you could always depend upon having something worth listening to, whenever your steps led you in the direction of Bridy's cottage. The old man believed in keeping Linnets with Goldfinches, not in the same cages, but to sing in opposition to each other, maintaining that the different pitch of their voices caused them to sing with more gusto than when opposed Linnet to Linnet, or Goldie to Goldie. I have never thoroughly tested the old man's theory, but the combination is one which I am very fond of. I remember in particular an old Throstle which he kept at one time. What the Throstle's singing qualities were I never had a chance to judge, but he was noticeable from the fact that he was as devoid of feathers as the proverbial toad. He looked as though the whole curse of Rheims had been directed at and settled upon him. On my making enquiries as to the reason of his dilapidated condition, the old man informed me, without the semblance of a smile, that a few nights previous he had intended making his supper of pea soup, and for that purpose had placed a large saucepanful to boil upon the kitchen fire. Having cause to leave the kitchen for a while, he informed me, upon his return he found that the Throstle had escaped from his cage, and was perched upon the rim of the saucepan, engaged in pecking out the peas as fast as they rose to the top of the boiling soup, a feat to which Bridy accounted the loss of his (the Throstle's) feathers and claws. Owd Bridy did not always have things his own way, and some of the fellows played a joke upon him when they heard that he had come into possession of a gun. They informed the old man that a rare bird had been seen in the village, and promised to send for him should it make its reappearance. Next day saw the old man, surrounded by a group of villagers, in deadly pursuit of a bird about the size of a Sparrow, but with the comb and wattles of a fair-sized barnyard rooster. "It was a 'furriner,'" the old man said, "which had escaped from some gentleman's aviaries." After a long and stern chase, and the running up of a bill for damaged windows, the old man laid it low. Amid breatheless silence the bird was retrieved, and upon examination proved to be an ordinary sparrow, with a comb and wattles of red flannel, waxed on with shoemaker's wax.—B.J.

THE NIGHTJAR'S SCREAMING.

SIR,—I thought it would interest some of your readers to let them know the impression left on my mind the first time I heard the Nightjar. I had been staying in a small village in Northumberland for a holiday of three months. Our house stood away from the village, and one night in August, after going to bed, I was awakened by an awful sound. It seemed to me like the cry of someone in great distress. It was so curdling that I felt quite afraid, and aroused my cousin and told her I thought there was someone needing help. She listened; the sound came again. Then she told me I need not be afraid, as it was only the Goatsucker bleating! "We shall hear him for a week or two," she added, "and you will get used to his sorrowing.—Miss A. BROWN (Sunderland).

(Correspondence continued on next page.)

THE CHAFFINCH PROBLEM.
Suggested Aerial Coition.

SIR,—With reference to Chaffinch breeding in captivity, I tried to pair cock Chaffinch to hen Canary for two seasons without success. The following season, cock Canary and hen Chaffinch; same result—clear eggs. But, having studied Chaffinches in their wild state since, I have come to the conclusion that the eggs are fertilised while the pair are in flight together. Thanking you for the treat I had in Birthday Number.—MARTIN COOK.

BEAUTY, CONDITION, RARITY, WHICH?

SIR,—I have often wondered what is the guiding principle in the judging of British birds, for the awards at the different shows are very contradictory. At one show we see the preference given to birds of the most brilliant plumage, at another to those which show that their owners have exercised much care and skill in putting them on the bench in the finest condition possible; whilst at some we see the rarest birds selected, irrespective of beauty or condition. I do think that the judging of British birds is a subject which might be profitably discussed now that the show season is waning.—TOM TIT.

C.B. SOCIETY WANTED IN DONCASTER.

SIR,—May I ask through CAGE BIRDS if there is any prospect of starting a Cage Bird Society in Doncaster and district? I should be glad to hear from anyone desirous of making a start. It does seem a pity that there should not be one at a town like this.—GEO. STOCKS, 44, Bentley Road, Doncaster.

BRITISH BIRDS IN AMERICA.

SIR,—Having read in CAGE BIRDS (Jan. 5th) of two brother fanciers who wished to know about keeping British birds in America, will you allow me to say through your columns that I should be pleased to communicate with any brother fanciers living in or near New York, at the address below? I have several British birds which are in full song.—GEORGE HOOPER, 63, Park Hill Avenue, Yonkers, New York, U.S.A.

A CAGE BIRD SOCIETY FOR EXETER AND DISTRICT.

SIR,—Allow me to introduce to you another first feather Society, with the above designation. Having been amalgamated for some years with the Devon and Exeter Society of Poultry, Pigeons, etc., some 30 cage bird fanciers met, and considered the desirability of paddling their own canoe. The result has been most gratifying to the one or two promoters: our first meeting taking place on the 15th of January, and to-day we have some 43 members. This, I think, Sir, will be significant evidence of the need of a separate organisation to promote and encourage the Cage Bird Fancy in this district. Our radius is 20 miles, and we look forward to be able to embrace all, young and old, in that area, by the means of holding lectures (open to discussion) on the many varieties; first feather shows; mutual advice one to another; and by this means endeavour to build up a society second only to our "mother" at Plymouth, which has made such rapid strides. The under-named would be glad to hear from any fancier in the district mentioned who would like to join us.—R. H. FOLLEY, 2,8 Rosebury Road, Exeter.

THE SECRETARYSHIP OF THE GREEN CANARY ASSOCIATION.

SIR,—The majority of fanciers are aware that the stronghold of the green Canary is Liverpool, and that the pioneer of that Fancy is Mr. Hadwin, the worthy Secretary of the Green Canary Association, who has for years, with untiring energy, done everything in his power to promote this particular bird. The supporters of the same know that the green Canary would not hold the place it does in the Canary world if it had not been for the perseverance of Mr. Hadwin. What are his thanks? There are one or two (and I'm proud to say only one or two) who are trying their level best to unseat Mr. Hadwin from the position of Secretary and give it to another. Now I am writing this for the benefit of all who are members of the Green Canary Association. If they lose their present Secretary, they will find before long that their beloved Green will soon lose the favour and patronage that it has at the present time. Perhaps there are other fanciers who can give more information as to Sam Hadwin's connection with the "Green Canary" than.—I. C.

An admirable Food of the
EPPS'S
Finest quality and flavour.
COCOA
Nutritious and Economical.

THE CANARY-BULLIE HYBRID AT LLANDILO SHOW.

SIR,—I should esteem it a favour if you would grant me space in your valuable paper to say that I bred the Canary-Bullie that Mr. Wasley showed at Llandilo Show on Jan. 17th. It was bred with a large green Crestbred cock Canary and hen Bullfinch. I had no Greenfinch-Bullfinch eggs, neither had the Bullfinch been flying with a Greenfinch, so it is impossible for it to be a Greenfinch-Bullfinch, or anything else but the Canary-Bullie.—(Mrs.) K. HUNT.

BO'NESS SHOW.

SIR,—In reply to Mr. J. C. Watt's letter, re missing Twite at Bo'ness, I think I can throw still more light on this matter. I defy him to say he has not got his right Twite. His Twite was sent to Mr. Craig, of Glasgow, in error; but immediately the error was discovered I wrote Mr. Craig to send it on to its rightful owner, Mr. Watt, who wrote to Mr. Craig saying he got his Twite all right; so how can he say truthfully he has not got it? Re printer's error in our catalogue, this is so, as in our catalogue Mr. Craig was No. 9, when it should have been No. 10, which he himself can testify, and Mr. Watt well knows his was No. 11. I can let anyone see from my book that there is an error with the printer. No. 10 was first, which was Mr. Craig's, of Glasgow, although, through this printer's error, No. 10 on our catalogue was Mr. Watt at £2, when it should have read "No. 10, Mr. Craig at £3." Mr. Livingstone, of Bathgate, claimed "No. 10, Watt at £2," according to catalogue; but on discovering the error I immediately acquainted Mr. Livingstone of it, telling him he would have to pay another 20s. if he wanted the Twite, and he, gentleman-like, said he would return Mr. Craig's Twite. This explains that part of Mr. Watt's letter about returning the Twite to Glasgow the next day. Then, after Mr. Livingstone had reconsidered it, he again wrote me saying he was keeping the Twite and had sent on the extra 20s. to Mr. Craig. I will leave Mr. Livingstone and Mr. Craig to testify whether the above is the truth or not. In my opinion, this matter is quite cleared up. Mr. Watt, besides getting his Twite, seems to want the £2, also the prize-money it never won. Re Mr. Watt's remarks, "It is always something to feed"—well, he surely means someone to pay dear enough for this "something to feed," as I see in last week's issue of CAGE BIRDS he has the Twite he has been showing advertised at 20s. This itself testifies he has got his Twite. I explained all this fully to Mr. Watt already, but he seems slow to understand, or perhaps he did not want to.—FINDLAY MCGILLIVRAY, Secretary.

[This matter may now well close.—ED. "C. B."]

THE CLASSIFICATION OF YORKSHIRES.

SIR,—I am indebted to Mr. Crawhall for his reply to my letter. I note he presumes my remarks apply chiefly to the North-Western portion of England. My remarks regarding poor support do apply to this portion of England, but not my remarks upon classification. I think few Yorkshire fanciers can find much to complain of in the classification given by societies in this county (Cumberland). There are at present five open shows held annually in the county (with a prospect of more next show season), giving the undermentioned number of classes:—Whitehaven, eight classes; Cleator Moor, six; Carlisle, six; Egremont, six; Cockermouth, 4, and one Nat. Colour. Total number of classes for five shows, 30 and one Nat. Colour. It will be seen that this compares favourably with the average number of classes given by the seven societies mentioned in Mr. Crawhall's letter as being the principal societies in the counties of Durham and Northumberland, whose number of classes totalled are 32. Separate classes are given for clears (in Cumberland), also in nearly all cases for hens, and I consider rightly so. Do we not produce as many hens as cocks? And that being so, why, may I ask, should they be confined to one class? I sincerely hope Yorkshire exhibitors will come forward and give us the benefit of their opinion as to why classification such as is given in this district is not better supported. And why societies giving from three to five classes, with a classification such as Clear or Tck. Yell., ditto Buff, Uneven. Mark. or Varieg. Yell. or Buff (Cinn. Mks. included), Clear, Tck., Uneven. Mark., or Varieg. Yell. or Buff Hen (Cinn. Mks. included), and in some cases Any Variety Hen, can get supported to the tune of from 15 to 27 entries in a class, or, may I put it, in a combination of classes? I think it rests with exhibitors themselves, and this, I believe, is one of the reasons why some shows are failures. For this reason I invite a general friendly discussion upon the matter, with a view to benefiting societies and exhibitors in general.—JOHN FERGUSON.

P.S.—I should like once again to respectfully ask the Hon Sec. of the Y.C.C. for the favour of a reply to my previous questions.

THE CAGE BIRD UNION.

SIR,—Will you allow me to draw the attention of fanciers and members of the Cage Bird Union to your paragraph in "Twitterings" in your issue of January 26th, stating that 36 members of the London Cage Bird Association have resigned their membership for the very good reason that they object to being forced to join the C.B.U.? That such a large percentage of members of one society should object to being affiliated does not say much for the much-boomed popularity of the Cage Bird Union, and I think that it supports my contention that a very large number of members are affiliated to it through fear of their societies being boycotted. While sympathising with the late members of the L.C.B.A., I would much rather have had them stick to their society and have done their best to persuado the L.C.B.A. to withdraw from the Union. A move made in this direction by any of the large societies is just what is needed by the smaller societies, who recognise the fact that they may be "marked" if they take the lead themselves. Let any of the large societies withdraw, and the Union will not last long.—W. REID.

A LONDON SPARROW AND ITS STORY.

SIR,—Perhaps it may interest some readers of CAGE BIRDS to hear this true story of a Sparrow. One cold and rainy day at the beginning of last year I found in my area a poor wee Sparrow, too ill to fly, and so cold and dirty. I picked up the little bedraggled thing, carried it up to a warm room and dried it before the fire, then put some moss in a Canary cage and some warm soft food within its reach. I covered up the cage carefully at night. In the morning my invalid guest was still very ill, and for three days he wheezed piteously, but allowed me to feed him. However, the Sparrow did not die, nor did I wish to lose him; and after a few days he was able to get on to a perch and to eat seed that I crushed for him. Then I carried the cage into a certain sunny corner of the house, known as the "birds' corner," and when he looked around and saw his beautiful Foreign companions, he took heart of grace and began to bathe and preen himself. It is so seldom London folk see a really smart and clean Sparrow, that I was very proud of my patient. I had promised him he should have his liberty on the first really warm day, so I used to carry his cage out on to the balcony to get him accustomed to live in the open once more. A lovely spring day came at last, and the Sparrow's cage was taken to the balcony as usual, and the door left open. I went indoors and watched. The bird hopped down and perched in the doorway of the cage. Presently, with a glad chirp, he was off, making for the trees in the garden of the square almost opposite the house. I thought I had lost my little friend for ever. I have also a Nonpareil Bunting, who lives on the balcony in the summer, and his cage was hung up just where the Sparrow's used to be. One day, when going out to feed "Bobby Blossom" (the Bunting), I found a nice clean Sparrow sitting on top of the cage, and several others on the floor, picking up the seed which was lying about. Now it was not surprising to see Sparrows feeding on the floor, but I had never seen one sitting calmly on top of the other bird's cage, especially as "Bobby" is rather aggressive, and resents liberties keenly. Many times now have I seen that Sparrow trying to feed from the pots of the Bunting's cage, and, although I cannot be certain about it, I like to think that it is my Sparrow, and that, although liberty is so sweet to him, he does not forget his old home and the human friends who tended him in his hour of suffering and of need.—K. LESLIE MILLER.

JUDGE AND EXHIBITOR.
A Protest.

SIR,—I understand that a report was in circulation at Bathgate Show on Saturday, Jan. 12th, to the effect that Mr. Peter Pettigrew (judge) carried my birds to and from Whitburn Show, where I was fortunate enough to win two firsts. What I want to do is to deny this report, and also any connection with Mr. Pettigrew, and advise the person who started this report, and those who believe it, to make enquiries from the Secretary of Whitburn Show, who both received and returned my birds by rail. I mentioned this matter to an old fancier. "Man, man," he said, "that's jist the sort o' thing you have ta pit up wie when you come into the Fancy, and if a' wis you a' wid jist say nothing aboot it. You'll find plenty ta say bad aboot you, but few ta say guid." This seems to be the motto of a great many fanciers. They let untrue reports pass, and don't trouble themselves to deny them. "Silence is consent," and if they all do as I intend to do—put in a stitch in time to save nine—I think it would be better for the Fancy.—A. WILSON.

HOW TO MAKE LIGHT BUNS.
By using Eiffel Tower Bun Flour the most inexperienced person can make *light* Buns and Cakes with certain success. Try a 1d. packet. Save Eiffel Tower Labels for 1000 picture free.

GRAVE CHARGES AGAINST EGREMONT SHOW.

SIR,—From Mr. Withington's last letter, re above, his praiseworthy intention "not to twist his opponent's letters in order to obtain justice," was evidently forgotten immediately he had made it. He is sorry for my committee, and hopes I will wear my statements on my sleeve lest I forget again. I may inform him that I have not forgotten anything in connection with this incident, nor have I contradicted a single one of the statements made by me in this discussion. The first "twist" in his recent contribution is in reference to the "exhausted condition" and the "fit." I plainly repeat, that his birds arrived in an exhausted condition, and that the bird which died never recovered. Surely that is plain enough for anyone; but as he failed to comprehend how my letter could be expected to do myself or my society any good, would it be putting his comprehension to too severe a test to state that the "fit" from which his bird died had been induced by the exposure to the cold, which exposure, I say, was responsible for his birds arriving at the Show in "an exhausted condition? That such has been my opinion since the Show, I may say, in passing, I informed the Egremont stationmaster there would in all probability be a claim from Mr. Withington against the railway company for neglect of his birds in transit, as evidently the bird in question had died from the effects of being left on Sellafield platform between the trains. This statement I made to the official on the Sunday night after the Show, when we were booking the birds back home. When Mr. Withington defies me to find the statement that his charge was one to which he did not attach any importance, we come to "twist" No. 2. I did not state what he attributes to me, and can safely leave my previous remark to the judgment of your readers. Perhaps he failed to comprehend the force of the remark? "Twist" No. 3 has reference to Mr. Douglas's letter. The only difference between that gentleman's letter and mine was that he included Mr. Moffat, Senior (my uncle), whose name I left out for obvious reasons. However, I will include him now, and also add the name of R. Jefferson, Esq., J.P., who was standing in the aisle when the bird had the fit. As for Judge Dixon's letter not bearing out the "exhausted condition" fact (not "theory," Mr. Editor), his statement could only be made so far as his knowledge of the case went, and therefore has no material bearing on the matter. I am glad Mr. Withington has at last disclosed the identity of the exhibitor who made the statement that his birds were without a drop of water on the second day of the Show—a statement which Mr. Withington was compelled to alter as being on the Sunday and not on the second day of the show. (Is my memory short or too long?) Now that he has at last been dragged from his obscurity into the light of day, I ask the said Mr. W. J. Park, of Millom, to furnish proof of the statement Mr. Withington makes him the author of, which I am authorised by my committee to state as being absolutely incorrect. I wish, also, to state that Mr. Parker Robinson, of Barrow-in-Furness, was the duly accredited C.B. Union representative, and that Mr. W. J. Park, of Millom, was not the C.B.U. representative, as stated by Mr. Withington. I wonder if that is another of his "twists"? I distinctly and plainly ask Mr. Withington to make his charges against our Society in a recognised manner, so that he won't be able to "twist" them further. I am wishful that the charges be judged upon their merits by the Cage Bird Union, and accept his offer of apology to myself if the C.B. Union decide against him, and the same holds good if their decision is otherwise, meaning I will apologise to him. The Egremont Show Committee and myself court the fullest inquiry into this matter, the charges, as we understand them, being of a nature calculated to do us harm if we do not show them to be without foundation, in fact and theory. We therefore invite Mr. Withington to send his charges against us to the Cage Bird Union, in writing, and also, at the same time, send me an exact copy of the said charges. If he does not do this, Mr. Editor, perhaps you will be kind enough to appraise his action at its true value, as something requires to be said to act as a deterrent on any exhibitor who makes charges against a society while in possession of no proof to substantiate his charges.—JAS. MOFFAT, Jun. (Hon.-Sec. Egremont Show.)

[This matter must now close.—ED. CAGE BIRDS.]

A PRIVATE APPEAL.

SIR,—Enclosed please find cheque, value 10s. 6d., towards the Verrall Fund. Sincerely hope I may have the pleasure of meeting the old gentleman at the Palace. I must add my sincere congratulations for the Birthday Number of CAGE BIRDS; it was simply superb.—E. BAKER (Cowes).

How I Keep and Treat my Linnets.

By J. G. SHEPPARD.

There have been so many useful hints given to fanciers in the pages of CAGE BIRDS on the subject of Linnet Keeping that it would be difficult to introduce any new points. Still, as a one time novice, I am going to try and help those who have had less experience than myself. I always like to rear my own Linnets from the nest, and I go about it in this fashion:—Towards the end of April or the beginning of May, I set out for a stroll over the mountains, walking on until I reach the fields of potatoes, mangels, oats, clover, etc., on the lower hillside. Here one can generally find a few cocks and hens feeding on top of the hedges, but it is away among the dense gorse bushes at a little distance that the Linnet finds its favourite nesting ground.

METHOD OF CAPTURE.

I sit down and take a few whiffs at my pipe before I begin my search, watching the birds pass and repass from feeding ground to nest which lies hidden in the gorse some three fields away. When I have finished my pipe I get a small stick, about a foot long, and make off to the gorse, which I begin to search thoroughly, giving each bush a light tap with my stick, and looking keenly in every direction. All of a sudden a cock bird will appear and begin to sing lustily near by. The closer you get to his nest the closer will he hover about you, alighting here and there on some bush and giving the warning cry to his mate, who will stick to her post, like a British artilleryman to his guns, until you are almost on top of her when off she will fly to her mate. But they will not go far. Before you have actually found the nest they are back on top of you again, darting and buzzing about you all the while. Perhaps all you will find in the nest are some white eggs with chocolate spots, distinct on the larger end, but fading out towards the smaller. The nest itself is made of dried hay and wool, lined with horse or cow hair. It is generally placed in the centre fork of the gorse bush, and most cunningly hidden. When I find a nest which contains eggs only I let them stop until the young are hatched, and when they are about eight days old I take them home and rear them by hand. I have, however, known the Linnet forsake her eggs when they have been handled.

FEEDING THE YOUNGSTERS.

I make up the food of the young birds as follows:—One egg (boiled for about half an hour), three parts of Osborne biscuit, one teaspoonful of pure white chalk (the latter to prevent scouring); mix altogether with water until moist, and feed with a pointed stick of soft wood. Be careful not to give the food too fast, or in too large pieces—they should be about the size of a large pin's head. You will find them very greedy birds, and the process of feeding is tiring; but if given a square meal each time it will not be necessary to feed oftener than every two hours, as their crops hold a tremendous quantity of food. After every meal give each one three drops of linseed tea on the end of a stick. To make this, put two ounces of linseed in half a pint of water; boil for half an hour; strain through a piece of white muslin, let it cool, and it is ready for use. Keep it well corked and make fresh every week. Keep them on this diet for four weeks, then begin to add crushed hemp, boiled German rape and crushed canary seed, using separate vessels for each. Do not forget a bath every day; they will take readily to it. I find it a good plan to turn them into a flight cage with young Canaries of their own age; by doing so you will get them on to seed much quicker. Until they are ten to twelve weeks old give them as much hemp seed as they will eat, with a little linseed added. Give also plenty of wild seeds as they come into season—hard-heads, teasel, plantain, groundsel, etc. I never give greenfood until they are three months old, when I provide dandelion, watercress and groundsel.

Now to select cock from hens. Some go by the red breast feathers; well, that is right as regards a wild-caught bird, but when he is hand reared, or house moulted, he loses this red breast, which is replaced by a dark pencilling. The way to pick these birds is to select those with the large, bold heads, with the web of the tail feathers nearly all white; the same with the outside of the flights. Choose nutty brown shoulders. The hens have a much smaller and snakey head, with hardly any whites at all on outside flights; she is a smaller bird altogether. Select one for the show bench in this way: Short thick bird; beak short and moderate size; good broad skull; eyes set in centre of head, large and bold; neck short and thick, well set into a pair of broad shoulders; back broad and nicely filled in with neat clear markings extending from head to rump; well finished off with depth of nut brown and rich gloss; nice deep chest full and well rounded, with a nice neat waist, of a rich nutty brown, full of nice dark pencilling racing round to vent, with not too much white on belly; good whites on outside flights and tail feathers. Wings to lie close to side with tips to meet on top of rump, not crossed, as this is a great fault in the bird. Legs short and well bent; thighs covered to the hock with short silky feather; the feet taking a firm hold of perch; a bold, defiant appearance; tail close and tight, making a well compact all-round bird with markings broken up as much as possible, shaded with a rich nutty brown. Those that are not in a way to rear their own Linnets and have to put up with fresh caught ones, I recommend to try and find a brother fancier who has a few to dispose of, when I don't think you will have much to fear; but as a rule when a fancier gets a couple of good Linnets he generally sticks to them.

TREATMENT OF FRESH-CAUGHT BIRDS.

If you fail in this way I prefer the catcher to buy from, as when you purchase a couple of Linnets straight from the field you know they have not been tampered with or knocked about; you have a better chance of taming your bird down, also moulting him out a winner if he has got the qualities in him before mentioned. The only difficulty I foresee you to have is getting him on seed. The way to set about this is to put them in a large flight cage, about 12 inches deep, and hang him in a position to see all that is going on, and every one that is passing. By having a deep cage the birds, when approached, instead of dashing into the wires of cage will edge off to the back out of the way, and thus become more accustomed to cage-life every day. Keep them supplied with plenty of water for bath, and feed on crushed hemp and Canary seed, boiled rape, German and English mixed. For the first ten days give only half crushed seeds and the other half solid, in separate vessels. After feeding on this for a fortnight begin to take notice which are the most forward on the hard seed, then separate these in a smaller cage (say, a two foot breeding cage) and put two young Linnets with one hen Canary; the Canary will help to steady them down, and draw them more to the seed and water-bottles. Supply them with as many hardheads as you can get.

MULING.

If it is your intention to mule with them pick out the largest and steadiest; run them with the hens all the winter up to March, then separate them with a wire partition up to the end of April, when draw the slide and let them together for about a week. Before you run them together you should have a cock Canary in the same room in full song, and if your hens are in condition (and the Linnets) they will crouch on the perch for the cock to tread them. As soon as the hen has made her nest and started to lay, you must take the egg out every morning, and replace it with a dummy one, or the Linnet will have eggs for breakfast. When she has laid her third egg shut the Linnet off from her altogether, take the dummy eggs out and replace her own. At the same time you must not forget to take the cock Canary out of the room altogether, then she will go to sit comfortably; otherwise to the cock Canary's singing she would very likely keep coming off the eggs and answering him. Put him where she cannot hear him. In fourteen days she will hatch the youngsters, and will feed and rear them herself if you supply the necessary food for her—hard boiled eggs and three parts of Osborne biscuits fresh twice daily (first thing in the morning and about three o'clock in the evening). When the young are about a month old introduce the Linnet as before, putting the young in a nursery cage and hanging them in front of the breeding cage where the hen can easily feed them through the wires, at the same time supplying the young with egg food, crushed canary and hemp, and a little boiled rape, gradually reducing the egg every day, and adding more crushed seed. After you have weaned them off the egg begin with solid seeds, docking the crushed seed day by day, and adding in separate vessels canary seed, boiled rape, and a little hemp. By the time they are six weeks old they should be on hard seed.

CRESTBRED CANARY.
Winner First Prizes at Nottingham and Walthamstow Shows.
The property of Mr. H. Horton (Blackheath).

LINNET RACE AT PECKHAM.

Impressions of a Novice in the Art.

This competition was sung off at the "Horseshoe," Hill Street, Peckham, on four Sundays, viz., Dec. 16th, competitors Messrs. Preston, Payne, Atkins, Mack; Dec. 23rd, Messrs. Peter, Gunnel, Baghurst ("Little Jack"); Dec. 30th, Messrs. Payne, Baghurst, Gunnel, Atkins. The winners of the three previous heats had to sing off on Sunday, Jan. 6th, the winner being "Jim" Gunnel. The runner-up was Atkins. The trophy consisted of a silver-plated tea and coffee service, under a glass shade, with a copper kettle, valued 10s., for the runner-up. This proved a very exciting night. The room was packed, there being hardly room to stand about.

I was invited to go and see what turned out to be a very interesting event to me, it being the first time I have had the pleasure of seeing such a thing. I think anyone interested in cage birds ought to endeavour to see a good singing handicap; it seems hardly credible that birds can be trained to sing so well in a stated time, namely, 15 minutes. I must say on entering the house I felt a little out of my latitude at first, but in a few minutes one soon got used to the situation. One hears nothing else talked of but the singing properties of So-and-so's bird.

All at once someone calls out that the other bird is here to sing off the semi-final, when everybody makes a rush to the room where the singing is to take place. There is a call "all pipes out," the door is closed, and kept strictly guarded by a doorkeeper, and silence reigns supreme. It hardly seems possible that so many burly men can keep so quiet. Two men who are to sing their birds, having tossed for the choice of the nail on which to hang their cages, the contest is ready to begin. Each one has a way of starting his bird, and when the timekeeper calls "time" up on the nails the cages go.

Some of the birds appear to know what is expected of them, and start singing at once, but some appear to find it necessary to adjust their toilet first. The men who are taking chalks for each bird sit at the table, watching and listening, and I really must admit that the song of some of the birds was a treat to hear. All at once there is another call of time, and that heat is over, and everybody makes a rush for the open door, for the room by this time is very warm. After a short spell the second round is sung, and the result is known. Then congratulations by some to the winner, and a general conversation regarding the different styles in which the birds have sung. It seemed curious that the winning Linnet should turn up in a bird with a white head, known by the name of "White Nob." All is now over, and an adjournment is made to the bars. Most of those present that have birds with them unwrap their songsters, hang their cages up round the wall on nails provided, and you can hear the voices of birds rise exultantly above the babble of conversation. Presently the landlord brings out his team of about forty birds, and puts them up in the bar. No one can guess what it is like, what with the birds and the talk. I thought I should sleep that night with birds singing in my ears.

If anyone interested should give a call on the landlord, Mr. Barnes, I am sure he would be pleased to show his birds. He told me he had about a score of Goldfinches and other British birds, some champion exhibition ones amongst them. I was shown two or three really fine Linnets which I should like to have in show cages. These Linnet singers' birds seem to be their first thoughts, judging by the way they get their cages up, with elaborate water tins and side pans, etc. A man showed me a Linnet which he says is 10 years old (it hardly seems possible one could keep them so long in good health in back cages), it hardly looked three or four years of age. I was told by one fancier that his birds had just done a clean moult, and finished up in three or four weeks. Of course they are kept covered up all the time. I asked how long they kept them covered up when training them for singing matches and for night singing, and was told that they are uncovered about 9 a.m. till 2 o'clock, and again from 7.30 till 10.30.

They all appear to feed mainly on English rape, flax, and canary seed (called black, white, and brown), and side pans are a speciality. They should be given also thistle, dandelion, and niger now and again. Of course nearly everyone has a special way of preparing their birds for singing. They are allowed to sing any one class bird. You hear fanciers saying to each other, "I will lend you so and so bird to sing at different contests," so borrowed birds are allowed, which is quite unlike the rules of exhibiting.—F. TURNER.

The Best Shilling Handbook on Canaries Published.
THE
BRITISH CANARY.
By that well-known Judge, Expert and Journalist,
C. A. HOUSE.
This thoroughly practical book treats of the Varieties, Characteristics, Breeding and Management of the Canary, and has reached its fourth edition. We have had it illustrated by "Cage Birds'" artist-in-chief, Mr. H. Norman, and it is now absolutely the best Shilling book on the subject procurable. Post free, 1/2, stoutly bound in cloth, 2/-, post free.
"CAGE BIRDS," 154, Fleet Street, London.

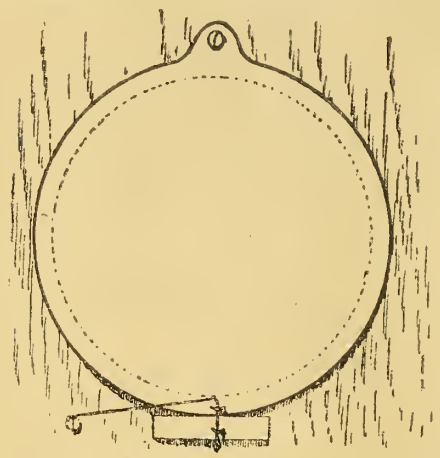
ILLUSTRATED IDEAS

Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 71
A SAFE CAGE DOOR.

Sent by W. Poate, Warblington, Havant, Hants.

I enclose a sketch of a door for cages, the chief point of which is that you can run birds from one cage to another without fear of them getting away. The door, which is made of



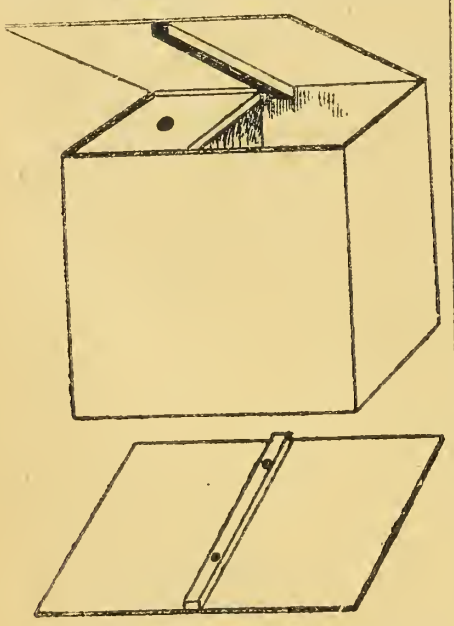
A Safe Cage Door.

tin (or other thin stuff) swings up flush with the side of the cage. Thus you can put two cages very close to one another. The hook passes through a small hole in the edge that is turned up.—W. POATE.

No. 72.
FITTING UP A TRAVELLING HAMPER.

Sent by A. W. Statham, Charlton Park, Cheltenham.

I noticed one of your readers complaining of a Hawfinch pecking off the foot of his Bramblefinch during the return journey from a show. The hamper fitting I illustrate here would prevent such an occurrence; at least,



Fitting a Travelling Hamper.

I have found it do so, and think other readers may also find it useful. The upper figure illustrates a show case to take two cages, with strips of wood one-inch wide screwed on the lid, and on the bottom of the case, the latter preventing the birds from touching one another during transit. The strips hold the cages firmly in position, and at a little distance apart. The lower figure shows how easily the strips are screwed on the bottom of the case, and on the lid.—A. W. STATHAM.

A Note on the Woodcock.

To flush a solitary Woodcock is occasionally done, by anyone wandering through a spinney where these birds are known to spend the day. It may sometimes happen that two are flushed together, but not often. And yet as soon as the sun sets and the light gets bad, several of them, by some mysterious signalling, manage to band together and fly off to the feeding grounds. Unlike most birds the Woodcock feeds at night, resting securely under some bush in a wood during the daytime. That the bird is able to see by daylight is proved by the skilful and rapid manner in which it threads its way between the tree trunks and saplings in the plantation while the sun shines brightly.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

Uncle Peter thinks that his nephews and nieces will not have forgotten the needs of the poor wild birds in this spell of bitter weather. He himself has been greatly distressed at finding several Redwings and other birds, among them a hardy Starling, starved to death with cold and hunger. Even the Gulls have been so famished as to fly to the windows of Uncle Peter's lodgings and take bread and other scraps placed for them on the flower-boxes outside.

Some men are so cruel that they catch the graceful Gulls with fish-hooks baited with sprats, and several young Gulls were hanging in the poulterers' shops here at Sandgate this morning. One, which Uncle Peter examined carefully, had his head and neck still mottled with brown; his back a beautiful pale-bluish grey, some black on his wings, and all his under parts pure white. His legs and feet were a pretty pink, and his bill bright yellow, with a patch of vivid red on the lower mandible.

It seemed a wicked thing to kill so beautiful a creature, for Gulls are not good to eat, and they do very little, if any, harm to anybody.

* The Wren and the Cat.

The Wren is a very lively bird, and is very common on the island. It braves our severest winter, and enlivens us by its sprightly and rattling note, and continues its song until late in the evening. During the breeding season a pair of Wrens built their nest under the top edge of a deep sand hole, within a few yards of where we lived. A very cosy nest, built of moss, dried grass and leaves. It contained about fourteen eggs, which were white, thinly dotted with small reddish spots, mostly at the thick end. We were eagerly watching to see the little ones, when we noticed the mother bird, going to and from the nest with something in her mouth. But a naughty cat was watching her too, and attacked the poor Wren and made a meal o' the young.—Sent by ISALIN GILL (age 13), 20, Drumgold Street, Douglas, Isle of Man.

* Cold Winter.

On the 10th ult. we had the first really cold winter day, there being a very sharp frost, and Starlings, Thrushes and Robins, which previously had been singing merrily, were suddenly silenced. The countryside seemed bare and cheerless with leafless trees and the absence of bird music. The following verses by Nicholas Breton I thought were very appropriate:—

The bushes and the trees,
That were so fresh and green,
Do all their dainty colour leese
And not a leaf is seen.

The Blackbird and the Thrush
That made the woods to ring
With all the rest are now at hush
And not a note they sing.

—LUCIE BEATRICE FEW (age 12), Claraville, Buckley Street, Wigan.

The Greenfinches.

Last December I caught a pair of Greenfinches. I put them in a cage together, with some food and water. But they were fighting so much that I had to separate them. I put the cock in another cage, but he was so wild there again that I had to let him loose. He was a very pretty bird with yellow bars on his wings. The hen was very happy in the cage for about a day. One afternoon I went to the country for a walk, and when I came back I saw the hen lying motionless on the bottom of the cage, and I don't know what has happened to her.—Sent by TOM LEWIS (age 11), Bwlchyffin, Cwmanne, near Lampeter, Cardiganshire.

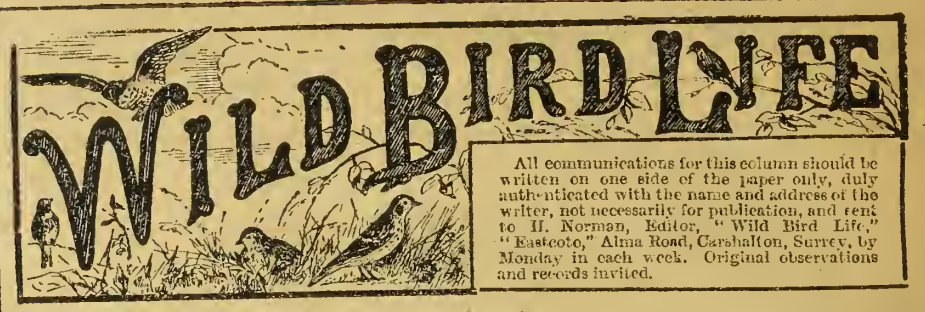
* My Jackdaw.

A Jackdaw makes a very nice pet. I had one given me which soon became tame, and I taught it several tricks. When I first had him he was very thin and was not very well. But he soon got well, and he used to try and follow me when I went down the street by trying to get over the gate. When he wanted his food he used to sit in his cage till he got it. One day I found him gone, and I haven't seen him since.—WILLIAM MILLARD (aged 12), 8, Church Street, Bishops Stortford.

The Mynah Mimic.

My mother brought home with her last year five Mynahs, four hill Mynahs, and one common Mynah. They come from India, and are very clever and intelligent birds. Our's mostly speak Hindustani, but they are beginning to pick up English. They have learnt the name of our cat, and continually call it out, whereupon our puss rushes in thinking it is dinner time, but, much to its disgust, finds no one about. Our common Mynah is very modest, and is always saying "O what a dirty bird I am." But if you speak to it, it says "Shut up" in a bass voice. They have learnt to cough just like a person, and if at dinner anyone makes a joke and we laugh, they mimic us so loudly that we cannot hear ourselves speak.—Sent by HARRY RYVES (age 13), "Whitewyches," Sylvan Way, Bognor.

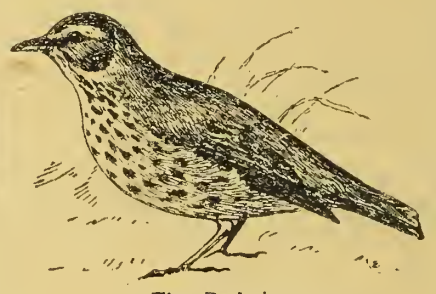
Kingfishers have re-appeared at the Roman Baths (Bath), and, it is said, become quite bold. Even in the presence of visitors they have been observed diving for the fish.



All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

Wintry Weather.

We have had another spell of real winter weather, and I fear our wild birds have fared badly. Although there has not been quite so much snow, the frost has been severe, and the wind exceedingly keen. After the heavy snow we had at Christmas time, I noticed that all the wild berries had been eaten by the birds. In this district privet hedges are plentiful, both round gardens and along the country roads, and on the borders of woods. There was a fine crop of the purple fruit, and one naturally thought they would last well through the winter; but in those first few days of snow and frost they all vanished, and we hunted everywhere to try and get a handful for our captive birds. Thrushes are fairly plentiful in the district, but it is doubtful if they could clear the hedges so effectually in a few days without help. Possibly we had a few wandering parties of Fieldfares or Thrushes from farther north.



The Redwing.

During this last spell of bad weather, the birds that came into the village looked very much worse than formerly; they were thick and lumpy looking. When they flew from fence to fence across the gardens, their feathers were so puffed out that their wings appeared too small for the body, and they hardly had strength to get along the hedge-rows, flying short distances, just a few inches above the ground, and then scrambling into the bottom of the hedge, instead of taking wing and getting right away as they generally do. A heap of steaming manure in a field or garden was a favourite hunting ground. Here would be gathered nearly all the Finches, Thrushes, Blackbirds, Hedge Sparrows, and Robins; and at one was noticed a Grey Wagtail, while a little cock-tailed Wren helped to swell the party.

At Christmas the Starlings were very much in evidence, coming into the village gardens. But now they seem to have suddenly disappeared. So have the majority of the Sparrows, and we should not be sorry if some of them forgot to return; we can well spare a few dozens. How Rooks manage to find anything to eat in a field partly covered with snow is a mystery, and yet they do so, for one can see them there all day long. If the ground is carefully examined, it will be seen that they have dug deep holes into the hard, frost-bound earth with their powerful beaks. How do they know where to dig, and do they succeed in finding anything every time they try?

One day a couple of Rooks were seen chasing a Starling for some time, trying their best to make him drop a tasty morsel he had found. He was shouting with fright, and although they several times nearly caught him, he managed to get away without losing his treasure.

We have lately had a few Redwings in the district. A flock of them were probing about in the snow, and could evidently manage to find something. Although the handsome Redwing is a bird of more northern climes, he is hardly so hardy as one would expect, and is even more likely to succumb during a spell of bad weather than our own resident Thrushes.

Notes and Queries.

Habit of the Raven.

It has been recorded that if one of a pair of Ravens be destroyed, the other will eat the eggs (if any are laid) before trying to get a fresh mate.

Absence of the Waxwing.

Has any of our readers seen the beautiful Waxwing this winter? We generally get a fair number over here each season, but up to the present time I have seen no mention of any in the papers devoted to wild life.

Herons Swimming.

It is not generally known that Herons are able to swim if necessary, but do not often do so. One was shot at and wounded in the wing, and fell at the edge of a ditch. He quickly swam to the opposite side when pursued.

Early Nesting.

We have noted the mating of the Robins, but a reader (E. Langford) kindly sends us some cuttings from a contemporary recording the nesting of these birds, both in Truro (Cornwall) and at Edmonton; also a photo of the latter nest.

Bramblefinches in Herts.

A number of Bramblefinches have made their appearance in this district, which is, I believe a rare occurrence. I have enquired of some of the oldest inhabitants, bred and born here, but no one seems to have seen these birds here before. Probably they have been driven further south than they usually come, owing to the severe weather.—W. C. FREEMAN, Hatfield, Herts.

Notes on the Goldfinch.

Although this sprightly bird is now somewhat more numerous than a few years ago, there was evidently a time when it must have been exceedingly common. In 1860 Mr. Hussey reported in the avicultural press that the average annual capture near Worthing exceeded 11,000 dozen, nearly all being cock birds. At that time they must have been very plentiful all along the Downs, for it was stated that 40 dozen had been captured near Brighton in one morning. The desire to possess these beautiful creatures as cage pets has no doubt helped to reduce them, but we must not forget that land has increased considerably in value, so that many fields now under cultivation were at that time waste places, and would naturally afford plenty of good food for the Thistle-Finch and others. So one is inclined to think they are still plentiful in some parts of Europe, where land is still running to waste.

What was the Bird?

Could you tell me what the bird was, about the size of a Thrush perching, black head, white band round throat, speckled like Thrush, only seen once here? General colouring brown, but only seen from distance.—"OBSERVER."

[It is probable that the bird you saw was a Ring Ouzel. He is very much like a Blackbird, with a white crescent or band round the lower part of the throat. Some birds are more dense in colour than others, and it is possible that the one you saw appeared to be spotted on the breast. Many have a distinct mottling, which under certain conditions shows very plainly.—H. N.]

Early Songsters.

To sing is apparently the first action of a bird when waking. Many sing before daylight, and, therefore, cannot have taken their morning feed. Judging by the behaviour of captive birds, we should expect wild ones to start feeding as soon as they awake. From an old diary I take the following interesting notes respecting the early songsters:—From February until April the Lark was the first bird to be heard upon six occasions out of eighteen, and these were the last six, showing that in the early months of the year he is hardly so fond of early rising as some people imagine. The Robin was first upon three separate occasions, and the Blackbird twice. Locality would evidently have some influence upon different birds. Here, for instance, the Song Thrush is the first bird to "hail the opening morn" at least four days in the week, and yet in the old record I am quoting from he does not manage to do so upon any single occasion. During the spring and early summer he is generally the last to say "good-night"; but during January and February the familiar Robin pipes a cheery note after his evening bath, when other songsters have retired to rest.

Advertisements conti nued from page 80.

FOREIGN BIRDS—continued.

PARROTS. PARROTS.

Bird dealers and hawkers wishing to be supplied regularly during the coming season should send in their orders. Monkeys, Mormazetts, Mongoose, Wild Cats, Racoon, Walaby, Oppossums, two tame Foxes, Parrot cages of every description made and supplied to the trade.—Note address, Wright's Trading Menagerie, 43 and 82, Park Road, Liverpool.

COKERNUT NESTS.

Buy of the Maker. Buy now before rush sets in. My nests cannot come undone. 3/-, 4/-, 5/- doz. Sample set, 3 sizes, 1/-, carriage paid 1/6. Cockatiel Box Nests. "The Ideal," 1/- each. Cokernut Fibre Dust for Cage Bottoms, 1/6 bushel; 3 bushel sack, 4/-. Free sample 4 penny stamps.

WANTED.

WANTED, Toy Pom bitch, black of chocolate, pedigree.—Oliffe, Church Green, Witney.

WANTED, Canaries, British birds, also cages, cheap.—Aviaries, 17, Seaside, Eastbourne. Stamp.

WANTED, for cash, hen Canaries, all types, prompt payment.—Lilwall, Aviaries, Birkenhead

WEAVERS, Zebrafinch, pair each; what offers exchange?—39, Penny Street, Lancaster.

WANTED, all kinds British birds, state price.—Lafberg, 442, High Street, Manor Park.

AVIARY birds; exchange 10s. 6d. fountain pen, gold nib.—Ross, Snowdon Road, Middlesbrough.

WANTED, Canaries or Poultry, in exchange for Fox Terrier dog puppy, four months; or sell 10s.—Davis, 20, Station Street, Lymington. x264

MANUFACTURERS of nest pans, foods, appliances, etc., to quote; cuttlefish wanted.—Dredge, Oakroyd Terrace, Bradford. x265

WANTED, a pair of Cockatiels in exchange for two pairs Pigmy Ponters or sell 10s. 6d.—L. Hewitt, Silver Street, Aylesbury, Bucks.

WANTED large yellow Cinnamon hen, exchange lady's new silver watch, perfect order.—Broomfield, 273, Herbert Road, Small Heath, Birmingham.

WANTED, typical Yorkshire or Norwich hen, 1906, for 50 CAGE BIRDS, few plates.—Jones, Juniper Street, Hulme, Manchester.

WANTED, Canarics, will give 3 stone dry poultry feathers, or sell 20s.—Apply, Mrs. Wells, Hazel House, Toftwood, Dereham.

WANTED, Canaries; exchange pair best men's box calf stitch boots, size 8, or sell 12s. 6d.—Mitchell, Long Yard, Desborough.

WANTED, Norwich Plainheads; exchange one or two dozen new records; approval both ways.—Watts, 22, Mitre Street, Buckingham.

INCUBATOR.—Will exchange good 40-egg incubator, in first-rate order, for typical Norwich Canaries, or sell 30s.—Blower, 15, Vickers Road, Erith, Kent.

WANTED, Waxbills, in exchange for pair good Yorkshires, ditto Plainheads, one good Crested green hen.—Vernon, Toddington Park, Beds. x267

WANTED, Canaries; exchange prize Bantam, lady's bike, air gun, camera, and duplicating apparatus.—Bliss, Breeders, Warwick Road, Birmingham.

WANTED, Canaries; exchange pair prize-bred Ponters, guitar, riding boots, Bullfinches, and Goldfinches, or watch.—H. Piggott, Wantage.

WANTED, long yellow Yorkshire hen or good Mountain Roller, for young Lancashire buff cock.—Hughes, Tailor, Tweedale Street, Rochdale. x265

WANTED, two flight cages, 4ft. by 1½ft. and 2ft high, exchange four good young Norwich hens, sell 20s.—Snowball, 13, Croft Avenue, Sunderland.

WANTED, Linnets, Goldfinches, Siskins, Bullfinches, all kinds, for cash.—Skinner's Aviaries, Bedminster.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from both parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

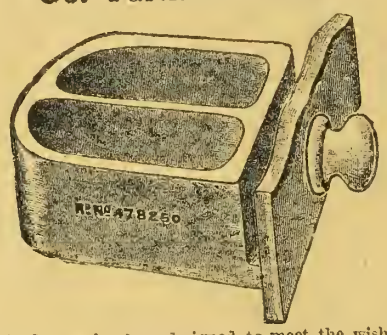
PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex"

Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

JOHN A. REECE, CAGE MAKER.
Astounding values in Breeding Cages, all up-to-date fronts, 4 cross case top nest pan doors, wood and wire divisions, sand trays, hopper, and all china fittings, black outside, blue inside; 18 in., 3s.; 20 in., 3s. 6d.; 24 in., 4s. 6d.; 30 in., double, 5s. 6d.; 36 in., double, 6s. 6d.; 48 in., 3 compartments, 9s. each. My improved sanitary nest box and bracket, so highly spoken of in CAGE BIRDS, 3s. dozen; blocked swansdown lined nests, 1s. 4d., free; best quality cage fronts, 12 x 12, 3s. dozen; others equally cheap. For cages of every description, illustrated list, 1d. stamp.—Note.—As there are no cage manufacturer classes at the forthcoming Palace Show, I shall not be exhibiting. Customers can depend on receiving all goods thoroughly up-to-date. Awarded 28 medals and other honours. Est. 31 years.—Jockey Wire Works, Colston Yard, Bristol.

"HOLLYTREE" BIRDLIME.
Home-made, absolutely strongest and best, stands all weathers, post free at 8d., 1s. 3d., and 2s. per tin.—Cochrane, Bird Dealers, Edinburgh. x267

BOARDS FOR CAGE MAKING.
All sizes cut and planed ready for nailing together. Also cage fronts made to fit same. Nothing but sound boards sent out. Stamp for reply.—Joshua Naylor, Cage Maker, Police Street, Brighouse.

IMPROVED WIRE FRONTS.
Sizes stocked:—12 by 10 or 12, 3d. each; 14 by 12, 3½d.; 16 by 12, 4d.; 18 by 12, 4½d.; 20 by 12, 5d.; 24 by 14, 6d.; other sizes to order, same rate of price; large Fronts, about 3d. per square foot, according to strength; Yorkshire Show, 15s. dozen; Baths, Seed Boxes, etc. Please note.—These fronts are made by experienced workmen, sliding door and seed holes in ready for use.—E. Bunner and Sons, Cage Makers, Copperas Hill, Liverpool.

COOPER'S COLORINE.
cannot be equalled as a sanitary, washable water colour for aviaries, cages, etc.; no red-mite can live where it is used, perfect disinfectant and harmless, equal to the best oil paint at less than a quarter the price; egg-shell blue, green, salmon, and white; numerous testimonials from leading fanciers; sample tin, sufficient for twenty cages, 1s. 3d., 2lbs. 2s., 4lbs. 3s., carriage paid.—H. Cooper, Decorator, Luton.

3s. DOZEN.
The original Challenge Canary nest pan, which has been on the market for the past 16 years, and has also been a pattern for others to work from. Have sold more pans than any other man living, and the only pan to-day that is sent out properly lined, made of white ware, swansdown lined, with wire bracket and screw hooks, all complete and carriage paid, 3s. dozen, large or small size; trade supplied.—Tom Thomas, Bird Dealer, Neath.

WRIGGLESWORTH & SONS

All kinds of Cages, Yorkshire Show Cages, Norwich Show Cages, Cinnamon Club Cages, Belgian Club Cages, Border and Scotch Fancy Show Cages; also Breeding and Stock Cages. Illustrated Catalogue, 1d. stamp.—Works: Victoria Road, Eccleshill, Bradford. uc

Are your Birds ready? Have you got the correct Nesting Material?

DODGE'S FICTITIOUS COW HAIR

is the only material with which birds will build a natural nest. They build as soon as you give it to them, and being a non-conductor the eggs are kept warm when the hen is off.

Try it and you will see a nest.

2/6 per lb., sufficient for about 90 nests. ½ lb. sample, 1/-

MORTEN DODGE, M.P.S.,
Manufacturing Chemist,
Strangeways, MANCHESTER.

Please note I can guarantee to give you prompt delivery and every satisfaction, as all my work is done on the premises by practical men. Trade supplied. Special Wholesale List will be sent to genuine Dealers on receipt of Trade Card. Note the address. Established 1896.

WALSH, Regent Wireworks,
Regent Street and Larkhall,
BLACKBURN.

F. W. HEATON, Ash Cottage, NANTWICH, CHESHIRE. Champion Norwich.

Winner of over 3,000 firsts, specials, and other prizes at the principal shows in the country. Diplomas for best Norwich in show, Crystal Palace, and other leading shows. Have supplied many of our leading exhibitors for years with both stock and show birds. Grand Stock and Show Birds. Single Birds from 15/- each; pairs from 25/-. Approval with pleasure. Inspection invited. State wants—you can rely on true **PURE-BRED NORWICH. TYPE—QUALITY—COLOUR—CONDITION.**

SHORT, thick-set, clear yellow cock, real good stock bird, 10s.; also variegated, 12s.; another clear, 8s.; two yellow hens, 7s. 6d., all typical, sound, and healthy; approval three days, deposit.—A. Bounds, 41, Artizan Road, Northampton.

CHAMPION Norwich, same strain my winners, pairs, 10s. to 15s.; hens, 4s. to 7s. 6d.; cocks, 6s. to 10s.; Cinnamons, Godley's strain, pairs, 10s. to 15s.; cocks, 6s. to 10s.; inspection invited.—W. Growdridge, Clarendon Road, Hinckley.

ARTHUR WAKE can spare few good stock pairs, also some that can win, same as winners, Middlesbrough, Stockton, York, Guisbrough, Darlington; prices reasonable; approval; inspection invited.—41, Aske Road, Middlesbrough.

FOUR cocks, yellow and buff, 6s. 6d. each; one even, one uneven marked, 6s. 6d., 8s. 6d.; four hens, variegated and buff, 3s. each; or 48s. lot to clear; from cold-room.—G. Paterson, Ardmeallie, Rothiemay, Scotland.

TWO Hundred typical Norwich, Yorkshire, Crests, and Crestbred cocks and hens, cocks from 5s., hens from 2s. 6d.; inspection invited, any time.—Marsh, Freemason's Aviaries, 45, Pereira Street, Bethnal Green, near Junction. x266

HIGH-CLASS Norwich cocks, 4s. 6d., 5s. 2d., 6s., 8s., hens 2s., 2s. 6d., 3s.; prize bred cocks, 10s., 12s., 15s.; hens, 4s., 5s.; guaranteed healthy; not suited, money returned.—Alfred Riley, grocer, Lower Church Gate, Leicester.

CLEARING out; room wanted; 50 hens and 40 cocks, Yorkshires, Norwich, Crestbreds; hens from 2s. 6d.; cocks from 5s.; cold room; 50 cages, two large flight cages, cheap.—Hill, 18, Coach Terrace, Longsight, Manchester.

NORWICH.—Five buff cocks, one buff variegated cock, some winners and bred from winners at all the leading shows this season; cheap; approval; stamp.—William Hampton, 25, Damacre Road, Brechin.

MR. ECKERSLEY has still some grandly bred birds to spare. Unflighted buff cock, grand type and quality, 30s.; 1905 buff hen, a Norwich all over, 30s.; two 1906 yellow hens, on small side, 7s. 6d. each.—51, Francis Road, Edgbaston, Birmingham.

SURPLUS stock from the breeders, satisfaction guaranteed, pairs matched for breeding from 10s. 6d., cocks from 6s. 6d., hens from 3s. 6d., also specials.—Secretary, Rye Bridge Association, 32, Colegate Street, Norwich.

PRIZE-BRED Norwich Plainheads, same strain as my winners at Norwich, all in open competition; grand cocks, 5s. 6d., 7s. 6d. upwards; matched pairs, 8s. 6d., 10s. 6d., to 40s.; hens, 3s. 6d., 5s. 6d.; approval.—Geo. Wright, 51, Silver Street, Norwich.

POWICK'S Champion Norwich, the same strain as the winners at all leading shows, cocks 7s. 6d., 10s. 6d.; hens 5s. 6d., 7s. 6d. each; pairs, mated to breed winners, 10s. 6d., 15s. 6d., and 20s. per pair; no rubbish; ten days' approval.—Wm. Powick, Eastfield House, Dewsbury, Yorks.

HEALTHY Norwich plainheads, matched pairs, 7s. 6d., 8s. 6d., 10s., 15s., upwards; cocks, 5s. 6d., 7s. 6d., 10s. upwards; hens, 3s. 6d., 5s., 7s. 6d., upwards; special terms to dealers; inquiries invited; cold-room bred; approval.—S. Roberts, 39, Gloucester Street, Unthank Road, Norwich.

PURE-BRED Norwich cocks, in full song, 4s., 5s., 6s.; hens, same strain, 2s. 6d., 3s. 6d.; pairs, properly matched, 6s. 6d., 7s. 6d.; guaranteed large, healthy birds, cold-room bred (1906). If not satisfied money returned.—Fred Heathcote, 55, Havelock Street, Leicester.

EXCEPTIONAL offer of high-class Norwich Plainheads, large typical birds, from winning strain, at moderate prices, mostly unflighted, few handsome 1905 stock birds, pairs from 12s. 6d., cocks from 7s. 6d.; approval, cash or deposit.—Miss Gwyn, Somerville, Ramsgate. x266

GOOD Norwich cocks, in full song, 5s. 6d., 6s. 6d., 7s. 6d., 10s., 12s. 6d., 15s. 6d., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d., 10s. each; pairs, matched for breeding, 8s., 9s., 10s. 6d., 12s., 15s., 20s. pair; stamp, reply.—Stewart Brothers, Surrey Street, Norwich. x266

W. MILES, Aviaries, Chichester, has ten large buff cocks, bred from his winners, 7s. 6d. each; yellow cock, winner, and buff hen, 20s.; ticked yellow cock and buff hen, 18s.; buff cock and yellow hen, 15s.; and about 50 others for disposal; approval.

SPECIAL offer this week.—Only 20 pairs large typical Plainheads, of correct stamp and quality, 7s. 6d., 8s. 6d., 10s., 12s. 6d., 15s. pair; single cocks, yellows, buffs, variegated, greens, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d.; hens, all colours, 3s. 6d., 4s. 6d., 5s. 6d.; satisfaction guaranteed; inquiries invited; approval with pleasure.—J. Allen, breeder and exhibitor, 19, Albert Street, Wednesbury.

THE largest stock of high-class Norwich Canaries in the Midlands; cocks, in full song, 4s. 6d., 5s. 6d.; orange yellows, 7s. 6d. and 10s. each; good healthy, for this year's breeding, 2s., 2s. 6d.; orange yellows, 4s. and 5s. each; pairs properly mated for this year's breeding, unrelated, 6s. 6d., 7s. 6d., 10s. 6d., and 15s. pair; most of these birds have been bred in outdoor aviaries. This is no flattering advertisement, but genuine, with 20 years' references. With my business extending so much I have had to take larger and more convenient premises. Please note change of address.—William Judd, Midland Countics' Aviaries, 120, Belgrave Gate, Leicester.

THE CREATEST SUCCESS ON RECORD.

With fourteen exhibits at the late Norwich All-England Show I was awarded 13 cash prizes and 10 specials. Having selected my breeding stock of Norwich Plainheads and Crested, can spare some of the same strain at reasonable prices.—Mrs. Gaze, Aldeby Grange, Beccles.

WALTON AND NOAKES

offer six pairs, 15s. to 30s.; eight cocks, yellow and buff, 1905, 1906, 10s. to 25s.—14, Abney Street, Highfields, Leicester.

THE ANCHOR'S WEIGHED.

Before starting on 1907 season, send for reliable breeding stock here offered. Large chubby Norwich yellow cocks, 7s.; buffs, 6s. Cinnamon yellow cocks, 8s.; buff hens, 4s.; pairs, 11s. 6d. Retailers supplied.—Broadbent, 129, Langsett Road, Sheffield.

E. F. Gowing's Crystal Palace Prize Strain.

Well-matched pairs, 25s., 35s., 45s.; some grand hens, 7s. 6d., 10s., 15s.; all related to my winners of firsts, specials, and other awards at Palace Show, in open classes. Not showing this season. No reserve; approval with pleasure.—28, Castle Road, Colchester.

CHAMPION NORWICH.
